"Reviewers have called Dr. Brault's analytical edition 'magisterial,' 'indispensable,' and 'the most thorough and comprehensive study of this greatest work of medieval French literature,'" his citation notes.

The edition was named an Outstanding

Academic Book of 1979 by *Choice*, publication of the Association of College and Research Libraries.

Dr. Brault joined the Penn State faculty in 1965 and served as head of the Department of French from 1965-70. He is a Fellow of the Institute for the Arts and Humanistic Studies and recently was named Officer in the National Order of Merit by the French Government.

Dr. Waldhausen is being recognized for his creation of a new therapy, both medical and surgical, for the treatment of congenital coarctation (or narrowing) of the aorta in infants. It is the fifth most common congenital heart defect.

According to Dr. Waldhausen's citation, (Continued on page 6)

Senators to discuss PS-23 issues

Legislative recommendations from the Committees on Undergraduate Instruction and Committees and Rules, as well as a historic session on proposed changes to PS-23, will confront senators as they assemble March 3 at 2:10 p.m. in Room 112 Kern Building.

Faculty members who are not senators may participate in the Forensic Session by notifying the Senate Office four days in advance of the March 3 meeting. The recommendations and the issues they address are printed on page 5.

BDR III "breadth areas" (Arts, Humanities, Natural Sciences, Social and Behavioral Sciences).

Because they affect the Senate's *Constitution and Bylaws*, three Committees and Rules' legislative reports were held over from the February meeting.

The first report recommends a semantic change — the substituting of the word "authority" where the word "responsibility" appears in the *Constitution and Bylaws*. According to Chairman Sally Small of Committees and Rules, members felt that "authority" is delegated to a receiving unit, which then has "responsibility."

The second proposal recommends the elimination of the Senate Committee on Intra-University Relations, while the third (Continued on page 5)

Nominations requested for awards

Nominations have been requested for three major annual awards at the University: The McKay Donkin Award, The John E. Wilkinson Award for Administrative Excellence and the Barash Award for Human Service.

President Oswald has appointed a general committee to coordinate nominations, chaired by Steve A. Garban, vice president and controller of the University. The committee will review all nominations, which should be sent to Room 408 Old Main by March 27.

"Nominations are encouraged from organizations and individuals in both the University and the community," Mr. Garban says. "Information accompanying nominations should be as brief as possible and should stress qualities relevant to the award."

Three subcommittees will screen nominations and develop recommendations for the respective awards. Members of the Wilkinson Award Subcommittee are: Rosemary Schraer, assistant provost, chairperson; Dean James B. Bartoo, Graduate School; Doris M. Seward, executive assistant to the President; and Ralph E. Zilly, vice president for business.

Members of the Donkin Award Subcommittee are: Ray T. Fortunato, assistant vice president for personnel administration, chairperson; Dean Stuart Forth, University Libraries; and Caralynne Schengrund, associate professor of biological chemistry, Hershey.

For the Barash Award, the subcommittee members are: Henry L. (Continued on page 6)

The first item on the docket is an informational report from Curricular Affairs outlining procedures for adding courses to and deleting courses from the

Penn Staters

Dr. Richard L. Gordon, professor of mineral economics, has received the 1981 Mineral Economics Award of the American Institute of Mining, Metallurgical, and Petroleum Engineers. He was cited for "his thoughtful and rigorous economic analyses presented in books, papers and teaching which have provided an outstanding guide toward a more rational allocation of society's scarce resources, to meet the world's fuel needs, especially coal, and for his leadership as chairman in 1973, which strengthened the Council of Economics of AIME."

John Balaban, associate professor of English, presented a reading from his poems on Feb. 9 at the New York Shakespeare Festival Public Theatre, which is directed by Joseph Papp. As a participant in the "Poets at the Public" series, Professor Balaban read from his forthcoming book, *Blue Mountain*, and from his Lamont Award-winning *After Our War*.

Dr. John J. Cahir, professor of meteorology and associate dean for resident instruction in the College of Earth and Mineral Sciences, has been elected a Fellow of the American Meteorological Society (AMS). Election to the grade of Fellow, an honor that has been accorded to only about 4 percent of the 8,000 AMS members, recognizes outstanding contributions to the science or application of meteorology, climatology and other areas of atmospheric science over a period of years.

Dr. Richard M. DiRuzza has been named dean of student affairs at the Beaver Campus. He received his M.Ed. degree in student personnel services in higher education and Ph.D. in higher education administration at Kent State University. He was associate dean of students at Baldwin-Wallace College, Berea, Ohio, for three years and has served as acting dean of student affairs at Beaver since August 1980.

Dr. Della M. Roy, professor of materials science, recently participated in a NATO-sponsored conference on problems of adhesion in concrete, held at St. Remyls-Cherveux, France. She presented a lecture on "Adhesion of Cement Material to Aggregate as It Affects Future Demolition of Properties."

Dr. Arthur H. Patterson, associate professor of environment and behavior, and Dr. Nora Newcombe, assistant professor of psychology, are editors of a book entitled *Spatial Representation and the Behavior Across the Life Span: Theory and Application*.

Dr. Lynn S. Liben of the University of Pittsburgh, a former Penn State faculty member, also edited the 404-page book, which has been published by Academic Press as part of its developmental psychology series.

The book is intended as a resource for scholars, graduate students and practitioners concerned with various aspects of space, including its psychological representation, design and influence on behavior.

Promotions

Staff Exempt

Vicki K. Carter to senior systems analyst-technical support in Management Services. George A. Hussey Jr. to State leader, Extension data systems in Agriculture. Linda E. Mace to coordinator of management systems in Continuing Education. Raymon J. Masters to lead research programmer in Intercollegiate Research Programs.

Staff Non-Exempt

Pamela J. Douglas to supervisor, Medical Center payroll at Hershey.

Mary Lou Eskew to senior research aide in Intercollegiate Research Programs. Jonathan E. Gardner to cardiovascular technician at Hershey. Patricia A. Pichini to supervisor, operations control at Hershey. Vincent X. Rabatin to laboratory assistant/programmer in Intercollegiate Research Programs.

Clerical

Linda Bronson to clerk, invoice B in Business Services. Carol Fee to secretary A in Earth and Mineral Sciences. Vera F. Freed to secretary A at Hershey. Carolyn A. Kresen to secretary B in Intercollegiate Research Programs. Linda C. Plonzer to data preparation operator B in Alumni Administration. Joan Reish to secretary A in Planning and Budget.

Technical Service

Mary J. Stover to operator, sewing room in Housing and Food Services. Lynn A. Wason to milk processor in Agriculture.

Staff Development

Fifty-one members of the University's clerical staff have completed the six-week Clerical Enrichment program offered through the Office of Personnel Administration. One program was conducted from Oct. 30 through Dec. 11, and two were given from Jan. 14 to Feb. 18.

Participants were: Cindy Coslo, correspondence typist A. Physical Plant; Nancy Derk, clerk typist B, Continuing Education; Darla Franks, clerk, curriculum material, Education; Lori McDowell, clerk typist B, Continuing Education; Phyllis McGarvey, receptionist, clerk A, ARL; Carmen McLaughlin, clerk typist A, Liberal Arts; Janet Page, clerk B, Business Services; Barbara Pruency, clerk typist A, Physical Plant; Shirley Thompson, clerk A, Business Services.

Betsy Barto, drafting room clerk B, Physical Plant; Patty Bierbaum, clerk typist A, Personnel Administration; Susan Broadwater, stenographer A, Science; Diana Bucha, clerk typist B, Arts & Architecture; Connie Decker, fee receipts clerk, Registrar; Cindy Dunmire, clerk typist B, Libraries; Kathy Green, clerk A, Libraries; Debbie Hamilton, clerk A, service desk, Physical Plant.

Cheryl Heasley, clerk typist A, Agriculture; Carol Hendershot, clerk typist A, Continuing Education; Judy Hoy, clerk typist A, Agriculture; Sandra Lowery, clerk A, Agriculture; Laurel Loy, audio visual materials clerk B, Continuing Education; Sylvia Malone, clerk typist B, Registrar; Robin Moyer, clerk B, IRP; Karen Penland, clerk typist B, Engineering; Janis Rudy, correspondence typist A, Physical Plant.

Nancy Sabol, technical secretary C, Science; Susan Shockowitz, secretary C, Liberal Arts; Paula Tutekay, clerk, production A, Housing & Food Services; Margaret Zimmerman, secretary C, HPER.

Norma Beck, clerk B, Student Administration Services; Marie Cole, technical secretary, ARL; Linette Courtney, secretary C, President's Office; Bonnie Davis, secretary C, Continuing Education; Susan Del Ponte, secretary C, Science; Kathy Dorman, clerk B, Student Administrative Services; Joan Emmanuel, technical secretary, ARL; Lisa Fayewicz, clerk typist B, Engineering.

Kathy Fishel, data processing clerk A, Continuing Education; Ellen Gfroehrer, clerk typist A, Continuing Education; Jeanne Gray, receptionist, typist A, Liberal Arts; Phyllis Hockenberry, secretary C, Human Development; Pam Kennedy, receptionist, typist A, Human Development; Elaine Krug, secretary C, President's Office; Mary Long, secretary C, Human Development.

Dorothy McClintock, accounting clerk A, Controller; Olga Mueller, secretary C,

Anybody There?

The Department of German, in cooperation with other departments, plans to hold a conference on the writer B. Traven (*The Death Ship, The Treasure of the Sierra Madre*) on the occasion of his 100th birthday in the Fall of 1982. Anybody who wants to participate or has suggestions concerning the structure and content of the symposium should contact Ernst Schurer, (865-5481), 5324 Burrows Blvd., University Park, Pa. 16802.

Liberal Arts: Diane Neidigh, clerk typist B, Agriculture; Barbara Reese, accounting clerk B, Business Services; Joan Shellington, secretary C, Engineering; Lisa Spotts, clerk typist B, Agriculture.

Partings

Carrie K. Grenoble, general helper in the Office of Business Services, will retire March 1 after working for the University since July 1, 1953.

"I'm looking forward to just plain resting," says Mrs. Grenoble, whose husband, Willard W., is a general poultry worker in the College of Agriculture's poultry plant.

Mrs. Grenoble—who works in the printing and communication services division—notes that although she doesn't normally follow football, she does follow the Nittany Lions closely each season. But my favorite sport is baseball—I'm a great fan of the Pittsburgh Pirates and I'm really hoping they can come back next year," she says.

Eva L. Meredith, secretary in Intercollegiate Research Programs, will retire March 1 after nearly 12 years of University employment.

Albert G. Neidrick, family housing project worker in the Department of Housing and Food Services, will retire March 1 after 10 years as an employee.

Jeanette E. Robinson, laboratory assistant in the College of Agriculture, will retire March 3 after working for the University almost 17 years.

Paul H. Neff, an electronic designer in Engineering since Feb. 1, 1960, left the University on Feb. 17.

Norman K. Skinner, a maintenance worker at O'Keefe, will retire March 1 after working at the Campus since Oct. 25, 1971.

Obituaries

Charles B. Manula, professor of mining engineering, died Feb. 20. He was 50 years old.

A member of the University faculty since 1964, Professor Manula received his B.S. and M.S. degrees in mining engineering from Penn State in 1958 and 1963. Prior to joining the faculty, he worked in the mining industry for some 10 years.

From October 1968 to January 1971, Professor Manula was on a leave of absence during which he served as Deputy Secretary of the Pennsylvania Department of Mines and Mineral Industries, Bituminous Coal Division.

As a recognized pioneer in conducting research on computer simulation of mining systems, he was responsible for the development of the computer models for underground and surface mining operations that are the standard for the industry today.

Most recently, Professor Manula had been conducting studies into the feasibility of deep open pit mining of anthracite coal in Pennsylvania.

Mildred W. Nicholas, a secretary in the College of Agriculture when she retired in 1958, died Jan. 24 at the age of 88. She was employed by the University from 1943 until her retirement.

Reserve duty time-off information

Editor's note: The following article has been prepared by the Office of Personnel Administration.

Pennsylvania law now provides that regular University faculty or staff members who are members of the United States military reserve or the Pennsylvania National Guard who are absent from work for short-term, active duty or field training shall receive University pay for such absences, up to certain limits (see below). Also, vacation earnings shall not be charged for such absences, up to the same limits. There is no reduction in University pay for such time off to the limits specified. In addition, the individual retains his or her reserve or National Guard pay.

Military reservists are limited to University pay for absences from work of up to 15 days in a calendar year for active duty service or required field training, or a combination thereof. There is no limit on paid time off in a year for active duty for Pennsylvania National Guard members. However, such individuals are limited to up to 15 days of University pay a calendar year for absences for required field training. The absences from work do not have to be consecutive to qualify. However, University approved absences for duty or training in excess of the limits described are charged as leaves without pay or to accumulated vacation as appropriate.

These provisions are retroactive to Jan. 1, 1980. Any regular faculty or staff member who took a leave of absence without pay or who charged vacation accumulation for absence for military reserve or Pennsylvania National Guard active duty or field training since Jan. 1, 1980, should contact his or her personnel representative or Commonwealth Campus business manager, as appropriate, so that suitable reimbursement or vacation balance adjustment can be made as applicable. Reinstated vacation may in some cases cause vacation accumulations to exceed the stated allowable maximums. Over-the-maximum vacation accumulations will be allowable for such individuals. However, it is expected that normal allowable maximums will be in effect again for them by Dec. 31, 1981.

For future such absences, or for retroactive reimbursements or adjustment for past absences to Jan. 1, 1980, copies of the authorization or orders mandating the absences, and copies of the military pay vouchers for the periods of the absences, are required.

This article is not intended to be definitive of University policy. It is intended to provide information to those affected so that they may contact their personnel representatives or Commonwealth Campus business manager, as appropriate, if adjustments are necessary, and to understand the new policy application for the future. The applicable University policy will be revised and reissued. Questions regarding this change in University policy should be directed to personnel representatives or Commonwealth Campus business managers, as appropriate.

INTERCOM is an internal communications medium published weekly during the four weeks of the class schedule for the faculty and staff of The Pennsylvania State University.

Millions of pieces of mail no problem for these staffers

Ever hear of "nixie mail"?

James McKivison has. During the last fiscal year, his division handled some 1,250,000 pieces of it.

"Nixie mail" is postal service slang for mail which carries the correct zip code but which is incompletely addressed. When it arrives at Penn State, it lands on the doorstep of Mailing Services, where Mr. McKivison is the manager.

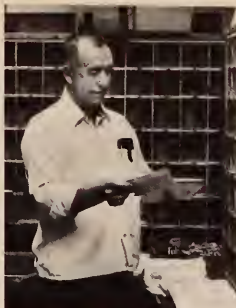

Most of Penn State's "nixie mail" (from the German *nichts*, meaning nothing, no one) includes the employee's name and department but does not provide the name of a building and/or room number.

"Because the U.S. Postal Service delivers most incoming mail directly to campus buildings, that portion of the address is essential," Mr. McKivison explains. "It would be helpful if we could get employees to include a complete return address on all off-campus correspondence."

Dealing with the "nixie mail" problem is clerk Harold Shope, whose job it is to look up building addresses and then send the mail on to its recipients through the interdepartmental mail system.

Some 2,600,000 pieces of interoffice mail pass through this system, which is also operated by Mailing Services, under the direction of group leader Glenn Metz.

Three carriers — Roy Swineford, Nick Grossman and Glen Glunt — handle this huge volume of mail — totaling about 3,850,000 pieces annually. Steve Pagano and Jim Schreck are alternate carriers.

"Nixie mail" clerk Harold Shope sorts mail into the proper bins after adding missing campus addresses to each letter.

"Each carrier usually covers his scheduled route twice daily," Mr. McKivison explains. The University's mail trucks are equipped with bins, so as mail is brought out from a building, it can be sorted immediately. Instead of having to bring the mail back into the Business Services Building (where Mailing Services is located), the drivers can exchange bins right out of their trucks.

In addition to interdepartmental mail, the carriers pick up out-going U.S. mail (another 3,700,000 pieces), United Parcel

Addressing Services employees Steve Pagano (left), utility and relief worker, and Roger Cartright, group leader, use this machine to attach address labels to a recent edition of *INTLRC OM*. Personnel also help prepare mailings, making labels and stuffing envelopes.

Service items and mail for other carrier services such as Federal Express.

Out-going mail and parcels are metered in Mailing Services, which must keep careful records to compile monthly postage-due statements for Penn State's various departments. While different departments use vastly differing amounts of postage, the University's total expenditure for postage during the 1979-80 fiscal year was \$1,287,000.

Closely related to Mailing Services and sharing the same of fice space is

Addressing Services. Directed by group leader Roger Cartright, this is a separate operation, although it reports to Mr. McKivison.

To illustrate the relationship between the two operations, Mr. McKivison notes that personnel in Addressing Services often help prepare mailings, making address labels, stuffing and labeling envelopes, and sorting pieces for mailing. Address labels are printed by computer and affixed to mail primarily by machine. Some 5,475,000 pieces of mail were handled in Addressing Services during fiscal '79-'80.

"In the last five to six years, we've had a 60 percent increase in our production level," says Mr. McKivison, "and we've done this with just about exactly the same number of personnel" (nine full-time and two part-time in Mailing Services; six full-time and several part-time in Addressing Services, plus Mr. McKivison).

He attributes this not only to modern equipment — the University owns some of the very best available — but more importantly, to "good personnel who really know how to operate it."

Mr. McKivison points to Bernie Kyler, senior clerk and his assistant, "as invaluable to the success of the operation. She fills in for me when I'm out of the office or otherwise tied up, and without fail, she always does a very good job."

In fact, our entire labor force is great, better than it's ever been," he continues. And Mr. McKivison should know — he's worked in Mailing and Addressing Services for 28 years and was the second full-time employee hired there.

Metering the outgoing mail are, from left, Doris Huckabee, mail clerk; Bernie Kyler, senior clerk; Glenn Metz, Mailing Services group leader; and Don McFarland, mail clerk.

"Good deed" by a Behrend employee is rewarded

Making it home on Feb. 10 was not easy for any of the faculty and staff of Behrend College as they struggled through the more than two feet of deep and drifting snow which hit the Erie area.

But for one employee, residence hall worker Dorothy Barnett, getting there was only half the fun!

After taking six detours and eventually walking the last half mile, Mrs. Barnett arrived home to find a school bus filled with small children parked nearby.

"The motor was dead, and the bus driver and the little kids had already been sitting in there for two hours," she said. "They certainly weren't going to sit out

there in the cold, while I had a home to keep them warm."

When she entered her house, Mrs. Barnett found that her youngest son had already invited three stranded snowplow drivers in. She also went out to ask all the people stranded in cars along the road to come inside, bringing the number of her marooned guests to close to 40.

While Mrs. Barnett prepared soup and sandwiches, some of the children called their parents to let them know they were safe; other children who lived nearby were transported to their homes by volunteer firemen and snowmobilers. The last of the guests departed about 12:30 that evening.

"If I had to do it over again, I certainly would," Dorothy Barnett says of her experience. "You always get paid for your good deeds."

And her "payment" arrived on Valentine's Day when she came home and again noticed the school bus parked by her house. However, this time she was greeted by the same "little laughing school children" who presented her with homemade valentines and candy. Accompanying the children was the bus driver, who also had a gift for Mrs. Barnett — \$50 — half of the amount of his overtime pay.

Winter Term graduates number more than 1000

More than 1,300 graduates are scheduled to receive degrees at Winter Term commencement exercises Sunday, March 8, at 1:30 p.m. in Recreation Building.

President Oswald will preside over the exercises, and will be assisted in conferring degrees by Provost Eddy and Walter Conti, vice president of the Board of Trustees. Dr. Eddy will address the graduates.

Among the candidates for degrees are 1,122 seniors qualifying for baccalaureate degrees; 388 candidates for master's degrees; and 125 doctoral students.

Issues identified for March 3 Senate forensic session

In order to help focus the discussion of the Commission's recommendations, the Faculty Affairs Committee has identified critical issues for each of these recommendations. While discussion need not be limited to these issues, it would be helpful if some comments did address them.

Recommendation 4. Responsibilities of the Various Review Levels

ISSUE: Should review committees at college and university levels make substantive judgments concerning the academic merits of a candidate for promotion and tenure or address themselves to the procedural adequacy of initial level reviews (looking for documentation and equity across departments, colleges and campuses)?

The present policy is ambiguous. Current practice does allow substantive reviews. Among the questions are 1) Whether people outside a candidate's field who are not familiar with the candidate's work are in a position to make substantive academic judgments about the candidate? 2) Should initial level reviews be determinative with regard to substance?

Recommendation 5. Dean's Veto

ISSUE: Should Deans have the authority to terminate a faculty member's candidacy for promotion and tenure?

Under present policy Deans may do so. In the case of University Park faculty, a College Dean alone can terminate the promotion or tenure of a candidate even when all other recommendations are

positive. In the case of Commonwealth Campus faculty, it takes a joint agreement between the College Dean and the Vice President/Dean for Commonwealth Campuses and Continuing Education. In June, 1978, the Senate recommended that the Dean's veto power be eliminated. The Commission's recommendation is that the Dean be required to explain a decision to veto.

Recommendation 6. General University Criteria

ISSUES: Should there be a "mission statement" in PS-23? Who decides the "weighting" of criteria referred to in the policy? (And how can we ensure that the candidate and all review committees share common expectations in this area?) Should "creative activity" be part of the title of the second criterion (research)?

Recommendation 7. Teaching Evaluations

ISSUES: (1) Who should decide the method or forms of evaluation? (2) Should there be department-wide forms, college forms, University-wide forms? (3) Should there be policies concerning the administration of student evaluations and the presentation of the results?

Present policy requires faculty input and two forms of student evaluations. In some cases the practice of a unit requires a particular form or a particular presentation of a given form. Some parts of this policy may conflict with other Senate legislation on teaching evaluation. There is no policy concerning administration or presentation of student evaluations.

Recommendation 8. (Two Parts) Monitoring of the Promotion and Tenure Review Process and Continuation of the Promotion and Tenure Review Commission

ISSUE: Who should monitor the process and policy of promotion and tenure? The Commission has recommended that the Promotion and Tenure Review Commission assume this task (in consultation with the Provost's Office and the Faculty Affairs Committee of the University Faculty Senate).

Statements of Criteria and Expectations

ISSUES: (1) Should there be guidelines for these statements and or "model" statements for the units to follow? (2) Who should develop these guidelines or models? (3) Who should decide whether criteria satisfy guidelines? (4) How are cases of conflict to be decided?

Problems: (1) Current statements vary widely in specificity and usefulness. (2) Some criteria that apply to a particular faculty member may contradict each other.

Recommendation 9. Implementation of Changes in PS-23 and Incorporation of Guidelines into Policy

ISSUE: Should "Administrative Guidelines" remain a separate document or should the basic points be incorporated into PS-23 itself; who should decide what the "basic points" are?

Senate

(Continued from page 1)

transfers IRC's duties to Senate Council and makes some other present Council duties more specific.

The Committee's fourth legislative report would add a paragraph to the Senate's *Standing Rules*.

The addition states that elected members of Senate Council cannot serve on the Committee on Committees and Rules; also Committees and Rules and Senate Council members may not serve as members of standing committees of the Senate, except in ex officio capacities.

The Committee feels that these changes will help spread the workload and power base of the Senate among more of its members.

"At the present time," the Committee report says, "there is too great a tendency to rely upon the same senators year-in and year-out for all assignments."

Senators will have a chance to act on three recommendations prepared by a Subcommittee on the Impact on Undergraduate Instruction of Teaching Performed by Graduate Student Teaching Assistants. This group presented an informational report at the October Senate meeting.

The first recommendation stipulates that teaching assistants without prior teaching experience must attend a teaching training program. College deans would be responsible for supervision of these programs, while program heads would systematically evaluate their TAs' performance in the classroom.

The quality of a TA's spoken English is addressed in the second recommendation, which asks program heads to obtain evaluations from the Center for English as a Second Language for all graduate student teachers whose first language is not English.

The third recommendation suggests that freshmen be informed during orientation that, in some instances, instruction will be provided by TAs.

The Forensic Session will permit full discussion of the recommendations made by the Joint Senate/Administrative Commission to Review and Make Recommendations on University Policy Governing Promotion and Tenure. The Commission report appeared in the March 13, 1980, edition of INTERCOM.

The first three recommendations of the Commission were reported out by the Committee on Faculty Affairs last June, and several of the proposed changes in PS-23 were then approved by the Senate and later implemented by the University Administration.

New State Retirement Handbook available

The Pennsylvania State Employees' Retirement system (SERS) Member's Handbook has been revised, and all faculty and staff members who belong to SERS will receive a copy through interoffice mail. The last edition was prepared in 1976.

The booklet is very informative, according to the Office of Personnel Administration, and members are encouraged to read it and retain it with other important papers for future reference.

Any employee who has questions about the booklet or who is a member of SERS and does not receive a copy should contact the Employee Benefits Division, Room 133 Willard Building (865-1473).

Next Intercom March 12

This is the last issue of INTERCOM for the Winter Term. The next issue will appear March 12.

24 Research Initiation Grants awarded to faculty

Twenty-four faculty members have been awarded one-year Research Initiation Grants from a fund approved by President Oswald. The grants, ranging from \$2,500 to \$5,000, are part of a program to encourage and support research and other creative work.

Faculty members at all campuses who had not accumulated more than two years of service before September 1981 were eligible for the 1981-82 RIC grants.

"We award these funds to support lines of research that may lead to external sponsorship," says Dr. Richard G. Cunningham, vice president for research and graduate studies, who administers the program.

A committee consisting of Edward H. Kleivans, Herbert M. Lundgren, John R. Nesselrode, Forrest J. Remick (ex officio), Paul H. Rigby (chairman) and Leonard N. Zimmerman reviewed and screened 70 proposals.

Faculty members receiving grants and their proposal titles are:

Richard N. Artica, assistant professor of olericulture — Carbon dioxide absorption by plant roots and its effects on photosynthesis; Anthony J. Baratta, assistant professor of nuclear engineering — The effect of hydrogen and deuterium on electron scattering in copper; Daniel J. Brass, assistant professor of organizational behavior — Spatial and network relationships, contexts for job characteristics and worker satisfaction;

Moses H. W. Chan, assistant professor of physics — Orientational ordering of two dimensional molecular films; M. Jeya Chandra, assistant professor of industrial engineering — Comparison of queueing disciplines in a multiple finite source queueing model with a single server; David R. Chase, associate professor of recreation and parks — Role conflicts of the traveling craftsman: artist, entrepreneur or entertainer? Kathleen B. Evensen, assistant professor of postharvest physiology — The effects of calcium on plant senescence;

Andris Freivalds, assistant professor of industrial engineering — Quantification of dynamic muscle strength; Raymond R. Fripp, assistant professor of pediatrics — The influence of the central nervous system on digoxin-induced cardiac arrhythmias in the neonatal pig; Thomas W. Gardner, assistant professor of geology — Hillslope evolution of reclaimed spoils piles from surface coal mining;

E. Earl Graham, associate professor of chemical engineering — Protein separation studies using ion exchange resins;

Christine M. Gregg, assistant professor of biology — The possible role of cerebrospinal fluid vasopressin concentration as a factor regulating vasopressin release; Sharon J. Laskowski, assistant professor of computer science — The heuristic approach to problems in computational complexity;

Susan M. McHale, assistant professor

of human development — Interactions of children with handicapped and non-handicapped siblings; Andrea M. Mastro, assistant professor of microbiology and cell biology — Endogenous membrane phosphorylation in lymphoma cells and in primary lymphocyte cultures; Gary L. Messing, assistant professor of ceramic science — Phase transformation enhanced sintering; Linda P. Miller, assistant professor of English (Berks) — A biography of Gerald and Sara Murphy;

Steven B. Mizel, associate professor of immunology — Biochemical studies on lymphocyte activating factor (Interleukin 1); L. M. Royleman, associate professor of electrical engineering — Direct fault location in electrical power systems; James P. Runt, assistant professor of polymer science — Studies of the fatigue fracture in polymers; the effect of microstructure; David J. Spector, assistant professor of microbiology — Messenger RNA synthesis in permeable cells;

Richard G. Stoker, assistant professor of communication disorders — A comparative evaluation of two methods used to teach speech to deaf children using a stimulation technique; Terrance M. Wilson, associate professor of veterinary science — Diethylstilbestrol and transplacental implications in hamsters; Richard S. K. Young, assistant professor of pediatrics — Prenatal brain damage due to bacterial infections.

Sociology Department major reaccredited for next seven years

The Undergraduate Social Welfare Program, one of two undergraduate majors within the Department of Sociology, has been reaccredited for a seven-year period by the Council on Social Work Education (CSWE).

A report issued after an on-site visit by CSWE representatives praised faculty members in the program in terms of their

professional qualifications, their interaction with students and attention to advising. Also cited were the "well designed and integrated curriculum" and the program's excellent working relationship with field placement agencies.

The accreditation of the baccalaureate program enables a graduate to qualify for

advanced standing in more than half of the accredited graduate schools of social work, reducing the time required to obtain an MSW from two academic years to one academic year and a summer. Graduates also become eligible for a range of employment opportunities which require that the applicant be a graduate from an accredited social work program.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Feb. 26 - March 15 Special Events

Thursday, Feb. 26
Final examinations. Also Feb. 27 & 28, March 2.
O Film, Reed, *The Third Man*, 7 and 9 p.m., HUB Assembly Hall.

Saturday, Feb. 28
Sports: bowling vs. Bloomsburg, 1 p.m.; volleyball (men) vs. Ohio State, 7 p.m.

Tuesday, March 3
Neutron Activation Analysis workshop, 8:30 a.m.-4:30 p.m., Breazeale Nuclear Reactor.
Sign-up, Dale C. Raupach, 865-6352.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Residence Halls close for Winter Term, 3 p.m.

Wednesday, March 4
Neutron Activation Analysis workshop, 8:30 a.m.-4 p.m., Breazeale Nuclear Reactor.

Thursday, March 5
College of Agriculture-Gamma Sigma Delta lecture, 4:30 p.m., Room 112 Kern. Dr. Clifford R. Wharton, chancellor, SUNY, on "Four Challenges for Agricultural Development."

Saturday, March 7
Sports: fencing (men) vs. Carnegie-Mellon, 1 p.m.; basketball (women), EAIW First-Round Games.

Sunday, March 8
Student arrival date for Spring Term. Residence Halls open, 10 a.m.
Winter Term Commencement, 1:30 p.m., Rec. Hall.

Monday, March 9
Orientation and advising.
Registration of faculty studies in Pattee Library, 7:15 a.m., Room 106 Central Pattee.
Public seminar, 2 p.m., Room 204 Keller Bldg.: Carol Smith, Robert Strauss, James D. Rodgers (economics) and Michael Wasylenko (economics), Pa. Tax Commission affiliates, on "Pa. Tax Commission's Recommendations for State and Local Tax Reform."
Interdisciplinary Symposium on Value, 7:30 p.m., Room 101 Kern. Roy C. Buck, sociology, on "The Ethics of Nostalgia."

Tuesday, March 10
Registration for Spring Term, 8 a.m.-5 p.m., IM Bldg.
Registration for Summer Term 1981, Room 112 Shields, through April 1.
Gallery Talk, 10:30 a.m., Museum of Art.
Robert M. Doty, director, *The Currier Gallery of Art*, on "The Search for an Image: Abstraction in American Painting in Mid-Twentieth Century."
Sports: volleyball (men) vs. East Stroudsburg, 7 p.m.

Wednesday, March 11
Registration for Spring Term, 8 a.m.-5 p.m., IM Bldg.

Spring patterns - Photo by Scott Johnson.

Bldg.
Robeson Film Series, *Black Britannica*, with introduction and discussion by producer of the film, Musindo Mwinyipembe, 7:30 p.m., Robeson Center.
Sports: gymnastics (women) vs. Utah, 8 p.m.

Thursday, March 12
Spring Term classes begin, 8 a.m.
Orientation tours of Pattee Library: 9 and 11 a.m.; 1 and 3 p.m.
Drop/Add, 1-4 p.m., HUB Station

Friday, March 13
Drop/Add, 9 a.m.-4 p.m., HUB Station.
Orientation tours of Pattee Library: 9 and 11 a.m.; 1 and 3 p.m.

Saturday, March 14
Sports: ice hockey vs. Binghamton, 3:30 p.m.; gymnastics (men and women) vs. Pittsburgh, 8 p.m.
Artist Series, New York Woodwind Quintet, 8:30 p.m., Schwab Auditorium.

Sunday, March 15
Free U., registration, 11 a.m.-3 p.m., Room 225 HUB.
University Chapel Service, 11 a.m., Eisenhower Chapel. Lynn Shivers, Society of Friends, Philadelphia, speaker.

Sports: tennis (men) vs. George Washington, 1 p.m.

Seminars

Thursday, Feb. 26
Computer Science. Karen Chase, computer science, on "Join Graphs and Acyclic Database Schemes," 4 p.m., Room 325 Whitmore (new listing).

Tuesday, March 3
Microcomputer User's Group, 7:30 p.m., Room 169 MRL.

Thursday, March 10
Applied Research Laboratory. Ralph Seely, engineering research, ARL, on "Switching Mode Power Supplies," 10:45 a.m., Walker Conference Room, Applied Science Bldg.
Organic/Inorganic Chemistry, D. Murphy, Bell Laboratories, on "Lithium Intercalation Chemistry," 8 p.m., Room 333 Whitmore.

Wednesday, March 11
Ecology. Ruth Buskirk, Univ. of Texas-Austin, on "Unusual Animal Behavior and Earthquake Prediction," 11:10 a.m., Room 8 Mueller.

Thursday, March 12
Chemistry. Dennis Evans, Univ. of Wisconsin, on "Recent Studies in Mechanistic Organic Electrochemistry," 12:45 p.m., Room 333 Whitmore.

Physics. Eli Burstein, Univ. of Pennsylvania, on "Surface Raman Scattering," 3:55 p.m., Room 445 Davey.

Acoustics. Constance Garetas, grad. asst., noise control lab., on "A New Method for Measuring the Acoustic Impedance of the Ground," 4 p.m., Room 73 Willard.

Exhibits

Chambers Gallery: Eduard Betenas, sculpture: Frank Chetelat, mixed media, both open March 12.

Kern Gallery: Sandra Leitzinger, watercolors, Mary Stokrocki, drawings and photographs, both through Feb. 27. Nancy Ziegenfuss, ceramics, through Feb. 28.

Museum of Art: European works from the permanent collection; "All That Is Glorious Around Us," paintings from the Hudson River School; selections from the Pre-Columbian and Oriental collections, through March 15.

Pattee Library: Charles Emlen, sculpture, East Corridor Gallery. Milwaukee's Lakemont Planning and Design Competition: The Design Pools, through March 15; John Wilson, photographs, open March 15. Lending Services Lobby. Randy Cleaver and Michael Rodemer, sculpture, Main Lobby. "World's Fairs," through March 13. Rare Books Room.

Visual Arts Zoller Gallery: Sculpture Students' Exhibit, through Feb. 28.

Staff Vacancies

Following vacancies for positions classified as staff or for which applicants must have been listed with the University Employment Division for filling. This announcement is made so that all University employees are interested in promotion may apply by calling the University Employment Division, 865-1387 (network line 475-729). Applications for these staff vacancies will be accepted until 5 p.m., March 5, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (FE-11) and compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), prior status as a disabled or Vietnam era veteran.

RESEARCH AIDE, COLLEGE OF AGRICULTURE, University Park. Perform nonaqueous procedures to determine the purity of some. Measure activity of several enzymes of carbohydrate metabolism associated with nonaqueously isolated amyloplasts and the whole cell homogenate. Assay enzymes by standard procedures or by procedures to be determined experimentally. Assist supervisor in the development of assay procedure for the isolation of amyloplasts and measure enzyme activity. Assist in the instruction of students and support personnel in using routine research methods and laboratory techniques. Oversee activities of part-time student

laboratory assistants B.S. degree or equivalent in biochemistry, biology, plant science or related field, plus one year of effective experience in a biochemical or plant physiology research laboratory.

MANAGER OF SYSTEMS DEVELOPMENT, COLLEGE OF MEDICINE, Hershey. Responsible to the Director, Medical Center, for planning and directing the activities of the group of programmers and analysts who are responsible for the completion of the many developmental project requests that are received by the Computer Center, and who are charged with the analysis, evaluation, selection and installation of new applications. The position requires a bachelor's degree (master's preferred) and at least eight years of data processing experience, four of them in supervisory capacity.

FINANCIAL AID COORDINATOR - WAGE MONITORING, OFFICE OF STUDENT AID, University Park. Responsible to the Director of Student Aid for administering the University Wage Payroll Monitoring System, for counseling students on financial and matters, and for assisting in the internal administration of all financial aid programs. Master's degree or equivalent in student personnel services, public administration, business administration, or other related field, plus up to one year of effective experience required.

PROGRAMMER A, COLLEGE OF MEDICINE, Hershey. Responsible to the Manager of Programming for analyzing the requirements of various systems and for the development of computer programs to fulfill these requirements. Bachelor's

degree with knowledge of third generation computers and programming, plus one to two years of effective experience, or an associate degree in data processing, plus two to four years of effective experience.

SENIOR RESEARCH INSTRUMENTATION AIDE, COLLEGE OF SCIENCE, University Park. Responsible to the Supervisor, Research Instrument Group, to assist in the design, construction, packing, documentation, and maintenance of instrumentation in the Microbiology, Cell Biology, Biochemistry and Biophysics Department and Chemistry Department. Associate's degree or its equivalent in electronics, plus three to four years of effective experience with scientific instrumentation or electronic components of instrumentation, are required. Experience with analytical instruments and a basic knowledge of chemistry, physics and mechanics are highly desirable.

New molecular, cell biology majors set

A new undergraduate and graduate major in Molecular and Cell Biology will be offered in the College of Science at University Park beginning Fall Term 1981. The major, which has resulted from a change in name and emphasis of the former Biophysics program, will lead to

the B.S., M.S. and Ph.D. degrees in Molecular and Cell Biology.

Additional faculty in the areas of molecular biology, molecular genetics and cell biology will join the existing biophysics faculty in the program. The curriculum and courses have been revised and updated. Added attention will be given new developments such as recombinant DNA, genetic cloning and engineering, biomedical applications, gene expression and regulation, and other aspects of molecular and cell biology.

These programs are tailored for and should be of interest to students from many backgrounds in the biological, physical and other sciences. Majors would obtain the background necessary for postdoctoral studies, graduate studies, medical school, and work in basic research, industrial applications of biotechnology, government laboratories, and other areas.

More information about the program is available from Dr. Reginald Deering in Room 201 Altshouse Laboratory or Room 618 Mueller Laboratory (865-0342).

18 workshops highlight 1981 Alumnae Day program

"Women: Options Matter Especially Now," the 1981 Penn State Alumnae Day program, is set for Saturday, April 4, in Keller Conference Center.

Sponsored by the Penn State Alumni Association, the day's program will feature discussions on a wide range of topics by distinguished University faculty members, alumnae and other women.

To be included are 18 workshops in the following areas of interest: "The Balancing Act" — dual career couples, living alone, and combining motherhood with a volunteer or working career; "Money Does Matter" — investments and estate planning, acquiring a financial identity, and turning creative ideas into financial reality; and "You and Your Health" — coping with stress, controlling one's own body, and shaping up and eating right.

Also: "Strategies for the Future" — marketing one's skills, a rewarding life without pay, and setting new goals and options; "Making It in Male America" — recognizing discrimination, the double bind of being black and female, and career advancement; and "Women United" — women's legislation, networking, and developing a political base.

Prominent guest speakers will include Senator Jeanette Reilly, minority chairman of the State Senate Education Committee; Helen Seager, director of the Pennsylvania Commission for Women in Harrisburg; Cynthia Ackron Baldwin '66 of McKeesport, attorney at Neighborhood Legal Services; Barbara Haas '61, past president of Women in Communications

and president of Wordcrafters, Inc., Pittsburgh; Dr. Linda Hartsock '69, management consultant in Washington, D.C.; and Dr. Carmen Beatriz Mendez '74, '79g, post-graduate resident obstetrician/gynecologist at George Washington University Hospital. University faculty members participating will include:

— Dr. Joanne Trautmann, director of the Center for the Study of Humanistic Medicine and professor of humanities and English at Hershey, who will give the opening presentation, "The 'Old Girl' Network: Women's Friendships and Creativity." Dr. Trautmann is co-editor with Nigel Nicholson of the multi-volume *Letters of Virginia Woolf*. Frequently published in professional journals, Dr. Trautmann also co-authored a book with Nigel Pollard, *Literature and Medicine: Topics, Titles and Notes*; and she is the editor and principal writer of another, *Medicine and Literature: Two Healing Arts in Dialogue*.

— Dr. Doris M. Seward, professor of human development and executive assistant to President Oswald, who is an authority in the field of comparative education. Dr. Seward will lead a panel discussion on managing one's life as a single, divorced or widowed woman.

— Dr. Marylee Taylor, assistant professor of sociology, will lead the panel discussion on "The Double Bind — Being Black and Female," which will focus on the difficulties of being in the minority. Dr. Taylor's research emphasis has been on

white racial attitudes.

— Dr. Kathryn Moore, associate professor of education and research associate at the Center for the Study of Higher Education, will present "Women Helping Women," a lecture-discussion of the rewards and risks in networking and mentoring.

— Dr. Dorothy Harris, professor of physical education and director of the Center for Women and Sport, will discuss current research on women and exercise.

— Dr. Laura S. Sims, associate professor of nutrition in public health, and a W.K. Kellogg Foundation National Fellow, will discuss the latest research on women and nutrition in a workshop on "Shaping Up and Eating Right."

— Dr. Linda Shoop, associate professor of educational psychology at the New Kensington Campus, will present a workshop on coping with stress. Dr. Shoop is a recipient of the College of Education's Alumni Society's Outstanding Teaching Award.

— Dr. Gladys I. Ritchie, associate professor of speech communication and associate dean for academic affairs for the University-wide System of Continuing Education and Commonwealth Campuses, and Dr. Kathleen Dutto, senior research technologist in the Division of Broadcasting, will present commentaries on selected films about women.

Further information and a registration brochure can be obtained by writing Heather C. Gilbert, Alumni Association, Room 1005 Old Main, 814-865-1973.

Scholar's medal

(Continued from page 1)

the therapy has reduced mortality from 60 percent to 3 percent and recurrence of the disease from 30 percent to zero. As a result, the Waldhausen operation has been universally accepted.

Clearly, the medical and surgical procedures devised by Dr. Waldhausen have turned a virtually hopeless situation faced by the infant with congenital coarctation of the aorta into one in which health can be restored in almost all cases," his citation notes.

Dr. Waldhausen's contributions in this field are included in a bibliography containing contributions in cardiac physiology and function, and related areas.

Dr. Waldhausen has held faculty positions in surgery at Indiana University and the University of Pennsylvania. In 1970, he joined the Penn State faculty.

Dr. Gould's medal recognizes his achievements in the application of mathematical and statistical techniques in geographical research. He is credited with having introduced geographers to multivariate analysis and has made a number of contributions to the quantitative revolution in geography.

"Dr. Gould is a 'world class' geographer whose accomplishments are deeply respected throughout the international community of geographers and scholars in related disciplines," his citation notes.

Some of his most recent work has been on the diffusion of ideas and images, and he is widely known for his work on "mental maps," the study of the sociospatial environment. He presently is engaged in a pioneering study of the international flows of information through mass media.

Prior to joining the Penn State faculty in 1963, he taught at Syracuse University and conducted field work in Tanganyika, Ghana, Kenya and Uganda. In 1969-70, while on sabbatical and research leave from Penn State, he was affiliated with the Geographic Institute of Lund, Sweden.

Dr. Ohmoto is being honored for his discovery that the formation of massive sulfide deposits, which are the source of much of the world's copper, silver and other metals, occurs near the sea floor as a result of submarine volcanism.

He was the first to propose that theory in 1977, on the basis of extensive research results. Subsequent work by Dr. Ohmoto, co-workers and other researchers has confirmed the theory and led to the development of new guides to exploration for the economically important ore deposits in rocks up to 3 billion years old.

"If this nation is to avert a metals shortage in the not-too-distant future," his citation notes, "it will lead in part to the scholarly achievements of Dr. Ohmoto in providing sound conceptual models to guide mineral exploration efforts."

Dr. Ohmoto also is being honored for his leading role in an international cooperative program of research on the volcanogenic massive sulfide deposits of Japan.

A native of Japan, Dr. Ohmoto came to the U.S. in 1964 to study at Princeton University under a Fulbright Fellowship. He was affiliated with the University of Alberta in Canada before joining the Penn State faculty in 1970.

Established earlier this year, the Faculty Scholar Medal parallels Penn State's Christian R. and Mary F. Lindback Awards, which are presented for excellence in teaching. Up to four Faculty Scholar Medals will be presented annually during Winter Term commencement exercises.

University awards

(Continued from page 1)

Yeagley Jr., assistant vice president for the physical plant, chairperson; Martha Adams, assistant dean for resident instruction, Health, Physical Education and Recreation; State College rector William Leonard; James R. Palmer, president, C-COR; and students Kathy Ryan and Jonathan Sonett.

The Donkin Award was established in 1969 to honor the late McKay Donkin, who was vice president for finance and treasurer of the University from 1957 to 1968. The award is presented to the full-time or retired member of the faculty or staff who has contributed most to the "economic, physical or mental, or social welfare of the faculty" of the University. The nominee's contribution should be for duties or services above and beyond regularly assigned duties. The award consists of a \$500 stipend and a certificate.

The Wilkinson Award was established in 1970 by friends of John E. Wilkinson, a lifelong Centre County businessman. The award, which carries a \$500 stipend, goes to a University staff member whose performance methods and achievements exemplify administrative excellence.

The Barash Award was created in 1975 by the family of the late Sy Barash. It is made to a full-time member of the faculty, staff, or student body at the University Park Campus who has contributed most, apart from regular duties, to human affairs through public service activities and organizations or the welfare of fellow humans. The award carries a \$1,000 stipend.

Libraries ask award nominations

March 1 is the deadline for nominations for the Award for Outstanding Contribution to the University Libraries.

The award, consisting of a cash stipend and a Nittany Lion statue, is given in recognition of the achievements or performance of any person holding an academic or staff appointment in the Libraries who meets one or more of the following guidelines:

- (1) Professional contribution which has a significant influence on the operations of the Libraries; or
 - (2) Significant professional contribution which earns the respect of the University community for the Libraries; or
 - (3) Significant contribution to the profession which reflects achievement in librarianship at the University; or
 - (4) Outstanding service to the Libraries as evidenced by continuing leadership and innovation.
- Nomination forms are available at the following library locations: Arts (E405 Pattee), Architecture (207 Eng. Unit C), Earth and Mineral Sciences (105 Deike), Engineering (325 Hammond), Information Desk (C102 Pattee), Life Sciences (E205 Pattee), Mathematics (110 McAllister), Physical Sciences (230 Davey), and all Commonwealth Campus Libraries. Nominations should be sent to Jack Pontius, chairman of the Awards Jury, Eo Pattee.

Wharton to discuss challenges to ag development

Clifford R. Wharton, chancellor of the State University of New York system, will present a public lecture, "Four Challenges to Agricultural Development," at 4:30 p.m. on Thursday, March 5, in Room 112 Kern Building.

His talk is sponsored by the College of Agriculture and Gamma Sigma Delta. An economist, Dr. Wharton earned his B.A. at Harvard, master's degrees at Johns Hopkins and the University of Chicago, and his doctorate at Chicago. He was associated in various capacities with the Agricultural Development Council from 1957 through 1969, serving in the Singapore region, as director of the Council's American university research program and finally as its vice president.

From 1970 to 1978, Dr. Wharton was president of Michigan State University, leaving to assume his post at SUNY.

He has served as an advisor to the government on numerous occasions. He was a member of the Presidential Task Force on Agriculture in Vietnam (1966) and of a State Department advisory panel on East Asia and the Pacific (1966-69). A member of the Presidential mission to Latin America (1969), he has been serving on the Presidential Commission on World Hunger since 1978.

Since 1976, he has been chairman of the Agency for International Development's (AID) Board of International Food and Agricultural Development. He serves also as trustee or director of the Rockefeller Foundation, Asia Society, the Overseas Development Council, the Carnegie Foundation and the Agricultural Development Council.

Tax reform to be subject of joint presentation

Four affiliates of the Pennsylvania Tax Commission, two of whom are Penn State faculty members, will present and discuss the commission's recommendations for State and local tax reforms in Pennsylvania at 2 p.m. on Monday, March 9, in Room 204 Keller Building.

The four are Carol Smith, tax commission member assigned to local non-real estate taxation; Robert Strauss, research director for the tax commission and professor of economics at Carnegie-Mellon University; James D. Rodgers, research director for local non-real estate taxes and professor of economics at Penn State; and Michael Wasylek, research director for sales taxation and assistant professor of economics at the University.

Two-day workshop at Breazeale Facility

A two-day workshop on the use of Newton Activation Analysis will be conducted Tuesday and Wednesday, March 3 and 4, at the Breazeale Nuclear Reactor Facility.

The workshop is open to faculty and staff members and students who have a desire to learn more about this method of analysis, one of the most sensitive techniques available for trace element identification and quantification.

The workshop will consist of one day of lectures and one day of laboratory experiments to enable participants to become familiar with the instrumentation and facilities available for use at the Breazeale Facility.

There is no charge for this workshop, but those who are interested in attending should contact Dale C. Raupach at 865-6352.

Penn State Intercom

Pennsylvania State University Conversion to an Early Semester Calendar (Effective Fall Term, 1983)

From: President John W. Oswald
To: The University Community

Introduction

In September of last year I asked the University community to join me in considering a change to an early semester calendar. In that letter, I reviewed Penn State's calendar history for the last 20 years; I expressed my own view that an early semester calendar would provide a preferable learning environment. Under the policies of the Board of Trustees, the President of the University has the responsibility for determining the calendar of the institution but only after consultation with faculty, students, and the University Council. In considering a major change in the academic calendar the policies of the University community were solicited as widely as possible.

I invited each individual member of the University community to express his or her calendar views to me. In addition, University groups such as the Faculty Advisory Committee, the Council of Academic Deans, the University Council, and the University Faculty Senate and its committees were specifically requested to consider the calendar question and offer advice to me.

Between September, 1980, and early January, 1981, over 100 communications, many from groups rather than individuals, came to me expressing a range of views on the calendar question. On November 11, 1980, the University Faculty Senate devoted essentially an entire meeting to a forensic session on the calendar question. All Senate committees made reports describing the perceived impact of a calendar change in the area for which each is responsible. In addition, a number of Senators, and two senators, addressed the Senate regarding the proposed calendar change.

The Deans of the colleges, assisted by the Department Chairmen, solicited the views of their faculties and reported those views to me through the Chairman of the Council of Academic Deans; Capitol Campus and the University Libraries also responded through that channel. At my request, the University Council invited the responsible persons in the non-academic areas of the University to consider a calendar change and report its probable impact. Many student organizations, at University Park and at the Commonwealth Campuses, considered the calendar question, an ad hoc group known as the Committee for Credible Student Input sponsored discussion forums in the Hetzel Union Building and polled a sample of the student body on the question.

All of us could have predicted before this broad consultation that the opinions and views of the total University community would vary widely. Some expressed strong opposition to any calendar change; others expressed equally strong support for the early semester change, and still others variations of these. Locally, at Penn State and elsewhere, the question of a calendar change has often been, at least in part, an emotional issue. I

take pleasure in reporting that the communications which came to me on the calendar question, no matter the strength of conviction of the writer on either side of the issue, addressed the calendar conversion question and did not, with rare exception, impugn the motives of anyone who had a different view on the subject.

All the material received has been read and reread. A number of studies of specific questions relating to the calendar change impact have been analysed. The calendar patterns at research universities with missions similar to Penn State have been considered. The magnitude of the conversion effort has been carefully weighed. At the outset in September, 1980, I identified some issues which were most likely to emerge as the most critical if the University were to convert to an early semester system. Among these were teaching load, availability of laboratory and large classroom space, faculty research, faculty contracts, conversion of courses, curricula, and schedule. As your responses came to me, these issues were, indeed, the major concerns to many of you.

Study to date demonstrates that availability of laboratory space and large classroom space is not likely to hinder operation of a semester calendar; some changes in procedural control and use of classroom space may be required. The question of faculty contracts turned out not to be an issue.

While some persons continue to fear damage to the research thrust of the University in a semester calendar, I believe that the workload in instruction is the real concern with regard to research opportunities; otherwise, it is difficult to understand how institutions such as the University of North Carolina, Columbia University, the University of Wisconsin, the University of Pennsylvania, Purdue University, Yale University, the University of Illinois, Harvard University, Indiana University, and Johns Hopkins University can achieve significant productivity in research under an early semester calendar.

Finally, the question of teaching load and concern about the time and effort to be spent on curriculum revision seemed to emerge as the most critical concerns of those opposing the conversion to an early semester system. As I have stated earlier, I believe that the major curriculum review and revision inherent in a calendar change will be a very invigorating and healthy process. The teaching load question seems to have differential impact by college, by department, by campus, and by individual. Studies which have been made indicate that solutions can be found to the workload problem in the particular colleges and at the particular campuses where it appears to be most critical.

The decision to change to an early semester calendar has not been made primarily on cost considerations. The information available to me demonstrates that the change in operational cost of the

University will be modest. Over time, administrative activities occurring twice each academic year instead of three times will constitute a savings or a cost avoidance. In the same vein, the winter break has not been designed to achieve significant increases in fuel energy savings. However, an early semester calendar creates a situation where an extended midwinter recess could be used, if it became necessary, without major disruption to the academic processes of the University.

Policy Affecting the Academic Calendar Beginning Fall 1983

By this memorandum, I hereby direct that The Pennsylvania State University will convert to an Early Semester Calendar effective in the Fall of 1983. Further, this memorandum sets forth the principles that will govern the new calendar and the conditions that will govern the conversion. In recognition of the complexity of making this change, a Calendar Conversion Council has been created which will have the responsibility, directly from my office, for implementing an orderly and equitable conversion. Finally, the first five calendars 1983-84, 1984-85, 1985-86, 1986-87, 1987-88 are set forth in detail.

Principles Governing the New Calendar

Now to the specifics of the new early semester calendar, the conditions under which it will be put in place, and the processes whereby the conversion can be made:

In my September letter to the University Community, I had suggested the summer of 1984 for the conversion, if it were made. On further reflection in recent weeks, I concluded that a three and one-half year period between the decision and its effective date is longer than really necessary for careful planning and implementation. In fact, that long a time might inadvertently lead us into a degree of procrastination that would be harmful to the process and to the University. I also note that many institutions have made calendar conversions successfully in less time than two and one-half years.

The first five years (1983-1988) of the new early semester calendar are presented in the following pages. As a brief review will demonstrate, the calendars follow a predictable pattern based on these principles:

- All instruction for the fall semester, including examinations, will be completed before the midwinter break.
- Fall and spring semesters will include 14 weeks of instruction exclusive of

registration, orientation, and the final examination period.

- Except in those years in which Labor Day falls on September 7, the first day of classes in the fall semester will be the Tuesday immediately following Labor Day. When Labor Day falls on September 7, the first day of classes in the fall semester will be the Wednesday immediately preceding Labor Day. (In the first 25 years of the new calendar, 1983-2007, Labor Day falls on September 7 only three times.)
- The summer session will include eight weeks of instruction exclusive of registration, orientation, and the final examination period; but maximum encouragement will be given to the programmatically necessary development of two, three, four, five, or six week modules within the eight week frame.
- The normal class period will be 55 minutes with a 15 minute interval between classes. While a three credit course will usually meet for three 55 minute periods each week, the class schedule will be structured to accommodate other than three credit courses and to accommodate class meeting schedules different from the three weekly norm. (The 55 minute, three times a week class meeting over a 14 week semester produces 60 minutes more per three credit course than the current class schedule.)
- The regular class schedule in the fall and spring semesters and summer session will be Monday through Friday of each week. Facilities will be available on Saturday for special instructional purposes.
- The final examination period will include six days in the fall and spring semesters and three days in the summer session.
- Commencements will be held following the spring semester and the summer session. (The reduction from four ceremonies per calendar year to two will provide a modest savings.)
- In the fall semester, holidays will be observed and classes suspended on Labor Day, Thanksgiving Day, and the Friday immediately after Thanksgiving Day.
- The spring semester will include one calendar week of spring holidays to occur at the midpoint of the semester.
- In the summer session, a holiday will be observed and classes suspended on Independence Day or on July 3 or July 5 when Independence Day falls on Saturday or Sunday respectively.
- The midwinter academic recess between the end of the fall semester and the beginning of the spring semester will include more than 14 and fewer than 21 days.

(Continued on next page)

• The time periods between semesters and between a semester and the summer session are, excepting officially designated University holidays, opportunities for research, scholarship, and other professional and academic pursuits. Many functions of a University, including research, ongoing study by many students — especially graduate students — scholarly activity, and administrative operations, transcend the formally scheduled academic calendar and will go on during those "between times."

Conditions Governing Conversion to the Early Semester Calendar

In addition to the principles on which the new calendars were drawn, it is necessary to state, in some cases restate, the conditions which will govern the calendar conversion. These conditions are:

- The total tuition for an academic year will not increase as a function of the calendar change.
 - There will be no reduction in any individual faculty salary as a function of the calendar change.
 - There is and will be no administrative requirement that the faculty teaching loads under this early semester calendar have a particular arithmetical relationship to a load under the current term system; for example, it is erroneous to assume that a current load of two three credit courses per term must automatically result in three three credit courses per semester.
 - The responsibility and authority for reexamination and revision of the degree programs and the service courses rest with the academic departments under the authority of the Department Chairman and the Dean of the college. While the recycling of funds which has been in process for several years is likely to continue, a reduction in the credit output of a department as a function of the calendar change will not automatically result in a decrease in that department's budget.
 - The conversion to the early semester calendar cannot be used as a basis for requiring Commonwealth Campus students to transfer to University Park earlier than may now be the case in a particular program.
 - While the early semester calendar provides two parts to the academic year as compared to the three of the term calendar, the University intends to make every effort to keep maximum flexibility for students and programs. As an example, consideration should be given, where academically appropriate, to combining a course together with its practicum so as to make full use of the semester calendar.
- responsible to me as Chairman of the Calendar Conversion Council. Dean Bartoo will be assisted in this task by Dr. James R. Dungan of the Office of Planning and Budget. Additional staff support, as required, will be made available.
- The Calendar Conversion Council will continue its responsibility until the end of the first year, 1983-84, of the new early semester calendar. Faculty and staff members of the Council will serve through 1983-84 barring unforeseen circumstances. The student members will serve on the Council through their term of office with the Graduate Student Association or Undergraduate Student Academic Assembly and will be followed on the Council by their elected successors.
- Members of the Calendar Conversion Council are:
- James B. Bartoo, Dean, Graduate School, Chairman;
 - Robert A. Bernoff, Director, Ogontz Campus;
 - Carol A. Cartwright, Chairperson, Task Force on Faculty and Staff, *A Perspective on the '80s* and Professor, Curriculum and Instruction, College of Education;
 - James R. Dungan, Special Assistant, Office of Planning and Budget, Secretary;
 - Robert E. Dunham, Vice President, Undergraduate Studies;
 - A. Daniel Frankforter, Associate Professor, History, Behrend College;
 - Wendell V. Harris, Head, English Department, College of the Liberal Arts;
 - Henry J. Hermanowicz, Dean, College of Education;
 - Peter Irvin, President, Graduate Student Association;
 - John F. Kavanaugh, Chairman, Academic and Athletic Standards Committee, University Faculty Senate and Professor, Veterinary Science, College of Agriculture;
 - John D. Martz, III, Chairman, Research Committee, University Faculty Senate and Head, Political Science Department, College of the Liberal Arts;
 - Richard L. McCarl, Immediate Past Chairman, Undergraduate Instruction Committee, University Faculty Senate and Professor, Biochemistry, College of Science;
 - George J. McMurtry, Immediate Past Chairman, University Faculty Senate and Associate Dean and Professor, Electrical Engineering, College of Engineering;
 - Gary Mullen, Associate Professor, Mathematics, Shenango Valley Campus;
 - Rosemary Schraer, Assistant Provost;
 - Ted Szklenski, President, Undergraduate Student Academic Assembly;
 - Leonard N. Zimmerman, Associate Dean, Research and Professor, Bacteriology, College of Science.

The Calendar Conversion Council

A considerable effort will be required in virtually every unit of the University, academic and nonacademic, in order to complete the conversion by the beginning of the fall semester, 1983. Because a calendar conversion is a unique and noncontinuing activity at a University, I concluded that it was best to appoint a Calendar Conversion Council to expedite and coordinate the implementation of the conversion. While the Calendar Conversion Council may find it necessary to initiate policy formulation on occasion and to suggest policy changes, it is expected that normal University channels and approval mechanisms will be utilized in the determination of new or revised policy.

Dr. James B. Bartoo, Dean of the Graduate School, has agreed to serve as the executive officer of the University

Calendars for 1983-84 through 1987-88

The calendars for 1983-84 through 1987-88 are:

1983-84		
FALL SEMESTER		
Arrival Date	Monday	August 29
Orientation & Registration	Tuesday-Friday	August 30-September 2
Labor Day Holiday	Monday	September 5
Classes Begin	Tuesday	September 6
Thanksgiving Holiday	Thursday-Sunday	November 24-27
Classes End	Wednesday	December 14
Final Exams	Thursday-Saturday	December 15-17
	Monday-Wednesday	December 19-21

1983-84		
SPRING SEMESTER		
Arrival Date	Tuesday	January 10
Orientation & Registration	Wednesday-Friday	January 10-12
Classes Begin	Monday	January 11-13
Labor Day Holiday	Monday	January 16
Spring Holiday	Monday-Friday	March 5-9
Classes End	Friday	April 22
Final Exams	Monday-Saturday	April 30-May 5
Spring Commencement	Saturday	May 12

1983-84		
SUMMER SESSION (8 WEEKS)		
Arrival Date	Sunday	June 10
Orientation & Registration	Monday-Tuesday	June 10-12
Classes Begin	Wednesday	June 13
Independence Day Holiday	Wednesday	July 4
Classes End	Wednesday	August 8
Final Exams	Thursday-Saturday	August 9-11
Summer Commencement	Saturday	August 18

1983-84

Aug.	5 19	6 20	7 21	8 22	9 23	10 24	11 25

A - Arrival Date E - Commencement H - Holiday X - Classes End
B - Classes Begin C - Exam Period R - Orientation & Registration

Those persons in the University community who have participated in the calendar discussion will have noticed that some issues which concerned some segments of the University have not been addressed in the statement. Revised procedures for sabbatical leaves, the specifics of the class schedule, new patterns for academic advising, special courses for the transition years of 1982-84, a full definition of the new summer session are among the issues to be resolved. While all are important, the principles and conditions included in this statement provide a framework for their resolution by the University with the assistance of the Calendar Conversion Council.

Dean Bartoo and the Calendar Conversion Council will be responsible to me for developing the additional or amended guidelines, procedures, and target dates for the variety of actions necessary to the calendar conversion.

Senate discusses TA training, the role of Council, PS-23 proposals

Last week, the Senate gave a Forensic Session — but hardly any faculty members came.

Looking about at the 64 senators who stayed to discuss recommendations from the Joint Senate/Administration Commission report on PS-23, Ernest Bergman deplored the absence of his colleagues, noting that he thought "the discussion was for faculty, not the administrators who are the ones still here."

Attendance at the March meeting was down from about 160 to 135 senators because of the term break, and much of the day's debate was devoted to several legislative reports. The forensic session did not begin until about 4:20 p.m.

Although the Senate did discuss a legislative report from Undergraduate Instruction on training programs for graduate student teaching assistants, no vote was taken because the legislation had not previously been sent to the Committee on Academic and Physical Planning for "costing."

The first proposal recommends that teaching training programs be established for all TAs and apportion responsibility for content and execution among program heads, deans and the Office of the Vice President for Undergraduate Studies.

Ensuring a suitable standard of spoken English for all TAs for whom English is a second language is addressed by the second recommendation.

Most of the discussion, however, was centered on Recommendation 3, which suggests that freshmen be informed during Orientation that in some instances instruction will be provided by graduate student teaching assistants.

Undergraduate Instruction Chairman Robert J. Heinsnoth told the Senate that freshmen need this information because "many of them do not know who these people are"; and his predecessor, Richard L. McCarl, referred to it as "truth in packaging."

Objections were raised, however, by Engineering deans Nunzio J. Palladino and George McMurtry, as well as by E & MS associate dean John J. Cahill on the grounds that the University would seem to be apologizing for using TAs.

Turning to three legislative reports from Committees and Rules, which, because they deal with changes in the Senate's Constitution and Bylaws, had lain on the table for a month, senators first discussed a proposal to substitute the word

"authority" in each instance where the word "responsibility" is used.

Armed with definitions taken from Webster's, Dean Palladino prevailed upon the Senate to modify the proposal so that the Constitution (Article 1, Section 4) will read: "The Senate shall have the authority to redelegate responsibility and authority in the areas listed in Section 1, according to such procedures as the Senate may establish."

No discussion accompanied the second proposal by Committees and Rules, this one to abolish the Committee on Intra-University Relations. The vote was unanimously in favor of the proposal.

The third proposal, however, provoked the most debate of the afternoon. It

External review grants announced

H. Thomas Hallowell Jr., the Penn State trustee with the longest service of any member of the Board, has contributed \$100,000 to the University to encourage external program reviews.

His contribution will be matched by the Fund for Academic Excellence through the Richard King Mellon Charitable Trusts grant, Provost Edward D. Eddy told the Senate at its March meeting.

"The first \$100,000 from these two sources will be available on application from the Provost's Office for small grants to assist in the honoraria and expenses of an external program review in all academic colleges except the College of Engineering," Dr. Eddy said.

"Because of his special interest in Engineering, Mr. Hallowell has asked that the second \$100,000 be reserved as a discretionary fund for the new Dean of Engineering to cover such items as external program reviews if that Dean gives them a high priority."

Dr. Eddy hailed the genuine contributions resulting from the recent internal reviews of Penn State's undergraduate and graduate programs. Adding that he recognized how exhausting the experience had been for many faculty members and administrative officers, he warned, however, that the University "must not stand still or we will fall backward in a rapidly changing academic world."

External reviews can "keep alive our continuing commitment to regular health

check-ups," he said, citing the example of the Mathematics Department, which successfully completed such a review last year.

Turning to the subject of the Baccalaureate Degree Requirements, Dr. Eddy informed the Senate that beginning with the Summer Term of 1981-82, the University will move forward to implement BDR III. At the same time, however, he urged the Senate to join hands with the Provost's Office to "begin the cogitation on and planning for BDR IV."

"Everyone of us is caught in the press of day-to-day business," Dr. Eddy continued. "Inevitably — even in a citadel of higher learning — the emphasis turns too often to the mundane and practical and away from the philosophical."

"We move from 'why' to the bureaucratic query of 'how.'"

"It would be good for Penn State, as well as each of us, I trust, if we shifted our focus from time to time to fundamental questions, such as the nature of the Penn State education."

Dr. Eddy urged all academic units of the University to participate in wide-ranging discussion and debate on the basic expectations of Penn State's students.

"I'd welcome your individual ideas on how we, as an intellectual community, can begin to think about the bases of higher learning, the essence of the Penn State experience — not — at least for now — about policy and procedure but about hopes and maybe a few dreams."

Summer/Fall baccalaureate applicants up

As of March 4, applications for admission to Penn State's 1981 Summer/Fall baccalaureate degree programs were up to 7 percent over last year, and University Park admissions were "closed" based on applications received through Jan. 13.

"Things are going very well at this point," Admissions Dean Donald G. Dickson reports.

The Admissions Office, as of March 4, had received 13,400 completed application forms from students competing for the 4,190 spaces available at University Park in Summer/Fall baccalaureate programs.

"We have made about 8,300 offers to fill these spaces," Dean Dickson says, adding that admissions standards have been maintained at the same level as last year.

"The proportion of those accepting our offers ('paid accepts') is looking pretty good at this point," Dean Dickson continues. "We think we will be up from last year, although final figures won't be available for several weeks."

Three colleges have shown significant increases in the number of "paid accepts." They are Business Administration, Engineering and Science.

Applications for Commonwealth Campus spaces increased about 4 percent for baccalaureate programs

(Summer/Fall), and the number of offers out is about the same as it was at this time last year, according to Dean Dickson.

"The flow of applications for the Campuses tends to lag behind that of University Park," he explains.

Two categories of applicants — associate degree and advanced standing — are down about 10 percent from 1980. In the last few weeks, however, there has been a sudden spurt in the number of these applicants, and Dean Dickson thinks they may also be applying later.

In the face of a 1½ to 2 percent drop in the number of 1981 Pennsylvania high school graduates, the University has held its own as far as in-State applications are concerned. Freshman applications for all programs at all locations are up slightly over last year. Applications from outside Pennsylvania increased by about 25 percent.

"No one can be absolutely certain why the number of applications increased this year," Dean Dickson comments. "We'd like to think it's the cumulative effect of Penn State's intensified recruiting efforts. Certainly my staff has done much more, and many other offices have been involved with our increased efforts."

"I'd like to give credit to the College Deans and Campus Directors, who sent out follow-up letters; the Publications and Public Information offices for their help in new and rewritten publications; Management Systems, who helped us improve our processing; Campus

(Continued on page 6)

Undergraduate study in Leningrad available

University undergraduates will be able to take courses for academic credit at Leningrad State University beginning next summer.

By affiliating with the Council on International Educational Exchange, Penn State's Office of Foreign Studies and Department of Slavic Languages will be able to offer students options for summer, semester or full academic year study.

The Council has been coordinating student exchange programs with the U.S.S.R. since 1958, explain Foreign Studies Director W. LaMarr Kopp and Slavic Languages Head William R. Schmaling.

The six-week Summer Russian Language Program is geared to the abilities

of intermediate and advanced students of Russian.

Upper-intermediate and advanced students of Russian are eligible for the Semester Russian Language Program, which includes 14 weeks of intensive language study.

The Academic Year Program is designed for students with a minimum of three years of university-level Russian language study, who are majoring in history, economics, political science, sociology or Russian language and literature.

Students will live in dormitories with their Soviet counterparts and have an opportunity to participate in the student life of the university. Classes are

Candidates sought for Associate Dean position

Dr. James B. Bartoo, dean of the Graduate School, has appointed a search committee to seek and review nominations and applications for the position of Associate Dean of the Graduate School.

The committee consists of Dr. Herberta Lundgren, chair (Health, Physical Education, and Recreation), Dr. Phillip Cartwright (Education), Dr. Roland Fleischer (Arts and Architecture), Dr. Earl Graham (Earth and Mineral Sciences), Dr. Paul Grun (Science), Dr. Gerhard Reethof (Engineering), and Dr. Kathryn Towns (Capitol Campus).

The Associate Dean of the Graduate

Penn Staters

Dr. Samuel M. Curtis, professor of agricultural education at the University, has been named head of the Agricultural Education Department, effective March 1.

Dr. Curtis is serving currently as interim department head.

His primary research responsibilities include occupational education for the educationally disadvantaged, a multi-level curriculum model and development of a vocational technical catalog for the dairy farmer.

Dr. Curtis has written more than 25 articles and has authored two books.

He teaches courses in agricultural education program development, research in agricultural education, and teacher education in agriculture.

His teaching and research have been recognized with an Outstanding Service Award (Eastern Region American Association of Teacher Educators in Agriculture); an Honorary Keystone Farmer (Pennsylvania Association of FFA) award, chairmanship of the Publications Committee of the American Association of Teacher Educators in Agriculture, and the 1978 1st Award for Instructional Materials (Planning a Career in Agriculture) at the AATEA Eastern Regional Seminar.

Dr. Curtis holds B.S., M.Ed. and D.Ed. degrees from Penn State. He has been a Post Doctoral Fellow at the National Center for Research in Vocational Education at Ohio State University.

Dr. Samuel H. Levine, professor of nuclear engineering and director of the Breazeale Nuclear Reactor, has been appointed chairman of the Interatomic Energy Agency's (IAEA) steering committee on In-Core Fuel Management. Representing more than 100 countries, IAEA monitors the use of nuclear energy in nations that have signed the non-proliferation treaty, provides safeguards for nuclear materials, and guides underdeveloped nations in the peaceful uses of atomic energy.

His committee on In-Core Fuel Management will develop a single, coordinated set of computer codes to analyze nuclear reactor operations in terms of safety and economy. Most of the present codes are protected by patents and thus unavailable for use by smaller, underdeveloped countries.

Engineering Dean N.J. Palladino was one of 34 invited participants at a special meeting on "Nuclear Energy: Safety, Future Development, and Alternative Strategies," held at Ditchley Mansion near Oxford, England. The meeting was sponsored by The Ditchley Foundations, which were created to promote the study of issues of common interest to Britains and Americans, as well as other nationalities.

Dr. Gladys L. Ritchie was one of six alumni selected to receive a citation for achievement from William Jewell College at its Achievement Day program on March 6. Dr. Ritchie, associate dean for academic affairs of the CWC-CE system, graduated from William Jewell in 1952. She holds an M.A. from the University of Colorado and a Ph.D. from Temple.

Jesse F. Core, adjunct professor of mining engineering, has been elected to the National Academy of Engineering.

One of 63 American and 12 foreign engineers honored March 1 with the nation's highest engineering distinction, Professor Core was cited for "outstanding contributions to improvement of health and safety in coal mines and greater efficiency in coal mine layouts."

Those elected to the 17-year-old Academy are deemed to have made important contributions to engineering theory and practice, or to have demonstrated unusual accomplishments in the pioneering of new and developing fields of technology. The Academy now has 1,075 American members and 93 foreign associates.

Professor Core, who received his B.S. in mining engineering from Penn State in 1937 and was a Distinguished Alumnus in 1966, joined the University's faculty in 1977. Earlier that year he had retired as consultant-coal operations for the United States Steel Corporation, after 41 years in the coal industry.

Dr. Raymond G. Ayoub, professor of mathematics, was an invited speaker at the Conference on Algebra and Geometry held Feb. 8-12 at Kuwait University in Kuwait. Dr. Ayoub lectured on "Number Theory as a Source of Algebraic Ideas" and "A Recent Result in Cyclic Fields." The conference was sponsored by the Department of Mathematics of Kuwait University and the Kuwait Foundation for the Advancement of Sciences.

Dr. George E. Andrews, Evan Pugh professor of mathematics and department head, presented three invited lectures at UC-San Diego. His topics were "Partitions," "Ramanujan's 'Lost Notebook,'" and "The Attack on the Lusztig-Macdonald-Wall Conjectures."

Dr. Heinz K. Henisch, professor of the history of photography and a Fellow of the Institute for the Arts and Humanistic Studies, presented a slide lecture, "Early Photography in Eastern Europe," as part of a festival, "Cross-currents: East Europe and America," sponsored by the Center for Russian and East European Studies at the University of Michigan.

Dr. Joseph Jordan, professor of chemistry, presented a seminar entitled "Enthalpimetric Analysis" at Rutgers University on Feb. 26.

H. James Dunlop, buyer in the Department of Purchasing Services, has received the designation of Certified Purchasing Manager (CPM) from the National Association of Purchasing Management, Inc. The designation is awarded only to individuals who demonstrate proficiency in purchasing and who successfully pass four comprehensive examinations covering all phases of purchasing. Mr. Dunlop joined the staff in 1970.

Bookshelf

Two faculty members at the Beaver Campus have co-authored two text books.

Dr. Ronald J. Harshbarger and Dr. James J. Reynolds have written *Mathematical Applications for Management, Life, and Social Science and Selected Solutions for Mathematical Applications for Management, Life, and Social Sciences*. The books were published by D.C. Heath Company.

The 608-page text presents mathematical skills and concepts and applies them to areas that are important to students in business, economics, and the life and social sciences.

Dr. Harshbarger, an associate professor of mathematics, joined the University in 1965. A graduate of Shippensburg State College, he received his M.S. from the University of New Hampshire and Ph.D. in curriculum and supervision from the University of Pittsburgh.

Among his publications are *Essential Business Mathematics, Introductory*

Engineering honors four faculty members

The College of Engineering honored four of its faculty members at its annual Engineers' Week banquet on Feb. 28. The Outstanding Achievement in Research Award was presented to Dr. Stephen J. Fonash, professor of engineering sciences. Excellence in Teaching Awards were presented to Robert Barkowiak, professor of engineering at Allentown; William A. Daniels, instructor of aerospace engineering; and Dr. Inyong Ham, professor of industrial engineering.

Dr. Fonash, a Penn State graduate, received his Ph.D. from the University of Pennsylvania and joined the faculty in 1968. His research interests include photovoltaics; ion, gas, and temperature sensors; hetero junctions; liquid/semiconductor junctions; Schottky barrier-type devices; and thin film properties and devices. He initiated and directed a project to develop electrochemical photovoltaic cells for solar energy conservation, and he created the Thin Film Laboratory. His research has been sponsored by the National Science Foundation, NASA, Westinghouse, and Centre Nationale de la Recherche Scientifique.

Algebra for College Students, Intermediate Algebra for College Students, Business Mathematics, Students Guide to Introductory Algebra and Students Guide to Intermediate Algebra, all published by Harper & Row.

Dr. Reynolds, an assistant professor of mathematics, joined the Behrend faculty in 1969 and moved to the Beaver Campus the following year. His bachelor's degree was granted by Colgate University, and his M.A. and D.Ed. by Penn State. He is the author of a number of articles in mathematics journals.

Carpoolers

Share driving or accept riders. Alexandria to campus via Rt. 45. Hours: 7:45 a.m. to 4:45 p.m. Call Bev Jones, 865-9533. Home: 669-9182.

Cindy Breen would like a ride from Warrior's Mark, leaving about 7:30 a.m. and returning at 5 p.m. Call her at either 863-2616 or 692-8545.

Tom Lintner seeks to form a carpool to depart Huntingdon at 7 a.m. and State College at 5:30 p.m. He invites riders and/or drivers and may be contacted days at 865-2165 or evenings at 643-6313.

Promotions Faculty

David A. Martin to assistant professor of business administration at Schuylkill.

Staff Exempt

Richard M. Diruzza to dean of student affairs at Beaver.

Richard S. Harris to assistant manager, Commonwealth Campus engineering services in Physical Plant.

Nicholas G. Otzel to director of personnel services at Hershey.

Staff Non-Exempt

Deborah A. Berkish to senior research technician at Hershey.

Kim E. Leitze to research technician at Hershey.

Steven C. Swigart to research technician at Hershey.

John J. Wert Jr. to senior research technician at Hershey.

Elizabeth M. Witkowski to senior research technician at Hershey.

Clerical

E. Susan Bennett to patient unit secretary at Hershey.

Sherry A. Ishler to clerk, records A in Registrar.

Norine A. Kirk to clerk typist A at Beaver. Lori Ann McDowell to clerk registration A in Continuing Education.

Professor Barkowiak received his B.S. from Penn State and his M.S. in electrical engineering from Drexel University. He joined the Allentown Campus in 1964. On student evaluation forms, he usually averages a 4.49 out of a possible 5.0. Students stress his organizational abilities and his concern for undergraduates having trouble understanding course materials.

Mr. Daniels joined the university faculty in 1977. Besides carrying a substantial teaching load, he supervises student employees in the Rheology Laboratory.

The senior member to receive the teaching award, Dr. Ham began teaching at Penn State in 1958. Graduating seniors in industrial engineering have consistently named his IE 438 course, "Manufacturing Systems," as one of the most worthwhile courses they have taken. They cite Dr. Ham's outstanding knowledge, meticulous preparation and excellent pedagogy. In the Fall 1980, Dr. Ham introduced a new course, "Manufacturing Systems Engineering," which has become the most popular technical elective course in his department.

Melanie S. Romig to technical secretary C in Science.

Barbara Shulman to secretary B in Earth and Mineral Sciences.

Cindy J. Teets to secretary B, Continuing Education at Hershey.

Technical Services

William Bathgate to maintenance worker general C in Physical Plant.

Donald E. Garver to maintenance worker general B at Altoona.

John Gibbony to parcel carrier in Business Services.

Debbie J. Korman to baker-utility in Housing and Food Services.

Jack H. Phillips to bookstore helper at Delaware County.

Donald G. Rager to maintenance worker general A at Shenango Valley.

Steven A. Rayhorn to tire surgeon A, apprentice in Physical Plant.

Kim L. Yearick to technician, TV and electronics B in Agriculture.

Obituaries

Clarence E. Bullinger, who served as head of the Department of Industrial Engineering from 1930 until his retirement in 1955, died Feb. 20 at the age of 88. He earned his B.S. degree from Penn State in 1921 and joined the faculty as an instructor the following year. The author of two books and a number of articles, Prof. Bullinger served with a Purdue University foreign aid team in Taiwan after retirement and subsequently taught at Iowa State, Texas A&M, and the University of Richmond.

Tien-Hsi Cheng, professor emeritus of zoology, died March 3 at the age of 68.

A member of the faculty from 1949 to 1972, Dr. Cheng received his bachelor's degree in biology at Fokien Christian University in his native China. He earned a second bachelor's degree at Dickinson College, and M.S. and Ph.D. degrees at Ohio State University.

A 1964 recipient of the Lindback Award for Distinguished Teaching, Dr. Cheng also made a number of scientific contributions through his research on insecticides.

Margaret S. Salgiver, a clerk typist in the College of Agriculture from 1948 to 1970, died Feb. 22. A State College native, she was 58.

Rose M. Nazarenko, a nutrition aide supervisor in the College of Agriculture, died Feb. 21. A member of the staff since 1977, she was 60.

Faculty/Staff Alerts

Editor's note: The University issues a number of notices each year affecting personnel matters, benefits and the payroll at ALL campuses. To ensure that this important information is readily available, it will appear henceforth under the above INTERCOM heading.

1980 major medical claims due by end of March

March 31, 1981, is the last date on which the Employee Benefits Division will accept charges for a 1980 major medical claim for University employees or their dependents. A major medical claim is established if an employee reports \$100 of deductible, out-of-pocket medical expenses incurred during the calendar year 1980.

Charges that are acceptable for a major medical claim include doctors' office calls, prescribed drugs, private duty nursing (if medically necessary), local ambulance service, oxygen, physiotherapy, insulin and special equipment and appliances. Among charges not covered are routine physical exams, dental work, eye exams and lenses.

Itemized receipts should be obtained for deductible charges and submitted to the Employee Benefits Division with a claim form. In order to avoid delay of payment by the insurance company, all questions in the employee's section of the claim form should be fully completed. Cancelled checks and cash register receipts are not acceptable evidence of charges incurred.

Claim forms and additional information on how to report a major medical claim are available at the Employee Benefits Division, Room 133 Willard Building; the Business Offices at locations other than University Park; and the Personnel Office at the Hershey Medical Center.

Ad policy restated

The Office of Personnel Administration would like to remind faculty and staff members of the University policy regarding the placement of help wanted advertising.

The Manager of the Employment Division is responsible for reviewing the wording of all help wanted advertisements to ensure their compliance with State and Federal legislation and that a standard of public relations is maintained. (See PS-33, Help Wanted Advertising in the University Policy Manual.)

Anyone wishing to place classified advertisements for faculty or staff vacancies should contact Robert L. Kidder, manager, Employment Division, 865-1387 (Network number 475-1387) before taking any formal action.

Ask the Editor

Q: What is the University Policy on access to building and the issuance of keys to faculty?

A: Faculty have access to most buildings on campus during normal business hours. Keys are routinely issued to faculty for the building in which they have an office/lab and their office/lab. Issuance of any other keys is on an exception basis and justification must be made for the need for the additional keys. Requests for the issuance of additional keys are made through the Department Head or Dean to whom the area is assigned.

David E. Stormer
Director, University Safety

Senate

(Continued from page 1)

suggested revising the duties of Senate Council: the most controversial portion of the recommendation read: "It (Senate Council) shall recommend to the President and Provost on the establishment, reorganization or discontinuation of organizational units and areas of the University which involve two or more of teaching, research and continuing education functions."

At the present time, such recommendations are the province of the Senate's Committees on Undergraduate Instruction and Research and of the Graduate Council.

Marlyse Taylor pointed out that the Senate would be encouraging increased centralization at a time when the colleges need flexibility in planning. Senator Irwin Feller agreed that establishing another oversight body would blur the lines of responsibility between the colleges and Council.

Dr. Feller, an ex officio member of Senate Council, noted that the group was "an entity in search of itself" without a clear sense of whether it was a procedural body — whose job was to set the agenda for Senate meetings — or a more substantive body — which discussed the merits of committee recommendations and had the power to return a proposal to committee.

"The legislation is intended to address the mission of Senate Council," he said, "without making the point that it is necessary, that current procedures are inadequate."

Sally Small said that Council would assume some of the duties of IRC and provide a single group to look at issues from a total University point-of-view.

Dean Stanley F. Paulson of Liberal Arts said that, in his opinion, the legislation was so vague that it should be deleted or sent back to committee. Dr. McCarl suggested deleting the paragraph, and Edward G. Buss, who was presenting the legislation to the Senate, said he felt the legislation should be withdrawn if its intent was unclear.

As the debate continued, Arthur Lewis suggested that "if we have to find something for Senate Council to do, maybe we should abolish Council instead of IRC." Dr. Bergman made a plea for giving Council meaningful work.

Motions to delete the paragraph or return the measure to committee failed. However, the legislation was amended to read: "It shall advise upon consultation with the Committees on Undergraduate Instruction, Research and the Graduate Council, as appropriate, the President and Provost. . . ."

A fourth Committees and Rules proposal to broaden the workload and power base of the Senate was passed. The new legislation says: "Elected members of the Senate Council and members of the Committee on Committees and Rules of the Senate may not serve as members of standing committees of the Senate except in such ex officio capacities as may now or in the future be designated. This restriction of committee membership may be suspended on an individual basis by a 2/3 vote of the senators present at a regular or special meeting."

Elected members of the Senate Council will also be prohibited from serving on Committees and Rules.

In the hour-plus forensic session which followed, the Faculty Affairs Committee, which is studying the Joint Committee recommendations on PS-23, sought input from senators before preparing legislation. Six recommendations are under consideration. (Three were acted upon last June.)

Recommendation 4 questions whether college- and university-level review committees should make substantive judgments or concentrate on procedural matters.

Senator Daniel R. Frankl said that he

believed "the decision should be returned closer to where it was — to the appropriate department."

President Oswald, noting that the University is currently trying to strengthen even further the University-level review committee, said he thought it would be a mistake "to turn it into a computer and have it count but not be able to judge substantively. . . . I would hate to be in a position of receiving advice that is only procedural."

Dr. Oswald pointed out that he and the Provost have followed the recommendations of the University committee in 95 to 100 percent of the cases which it forwarded to them.

"Some of our best scholars, teachers and experienced academic administrators are members of this committee," he said, "giving it the breadth that is needed to cover an institution with the diversity of Penn State."

Similar sentiments were voiced by Senators Peter Bennett and Dr. McCarl. Capitol Provost Theodore Gross noted that if standards are not monitored throughout the University, colleges with weaker standards will become weaker while those with higher standards become stronger.

Recommendation 5 addresses the issue of whether Deans have the authority to veto a faculty member's candidacy for promotion and tenure. Dr. Bergman, a member of the Joint Commission, observed that the group had studied this issue exhaustively and concluded that "the buck has to stop somewhere and the Dean has to make some decisions. However, to make it more palatable," he added, "a Dean would be required to explain the decision."

Recommendation 6 asks whether there should be a "mission statement" in PS-23. Sherwood Stutz of DuBois protested what he saw as changing expectations of the faculty member's role. Cara-Lynne Schengrund, Faculty Affairs chairman, replied that PS-23 does contain a qualifier which speaks to changing needs and priorities in the institution.

Referring to the problem of weighting criteria for promotion and tenure, Peter A. Thrower said that "there may be no real answers to some of the questions which are being stirred up. How do you weight the contribution of an architect who designs a home for a friend?" he asked, "against the contribution of a geologist advising on a technical problem in the field?"

The use of teaching evaluations, the subject of Recommendation 7, provoked some discussion, with Dr. Heinsohn suggesting that individual faculty members, as well as administrators, have some input into devising evaluations. Responding to the complaint of a student senator about professors administering and tabulating their own evaluations, Dr. McMurtry acknowledged that there might be occasional abuses but said it was not fair to generalize or criticize the entire process of evaluation. Rather than try to devise a uniform policy, he suggested that evaluation instruments be prepared by individual units. Dr. Lewis concurred.

Richard G. Cunningham pointed out that evaluation forms may contain as many as 80 questions and proposed shortening them. Edward Klevans said that the University needed to develop guidelines for meaningful interpretation of the data collected on the forms.

Dr. McCarl concluded the discussion by remarking that while students can evaluate such matters as "whether I'm on time, whether I speak loudly or write well on the board," he was less certain of their ability to determine whether a textbook or subject matter was appropriate.

In discussing Recommendation 8, monitoring of the promotion and tenure process, Dr. Cahir — to applause — proposed acting "to streamline the process rather than make it more cumbersome."

A similar view prevailed in the consideration of Recommendation 9 on whether separate "Administrative Guidelines" should be issued annually.

Seminars

March 13-22

Tuesday, March 17
Organic/Inorganic Chemistry, R. Franck, Fordham Univ., on "Synthetic Approaches to the Olivomycins," 8 p.m., Room 333 Whitmore.

Thursday, March 19
Ceramic Science and Engineering, Roger R. Wills, Battelle Labs., Columbus, on "Host/Inorganic Pressing of Ceramics," 11 a.m., Room 301 Sieidle.
Chemistry, Yuan-Lei, Univ. of California/Berkeley, on "Molecular Beam Studies of Reaction Dynamics," 12:45 p.m., Room 333 Whitmore.

Economics/Institute for Policy Research and evaluation, Robert Clower, Univ. of California/Los Angeles, on "Foundations of Industrial Organization Theory," 2 p.m., Room 124 Sparks.

Physics, John Hall, National Bureau of Standards, Colorado, on "Precision Dye Laser Spectroscopy," 3:55 p.m., Room 445 Davy.
Agronomy, Andrew Rogowski, NE Watershed Research Center, on "Geostatistics in Agriculture," 3:55 p.m., Room 111 Tyson.
Fuel Science, Randy Winans, Argonne Labs., on "New Approaches to the Separation and Chemical Characterization of Coal Minerals," 4 p.m., Room 301 Sieidle.

Candidates

(Continued from page 1)

School is responsible to the Dean and serves as the academic officer in charge of graduate student programs. Specific duties of the position involve responsibility for the academic involvement and concerns of graduate students from their admission to graduation, involving: (1) registration, (2) admission, (3) maintenance of records, (4) appointment of graduate committees for doctoral students, (5) scheduling of doctoral comprehensives, (6) approval of students for graduation, and (7) handling of student academic problems.

The candidate must have an established record of scholarship and research and experience as a senior member of the graduate faculty in teaching and directing graduate student research. Knowledge of the policies and procedures of the Graduate School, and the ability to provide leadership, organize tasks and supervise staff are essential. Some experience in research management is desirable.

It is expected that the appointee will participate as a member of a graduate program faculty on a part-time basis.

This position will be available on July 1, 1981. Nominations and letters of application (with resumes) should be received by April 1 and addressed to: Dr. Herberta M. Lundegren, Chair, Graduate School Associate Dean Search Committee, 205 Kern Graduate Building, University Park, PA 16802.

AAUW requests donations for annual used book sale

The State College Branch of the American Association of University Women requests donations of all types of books for its annual used book sale to be held the week of April 27.

AAUW is also happy to receive LP records, art prints, sheet music, maps, dress patterns, children's magazines, literary and historical journals, and such specialized magazines as Antiques, Etude, Needlework, Arizona Highways, Popular Mechanics and Genealogy.

Donations may be left at the yellow collection bin on Aaron Drive at N. Atherton Street, at the box just inside the door of Thrift Drug on Westley Parkway, and at Schlus Memorial Library. For pickup of large donations, call 237-8068.

Proceeds from the sale, which is held at the Wesley Foundation, go to help local and national educational programs and fellowships.

University Park Calendar

Spring Term 1981

Friday, March 13

Orientation tours of Patee Library: 9 and 11 a.m.: 1 and 3 p.m.
Commonplace Theatre, *Gone with the Wind*, 7 p.m. only, Room 112 Kern. Also March 15.
Margaret LeCone, violin, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, March 14

Sports: ice hockey vs. Binghamton, 3:30 p.m.; gymnastics (men) and (women) vs. Pittsburgh, 8 p.m.
France-Cinema, Skolomowski, *The Shout*, 7 and 9 p.m., Room 112 Kern. Also March 16.
Artists Series, New York Woodwind Quintet, 8:30 p.m., Schwab Auditorium.
Student Foundation for Performing Arts, Pat Bond in "Gerty, Gerty, Gerty Stein is Back, Back, Back," 8:30 p.m., HUB Ballroom.

Sunday, March 15

Free U. registration, 11 a.m.-3 p.m., Room 225 HUB.
University Chapel Service, 11 a.m., Eisenhower Chapel. Lynn Shivers, Society of Friends, Philadelphia, speaker.
Sports: tennis (men) vs. George Washington, 1 p.m.
Annette Torregrosa, cello, 3 p.m., Music Bldg. Recital Hall.

Week of March 16

Monday, March 16

Fixed date for meetings involving Commonwealth Campus Four - March Conference. Also March 17 and 18.
Sports, Health and Recreation Activities Week, sponsored by HPER, through March 22.
STS/TCO, luncheon, noon; talk, 12:20 p.m., Room 101 Kern. Bert L. Fenner, music, on "Twentieth Century Canon: Technology, Dux, Music, Comes."
Coke Slide Club meeting, 7:30 p.m., Room 189 MRL.
HUB Craft Center, open house, 7:30-9:30 p.m., Room 312 HUB.
GSA Irish Social, Jim Corr and Friends, 8 p.m., Room 102 Kern.

Tuesday, March 17

IAHS lecture, 12:45 p.m., Room 313 Burrows. Alberto Limentani, Univ. of Padua, talks on Venice and medieval French literature (in French).
Comp. Lit. Film Series. *Duet for Cannibals* 77 and 9 p.m., Room 112 Kern.
History of Photography lecture, 8 p.m., Room 101 Kern. Naomi Rosenblum, photohistorian, New York City, on "Adolphe Braun (1812-1877), the Man and His Work."

Black Studies Program lecture, 7:30 p.m., Robeson Center. Edris Makwand, Univ. of Wisconsin, on "The African Sources of Alex Haley's Roots."

Wednesday, March 18

HUB Craft Center, Spring Term first session classes begin, Room 312 HUB.
IAHS lecture, 9:35 a.m., Room 328E Human Development. Alberto Limentani, Univ. of Padua, discusses Dante (in Italian).
Commons concert, Dan Johnson, noon, Kern Lobby.

Black Studies Symposium, 8 p.m., Robeson Center. Saunders Redding, Afro-American scholar, discusses Afro-American literature. English Colloquium, 8 p.m., Room 305 HUB. Joanne Troutman, humanities and English (Hershey), discusses her experiences as an instructor of medical students.
Koya Ohnoho, organ, 8:30 p.m., Music Bldg. Recital Hall.

Black Studies Program, "A Dialogue Between Edris Makwand and Saunders Redding," 2:20 p.m., Room 112 Sackett.

Thursday, March 19

15 University Faculty Senate meeting, 2:10 p.m.,
Room 112 Kern.

Thursday, June 4

15 Alumni Reunion Weekend, through June 6.

Sunday, June 7

15 Arrival date for 10-week Summer Term stu-
dents. Residence Halls open, 8 a.m.

TCD looks at art, technology

The "Three Cultures Dialogue" has begun a series of lecture-discussions that will examine the relationship between the arts and technology.

In launching the series, Warren S. Smith, professor emeritus, general education in the arts, emphasized that "technology is not a mere overlay on our civilization. It is part of our emotional response to the world, part of contemporary mythology."

Burt L. Fennel, professor of music, will pursue these ideas further in his March 16 lecture on "Twentieth Century Canon: Technology, Dux, Music, Comes," i.e. technology as the leading voice in the counterpoint and music as a companion voice that follows along.

Later in the Spring Term, Rob Fisher, the Belforte sculptor who designed the large water piece in the new Allenway Atrium and who is presently in the process of installing his largest work at the new Playboy Hotel-Casino complex at Atlantic City, will speak on "The Artist as Mad Scientist."

William H. Allison, professor of theatre, will discuss the applications of modern technology to the theatre. Philip Klass, professor of English and author of science fiction under the name of William Tenn, will relate technology to modern literature. Finally, Ellis Grove, associate professor of general education in the arts, will lecture on the film-maker as pitchman under the title, "A Bible, a Skull, and a Coil of Rope."

The intent of the dialogues, which are held in Room 101 Kern shortly after noon, is to bring together faculty members from wide-ranging disciplines. The programs are open to anyone interested. Those attending can secure luncheon at the Kern cafeteria or "brown-bag it."

The dialogues are announced in the INTERCOM calendar, and anyone wishing to be put on the regular mailing list for future announcements should write or call Ernest Hawk, Room 102 Materials Research Laboratory, 865-3424.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475 1387). Applications for these staff vacancies will be accepted until 5 p.m. March 16, 1981. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, sex, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

BUSINESS MANAGER, WILKES-BARRE CAMPUS. Responsible to Campus Director for all non-academic business affairs, including personnel and employee relations, purchasing, budget administration and control, student accounts, physical plant, maintenance and operations, utilities, safety, security, community relations, accounting procedures, auxiliary enterprises (bookstore and food service) and general services. Responsibilities include interviewing applicants for admission, counseling, for maintaining information on and advising students in need of financial assistance. Experience with various State and Federal forms highly desirable. Bachelor's degree with two to three years of effective experience in academic areas.

JANITORIAL FOREMAN, OGONTZ CAMPUS. Responsible to the Supervisor, Maintenance and Operations, for assisting in laying out, planning and scheduling janitorial work force. Also, for training, supervising, inventory control, inspecting of janitorial tools and power equipment, etc. High school graduate or equivalent training, plus over one year and up to and including two years of effective janitorial experience. Leadership qualities necessary. Experience in a supervisory capacity highly desirable.

News in Brief

Comp Center continues instruction restrictions

The increasingly heavy demand on services of the Computation Center requires the continuation of restrictions on instructional uses of interactive systems.

Faculty members at University Park who wish to request authorization for students in their 400 and 500 level courses to use RJE, APL or INTERACT interactive computer systems in the Spring Term, 1981, are asked to send their requests to E.R. Melander, chairman, University Advisory Committee on Instructional Uses of the Computer, Room 117 Old Main, by no later than the end of the first week of the term, March 19.

Requests should be for one type of interactive service and should include estimates of the number of students and the average weekly connection time per student for each course.

Schuylkill launches drive for Activity Center

The Schuylkill Campus has launched a Capital Fund Campaign to seek funds for a Student-Community Activity Center.

The campaign is aimed at meeting three most pressing needs of the Campus, as identified by the Development Committee of the Schuylkill Advisory Board. These include expanded food service and student lounge facilities, as well as a place to hold cultural affairs programs.

Dr. Wayne D. Lammie, Campus director, explains that at present only vending machines are available to the commuting students who represent about 85 percent of the 1,100-member student population. An auxiliary gym serves as a student center, and a classroom or gymnasium must be pressed into use as an auditorium.

The proposed center would include a snack bar with hot food service, a student activity area and a large lecture hall-auditorium.

The Schuylkill Campus Advisory Board hopes to raise \$500,000 for construction of the facility, and the University has agreed to contribute matching funds.

Conference welcomes University secretaries

University secretaries may attend the 25th annual Educational Secretaries Conference, April 23 to 25, at a reduced registration fee. The sessions will be held in Keller Building at University Park.

The main purpose of the conference this year is to bring together educational secretaries from across the state to pool ideas and share experiences related to their common occupation, to expand their educational backgrounds by providing informative workshop sessions, and to stimulate participation, enthusiasm, and pride in the profession.

Further information is available by calling 865-5141.

\$320,000 bequest made

A Charles Godfrey Binder Professorship in the College of Engineering, a Faculty Fellowship in the College of Business Administration and a scholarship fund for students interested in studying abroad will be established at the University.

Their creation is the result of a \$320,000 bequest from the estate of Lillian E. Binder, formerly of Merchantville, N.J. Mrs. Binder and her husband, a 1912 Penn State graduate, have been providing support for University students through a number of scholarship funds since 1964.

President Oswald hailed the Binder bequest as a significant and important contribution to the University's academic programs.

Mr. Binder, a Penn State engineering graduate, retired in 1948 as manager of the

Engineering Department of Warren Webster and Company, Camden, N.J. Previously he was employed by the Rochester Gas and Electrical Co., N.Y., and the New York State Department of Architecture in Albany.

A total of 159 Penn State students have received awards totaling \$131,000 from the Binder scholarship programs, which include the Charles and Lillian Binder Foreign Studies Grant-in-Aid Fund.

Italian medievalist to talk March 17-18

Dr. Alberto Limentani, professor of Romance languages at the University of Padua and a noted medievalist, will deliver two lectures next week under the auspices of the Institute for the Arts and Humanistic Studies.

On Tuesday, March 17, at 12:45 p.m., in Room 313 Burrows, he will speak in French on Venice and medieval French literature, on Wednesday, March 18, at 9:35 a.m., in Human Development East 328, he will speak in Italian on Dante. On the latter occasion, he will be introduced by Professor Alfred Triolo of the Department of Spanish, Italian, and Portuguese.

Both lectures are open to the public, but persons planning to attend are requested to inform Professor Gerard J. Brault, Department of French, who is coordinating the visit.

Tourism is subject of March 19 colloquium

Rolf Meyersohn, professor of sociology at CUNY's Graduate School and University Center, will speak on "Social Aspects of Tourism" at 7 p.m. on Thursday, March 19, in Room 112 Kern Building.

Dr. Meyersohn, who edited the book, *Mass Leisure*, a standard text in the area of popular culture, will present his remarks in a Health, Physical Education and Recreation Colloquium.

Creamery remodeled

The University Creamery, closed for remodeling during term break, reopened March 12 with new equipment and an improved ability to handle large crowds.

"The basic design is unchanged," Creamery Manager John Foley explained, "but we're replacing most of the equipment, which was about 30 years old. "We'll also add an improvement which will allow us to serve ice cream cones from two lines during peak periods — such as after a football game."

The remodeling is being paid for through Creamery sales receipts. No University or public funds are involved, Mr. Foley said.

Maple sugaring highlights HPER-sponsored program

Stone Valley Recreation Center and the Recreation and Parks department are sponsoring a "Maple Sugaring Sunday" at the Stone Valley Recreation Center on Sunday, March 22, from 1 to 5 p.m. The day's activities, which will feature a demonstration of old-fashioned maple-sugaring methods, will conclude a "Sports, Health and Recreation Activities Week" sponsored by the College of Health, Physical Education and Recreation.

To be included in the week's activities (March 16 through March 22) are open houses and special programs in the White Building, a synchronized swimming clinic for junior high and high school students in the Natatorium, and a Boy Scout "First Aid Jambooree" in White.

There is no charge for admission to any of the events except the "Maple Sugaring Sunday" (\$1 for adults and 50 cents for children), although registrations should be made before March 29 for participants in the synchronized swimming clinic by telephoning 865-1432.

UDIS to offer two seminars

The University Division of Instructional Services (UDIS) is sponsoring a two-part seminar entitled "Enhancing Classroom Communication."

The first session will be conducted on Monday, March 23, from 2 to 4 p.m., in Room 128 Mitchell Building and will be repeated on Tuesday, March 24. The second part will be scheduled for Monday, April 13, and repeated on Tuesday, April 14, from 2 to 4 p.m.

The seminar will be conducted by Mary Ann Chezik, a member of the UDIS Instructional Improvement staff, and Maryellen Gleason of the Speech Communication Department.

The seminar will emphasize a variety of factors affecting the success of communication. In particular, the importance of attending to the four main elements of every communication situation (speaker, listener, message and environment) will be stressed. The information presented will specifically address the communication situation of the classroom, with the speaker being the instructor, the listener being the students, and the message being the course content.

Part I of the seminar will concentrate on the roles of speaker and listener in both the verbal and non-verbal aspects of communication. Delivery, style and methods of gaining and holding attention will be discussed.

Part II will build upon the information presented in Part I, and it will deal specifically with the message and environment of classroom situations. Strategies for structuring lectures, selecting methods of presentation and adapting to various classroom environments will be presented.

A discussion period will follow the presentation. Small group follow-up sessions will be arranged for participants interested in pursuing the topic in greater detail.

The seminar is limited to 35 participants on a first-come basis. For more information and to make reservations, call 863-0668.

Funding Sources

For further information, call 865-1372

(354-1) The U.S. Department of Commerce, National Oceanic and Atmospheric Administration (NOAA) has issued a University Affairs Letter including announcement of: (1) a March 31, 1981, deadline for \$5 million in current year funds for university R & D; NOAA's Office of Marine Pollution Assessment (208-525-0651); (2) the availability of a report, "Ocean Services Through the 80's"; (3) the form and procedure for Inter-governmental Personnel Act (IPA) term appointments between Federal agencies and institutions of higher education; and (4) an explanation of R & D Cooperative Agreements compared with grants and contracts. Copies of the eight-page announcements have been distributed to ACOR and are available.

Applications

(Continued from page 1)

admissions staffs for their increased cooperation; and all those students who took part in our telethons. The list could go on.

"Clearly, then, a lot more has been done, but we'll have to see the 'yield' figures next Fall before we can draw any final conclusions about our success."

Arts Roundup

'History of Photography' includes numerous events

Eight illustrated lectures have been arranged for this year's History of Photography Events, which will be held from March 17 through April 29 in Room 101 Kern.

As a bonus, an exhibition on "Photography and Humor" will be displayed in the Rare Books Room of Pattee Library from March 23 through April 30.

Adolphe Braun, *The Man and His Work*, the first lecture, will be given by photohistorian Naomi Rosenblum at 8 p.m. on Tuesday, March 17. As a textile designer in Alsace in the 1840s, Braun became involved in photography when it was still a new art form. He established a publishing company, "Braun and Cie," in an effort to bring great works of art in the form of photographic reproductions to a wide audience.

Dr. Heinz K. Henisch, professor of the history of photography and a Fellow of the Institute for the Arts and Humanistic Studies, will present the second talk, "Focus on Vienna," at 4 p.m. on Friday, March 20. Dr. Henisch will discuss 19th century Vienna's contributions to photographic invention and style through the work of Petzval, Voigtlander, Esterhazy, Mach, the Angerer brothers, Kuhn, Watzek, Henneberg, Brenda and d'Ora. Photojournalism and fashion photography in 19th century Vienna will also be discussed in Dr. Henisch's presentation.

"Photography and the Quest for the Third Dimension" will be the subject of a talk at 8 p.m. on Monday, March 23, by Gillian Greenhill, a graduate student in the Department of Art History. She will analyze the technical and aesthetic impact of the peep-show, the eidiophusikon and the diorama—all of which preceded the development of photography.

Dr. Henisch and Ms. Greenhill, along with Bridget Henisch and L.P. Greenhill, director emeritus of UDIS, arranged the exhibit in the Rare Books Room.

Kathleen Fuller, a graduate student working with Dr. Henisch, will give the fourth lecture, "Photography and Politics," at 8 p.m. on Thursday, March 26. Ms. Fuller will explore the stylistic means by which photography has been used since the 1850s to promote political and social causes such as nationalism,

Poking fun at early photography was the object of this 1866 cartoon — from the "Photography and Humor" exhibit in the Rare Books Room.

women's suffrage, housing reform, religion, charity programs and party platforms.

"Photography and the New Deal" is the title chosen by photohistorian and anthropologist John Collier Jr. to describe his attempt to trace the efforts of the Farm Security Administration photographers of the Great Depression and their role in shaping new social values. As part of his talk — at 2 p.m. on Friday, March 27 — Mr. Collier will evaluate the subsequent attempts that have been made to form similar photographic groups.

Photohistorian Robert C. Snider will give the sixth lecture, "From Talbot to Television," at 8 p.m. on Monday, April 20. His subjects include the relationship of photography and the humanities, modern electronic imagery, and the potential of the camera to create greater humanistic understanding in the world.

"Photojournalism: Ambition and

Reality" will be considered by John Faber, photohistorian of the National Press Photographers Association, at 8 p.m. on Tuesday, April 21. As part of his discussion of photojournalism as a profession, he will tell the stories behind some of the most famous news photographers.

The eighth and final lecture, "The Great Exhibition of 1851," will be given by Charles W. Mann, IAHS Fellow and chief of Rare Books and Special Collections for the University Libraries, at 8 p.m. April 29. His presentation at 8 p.m. on Wednesday, April 29, will include selections from the prose, engravings and photographs which the Exhibition generated.

The 1981 History of Photography Events are being sponsored by the Institute for the Arts and Humanistic Studies, the Departments of Art History and English and the School of Journalism; and they are being coordinated by Dr. Henisch.

Black films, literature play role in social change

The University's Black Studies Program will continue its program on "Black Films and Literature as a Vehicle for Social Change" this month.

"The African Sources of Alex Haley's *Roots*" is the title of a lecture by Dr. Edris Makward, professor of French and African literature at the University of Wisconsin, set for Tuesday, March 17, at 7:30 p.m. in the Robeson Cultural Center.

A native of Bathurst, Gambia, Dr. Makward is former head of Wisconsin's departments of African American studies and African languages and literature, and is co-author of the textbook, *African Literature*.

His lecture will examine the cultural background for Haley's research, including the strong Gambian oral tradition which enabled Haley to trace his ancient heritage.

The well known black author/educator, Saunders Redding, will give "A Critique of Afro-American Literature" on Wednesday, March 18, at 8 p.m. in the Robeson Center.

Dr. Redding is Ernest I. White professor emeritus of American studies and humane letters at Cornell University. His books include *To Make a Poet Black*, *The Negro*, and *Cavalcade: Negro American Writing from 1760 to the Present*.

A dialogue between Dr. Makward and Dr. Redding will be held March 18 at 2:20 p.m. in Room 112 Sackett at a special session of English 139 — "Black American Literature." Instructor Virginia Thornton will moderate the informal discussion, which will be open to the public.

All events are sponsored by the Black Studies Program with the Robeson Center, the Committee on International Programs of the College of the Liberal Arts, the English Department and the Student Film Organizations.

Tour to National Gallery will 'Search for Alexander'

The Central Pennsylvania Society of the Archaeological Institute of America will sponsor a bus excursion on Thursday, March 26, to the "Search for Alexander" exhibit at the National Gallery in Washington, D.C. The bus will leave the main entrance of the HUB at 7 a.m., and will depart from the Gallery at 4:30 p.m. The round-trip fare is \$14, and reservations can be made by calling the Department of Classics at 865-8851.

On the Tuesday preceding the trip (March 24) at 8 p.m. in Room 102 Forum Building, Dr. Eugene N. Borza, associate professor of history, will discuss "The Search for Alexander" Exhibition: Some Background and a Preview." Professor Borza played an important role in setting up the exhibition, and the public is welcome at his illustrated talk.

Chambers exhibit set

An exhibition of multi-media two-dimensional works by Frank Chetelat and sculpture by Eduard Betenas will open in the University's Chambers Gallery Monday, March 16. It will continue through April 7.

Leningrad

(Continued from page 1)

conducted in Russian by instructors on the university's Preparatory Faculty for the Teaching of Russian as a Foreign Language.

Eleven universities and colleges have joined in sponsoring the Cooperative Russian Language Program in cooperation with the Council on International Educational Exchange. They are:

The City University of New York, Dartmouth College, Georgetown University, University of Illinois, Indiana University, University of Kansas, Michigan State University, University of Minnesota, Oberlin College, Tufts University and University of Washington.

URTC to stage Chekov's 'The Cherry Orchard' next

Anton Chekov's masterful comedy, *The Cherry Orchard*, will be the first of the Penn State University Resident Theatre Company's two Spring 1981 productions. The play opens Thursday, March 19, and continues through Saturday, April 4, in the Pavilion Theatre. Curtain is at 8 p.m.

According to Director James W. Assad, who also staged URTC's productions of *The Shadow Box* and *Ah, Wilderness!*, *The Cherry Orchard* is a comedy of characters rather than of situation.

Set in 19th century Russia, the play employs the cherry orchard as a metaphor for social change. The orchard, which no longer bears fruit but is still beautiful to behold, must be sold to pay debts accumulated by the aristocratic family that owns the trees. Whether landowner or serf, each character must adapt to the loss of the orchard.

For reservations to *The Cherry Orchard*, as well as URTC's second spring production, the Sherlock Holmes mystery, *The Crucifer of Blood*, call 814-865-1884. Tickets also may be purchased by mail from the URTC box office, Room 137 Arts Building, University Park, Pa., 16802, or in person at the box office in the Arts Building lobby.

M.F.A. candidate James Caldwell (center) is flanked by Equity players Peter Umbras and Suzanne Gilbert in URTC's upcoming production of "The Cherry Orchard."

President Oswald presents '81-82 Appropriation Request

Editor's note: The following article, which is the first of two on the subject, has been prepared from the Statement presented by President Oswald during the University's budget hearings March 2 and 10 before the House and Senate Appropriations Committees. Material taken directly from the 1981-82 Budget Presentation booklet is indicated by quotation marks.

"The 1981-82 appropriation request for The Pennsylvania State University, approved by its Board of Trustees on September 26, 1980, is the product of extensive and careful analysis and planning. Our planning efforts are designed to review continually the University's programs and services, and to modify them where necessary to serve better the changing needs of the Commonwealth and of its citizens.

"As the University enters the decade of the '80s, its major focus is on the themes of quality, selectivity, and flexibility. In the face of continued inflation and financial stringency, the continued aid and support of the Commonwealth, combined with the University's effective management of its human and financial resources, will enable it to meet these challenges.

"For 1981-82, Penn State is encouraged that the State administration has continued to recognize the critical funding needs of its Land-Grant University in a period of fiscal stringency in the overall State budget. The recommended 5.3 percent appropriation increase for Penn State is equitable, not only among the segments of higher education but also with recommended increases in the overall State general funds budget. Unless augmented by the General Assembly, however, it would appear once again that it will be necessary to increase tuition rates beyond the projected 5 percent inclusion in this budget request.

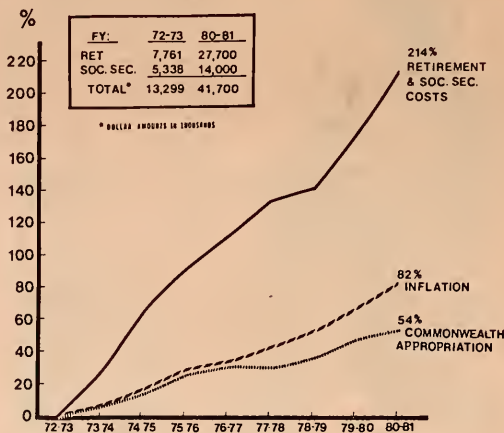

"The requested increases in State appropriations for 1981-82, as described in the sections following, are related entirely to projected increases in the University's basic costs of operation. Penn State is increasingly hard pressed to cope with rapidly escalating inflationary costs. Some examples are:

- Goods and services the University must purchase, which are increasing in cost at an even higher rate than that of the nation's general, double-digit inflation. These include fuel and utilities, library books and periodicals and certain types of critically needed instruction and research equipment.

- Significant increases in retirement and Social Security costs, which are mandated by external agencies and are not under the University's control. The amount paid for retirement costs, primarily to the State Employees' Retirement System, has increased by 257 percent since 1972-73. Social Security costs have escalated by 162 percent over the same period. (See graph.) Penn State will pay over \$27.7 million for retirement costs and \$14.7 million for Social Security costs in 1980-81. Between 1972-73 and 1980-81, the University's appropriation increased by \$44,346,000. Of this amount, \$28,401,000 — or 64 percent — has been required to meet mandated cost increases in retirement and Social Security."

- While State appropriations have increased almost every year during this decade, the value of the appropriation in terms of purchasing power has declined significantly. Comparing the State appropriation per equivalent full-time student in terms of current and constant 1972-73 dollars shows that Penn State is operating with a per-student appropriation which, in "real dollars," has declined by almost 23 percent over the last several years.

- To offset partially this decrease in purchasing power, substantial increases in tuition rates have been necessary, including a 10.5 percent increase for 1980-81. Currently the tuition rate of \$1,641 for

% CHANGE IN RETIREMENT & SOCIAL SECURITY COSTS vs. INFLATION & APPROPRIATION SINCE 1972-73

undergraduate students at University Park is the second highest of all major public Land-Grant institutions — well over 80 percent higher than the average tuition rate for 1980-81 at these comparable institutions.

"The University is concerned that each year a larger share of the increased costs of education falls upon the students and their families. Since 1972-73 tuition charges have risen sharply by 92 percent — higher than the 82 percent increase in the general rate of inflation and considerably higher than the 54 percent increase in State appropriations during the same period.

"For 1980-81 Penn State received a per-student appropriation of \$2,132, which is \$662 less than the average appropriation per student for all other publicly supported four-year institutions in Pennsylvania."

"To overcome the effects of inflation, the University has achieved several important economic goals and has made internal reallocations.

"Rising costs have outstripped income every year for the past several years. Because of this, the University's management has worked assiduously to economize wherever possible. Since 1971-72, more than \$23.4 million have been cut back from operating budgets and reallocated to other areas of greater priority and need. For the first two or three years, these were "across-the-board" reductions. In the last several years, our internal budget reductions have been more and more selective, and have been used as a primary means of internal resource reallocation to areas of greatest priority or need. In a sense, over the past decade, Penn State has been following a procedure not unlike the one suggested in the Governor's Budget Policy Guidelines for 1981-82. These internal cutbacks and reallocations represent nearly 10 percent of the University's 1980-81 General Funds Budget and demonstrate our determination to examine closely all existing programs and activities and to take action to reduce expenditures wherever possible through effective management.

"The University's reputation rests upon the quality of undergraduate and graduate teaching. Penn State faculty members have absorbed increased teaching loads during this period of financial stringency. Between Fall Term 1972 and Fall Term

1980, enrollment increased by 17.5 percent (from 47,024 to 55,274), while the number of full-time faculty members decreased by 4.8 percent (from 3,175 to 3,029). Both administrative staff and faculty members have been assigned heavier workloads. There were 243 fewer academic and non-academic personnel on Penn State's payroll in October of 1980 than there were in October, 1976.

"Substantial resources have been reallocated among colleges and departments to provide for shifts of enrollments among programs. For example, student interest and enrollments in recent years have shifted away from the lower cost humanities and social sciences toward the much more costly engineering and computer science programs. It has been necessary to redirect the use of resources as best we can to provide for additional faculty members and equipment in these growing areas.

"To help preserve the quality of the University's academic programs, nearly 70 percent of the budget reallocations have been made from nonacademic units. In many programs and departments the number of personnel has been reduced to permit shifting resources to meet essential needs and unavoidable costs increases. These include costs of fuel, utilities, and other supplies and services, growing retirement, Social Security, and group insurance costs, and essential salary and wage adjustments for employees."

The University's requested increases in State appropriations are explained as follows:

After a careful analysis of each of the major expenditure categories, we project that the University's proposed general funds for 1981-82 will be \$274,954,000 — a modest increase of 8.4 percent over the 1980-81 level. The University is requesting a total appropriation of \$144,740,000 or an increase of \$17,700,000 over the 1980-81 appropriation.

The University is requesting an appropriation increase of \$16,024,000, or 12.9 percent, over the 1980-81 appropriation level for General University Operations (excluding Hershey). The total appropriation requested is \$140,168,000.

"The budget is based on the following general principles:

- "1. Stable enrollment is anticipated for 1981-82. Enrollment for 1980 Fall Term was at a second consecutive all time high

of 55,274 students enrolled in resident instruction courses. It is clear that Penn State continues to serve larger numbers of students than at any previous time in its 125 years of service to the Commonwealth.

- "2. The emphasis of the proposed budget is placed entirely on provisions to cope with the rapidly escalating inflation of costs, which affects the goods and services which the University must purchase. The budget seeks to provide for:

- Essential and competitive salary adjustments for employees.
- Requirements for mandated fringe benefits cost increases (primarily Social Security-base and rate changes, retirement cost increases, and increases in group insurance costs).
- Increases in the costs of operation, including supplies, services, fuel, utilities, library books and materials, instruction and research equipment, and increased costs of critically needed maintenance of the University's physical facilities.

- "3. On the income side, the plan includes an average 5 percent tuition rate increase for all students except Doctor of Medicine students, for whom tuition rates are already at the \$5,550 level. There is no question that the individual student benefits from his or her education at the University and, therefore, should be expected to share in the increased costs of the education. The State also benefits from Penn State's programs, not only through having a more highly educated citizenry, but also through the significant social, economic, technological, and cultural contributions of the University's research and public service programs. Over the years, students have been paying an unduly high proportion of the increased costs. This budget plan at the University's requested level of appropriation recognizes that the contribution of the State must be brought into better balance with that of the student; therefore, the tuition rate increase should be proportionately less than the increase in State appropriations.

- "4. As has been the case for several years, no funds are requested for program improvements or new programs. New program initiatives are essential to the University's vitality, but they will be provided for through the continuing program of internal resource reallocation or from non-State sources of funds.

"The basic State appropriation support for medical education has not been increased since 1971-72. The costs of medical education have increased even to a greater extent than the costs of other University operations. In the absence of increased appropriation support, the University has had to rely on very substantial increases in tuition to offset partially the ever higher operating costs. Tuition for Pennsylvania residents has increased by 455 percent since 1971-72 (from \$1,000 to \$5,550 per year). Non-resident students pay \$8,670.

Consequently, no tuition increase is proposed for medical students. The increase in basic support requested of the State is \$1,676,000 and represents the equivalent of approximately 4.7 percent annual increases in State appropriation over the ten-year period."

News in Brief

Nominations sought for Hetzel, Walker Awards

The University is seeking nominations of outstanding seniors for two prestigious annual prizes: the Ralph Dorn Hetzel Memorial Award and the Eric A. Walker Award.

Nomination forms are available at the offices of the deans of the colleges, the HUB desk and Room 235 Boucke Building. The forms should be returned to the Office of the Vice President for Student Affairs, Room 235 Boucke, by Friday, April 3.

The Hetzel Award recognizes the achievements and potential of outstanding seniors who have demonstrated

responsible leadership, in addition to academic achievement, during their college careers and who give promise of public-spirited service in the future.

The Walker Award recognizes a senior whose activities and achievements have enhanced the public esteem and renown of the University.

Both awards are presented during the Spring Term Commencement, though recipients may have graduated during the preceding Fall or Winter Terms. Spring and Summer Term 1981 graduates also are eligible.

IAHC, German to sponsor four lectures

Four visiting scholars and writers will present lectures on German language and literature during Spring Term under the sponsorship of the Department of German, with support from the Institute for the Arts and Humanistic Studies.

"German Studies in Sweden" will be the topic of Dr. Helmut Mussener, professor at the German Institute at the University

of Stockholm. Dr. Mussener, who specializes in the study of German abroad and in German literature in exile, can be heard on Tuesday, March 24, at 8 p.m. in Room 167 Willard Building.

Dr. Walther Huder, professor at the Free University of Berlin and director of Archives at the Academy of Arts in West

Senate questionnaire

The Senate Committee on Faculty Affairs is doing the last part of its study on sabbatical leaves by sending a questionnaire to a stratified, random sample of the faculty at all locations. If you are asked to respond, your reply by March 30 will be important to the study.

Berlin, will speak on "Die goldenen Zwanziger Jahre" on Monday, March 30, at 8 p.m. in Room 124 Sparks Building.

The third lecture, which is under the auspices of the Linguistics Program, will be presented by Dr. Wolfgang Dressler, a professor and department chairman at the University of Vienna. His topic is "Sociolinguistic Problems of German as Spoken in Austria," and his presentation is scheduled for Tuesday, April 7, at 8 p.m. in Room 167 Willard.

The final lecture will be offered by the East German writer and translator, Fritz Rudolf Fries, during the week of April 20. The date, time and place of his talk will be announced later.

Satellite teleconference

Broadcasting Services in Continuing Education conducted Penn State's first nationally distributed satellite teleconference on March 12. Entitled "Higher Education and Cable TV," the 90-minute teleconference originated from the WPXK-TV studios in

(Continued on page 3)

Pennsylvanians dance 'Coppelia'

Tickets are available for two performances of the Pennsylvania Ballet's critically acclaimed production of *Coppelia*. The Artists Series will present the troupe in Eisenhower Auditorium on Saturday, March 21, at 8:30 p.m. and on Sunday, March 22, at 3 p.m.

When the Pennsylvania dancers presented *Coppelia* in New York City, Barton Wimbler wrote in the *Daily News*: "The most beautifully designed, wittily directed, consistently entertaining *Coppelia* seen in this city for one long, long time . . . Every dancer on stage is communicating her joy and acting his part, no matter how small, with youthful enthusiasm."

Delibes's delightful ballet is about a young man who falls so deeply in love with a beautiful doll that he imagines it has come to life. Swanilda, the young man's girl friend, wins back her lover by dressing up as the doll.

Tamara Hadley, who will dance Swanilda, has been applauded by audiences and critics alike for her portrayal. The part of Franz will be danced by William DeGregory. Clive Barnes of the *New York Post* said: "DeGregory is already an exceptional partner and his dancing has a brightness and brilliance that could take him far." Other performers include Sari Braff as Coppelia, the mechanical doll, and Dana Lafontise as the eccentric Dr. Coppola.

Founded in 1963 by Penn State alumna Barbara Weisberger, with the artistic support of her mentor George Balanchine, the Pennsylvania Ballet is one of the most remarkable success stories in the contemporary performing arts field. Aided by a Ford Foundation grant, the Company progressed from its first performance outdoors on a country estate on Philadelphia's Main Line to two seasons at

the University of Pennsylvania's Irvine Auditorium and then in 1966 to Philadelphia's Academy of Music, the Company's home for 10 years.

In 1968 the Pennsylvania Ballet opened at New York's City Center and became overnight "a major force in the world of dance." Artistic Director Benjamin Harkavy, founder of the Netherlands Dance Theatre and director of the Harkness Ballet, joined the Company in 1972. He is the principal architect of the Company's style.

Each year, the Pennsylvania Ballet performs in New York City as the resident company of the Brooklyn Academy of Music. The Company began an active touring schedule in 1965.

Tickets are now on sale at Eisenhower Auditorium and the HUB Booth, weekdays, 9 a.m. to 4 p.m. Phone orders on MasterCard/Visa may be placed by calling 863-0255 during sale hours.

Schuykill students have unique chance to study Pennsylvania German

"Throw me down the Stairs my Coat" and "Pass me over the Table the Butter" are expressions most Pennsylvanians would identify instantly as "Pennsylvania Dutch."

But Pennsylvania Dutch is really Pennsylvania German, and the distinction is important, according to Earl C. Haag, assistant professor of German and English at the Schuylkill Campus.

"Pennsylvania Dutch," from the German *Deutsch*, is the term Pennsylvanians of German descent would use themselves in describing their language," Professor Haag explains, "but in scholarly use, 'German' is preferred in order to avoid confusion with the Dutch of Holland."

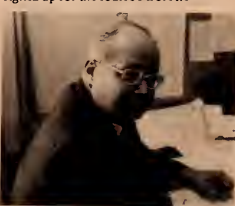

Professor Haag offers at the Schuylkill Campus perhaps the only opportunity anywhere for students to study Pennsylvania German, which is "almost identical" to the dialect spoken in the Palatinate, an area in Southern Germany to which most Pennsylvania Germans trace their heritage. He also teaches what he believes are the only courses on Pennsylvania German culture and literature.

The reason Professor Haag is fairly certain his courses are unique has to do with a "slight" problem he had to overcome while teaching the language

course for the first time — the lack of a textbook.

"I had planned to use a Pennsylvania German grammar book by the late Dr. Albert Buffington (a Penn State professor), but I discovered the book, the only one of its kind, had been out of print since 1957," he explains.

Since some 65 persons had already signed up for the course before he

Professor Haag

discovered the total unavailability of a text, Professor Haag resolved the problem the only way he could — he wrote a book himself.

"Fortunately, I have an extensive background in German, so the undertaking was more exciting than difficult," he recalls. "The greatest

challenge was having to finish a chapter each week, sometimes just in time for the next class meeting."

He did it, though, and the book, *A Pennsylvania German Reader and Grammar*, consists of 14 chapters, each focusing on an aspect of Pennsylvania German culture. Accompanying the German text are English translations.

Professor Haag had the book — which currently exists in the form of duplicated "hand-outs" — copyrighted in 1979.

He attributes some of the popularity of his "German Language and Culture" course to the old Pennsylvania newspaper tradition of running columns in Pennsylvania German. Several newspapers still run such columns on a regular basis.

These columns, which trace their origins to the mid-1800s, form the basis of a second course developed by Professor Haag, "Pennsylvania German Literature." "Of the large amount of existing Pennsylvania German literature, some is good enough to be classed with the world's great literature," Professor Haag says. He adds that Pennsylvania German poetry — by such authors as John Birmelin — is especially well known, although the prose is often of equally high quality.

"Charles C. Moore and Lloyd Moll are writers of exceedingly good short stories,"

he observes, "and a number of other prose writers have produced very good pieces. Such poets as Birmelin and the ultra-modern Russel Gilbert have written what I consider to be some of the world's best poetry."

Professor Haag notes that most of the Pennsylvania German literature he is using in his course first appeared in newspaper columns and has been reproduced in books published by the Pennsylvania German Society.

But because many of these books are also out of print, he is faced with the same problem — no single, unified book to use for the course.

As a result, he again has decided to develop his own text, an anthology of Pennsylvania German literature, which, like the reader and grammar book, would be the only one of its kind.

In the meantime, he is duplicating his materials, including original title pages to give his students a feeling for the literature and the old books in which it was first collected.

He and his students can also get a taste of the old books — and the literature they contain — from a special collection donated to the Schuylkill Campus library by Edward G. Fox, president of the Schuylkill Campus Advisory Board and a 1925 Penn State graduate.

Penn Staters

Dr. Carol Farley Kessler has received a fellowship from the National Endowment for the Humanities. An assistant professor of English and American studies at Mont Alto, Dr. Kessler will spend the next year in residence at the University of Maryland preparing a monograph on the contributions of literature to the women's movement.

Dr. B. Lakshminarayana, professor of aerospace engineering and director of Computational Fluid Dynamics Studies, participated in the International Symposium on Air Breathing Engines held in Bangalore, India, Feb. 16-22. This meeting was co-sponsored by the International Committee on Air Breathing Engines, the American Institute of Aeronautics and Astronautics, the Indian Council of Scientific and Industrial Research, and UNESCO. Dr. Lakshminarayana's paper, "Analysis of Turbulent Boundary Layer on Cascade and Compressor Rotor Blades," was co-authored with T. R. Govindan, an aerospace engineering graduate student.

Dr. Roberto Lima, professor of Spanish and comparative literature, presented an invited lecture at the Symposium on Literary Theory and Ideology sponsored by the Programme in Comparative Literature and the Department of Hispanic and Italian Studies at the University of British Columbia. Dr. Lima's topic was "Towards Gnosis: Exegesis of Valle-Inclán's *La lampara maravillosa*."

Dr. I.S.T. Tsong, associate professor of materials research, presented papers on "Hydrogen and Chlorine Detection at the SiO₂/Si Interface" and "Dating of Obsidian Artifacts by Depth Profiling of Artificially Hydrated Surface Layers" at the Fifth International Conference on Ion Beam Analysis held in Sydney, Australia, in February. Dr. Tsong was elected chairman for the next Ion Beam Analysis Conference, which will be held at Penn State in 1983. While in Australia, Dr. Tsong also gave a seminar at Monash University in Melbourne.

Dr. James W. Kelz, professor of education and director of Rehabilitation Education Programs, will present an April workshop in Florence, Italy, on "Community Approaches to Rehabilitation of Psychiatric Patients." The workshop will be part of an international seminar, "Counseling for the Integration of the Handicapped in Society," under the auspices of the United Nations International Year of the Disabled. It is being sponsored by the International Round Table for the Advancement of Counseling.

The new president of Wilson College is **Dr. Mary-Linda (Sorber) Merriam**, former research associate at the Individual and Family Consultation Center in Individual and Family Studies.

Dr. Merriam received her B.A. (65), M.A. (67) and Ph.D. (70) degrees in speech communication from Penn State. After leaving the University, she held several positions at Emerson College, including vice president for administration, and then served as assistant to the President at Boston University.

Bookshelf

Dr. Keith E. Nelson, associate professor of psychology, is the editor of a series of books titled *Children's Language*, which is being published by Gardner Press of New York.

The books, six in all, will present a survey of most of the major research done in recent years on children's acquisition of language. The second volume appeared in 1980, and Volume 3 will be published this spring.

"Only within the past 15 or so years have scientists paid much attention to the

subject," says Dr. Nelson. "Now, though still small, the field has attracted a growing number of researchers, some hoping to help children who, because of aphasia, retardation or various other reasons, have problems learning to communicate."

Dr. Nelson recently received a National Science Foundation grant to continue studies in which he and his graduate students, using tape recorders, collect and analyze samples of mothers talking to their young children. By observing the children over a period of time, they can compare various mothers' strategies and analyze how they help or hinder children in acquiring linguistic facility.

Dr. Sheldon Baum, associate professor of radiology and director of nuclear medicine at Hershey, is the principal author of the recently published book, *Atlas of Nuclear Medicine Imaging*.

The atlas, designed for use by radiologists and others working in nuclear medicine, is the first comprehensive single-volume atlas on the subject. More than 2,800 illustrations are used to present both normal and abnormal radionuclide imaging studies for various parts of the body. The atlas is published by Appleton-Century-Crofts, New York.

A relatively new field that developed rapidly in the 1960s, nuclear imaging involves using radioactive materials to highlight selected parts of the body so that disease and other abnormalities will stand out in x-ray type images of the area. Using nuclear imaging, physicians now can diagnose certain conditions without having to perform more invasive procedures.

Appointments

Michael M. Micci as assistant professor of aerospace engineering. B.S., M.S., U. of Illinois; Ph.D., Princeton U.

Joseph M. Russo as assistant professor of horticulture. B.S., St. Louis U.; M.Sc., McGill U.; Ph.D., Cornell U. Formerly postdoctoral research associate, N.Y. State Agricultural Experiment Station.

James W. Travis as assistant professor of plant pathology. B.A., Gettysburg College; M.S., PSU; Ph.D., North Carolina State U.

Jeremy L. Waller as research associate at ARL. B.S.M.E., M.S.M.E., Ph.D., PSU. Formerly assistant professor, PSU; senior engineer, Westinghouse Corp.

Alexander V. Mirzo-Moghadam as research assistant at B.S., UC-Santa Barbara; M.S., UC-Berkeley.

Douglas B. Beegle as instructor, agronomy Extension. B.A., Lycoming College; M.S., Penn State.

Promotions

Staff Exit

Diane Freytag to associate director in Undergraduate Admissions.

Nancy K. Gardner to associate director in Undergraduate Admissions.

Cathy A. Loffredo to chief technologist/laboratory support services at Hershey.

Robert P. Lynott to accountant in Controller's Office.

George A. Patrick to financial officer in Controller's Office.

Meredith C. Swauger to employment specialist/training coordinator at Hershey.

Brenda M. Taylor to programmer in Agriculture.

Christine L. Templeton to administrative assistant in Liberal Arts.

Staff Non-Exempt

Roxanne S. Burkholder to respiratory therapy clinical specialist at Hershey.

Clerical

Martha B. Coleman to inventory clerk in Controller's Office.

Lisa Fayewicz to clerk records A in Engineering.

Stacy L. Hanley to clerk stenographer A in Engineering.

Janet A. Hurtack to secretary A in Engineering.

Deborah E. Leis to senior clerk at Hershey.

Linda C. Marquardt to secretary B in Agriculture.

Gladyes E. McMahon to teller in Controller's Office.

Shirley W. Meck to secretary C in Agriculture.

Pamela J. Williams to accounting clerk in Controller's Office.

Joyce E. Zeager to secretary C at Hershey.

Technical Service

Barbara A. Bush to group leader — animal caretaker at Hershey.

Ronald B. Hartman to family housing project worker in Housing and Food Services.

Brian L. Hasinger to ice pavilion attendant in Health, Physical Education and Recreation.

James G. McKillop to maintenance worker general B at New Kensington.

Curtis Randall to laboratory maintenance technician in Science.

James L. Watson Jr. to vending machine server in Housing and Food Services.

Partings

Dr. Charles Taylor, professor of human development, retired March 15 with the rank of professor emeritus of human development and psychology.

Dr. Taylor served on the faculty for more than 16 years, first as professor of psychology and specialist on aging in Continuing Education and, since 1967, as professor in the Colleges of Human Development and Liberal Arts.

Before coming to Penn State, he was a member of the faculty of Brigham Young University and director of the Utah Council on Aging.

Dr. Taylor received two bachelor's degrees from Syracuse University, a license from the University of Paris and his doctorate from Syracuse University.

Various aspects and issues of the aging process are among his research interests, and he has written many professional articles.

He has served as president of the Rocky Mountain Gerontology Association, president of the Western Association for the Gifted, consultant to the National Institute on Aging, and member of the board of editors of the publication *Industrial Gerontology*.

Dr. Taylor will move to the Tampa, Florida, area, where he will continue scholarly activities on the creative process and on humanistic literature in aging.

Elwood C. McClellan, elevator mechanic in the Office of Physical Plant, retired Feb. 19 after working for the University since 1961.

"I've really enjoyed the job's variety; it was always interesting because we made many different kinds of repairs and performed many maintenance procedures," Mr. McClellan says in describing his role in servicing and repairing the University's elevators.

Mr. McClellan — whose retirement plans include working around his Port Matilda property, along with hunting and fishing — began his University service as an oil burner-helper. He assumed his position as an elevator mechanic about three years later.

Mr. McClellan intends to remain active in the State College VFW and with Bellefonte's Undine Fire Company, of which he has been a member for 29 years.

Woodrow W. White, assistant professor of engineering at Worthington Scranton, retired March 1. He had been at the campus since Sept. 1, 1962.

Robert E. Smith, a plumbing and piping maintenance worker in Physical Plant, retired March 7. He joined the staff on June 3, 1974.

Russell N. Pennebaker, a guard at the Applied Research Laboratory, retired on March 1. He had been a University employee since April 1, 1963.

Elsie R. Burd, food service worker in Housing and Food Services, retired March 8. She had been a University employee since Sept. 15, 1961.

Chester J. Kalwarski, a group leader — maintenance worker at New Kensington retired March 1. He had been with the Campus since Feb. 1, 1970.

Hazel Minarik, a residence hall worker with Housing and Food Services since May 7, 1963, retired March 3.

Staff development

An Oral Communications/Talking with People Course was taken by the following staff employees:

Kent Addis, conference coordinator, Continuing Education; **Edith Bender**, senior systems analyst, Management Engineering; **Joseph Capitos**, engineering analyst, Physical Plant; **Marie Clink**, assistant housekeeping supervisor, Housing & Food Services; **Shirl Dillon**, senior housekeeping supervisor, Housing & Food Services; **Gary Feitenberger**, assistant supervisor, Laundry Services, Housing & Food Services.

Myrtle Getz, associate housekeeping supervisor, Housing & Food Services; **Ted Kopp**, accountant, Libraries; **Kay Kustenhauer**, coordinator, Nittany Lion Fund & Public Relations, HPER; **Harold Levy**, affirmative action specialist, President's Office; **Jerry Sawyer**, utilization specialist, Continuing Education; **Milton Trask**, senior classification analyst/regional personnel officer, Personnel Administration.

Obituaries

K. Isabelle Holmes, a secretary with Continuing Education from 1945 to 1972, died March 7. She was 70.

Carpoolers

Linda Bartlett, 108 Althouse Laboratory, seeks a ride at 5 p.m. (Mon.-Fri.) to the intersection of Route 322 and West Drive in Boalsburg. She can be reached between 8 a.m. and 5 p.m. at 865-5497 or evenings at 466-7514.

Linda Stephens would like to share driving or join an existing carpool from Linden Hall to campus. Working hours are 8 a.m. to 5 p.m. Call 865-1331 or 466-6632.

Special Events

Thursday, March 19

Registration for Saturday Art Classes, ages 5 to adult, sponsored by School of Visual Arts. Call 865-6579. Classes begin March 28.
Ecumenical Faculty Forum, noon, Informal Lounge, Eisenhower Chapel. Robert D. Siler, classics, Dickinson College, on "Secular Teaching and a Christian Imagination."

URTC, Anton Chekhov, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Friday, March 20

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Alistair Fraser, meteorology, on "Sell It with a Rainbow."
History of Photography lecture, 4 p.m., Room 101 Kern. H.K. Henisch, history of photography, on "Focus on Vienna."
Commonplace Theatre, *The Last Waltz*, 7 and 8 p.m., Room 112 Kern.

Sports: tennis (men) vs. Swarthmore, 7:30 p.m.; ice hockey vs. Univ. of Pittsburgh, 9:30 p.m. Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.
Aulos Series, Pennsylvania Ballet Company with Orchestra, Coppelius, 8:30 p.m., Eisenhower Auditorium.

Saturday, March 21

Sports: fencing (women), AFLA Qualifying Meet; volleyball (men), Penn State Invitational; tennis (men) vs. Columbia, 2 p.m.; lacrosse (men) vs. Lehigh, 2:15 p.m.; ice hockey vs. Univ. of Pittsburgh, 8 p.m.
France-Cinema, Brusti, *To Forget Venice*, 7 and 9 p.m., Room 112 Kern.

Aulos Series, Pennsylvania Ballet Company with Orchestra, Coppelius, 8:30 p.m., Eisenhower Auditorium.

Sunday, March 22

Diversity, Chapel Service, 11 a.m., Eisenhower Chapel. The Rev. Lerrill White, Hillcrest Church of Christ, State College, speaker.
Sports: tennis (men) vs. Pittsburgh, 1 p.m.
Blaker's Creek Environmental Center, maple sugaring demonstration, 1-5 p.m., Stone Valley. Adults, \$1; children, 50 cents.

Aulos Series, Pennsylvania Ballet Company with Orchestra, Coppelius, 8:30 p.m., Eisenhower Auditorium.

Yvonne Shigley, clarinet, 3 p.m., Music Bldg. Recital Hall.

Union Board Concert, Buffalo Chickpeas and Whetstone Run, 8 p.m., HUB Ballroom.
Masterworks for piano and strings concert, 8:30 p.m., Music Bldg. Recital Hall.

Monday, March 23

Registration deadline.
Add deadline.

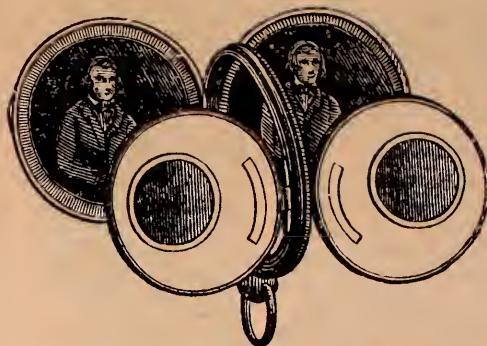

Registration for creative drama classes for children, sponsored by the Dept. of Theatre and Film. Call 865-7556 to enroll for April 6-May 20 program.

Commons videotape, "Austin City Limits," noon, Kern Lobby.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Kenneth Corey, Univ. of Maryland, on "Neighborhood Grantsmanship: An Approach for Grass-Roots Self-Reliance in the 1980s."

History of Photography lecture, 8 p.m., Room 101 Kern. Gillian Greenhill, grad. student, art history, on "Photography and the Quest for the Third Dimension."

Kathara Hawman, horn, 8:30 p.m., Music Bldg. Recital Hall.

An 1855 stereoscope (above) and an Austrian daguerreotype (below) are two photographic formats to be discussed in the History of Photography lectures scheduled March 20 and 23. (See calendar listings.)

Tuesday, March 24

Comp. Lit. Luncheon, 12:15 p.m., Room 204 HUB. Robert Fitzgerald, Harvard Univ., on "Translating Homer."
Comp. Lit. Film Series, *Enjo*, 7 and 9 p.m., Room 112 Kern.

Artists Series film, *Whale, The Bride of Frankenstein* (1935), 8 p.m., Schwab.
German Dept./IAHS lecture, 8 p.m., Room 147 Willard. Helmut Mussener, German Institute, Univ. of Stockholm, on "German Studies in Sweden."

Archaeological Institute of America lecture, 8 p.m., Room 102 Forum. Eugene Borza, history on "The Search for Alexander" Exhibit: Some Background and a Preview."

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Wednesday, March 25

Commons concert, noon, Kern Lobby.
STS/TC, luncheon, noon, talk, 12:20 p.m., Room 101 Kern. Rob Fisher, sculptor, on "The Artist as Mad Scientist."

Robeson Center Film Series, James Earl Jones in *Paul Robeson*, 7:30 p.m., Walnut Bldg.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

IAHS/Graduate School lecture, 8 p.m., Room 112 Kern. Robert Fitzgerald, Harvard Univ., on "A Translator's Homer."

The Alard String Quartet, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, March 26

Board of Trustees meeting, The Milton S. Hershey Medical Center.

Archaeological Institute of America, excursion to "The Search for Alexander" exhibit, Washington, D.C. Info: 865-8651.

Sports: tennis (men) vs. Brown Univ., 10 a.m.

History of Photography lecture, 2 p.m., Room 101 Kern. John Collier, photographer/anthropologist, San Francisco Art Inst. and San Francisco State College, on "Photography during the Great Depression."

History of Photography lecture, 8 p.m., Room 101 Kern. Kathleen Fuller, grad. ass., on "Photography and Politics."

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Friday, March 27

Sports: volleyball (men) vs. Army, 7 p.m. Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Mary Beth Lons, violin, 8:30 p.m., Music Bldg. Recital Hall.

Contemporary Dance Company, 8:30 p.m., Eisenhower Auditorium.

Saturday, March 28

Sports: fencing (women) vs. Temple, Cornell, Indiana (Pa.) and William Paterson, 9 a.m.; basketball vs. Navy (DH), 1 p.m.; lacrosse (women) vs. James Madison, 3 p.m.; volleyball (men) vs. Rutgers/Newark, 7 p.m.

Contemporary Dance Company, 2:30 and 8:30 p.m., Eisenhower Auditorium.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Penn State Percussion Ensemble, 8:30 p.m., Music Bldg. Recital Hall.

Artists Series, McCarter Theatre Company in *Moby Dick* Rehearsed by Orson Welles, 8:30 p.m., Schwab.

Sunday, March 29

University Chapel Service, 11 a.m., Eisenhower Chapel. The Rev. John J. Wenzke, PSU Lutheran Student Parish, speaker.

Seminars

Thursday, March 19

Ceramic Science and Engineering, William Rhodes, GTE Laboratories, on "Sintering

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Studies of Yttria-Based Systems," 11 a.m., Room 301 Steidle.

Chemistry, Yuan Lee, UC-Berkeley, on "Molecular Beam Studies of Reaction Dynamics," 12:45 p.m., Room 333 Whitmore.

Economics/Institute for Policy Research and Evaluation, Robert Clower, UCLA, on "Foundations of Industrial Organization Theory," 2 p.m., Room 124 Sparks.

Physics, John Hall, National Bureau of Standards, Colorado, on "Precision Dye-Laser Spectroscopy," 3:55 p.m., Room 445 Davy.

Agronomy, Andrew Rogowski, North East Watershed Research Center, on "Geostatistics in Agriculture," 3:55 p.m., Room 111 Tyson.

Fuel Science, Randy Winans, Argonne National Labs, on "New Approaches to the Separation and Chemical Characterization of Coal Macerals," 4 p.m., Room 301 Steidle.

HPER, Rolf Meyersohn, CUNY Graduate School, on "Social Aspects of Tourism," 7 p.m., Room 112 Kern.

Friday, March 20

Analytical Chemistry, Steve Zabarnick, grad. ass., on "Sensitive Electron Capture Sensitization," 11:10 a.m., Room 333 Whitmore.

Monday, March 23

Biochemistry, Richard O. Hynes, Center for Cancer Research, MIT, on "Fibronectin and Cellular Behavior," Part I, 4 p.m., Room 101 Althouse.

Tuesday, March 24

ARL, J.D. Maynard, physics, on "Near Field Acoustic Energy Flow," 10:45 a.m., Eric A. Walker Conference Room, Applied Sciences Bldg. (See receptionist.)

Biochemistry, Richard O. Hynes, Center for Cancer Research, MIT, on "Fibronectin and Cellular Behavior," Part II, 11 a.m., Room 101 Althouse.

Philosophy of Science, Glen Helman, philosophy, on "Bootstrapping: Glymour's Alternative to the Hypothetico-deductive Method," 3:45 p.m., Room 124 Sparks.

Organic/Inorganic Chemistry, R. Rudolph, Univ. of Michigan, on "Cluster Chemistry," 8 p.m., Room 333 Whitmore.

Thursday, March 26

Ceramic Science and Engineering, Jean Blachere, Univ. of Pittsburgh, on "Grain-Boundary Controlled Creep," 11 a.m., Room 301 Steidle.

Chemistry, Robert Bergman, UC-Berkeley, on "Transformations of Organic Compounds Mediated by Transition Metal Complexes," 12:45 p.m., Room 333 Whitmore.

Ecology/Anthropology, Paul W. Sherman, Cornell Univ., on "Nepotism and Kin Recognition in Ground Squirrels," 3:55 p.m., Room 8 Mutler.

Physics, David Lichtman, Univ. of Wisconsin, topic to be announced, 3:55 p.m., Room 445 Davy.

Agronomy, William Stringer, agronomy, on "Alfalfa Growth Striver and Cold Hardiness," 3:55 p.m., Room 111 Tyson.

Fuel Science, C.A. Mims, Exxon Research and Engineering Co., on "Kinetics and Mechanisms of Alkali Catalyzed Carbon Gasification," 4 p.m., Room 301 Steidle.

Anthropology, Louis Dupree, anthropology, on "The First Russian Afghan War: Reflections on the Cultural Components," 8 p.m., Room 101 Chambers.

Friday, March 27

Analytical Chemistry, Gary Simmons, Lehigh Univ., on "Electron Spectroscopic Studies of the Reaction of Corrosive Gases with Metal and Alloy Surfaces," 11:10 a.m., Room 333 Whitmore.

News in Brief

(Continued from page 1)

Wagner Annex and was beamed via satellite to more than 40 public television stations around the nation. The teleconference was funded by the telecommunications Demonstration Program of the U.S. Department of Education as part of a demonstration grant to PENNARAMA, Pennsylvania's continuing education cable television network service. Its purpose was to share information about how colleges and universities are using cable TV.

Alard plays March 25

March 25, the 100th anniversary of composer Bela Bartok's birthday, has been selected as the date for a concert by the Alard String Quartet. The concert will begin at 8:30 p.m. in the Music Building, Recital Hall.

The program will include Bartok's Quartet No. 1, Luigi Boccherini's Quintet for Guitar and Strings, featuring guitarist Lawrence Rich; and the Quartet in E Minor by Sir Edward Elgar.

The Alard String Quartet is composed of Joanne Zagst Feldman and Donald Hopkins, violinists; Raymond Page, violist; and Leonard Feldman, cellist.

Hyslop Reading Room open

The Francis Hyslop Reading Room, honoring the late professor emeritus of art history, has been opened on the second floor of the Arts Building.

The reading room's collection was donated to the Department of Art History by Dr. Lois B. Hyslop, professor emerita of

Romance languages, who collaborated on four books with her husband. The collection includes art journals from the past several decades, about 700 photographs and 9,600 postcards, 380 university prints, books and teaching materials for printmaking.

Dr. Hyslop, a member of the faculty from 1934 to 1974, was the first art historian hired by the University.

Persons wishing to visit the reading room may contact the Department of Art History at 865-6326.

President Oswald presents '81-82 Appropriation Request

Editor's note: The following article, which is the second of two on the subject, has been prepared from excerpts of the *Statement presented by President Oswald during the University's budget hearings March 2 and 10 before the House and Senate Appropriation Committees. Material taken directly from the 1981-82 "Budget Presentation" booklet is indicated by quotation marks.*

Penn State's 1981-82 budget request "is not just a document setting forth our needs as we view them for one year. Rather, it is presented in the context of the University as we view it over the next decade. Significant national trends have implications for Penn State's programs—increased student interest in career-related programs; the dramatic increase in the number of women attending college; the equally dramatic increase in the use of computers in instruction; and the fact that in many areas of high market demand for undergraduates, fewer students are going on to graduate school. Difficult problems are anticipated—the drop in the numbers of traditional college-age students, persistent increases in the costs of goods and services, and continued fiscal stringency.

"For the past three years we have been studying these issues carefully in the context of preparing a plan for the next decade. Several hundred faculty members, administrators, and students participated in this major planning effort. The actual process brought together the many and diverse segments of the University community, and had an extremely salutary effect in identifying the issues which Penn State will be facing in the next few years. The resulting product, *A Perspective on the '80s*, provides the University with a strategic look at its purposes, missions, programs, enrollments, and fiscal resources as a guide to decisions in the 1980s.

"Our five-year planning and budget process, inaugurated in 1977, provides the mechanism to address these issues as the University plans for changes over the next five years. Each year a comprehensive review is made of each academic and non-academic unit over a five-year time horizon. . . . decisions are reached on the allocation and reallocation of available resources on the basis of priorities. In this way, we are linking budgetary decisions to academic plans and priorities, and we are facing up to the difficult choices which will have to be made."

"The opening chapter of *A Perspective on the '80s* spells out the University's objectives for the next decade: 'For maximum effectiveness, long-range planning efforts in higher education must focus on a limited number of crucial issues. Therefore, three pervasive themes are found throughout the document—quality, selectivity, and flexibility. These are Penn State's objectives for the decade of the '80s. . . .

"The first and perhaps most fundamental of the three objectives for the '80s is 'quality.' As President, I am convinced of the superior quality that Penn State represents today, and I would like to cite some examples:

"—Penn State is the largest single institution of higher learning in Pennsylvania, enrolling one out of every ten college students in the State. It is also the most accessible, with one of its 22 campuses within easy commuting distance of 95 percent of Pennsylvania residents.

"—More students send their Scholastic Aptitude Test (SAT) scores to Penn State than any other college or university in the nation. Within Pennsylvania, nearly one out of three high school graduates electing to go to college applies to Penn State.

"—At Penn State, the emphasis on professional and vocational preparation always has been strong. Student demand has shifted toward program areas

providing career opportunities and meeting economic, technological, and social needs. . . . over half of the baccalaureate degree students at Penn State are majoring in programs contained within the Colleges of Business Administration, Engineering, Science, and Earth and Mineral Sciences.

"—Currently, there are approximately 200,000 living Penn State alumni, of whom nearly 125,000 are residents of Pennsylvania.

"—Penn State is a major supplier of professionals to companies whose corporate headquarters are located in Pennsylvania. For example, Penn State graduates in large numbers work for Bethlehem Steel (482), Armstrong World Industries (272), Gulf Oil Corporation (253), Pittsburgh Plate Glass (207) and Pennsylvania Electric Company (167). In addition, the University provides more graduates for General Electric than any other institution (over 1,000 Penn States currently employed), is number two in providing graduates to Westinghouse Electric and is among the top suppliers of college talent to IBM (980 Penn States currently employed).

"—As a result of its history and land-grant status, Penn State's instructional programs are unique. For example, for nine consecutive years Penn State has granted more associate degrees in engineering technology than any other institution in the country. More than 80 programs in agriculture, science, and technology are offered in Pennsylvania only by Penn State, and 23 certificate programs are similarly unique.

"—Quality public service programs are an important and integral part of the University's mission. Penn State's continuing education programs long have been recognized as national leaders in the field, and they have responded effectively to the changing educational needs of the Commonwealth. It has the nation's fourth largest continuing education credit program and the largest noncredit and education by correspondence programs. With assistance from the Kellogg Foundation, Penn State is developing model programs of continuing education for professionals. In addition to the Cooperative Extension Service Programs in every county of the State, the University serves business and industry through the Pennsylvania Technical Assistance Program (PENN-TAP) and through the newly established PENNARAMA, which provides televised education to citizens throughout the Commonwealth.

"—Penn State's Milton S. HERSHEY Medical Center is unique, not only in the State but in the nation, for its emphasis on the humanities, behavioral science, and family and community medicine. Graduates of the College of Medicine are practicing in nearly all areas of the State, including underserved rural areas.

"—In its planning for the decade of the '80s, the University has recognized the need for increased private giving. In 1975-76, Penn State undertook a five-year campaign to double the dollar amount of private gifts to the University, primarily from its alumni and friends. Although that goal was reached within the fourth year, the potential for even greater support from our almost 200,000 living alumni is excellent. Current planning calls for doubling again the level of private support to the University by 1985. This fall, we have reorganized and expanded the Penn State Fund Council and are in the process of strengthening the University's internal fund-raising organization. We recognize that private giving can combine effectively with other funding to assure the excellence of our many programs that serve both the Commonwealth and the nation.

"Quality in research merits special attention. Research is a principal means by which the University responds to the problems of the Commonwealth.

"Through its many research activities,

the University is in a strong position to contribute toward solutions of many of today's challenges. Consider the following exciting research activities being conducted currently by Penn State scientists:

"—A new technology for cancer detection has been developed by biochemists at the Milton S. HERSHEY Medical Center. Known as a "tumor-specific glycoprotein assay," the test is conducted on blood samples from the patient. Most cancer tests on the market today monitor only one class of malignancy, while this new technology appears to have the potential to detect a broad spectrum of cancers. Further development of this technology by a private pharmaceutical company in conjunction with Penn State scientists continues, with the hope that an FDA-approved test will result for the benefit of mankind.

"—In the nation's pioneering and major university effort, researchers in the University's College of Earth and Mineral Sciences are developing the technology needed to tap a vast potential energy source—methane gas which is buried deep in the fissures of the country's coal seams. The degasifying of the coal beds also could have significant benefits in mine safety.

"—Scientists in the Agricultural Experiment Station have found a way to develop wheat and rice crops which they believe would be largely resistant to the fungal diseases that devastate much of the world's food crop every year. In research that could have enormous implications for world food supplies, Penn State scientists have solved a genetic riddle which, they believe, will make it possible for crops to thrive despite the existence of rice blast and wheat rust. If these scientists are correct, farmers the world over would be able to grow vast quantities of upland rice on hundreds of thousands of acres of virtually unused land. Also, they would be able to increase dramatically the yields of both wheat and rice in existing fields.

"—The College of Agriculture and the Institute for Research on Land and Water Resources have developed a successful and economical method for the disposal of sewage sludge. This method entails transporting the sludge to areas where stripmine reclamation is in process. Although sludge disposal and reclamation of barren mine land represent separate environmental concerns, this innovative approach solves both problems simultaneously.

"The City of Philadelphia currently is using this method of sludge disposal, their least cost option. The City earlier had signed a consent decree calling for an end to ocean dumping of sewage sludge by the end of 1980. The sludge is trucked to strip mine reclamation sites in Somerset County in Western Pennsylvania. Truckers who once returned empty from coal-hauling trips to Philadelphia now come back with a sludge payload. The nutrients in one sludge application are rich and slow acting enough to feed vegetation for five years. As vegetation increases, acid mine water and erosion are reduced, and the land returns quickly to production.

"Environmentalists applaud the elimination of ocean dumping, and with scientists, appreciate the practical solution of cancelling one waste with another. Plans are to reclaim one thousand acres a year in counties such as Indiana, Somerset, Westmoreland, and others where there may be interest.

"The method being used in Philadelphia is receiving national attention as a positive example to other major cities of how it is possible to end ocean dumping and pursue alternative disposal methods."

These programs are examples of how research at Penn State can have a payoff to the citizens of Pennsylvania in a relatively short period of time.

"Despite Penn State's considerable efforts to maintain and improve the

quality of its programs and services, the decline in real purchasing power of the University's resources is resulting in a number of serious problems which must be alleviated." Some examples are:

"—Basic courses in Business Administration are severely overcrowded, and are not available to some students who need them. Class sizes in basic chemistry, physics, and biology frequently exceed 60 students. First-year calculus courses usually exceed 400 students. Advanced engineering courses frequently exceed 70 students, more than triple the usual section size for this type of instruction.

"—Certain laboratory sections in many of the natural and physical sciences, as well as engineering, have been reduced or eliminated because of the high cost of laboratory instruction.

"—The ability of the University's Libraries to purchase appropriate materials for research and study has been seriously eroded. From 1969 to 1979, the price of the average book has risen nearly 130 percent and the price of the average periodical has risen over 218 percent. During this same period, funds available for the purchase of these library materials have risen only 27 percent.

"—A significant portion of the University's instruction and research equipment was provided during the 1950s through the early 1970s from State and Federal funds as original equipment for new buildings, or from Federal research grants. Equipment that is wearing out or becoming technologically obsolete must be replaced. While some of each year's resources are devoted to this purpose, much more needs to be provided to update and replace essential equipment.

"—Many of the facilities constructed during the 1950s and 1960s are at the age where major maintenance is required—e.g., major roof repairs and complex electrical, heating, and air conditioning systems. Major maintenance to existing facilities must be performed to keep the physical facilities in good serviceable order. In addition, regulatory standards set forth by agencies of the State and Federal governments must be accommodated at substantial expense to the University."

Staff Vacancies

The following vacancies for positions classified as staff or exempt staff non-union have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by filing the Employment Division, 805-1387 (network line 805-1387). Applications for these staff vacancies will be accepted until 3 p.m., March 26, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

DIRECTOR OF BUSINESS SERVICES, COLLEGE OF MEDICINE, HERSHEY Responsible for recruitment and selection of department personnel; approval of the selection of other department personnel; responsible for the preparation, expenditure of funds, and monitoring of budgets for departments on the basis of cost, need, historical trending, economic indicators and discussions with department heads; responsible for analyzing and recommending new or revised charges; setting up, maintaining and controlling rates for applicable departments; responsible for the preparation of financial reports, statistical analyses, annual reports; develop financial planning, construction and submit Center data for inclusion on various reports for the University and for federal, State and other agencies as assigned. Bachelor's degree in management or equivalent, with emphasis in accounting and five to six years' effective experience.

MANAGER, UTILITIES OPERATION & MECHANICAL ELECTRICAL TRADES, OFFICE OF PHYSICAL PLANT, UNIVERSITY PARK Responsible to the Director, Physical Plant Maintenance and Operations. For the management, administration and controlling functions of assigned activities within the Office of Physical Plant with accountability for results. Must continually apply knowledge of management techniques, work procedures and methods, machines and equipment. Departmental and University policies and objectives of the department and University. Promotable responsible for management and administration of campus utilities, including Waste Water Treatment and Plant and Power Plants, wastewater operations, mechanical and electrical trades. Bachelor's degree in engineering, plus four to seven years of experience with effective management experience at levels requiring administrative decision-making.

Penn State Intercom

Professor Brown

Dr. Argento

Choirs will premiere a new work by Dominick Argento on April 11

The world premiere of a work specially commissioned from composer Dominick Argento for the University Choirs will be presented on Saturday, April 11, at 8:30 p.m. in Schwab Auditorium.

The piece, "Peter Quince at the Clavier," is based on a poem by Wallace Stevens. It was commissioned, with private funding, by the Institute for the Arts and Humanistic Studies.

Three other Pennsylvania audiences will preview the commemorative piece during the Commonwealth's celebration of its bicentenary.

On April 12, Choir Director Raymond Brown will take his singers to York — Mr. Argento's birthplace; on April 13, to Reading — Mr. Stevens' birthplace; and on April 27, to Hershey.

The program will be offered also on April 28 in Washington, D.C., and as part of a May 26-June 13 tour of the British Isles by the Choirs. In England, the Choirs will sing at the Mayflower Barn in Old London, where William Penn is buried.

Dr. Argento will spend the week of April 6-11 in residence at University Park.

A Regents' Professor at the University of Minnesota, Dr. Argento received the Pulitzer Prize in 1975 for his song cycle, "From the Diary of Virginia Woolf." He has composed 10 operas, five song cycles, and numerous symphonic and choral works.

His musical achievements have been recognized through a range of awards including several Guggenheim Fellowships, grants from the National Endowment for the Humanities, membership in the American Academy of Arts and Letters and an Honorary Doctorate from York College.

Although he has written orchestral pieces, Dr. Argento prefers to write vocal music, according to Professor Brown, who was a classmate of the composer's at Baltimore's Peabody Institute in the 1930s. (Dr. Argento earned his Ph.D. from the Eastman School of Music.)

"Of all instruments for the production of music, the voice, in my opinion, takes pride of place," Dr. Argento told an interviewer. "It is the original instrument, the one for which and with which music was invented."

In "Peter Quince at the Clavier," Dr. Argento has turned to the work of one of

America's best known contemporary poets, Wallace Stevens (1879-1963), an insurance executive, published nine books of poetry, twice won the National Book Award for poetry, and received the Pulitzer Prize.

The composer described his own feelings about "Quince" in a letter to Professor Brown, calling the piece "a typical four-movement symphony (or sonatina)." He continued:

"The first movement is fairly straightforward and generally pleasant, setting the tone and argument of the work. The second movement, a beautiful (or erotic) adagio, just wallowing in gorgeous

Byzantium, Leaf by Leaf

Editor's Note: This article, in which a faculty member describes his on-going research, is one in a new series which INTERCOM will publish from time to time.

By Anthony Cutler, Professor of Art History

There are probably as many sorts of art history as there are branches of geography or astronomy. The sort that I pursue is the investigation of clusters of medieval objects to determine what they may have in common. Through these links we can establish their role in the life of the patron that commissioned them and the extent to which they reveal shared patterns of function and meaning for the world that made and used them. Perhaps no society produced more great works of art, yet in them revealed less of itself, than Byzantium, the Eastern Roman Empire that from A.D. 324 was based in Constantinople and lasted until it was overwhelmed by the Ottoman Turks in 1453.

Byzantium's artistic products are largely anonymous and generally undated. We know the names of the patrons or the artists of fewer than 1 percent of them. Generally, Byzantine works of art can be dated only by analyzing their place within a sequence of stylistic development — the traditional occupation of most art historians whatever field they work in. But

News in Brief

Input being sought for "Faculty Handbook"

A new edition of the *Faculty Handbook* is being prepared. The previous edition, issued in 1976, is out of date in many respects.

Suggestions are welcome from faculty and staff members, especially in the matter of topics to be included in the revised edition.

Suggestions should be sent to Chester C. Gnatt, chairman of the *Handbook* revision committee, Room 205 Old Main, University Park, no later than April 8.

The *Handbook* is intended to serve the needs of faculty members on a University-wide basis. Some Commonwealth Campuses supplement the *Handbook* with additional information pertinent to their own local conditions.

Mr. Irvis

Radnor conference studies kibbutz, American values

Interested Penn State faculty members are invited to register for an unusual conference, "The Kibbutz Experience and American Life: A Comparative Examination of Values and Their Implementation."

The conference will be held at the Radnor Center for Graduate Studies April 29 and 30.

Speakers for the conference are Professor Moni Alon of Haifa University; Professor Joseph R. Blasi of Harvard University's Center for Jewish Studies; Dr. Yoram Krol of Hebrew University and visiting scholar at the University of Pennsylvania; and Dr. Menachem Rosner,

(Continued on page 6)

House leader is Festival speaker

The Honorable K. Leroy Irvis, minority leader of the Pennsylvania House of Representatives, will be the keynote speaker at the 1981 Black Arts Festival on Thursday, April 2, at 8 p.m. in the Charlotte Ray Memorial Lounge of the HUB.

In keeping with the festival theme of "Black Perspectives: New Vistas for the '80s," Mr. Irvis will consider those perspectives in the political arena.

Born in Saugerties, N. Y., Mr. Irvis graduated summa cum laude from New York State Teachers College, and earned a master's degree in education from the University of New York at Albany. At the

Dr. Cutler

"style" the character and quality of a work of art, does not develop or decline in a simple linear progression. It is affected by variables as different as the training and competence of the artist, the "budget" of the place, and the models that the artist worked from. Obviously we need to know as much as we can about the artist and his client if we are to "place" a work of art in its correct sequence.

Most medieval art is normative in character; that is to say it conforms to established forms which determine not only its content but also, to a large extent, its style. But beyond this rather abstract notion, one has to take into account such mundane considerations as the degree of luxury for which the client was willing to pay and the degree of pretentiousness involved in his decision to commission a copy of, say, a much older manuscript. This investigation tells us not only about the creation of medieval books — one of my special interests — but about their "after life." It reveals which manuscripts survived, where, and under what conditions of accessibility. It reveals the changing taste of Byzantine patrons: why, for example, 10th-century books were copied in the 14th century but not a hundred years earlier.

It will be evident that the reproduction of antiques is by no means only a modern phenomenon. In Byzantium, magnates apparently commissioned "fakes" so skillful that it takes a trained eye to detect them — a virtue that can hardly be attributed to modern "Chippendale" or "French Provincial" furniture. For instance, in Baltimore there is a famous Psalter (an illuminated Psalmsbook) that for years was attributed to the 11th century. By analyzing the script and the picture-style, I was able to show that it was a 14th-century work.

Penn Staters

Paul West, professor of English and comparative literature and a Fellow of the Institute for the Arts and Humanistic Studies, has been chosen to receive the 1981 Governor's Award for Excellence in the Arts in the field of literature.

Professor West and award recipients in nine other fields — including artist Andrew Wyeth and musician Vincent Persichetti — will be honored in Harrisburg on May 5 at special ceremonies in the Capitol Rotunda and at a luncheon in the Governor's Mansion.

A Penn State faculty member since 1962, Professor West has written nine novels and 11 other books in the past 18 years, many of which have won major awards. His most recent novel, *The Very Rich Hours of Count von Stauffenberg* (1980, Harper and Row), was described by *The New Yorker* as "an astonishing union of research and imagination." *The Boston Globe* said it was "a demanding, disturbing, but ultimately rewarding and extraordinary novel."

Among Professor West's non-fiction books is *Words for a Deaf Daughter* (1979, Gollancz, London; 1970, Harper and Row), a work that received wide critical acclaim.

He began to publish when still in his early twenties, with a pamphlet of poems that came out while he was a Research Fellow at Oxford.

He came to the U.S. on a Smith-Mundt Scholarship to Columbia University in 1952, but later returned to England to serve for three years in the Royal Air Force. In 1957 he joined the faculty of Memorial University of Newfoundland, Canada. In 1962 he returned to the U.S. on a Guggenheim Fellowship and joined the Penn State faculty.

Most of his novels have been written at Penn State. He teaches undergraduate writing courses and is also a member of the faculty for a new graduate writing program to be opened in the fall.

Blake and Freud by Diana Hume George, assistant professor of English at The Behrend College, has been named one of the outstanding academic books of 1980 by the editors of *Choice*. *Choice*, a major book-selection journal for librarians, announces each year those titles it has reviewed that merit special praise.

Dr. Z. T. Bieniawski, professor of mineral engineering, recently presented invited lectures at two universities. At UC-Berkeley, he described "Experience with In Situ Testing of Rock Properties" at a special National Science Foundation Seminar on Large-scale Testing in Geomechanics. At the University of Minnesota in Minneapolis, he talked about "Engineering Rock Classifications."

Dr. Peter Gould, professor of geography, recently presented two invited lectures at Clark University in Worcester, Mass. He addressed the Graduate School of Geography on "Philosophy and Algebra in Contemporary Geography" and "The Structure of International Television."

Dr. Gerald E. McClearn has been named associate dean for research and graduate studies for the College of Human Development.

Dr. McClearn comes to Penn State from the University of Colorado, where he was professor of biology, pharmacology and psychology and director of the Institute for Behavioral Genetics.

In addition to his duties as associate dean, Dr. McClearn is director of the Institute for the Study of Human Development in the College. He has the academic titles of professor of individual and family studies and professor of human nutrition.

A native of Sandy Lake, Pa., Dr. McClearn received his bachelor's degree from Allegheny College and his master's and doctoral degrees from the University of Wisconsin.

He served on the University of Colorado faculty for 15 years and has held affiliate faculty membership at the University of Hawaii for the past six years. He served also as a faculty fellow at the Galton Laboratory in London, on the faculty at the University of California at Berkeley, and as a post-doctoral fellow at the Institute of Animal Genetics in Edinburgh.

Robert Harkavy, associate professor of political science, has returned from a two-week European lecture tour sponsored by the U.S. International Communications Agency. Speaking on the general theme of the Reagan Administration's national security and arms control policies, Dr. Harkavy addressed audiences at universities and in other settings in Brussels and Louvain, Belgium; Bonn, West Germany; both East and West Berlin; and Belgrade, Titograd, Zagreb and Ljubljana, Yugoslavia.

Dr. Robert Newnham, professor of solid state science, returned recently from India where he was one of ten invited participants from the United States in the Indo-U.S. Symposium on Materials held in Bangalore under sponsorship of the National Science Foundation. At the symposium, he described research in ferroelectric materials that is being conducted at Penn State. While in India, he also gave talks at the Babba Atomic Research Center in Bombay, the Institute of Technology in Delhi, and the Indian Institute of Technology in Kanpur.

Joseph L. Wysocki, family housing specialist with the Cooperative Extension Service, has been asked to serve as one of 10 Steering Committee members for a federal Task Force investigating housing regulations. The immediate goal of the group is to present to the White House and Congress by April 15 a list of recommendations of short-term actions that can be taken quickly by the federal government to ease the depressed housing situation in America. Throughout the remainder of this year, the full range of government regulations and regulatory processes impacting on all buildings will be examined and recommendations developed.

Dr. Eugene N. Borza, associate professor of history, recently gave three invited lectures in Virginia. The first, "Philip II and Alexander the Great: Ancient Propaganda and Modern Politics," was sponsored by the History Department of George Mason University, at Fairfax. The other two, entitled "Of Tombs and Kings and Things: The Archaeological Discovery of Ancient Macedonia," were part of a series sponsored by the Archaeological Institute of America, and were given at Charlottesville and Richmond. Dr. Borza has been a National Lecturer for the Archaeological Institute since 1976.

Dr. C. Gregory Knight, professor of geography, recently completed a lecture series that was arranged under the Visiting Geographical Scientist program of the Association of American Geographers. He spoke at Miami University (Ohio) and Wittenburg University on two topics: "Small-scale Agriculture in the Context of

Development" and "Environmental Limitations on Tropical Productivity: Theory and Practicality."

Dr. Knight was also recently appointed associate editor of *GeoJournal*, an international publication devoted to the physical, biological, and human geosciences and their application in environmental planning and ecology.

Richard A. Queeney, associate professor of engineering mechanics, recently completed a design manual for construction of composite wind turbine blades for the Department of Energy. The manual is expected to be of interest to persons interested in generating some fraction of their own electric power.

Dr. Frederick H. Wood Jr., head of the division and professor of curriculum and instruction, was elected president of the Council for the Professors of Instructional Supervision at the recent meeting of the Association for Supervision and Curriculum Development in St. Louis. Membership in the Council is limited to a group of 75 professors who have achieved national recognition and who are committed to research and scholarship in the areas of instructional supervision and staff development.

Dr. Geoffrey L. Wilson, associate professor of engineering research in the Applied Research Laboratory and a member of the faculty of the Graduate Program in Acoustics, has been named a Fellow of the (British) Institution of Electrical Engineers. He is also a Fellow of the (British) Institution of Acoustics and of the Audio Engineering Society, and a Senior Member of the Institute of Electrical and Electronics Engineers.

Murray S. Martin, associate dean of Libraries and member of the Comparative Literature Program faculty, presented a paper at the Ninth Annual Conference on Twentieth Century Literature held at the University of Louisville last month. The theme of the conference was "Quest and Discovery in Twentieth Century Literature." Mr. Martin's paper was on "Alan Curnow and New Zealand Poetry: The discovery of the past and the will to accept the future."

Dr. Caroline D. Eckhardt, associate professor of English and comparative literature, gave an invited paper on "New Literary Continents" at the Sixth Area Studies Conference held Feb. 26-27 at Columbia University and sponsored by the NDEA Centers, the Association of Departments of Foreign Languages, and the Council on National Literatures.

Bookshelf

Four faculty members at University Park are among the co-authors of a college textbook on early childhood education, *Language Arts and the Young Child*.

Collaborating on the book, published by F. E. Peacock, were Drs. Thomas D. Yawkey, Eunice N. Askov and Carol A. Cartwright, all professors of education, and Dr. Mary M. Dupuis, associate professor of education. Joining the Penn State faculty members — all in the College of Education's division of curriculum and instruction — were Dr. Steven Hunter Fairchild, who received his doctorate at the University in 1978 and is now at James Madison University, and Margaret L. Yawkey, reading specialist with the Tyrone Area School District.

Included in the textbook are chapters on "Views of the Young Child," "Listening," "Oral Language Development and Composing," "Handwriting," "Teaching Spelling in the Early Years," "Imaginative Play and Creative Expression: Contributions to the Language Arts."

The textbook, the authors note, is intended for pre-service and in-service educators in day care, nursery, kindergarten and primary grades. It covers the teaching and learning of language arts for children aged 2 through 8.

25-year chair

Warren W. Hassler Jr., professor of American history, is observing his 25th year as a Penn State faculty member. Dr. Hassler is also a Fellow of the Institute for the Arts and Humanistic Studies.

A prolific writer in his field of interest, military history, Dr. Hassler has authored some 70 book reviews for scholarly journals and some 25 articles for learned quarterlies. In addition, he has authored the following books: *General George B. McClellan: Shield of the Union*, recipient of the Southern Book of the Year Award in 1958; *Commanders of the Army of the Potomac: Crisis at the Crossroads*; *The First Day at Gettysburg*; *The President as Commander in Chief*; *With Shield and Sword: American Military Affairs, Colonial Times to the Present* (to be published this year). He is also the co-author of the two-volume series, *Civil War Books: A Critical Bibliography*; and the author of the main article on the American Civil War for the latest edition of *Encyclopedia Britannica*.

From 1969 to 1975 Dr. Hassler served on the Secretary of the Army's Advisory Committee for the Military History Institute, U.S. Army War College, Carlisle (Pa.) Barracks, being the ranking senior member in the last year. During 1975-76, he was the second occupant of the Morrison Chair of Military History at the Command and General Staff College, Fort Leavenworth, Kan. During 1979-80, he was the Visiting Professor in the Chair of Military History at the U.S. Military Academy, West Point, N.Y.

Dr. Hassler received his Ph.D. from Johns Hopkins University (1954), his M.A. from the University of Pennsylvania (1951) and his B.A. from Johns Hopkins (1950), all in history. He also served with the U.S. Army Airforce from 1945 to 1947 in the European Theatre of Operations.

During his university tenure, he has served on numerous department, college and university committees, including six years on the Faculty Senate.

Promotions

Staff Non-Exempt

Joyce A. Parsons to data extraction specialist in Agriculture.
Gloria A. Slatick to senior staff nurse at Hershey.
Paul D. Swanson to engineering aide in ARL.

Clerical

Tracey S. Adams to secretary C in Human Development.
Anna L. Behney to secretary B at Hershey.
Jean C. Kagarise to secretary A in Human Development.
Cathy May Neff to accounting clerk in Controller's Office.
Julie Pappas to clerk, data processing in Capital Campus.
Dorothy S. Stauffer to clerk A, monitoring in Student Administrative Services.

Technical Service

Lorij. Anderson to animal caretaker at ARL.
Hershey.

(Continued on page 3)

(Continued from page 2)

Craig N. Kreider to farm machinery and truck operator in Agriculture.
Nancy L. Kurzingger to residence hall utility worker in Housing and Food Services.
William C. Matusky to lead maintenance mechanic at DuBois.
Joseph Zabaley to group leader, maintenance worker utility at DuBois.

Retirements

M. Maxwell Smith, Lancaster County senior Extension agent, will retire March 28 with 44 years of service.

Nationally known for his educational work in livestock production, Mr. Smith earned his B.S. in animal science at Penn State in 1936 and joined the Lancaster County staff the following year. He has been coordinator of Extension programs since 1949.

During his career, he has received many honors. In 1956, he was selected as one of the top 10 county agents in the United States by the American Hereford Association. He also represented Pennsylvania agriculture on the Partners of Alliance Study Team in Brazil in 1965. A recipient of the U.S. Department of Agriculture's Superior Service Award, he was named Livestock Man of the Year by the Pennsylvania Livestock Association and was the recipient of a Master Educator Award presented by the Pennsylvania Association of Farmer Cooperatives.

Melvin C. Harper, lead carpenter in the Office of Physical Plant, will retire April 1. He has been a University employee since April 1, 1956.

In observing not only his retirement but also his 25th year with the University, Mr. Harper says he plans to begin building a grandfather clock, a project he never had the time for until now.

He has had time, however, to build several smaller mantle clocks in his home workshop, where he also constructs custom-made cabinets and other wood pieces. He plans to continue his oil painting, noting that he usually prefers landscapes and still lifes.

Other of Mr. Harper's retirement plans include participating in activities of the Bald Eagle Grange and the Bald Eagle Methodist Church, and hunting and fishing.

Mr. Harper and his wife, Margaret, live in Tyrone. Their son, Clair L., was formerly a supervisor in engineering shop services.

Julia M. Herr, food service worker in Housing and Food Services, will retire April 4 after working at the University since March 20, 1958.

"The biggest change I've seen was this past fall, when we introduced the salad bars," says Mrs. Herr. She adds that this is a change "the students really like—sometimes, my busiest moments are keeping up with their appetites by re-stocking the many salad ingredients."

Mrs. Herr has worked in Pollock Dining Hall since it first opened in 1960, having served previously in Waring Dining Hall. In addition to her dining hall duties, she also spends about three hours per day working in Pollock's linen room, where she distributes linens to students and uniforms to her co-workers.

Of her retirement plans, she says she and her husband, Mervil—who retired from a custodial position in Housing and Food Services in 1974—intend to visit relatives in Colorado and Arizona. In addition, they are both members of the Gideon Chapter in Lock Haven and look forward to increasing their activities with the group.

Bertha S. McCracken, a food service worker in Housing and Food Services, will retire March 29 after serving on the staff since March 1, 1962.

Adelene C. Eisenhart, a general helper in Business Services, will retire March 28 after working at the University since Oct. 10, 1969.

Henry H. Shower, janitor foreman with the Office of Physical Plant, will retire April 1 after a tenure dating back to March 1, 1965.

Pauline B. Broadwater will retire April 4 as an anesthesia workroom aide at Hershey, where she has been employed since Oct. 10, 1967.

Josephine P. Cleary, a secretary in Health, Physical Education and Recreation since Jan. 1, 1967, will retire April 1.

Rose Ann Bobak, a secretary in the Office of Planning and Budget, left the University Jan. 7. She had been a member of the staff since Sept. 1, 1967.

Howard Finney left his position as an editorial assistant in Continuing Education on Feb. 1. He had been with Penn State since 1968.

Staff development

Fourteen University employees recently completed a course in Basic Supervisory Management. They are:

Patricia Balash, dining hall supervisor, Housing and Food Services; Lori Benacert, operations supervisor, IRP; Dean Brungart, senior clerk, lending services, Libraries; Edward Faust, supervisor, cinematography/videography & affiliate instructor, Continuing Education; Bruce Hesley, supervisor, admissions operations, Undergraduate Admissions; Orla Hopkins, senior clerk, lending services, Libraries.

Deborah Lehrer, editorial assistant, Continuing Education; Nina McNeal, secretary B, Earth & Mineral Sciences; Gabriel Michels, lead applications programmer/analyst, Planning & Budget; Glenn Mulberger, assistant housekeeping supervisor, Housing & Food Services; Margaret Nastase, budget operations

analyst, Planning & Budget; Thomas Rodkey, scheduler-planner, service desk, Physical Plant; Stanley Scanlon, broadcast programming specialist, Continuing Education; Joan Woodring, assistant housekeeping supervisor, Housing and Food Services.

Twenty-three employees of the University have completed the course in Report Writing-Preparation and Organization, coordinated through the Office of Personnel Administration. They are:

Seward Bieling, engineer, n/e project analysis, Physical Plant; Charles Bolan, assistant director, Student Administrative Services; Helen Brown, associate librarian, Libraries; Dorothy Carolus, associate housekeeping supervisor, Housing & Food Services; Tony Ciccarelli, foreman, electronic services, Physical Plant; Sue Dahms, budget planning analyst, Planning & Budget.

Sandra Eriksson, senior analyst, Personnel Administration; Lorenda Fambro, editorial assistant-trainee, Continuing Education; Hugh Fry, senior applications programmer/analyst, Planning & Budget; Ron Fuller, assistant pupil transportation specialist, Continuing Education; Robert Grenoble, architect, structural/architectural project analysis, Physical Plant; Nancy Hensal, benefits specialist, Personnel Administration.

Oscar Jones, resident assistant housekeeping supervisor, Housing & Food Services; Joyce Keenan, assistant director of operations, Student Aid; Shirley Leitch, office manager, Business Services; Greg Ritchey, senior engineering systems analyst, Management Engineering; Steve Schroeder, assistant manager of operations for procedures & training, IRP; Leslie Shaw, coordinator-inspector, Physical Plant.

Margaret Shaw, housekeeping supervisor, Housing & Food Services; Joan Schumacher, assistant director, student employment programs, Student Administrative Services; Mike Werner, budget planning analyst, Planning & Budget; Florence Wike, assistant housekeeping supervisor, Housing & Food Services; P. Thomas Wondring, assistant foreman, electronic services, Physical Plant.

Obituary

Richard A. Ogden, a refrigeration and maintenance mechanic for the College of Agriculture when he retired in 1978, died March 15 at the age of 69. He had joined the University in 1964.

Faculty candidates sought for directorship of Office for Protection of Human Subjects

The Office of the Vice President for Research and Graduate Studies is seeking faculty candidates for the position of Director of the Office for Protection of Human Subjects. The position is for half-time for 12 months on a rotating basis, with a minimum of a one-year appointment to a maximum of three years, subject to negotiations with the candidate.

The Director is responsible to the Vice President for Research and Graduate Studies for developing, recommending and implementing policy and procedures for the protection of human subjects. The Director must maintain close contacts with DHHS officials and follow the development of new regulations. The Director is responsible for reviewing the University's policies and procedures for adherence to new laws and regulations as they are adopted and is charged with the responsibility for maintaining contact with officials at other universities to learn how these institutions are handling this responsibility and if more effective methods might be incorporated into the University's procedures.

Other duties include overseeing the

administration and orderly functioning of the biomedical and the behavioral and social sciences review committees and providing adequate administrative support to the committees for carrying out their functions.

The Director will review all protocols for conformity to campus policy, procedures and committee requirements; provide advice and assistance to investigators and graduate students contemplating the use of human subjects; provide information to committee co-chairmen and committee members from DHHS and other federal agencies; and furnish logistic support for committee meetings including scheduling, notification to members, agenda, and minutes.

The Director will attend all monthly biomedical committee meetings and meetings of the behavioral and social sciences committee as scheduled.

Nominations with a resume should be sent to Dr. Richard G. Cunningham, Room 207 Old Main, University Park, by May 8.

Faculty/Staff Alerts

Editor's note: The University issues a number of notices each year affecting personnel matters, benefits and the payroll of ALL campuses. To ensure that this important information is readily available, it will appear henceforth under the above INTERCOM heading.

Saturday holidays

July 4 falls on a Saturday this year. The University officially will recognize that day as the Independence Day holiday, and University holiday policies will be applicable to the Saturday holiday.

Employees are reminded, however, that if a University holiday falls on an employee's regularly scheduled day off, the employee is granted another day off with pay as the holiday. That day can be scheduled at another time in accordance with applicable policy.

Staff Vacancies

The following vacancies for positions classified as staff exempt from civil service have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387, or by mail to 275-1387. Applications for these staff vacancies will be accepted until 5 p.m. April 2, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap as provided by law, sex, or status as a disabled or Vietnam era veteran.

APPLICATIONS PROGRAMMER/ANALYST, MANAGEMENT SERVICES, University Park. Responsible for the analysis, design, and programming required in the development and modification of computer programs. The individual will conduct interviews with system users, perform feasibility studies; and investigate alternative models of data handling in gathering necessary data to support system design recommendations for systems modification or to support the Project Leader's design efforts in system development. Bachelor's degree or equivalent in basic computer systems, and one to two years of effective experience in computer programming and analysis. Strong experience in COBOL, IMS and IMS/DC is desired.

For further information, call 865-1372

[J36-1] NSF's Industrial Research Participation Program will provide opportunities for undergraduate science and engineering faculty members to participate in ongoing research activities at industrial, R & D, or government facilities during the summer of 1981. A directory of laboratories, including a brief description of the projects available and the name of the project director to whom application should be made, will be available in late March. The directory (SE 81-284/D) may be requested by contacting the Faculty Oriented Program, Division of Scientific Personnel Improvement (202-282-7795). (Ref: NSF Bulletin, March 1981)

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University. USPS 351-170

Special Events

Thursday, March 26

Board of Trustees meeting, The Milton S. Hershey Medical Center.
Sports: tennis (men) vs. Brown Univ., 10 a.m.
Anthropology lecture, 8 p.m., Room 101
Chambers, Louis Dupree, anthropology adjunct, on "The First Russian Afghan War: Reflections on the Cultural Components"
History of Photography lecture, 8 p.m., Room 101 Kern. Kathleen Fuller, grad. asst., on "Photography and Politics."
Student Dietetic Assn. lecture, 8 p.m., Room 121 Sparks. Victor Herbert on "Common Myths in Nutrition."
URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Friday, March 27

Board of Trustees meeting, The Milton S. Hershey Medical Center.
History of Photography lecture, 2 p.m., Room 101 Kern. John Collier, San Francisco State College and Art Institute, on "Photography and the New Deal."
Music in Interesting Times, 2:30 p.m., Music Building Reich Hall. Barbara Riemschneider, Pa. folk musician, on "Women in Music."
Sports: volleyball (men) vs. Army, 7 p.m.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.
Contemporary Dance Company, 8:30 p.m., Eisenhower Auditorium.
Mary Beth Ions, violin recital, 8:30 p.m., Music Bldg. Reich Hall.

Saturday, March 28

Sports: fencing (women) vs. Temple, Cornell, Indiana (Pa.) and William Peterson, 9 a.m.; baseball vs. Navy (DH), 1 p.m.; lacrosse (women) vs. James Madison, 3 p.m.; volleyball (men) vs. Rutgers/Newark, 7 p.m.
Contemporary Dance Company, 2:30 and 8:30 p.m., Eisenhower Auditorium.
URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.
Artists Series, McCarter Theatre Company in *Moby Dick Rehearsed*, 8:30 p.m., Schwab Bldg. Reich Hall.
Penn State Percussion Ensemble, 8:30 p.m., Music Bldg. Reich Hall.

Sunday, March 29

University Chapel Service, 11 a.m., Eisenhower Chapel. The Rev. John J. Wenzke, PSU Lutheran Student Parish, speaker.

Monday, March 30

Pass/Fail.
French/Linguistics lecture, 7:30 p.m., Room 101 Kern. André René Descartes, Paris, on "Linguistic Dynamics and Diachrony."
German Dept./IAHS lecture, 8 p.m., Room 124 Sparks. Walther Dierker, Free Univ. and Academy of Arts, Berlin, on "Die goldenen Zwanziger Jahre."
Thomas Spacht, organ recital, 8:30 p.m., Music Bldg. Reich Hall.

Tuesday, March 31

Pass/Fail.
Gallery Talk, 10:30 a.m., Museum of Art. Donald Gordon, fine arts, Univ. of Pittsburgh, on "Egon Schiele and Expressionism."
Comp. Lit. Luncheon, 12:15 p.m., Room 204 HUB. Damir Kalogiera, Univ. of Zagreb, on "American Literary Influences in Yugoslavism."
URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Wednesday, April 1

Pass/Fail.
Drop deadline.
Course repeat deadline.
Prerequisite deadline for Summer Term 1981.
Commons concert, Jerry Zoltan, noon, Kern Lobby.
London Bus tour begin, 1:30 and 2:30 p.m., HUB Main Entrance.
Music in Interesting Times, 2:20 p.m., Music Building Reich Hall. Jack Samuels, Temple Univ., on "Music, Sociology and Business."
Robson Center Film Series, Paul Robeson in *Emperor Jones*, 7:30 p.m., Walnut 81dg.
URTC/Kern Theatre, *Jacques Brel Is Alive and*

A scene from the McCarter Theatre Company's production of "Moby Dick Rehearsed."

Princeton group to play in Schwab

The obsessive quest of Captain Ahab and the crew of the *Pequod* for the great white whale is the inspiration for the McCarter Theatre Company's production of Orson Welles' *Moby Dick Rehearsed*. The play will be performed on Saturday, March 28, at 8:30 p.m. in Schwab Auditorium.

Welles' adaptation of Herman Melville's classic novel uses the device of the play within a play. As a group of Shakespearean actors read through the script, the rigging and furnishings of the stage gradually become the yards and longboats of this, the most famous of all whaling vessels, creating a genuine voyage of the imagination into the dramatic world of *Moby Dick*.

The McCarter Theatre, under the artistic direction of Nagel Jackson, is a

professional company based in Princeton, N.J., and is recognized as one of America's foremost regional theatres. This is its third season of touring throughout a five state region, which includes New Jersey, New York, Pennsylvania, Maryland, and Delaware.

Moby Dick Rehearsed is directed by William Woodman, a former artistic director of Chicago's Goodman Theatre. Last year, the production opened to national acclaim in Denver, where it helped to inaugurate one of two new theatre centers.

Tickets are now on sale at the Eisenhower Box Office and the HUB Booth, weekdays from 9 a.m. to 4 p.m. Phone orders to MasterCard/Visa are accepted at 863-0255 during hours of sale.

Well and Living in Paris, student preview, 8 p.m., Room 112 Kern.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Thursday, April 2

Campus Colleagues, brown bag lunch, noon, Room 225 HUB. William W. Asbury, affirmative action, and Jane McCormick, student affairs, on "Penn State's Guidelines on Sexual Harassment."

Sports: softball (women) vs. East Stroudsburg (DH), 2 p.m.

Football office lecture, 7 p.m., Keller Auditorium. Ellington Darden, Athletic Center of Atlanta, on "General Conditioning and Strength Training."

URTC/Kern Theatre, *Jacques Brel Is Alive and Well and Living in Paris*, 8 p.m., Room 112 Kern.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Black Arts Festival, 8 p.m., Ray Memorial Lounge. HUB K. Leroy Irby, minority leader, Pa. House, on "Black Perspectives for the '80s in the Political Arena."

Friday, April 3

Geography Dept. Coffee Hour, 3:45 p.m., Room 310 Walker. Paul Simkins, geography, on "The Prospects for Curbing Population Growth in Latin America."

Sports: tennis (women) vs. James Madison, 6 p.m.

URTC/Kern Theatre, *Jacques Brel Is Alive and Well and Living in Paris*, 8 p.m., Room 112 Kern. Dessert following performance. Room 102 Kern.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Artists Series, Gewandhaus Orchestra of Leipzig, 8:30 p.m., Eisenhower Auditorium.

Saturday, April 4

Penn State Alumni Association, Alumnae Day, 9 a.m.-4:30 p.m., Keller 81dg.

Sports: softball (women) vs. Temple (DH), 1 p.m.; tennis (women) vs. Rutgers, 8 p.m.

URTC/Kern Theatre, *Jacques Brel Is Alive and Well and Living in Paris*, 8 p.m., Room 112 Kern. Dessert following performance. Room 102 Kern.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, April 5

Sports: tennis (women) vs. Bucknell, 9 a.m.
France-Cinema, Bergman, *The Virgin Spring*, 7 and 9 p.m., Room 112 Chambers.
URTC/Kern Theatre, *Jacques Brel Is Alive and Well and Living in Paris*, 8 p.m., Room 112 Kern.

Seminars

Thursday, March 26

Acoustics, Hideo Suzuki, grad. asst., ARL, on "Radiation and Diffraction Effects from Convex and Concave Domes in an Infinite Baffle," 4 p.m., Room 333 Willard (new listing).

Bioengineering/Electrical Engineering, David Cunningham, Herby, on "Microwave-Induced Hyperthermia for the Treatment of Cancer," 4 p.m., Room 329 EE East (new listing).

Statistics, Ray Carroll, Univ. of North Carolina, on "Estimation in Heteroscedastic Models," 4 p.m., Room 167 Willard (new listing).

Friday, March 27

Analytical Chemistry, Gary Simmons, Lehigh Univ., on "Electron Spectroscopic Studies of the Reaction of Corrosive Gases (O₂, H₂S and H₂) with Metal and Alloy Surfaces," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Michael Kurlyo, National Bureau of Standards, on "HO₂ Reactions of Importance to Stratospheric Chemistry," 2:30 p.m., Room 333 Whitmore.

Monday, March 30

MC38, Robert Goldman, Carnegie Mellon

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Univ., on "Structure and Function of Cytoskeletal Elements," 4 p.m., Room 101 Althouse.

Tuesday, March 31

Organic/Inorganic Chemistry, R. Matthews, Univ. of Michigan, on "Mechanism of Action of Methylene Reductase and Its Importance in Biological Methylations," 12:45 p.m., Room 333 Whitmore.

Environmental Pollution Control, Kenneth Komorski, PPG Industries, on "Field Experiences Involving 20 Hazardous Waste Sites in the U.S.," 2:20 p.m., Room 128 Sackett.

Chemical Engineering, S.V. Babu, Clarkson College of Technology, on "Thermodynamic Perturbation Theory: Properties of CO₂ and Its Mixtures," 3:45 p.m., Room 140 Fenske.
Geosciences, Randolph J. Martin, geosciences, on "Piezomagnetism in Rocks," 3:45 p.m., Room 112 Walker.

Biology, Bernie May, plant pathology, on "Genetic Variations and Selective Breeding of the Common Edible Mushroom, *Agaricus bisporus*," 3:55 p.m., Room 8 Mueller.

Plant Pathology, Judy Pawloski, grad. student, on "On the Road to Timbuktu: Coffee Rust in the Third World," 3:55 p.m., Room 213 Buckhout.

Thursday, April 2

Ceramic Science and Engineering, Charles D. Greskovich, corporate research and development, General Electric Co., on "Polycrystalline Optical Ceramics," 11 a.m., Room 301 Steidle.

Agronomy, Michael Amacher, grad. student, on "Chromium in Pennsylvania and Plutonium and Americium in Nevada. Similarities and Differences," 3:55 p.m., Room 111 Tyson.

Physics, L. Wolfenstein, Carnegie Mellon Univ., on "Does the Neutrino Have a Mass—and If So, What?" 3:55 p.m., Room 445 Davey.

Plant Pathology, Gustafson, Univ. of Wisconsin, on "Early Events in Plant Infection," 3:55 p.m., Room 213 Buckhout.

Acoustics, Mark S. Lang, research assoc., ARL, on "An Experimental Analysis of the Basic Phenomena Involved in Modern Diffraction Theories," 4 p.m., Room 373 Willard.

Fuel Science, D.R. Frankl, physics, on "Study of Crystal Surfaces by Atomic Beam Scattering," 4 p.m., Room 301 Steidle.

Friday, April 3

Analytical Chemistry, Robert Delevie, Georgetown Univ., speaker, 11 a.m., Room 333 Whitmore.

Physical Chemistry, William Jorgensen, Purdue Univ., on "Theoretical Studies of Organic Chemistry in Solution," 2:30 p.m., Room 333 Whitmore.

Exhibits

Chambers Galleries: Edward Betenas, sculpture, and Frank Chetelat, mixed media.

HUB Galleries: Art Alliance Member Exhibit, through March 31. Third Annual Slave Folk Festival Exhibit, opens April 1, Art Alley. Kathy Ragusa, drawings, through March 31. Jim Weigle, landscapes of handmade paper, opens April 1. Browning Gallery, "Between Art and Industry—The Deutscher Werkbund," through April 3. Benny Andrews, paintings, opens April 4, The Gallery.

Kern Gallery: Lauren Abrams, feathered masks; Kathy Terrell, drawings; Renees Liberman, silk screen prints, through March 27. John Seitz, glass work, Mary Weidner, drawings, open March 30. PSU Art Department Juried Photography Exhibit, opens April 1.

Museum of Art: European works from the Museum's collection, through March 29. Recent acquisitions to the Museum's collection. Selected works from the collections of Mimi and Sanford Feld and Samuel Gallu. Selections from the Museum's American collection, opens March 29.

Pattie Leary: Rome Hanks, landscape photographs, East Corridor Gallery. John Wilson, photographs, through April 2. Paul Flexner, drawings, open March 2. Lending Services Lobby, Andrew Pleak and Thomas Hubben, ceramics and ceramic sculpture, Main Lobby "Photography and Humor," arranged by G. and L. Greenhill and B. and H. Henisch. Rare Books Room: Mi Park, paintings, West Pattie Lobby.

Visual Arts Zoller Gallery: Visiting Artist Exhibition, opens March 29.

Editor's Note: The following address, delivered by Proust Eddy at the March 8 Commencement, is being printed at the suggestion of several faculty members who were present and thought it should be made available to the entire academic community.

This is a highly significant day not only for each of you but for your university as well. In the same ceremony, we are honoring you and four of our faculty who have been singled out to receive the first University medals for extraordinary scholarly and creative achievement. What do you share in common on this Sunday afternoon in 1981? Those of you receiving degrees are on the threshold of achievement; the four faculty members are in mid-passage — neither at the beginning nor certainly the conclusion. Today is a major milestone for all of you.

The other day I received an anonymous letter from "a graduating senior." He or she asked, rather plaintively, if we'd say a few words this afternoon about "why our college years are worth the effort." The writer added, "Sometimes I feel that they aren't, but deep down I know that isn't true." I wonder if the clue to the value of your education doesn't appear directly before you on this platform today. These four faculty members are especially distinguished — but they are also especially typical. They represent the highest interests of The Pennsylvania State University and its world of learning — the unique combination in one individual of great teaching and distinguished research, of the creative spark that burns brightly in the laboratory, the study, on the ocean floor, in the operating room — wherever men and women seek to expand knowledge and transmit it.

The world is a much better place — safer, more comfortable, healthier, more enlightened, and with far less tragedy and suffering — because the university which gave you your education also sponsors the best efforts of the best scholars. A recent study has shown that university scientists were responsible for more than 70 percent of the significant advances of the last 20 years in such fields as physics, chemistry, astronomy, and the earth sciences.

Hopefully, each of us on the faculty of Penn State is a special blend of imagination, knowledge and enthusiasm. And, hopefully, each of you emerges today from Penn State with a heightened sense of

Something to be remembered

imagination, knowledge and enthusiasm. It's that drive which makes the educational experience worth the effort. The English essayist, William Hazlitt, observed that "man is the only animal that laughs and weeps, for he is the only animal that is struck by the difference between what things are and what they ought to be."

The expectation of strong teaching and excellence in research from the same person is not always a cause of joy in the hearts of college students. The complaint is often heard that one is neglected in favor of the other. The suggestion is put forward frequently that we should have two faculties: one to teach, and the other to engage in scholarly research. And each generation of students reinvents the catch phrase "Publish or perish" as the source of all academic malfunction. Many of us just don't recognize the genuine necessity — indeed, the crucial necessity — of research to good teaching. To the true scholar — and not the mere transmitter of trivia — scholarly research keeps teaching from shrinking into ridiculous redundancy.

One popular misconception regarding research and teaching is that ENOUGH IS ENOUGH to teach well. Learn a little — just enough — then stop and transmit it for the rest of your life. Enough, happily, is never enough. The search for new knowledge and understanding is the teacher's best guarantee of creativity in the classroom. Students are constantly seeking new experiences as a form of growth and renewal. Why should they deny the teacher that same growth and renewal? Thus teacher, like student, has an obligation to stay fresh, to keep an open, inquiring mind — and never to agree that enough is enough.

H. G. Wells wrote of his mother that "she went to finishing school and was finished. The ideas she gained there coiled around in her head like little marbles for the rest of her life." Penn State has no interest in being a finishing school. It is a beginning, not an end. It is the beginning of the individuality of each one of you.

Education doesn't grind to a screeching stop the moment you pick up your diploma. To stay alive, the intellect must expand continually. Can you imagine what

it would be like to study under someone who had stopped thinking at the age of 24 or 26, who earned his Ph.D. and taught his thesis topic for the rest of his life? Enough is NOT enough. What kind of person is a teacher who never reads a book, develops an idea, listens to a different kind of music?

A second, commonly held misconception is that serenity is a sure sign of genius. We like to depict the most learned gentlemen of our time as the tweedy types — pipe smoking, slow moving and speaking, the thoughtful scholar who welcomes any chance to occupy a comfortable chair and reminisce by the hour — or day — or year. Nonsense! Every great scholar I have known is almost impossible to find and nowhere to be seen because he or she is moving too fast and has an enormous agenda of tantalizing, solution-defying projects.

Those who sit puffing on their pipes and gazing into sunsets are, in fact, doing exactly that and little more — puffing and gazing. After a bit, both the smoke and the gaze are stultifying. The creative person is a restless soul, engaged often in frustrating and frequently lonely endeavor. On a surprising number of occasions, he must summon the courage to admit that he is wrong and to start all over again. As Gertrude Stein observed, "When you get there, there is no there there."

And the third and final misconception about scholarship is that truth is absolute. One needs only to find it and codify it. One of the perplexing, intriguing, maddening aspects of research and teaching is that truth won't stay put. A traditional Vermont story has the city slicker posing the question to the Vermont farmer: "What do you know today — for sure?" And, without hesitation, the Vermont replies: "Not a damn thing." In a recent Harper's article, the editor of the *American Scholar* observed that "the unpredictability of the outcome of dreams is no reason to cease dreaming."

Currently our society seems to be entering a period of craving for absolutes. We want easy answers readily dispensed. Easy answers depend upon sweeping generalizations. Right now we seem to be in love with the sweeping generalization: "Education has no value;" "Americans

have no morals;" "Nothing can be solved at the national level which can't be handled better in the neighborhood."

In the academic world, the danger of teaching without research is that the teacher falls back on the easy generalization to justify the unknown. The research-trained teacher knows instinctively that a generalization today is without substance tomorrow.

Lewis Thomas, the brilliant scholar-chancellor of the Sloan-Kettering Cancer Center, has written a beautiful essay "On the Uncertainty of Science." He observes: "Human knowledge doesn't stay put, it evolves by what we call trial and error, or, as is more usually the sequence, error and trial. Other animals differ from us in this respect. Each of them has at least one thing to be very good at, even superlatively skilled, surefooted. Any beetle can live a flawless, impeccable life, infallible in the business of procreating beetles. Not us: we are not necessarily good at anything in particular except learning, and using this we tend to get things wrong. It is built into our genes to veer off from the point: somehow we have been selected in evolution for our gift of ambiguity."

The true scholar-teacher is restive, not rested. He and she are constantly challenged and defeated and challenged again by ambiguity.

I asked at the outset what you shared with these men of accomplishment? Why are your college years worth the effort? Hopefully and simply because you have learned from your mentors these lessons of life: (1) Enough is never enough. Knowledge is endless, and the simple life is not worth human living. (2) Hard work, mistakes, failures, and occasional recognition lie ahead for anyone who seeks to add to human intelligence or merely to preserve the present quality of human life. (3) Don't ask for certainty. Whatever your age and condition, be ready to venture and to make choices without guarantees. In sum, we wish you the same driven, unsatisfied life these men have relished, a life in which you will never have all the answers but in which you will always have a purpose.

Listen carefully to the words of Daniel Webster: "Let us develop the resources of our land, call forth its powers, build up its institutions, promote its interests, and see whether we also, in our day and generation, may not perform something worthy to be remembered."

Byzantium

(Continued from page 1)

century copy of an 11th-century work. Such "fakes" are no less interesting than the "originals." Indeed, they tell us even more about the society that created them.

One must be extremely careful about dating works of art on grounds of style alone. Generally we search for objective, often extraneous grounds for making such decisions. Thus, to study only the illuminations in a Psalter is to miss names, inscriptions and other "messages" hidden in a page of text that can get overlooked in the art historian's rush to look at the splendid pictures. Only when a medieval book is considered as a whole, and compared in detail to all other known examples of its type, is one equipped to make a judgement concerning its age.

Therein lies a problem since only a small fraction of medieval picture books have been published in full. To make useful judgements about a Byzantine Psalter of the so-called Aristocratic type that I discovered in New York, I had to examine every other extant example. This was easier said than done. For no one knew how many examples of this type were preserved, let alone their dates or place of origin. With the backing of Penn State's Institute for the Arts and Humanistic Studies, I travelled from Cairo via Istanbul and Athens to Leningrad and Moscow, as well as to American libraries, examining Psalters that were known to exist but which had never been studied. The result is a corpus of manuscripts that I discovered in Paris in 1982. We now know

at least three things: first, how many such books exist (57); their chronological range (10th to 15th century); and, finally, that this is the largest single cluster of Byzantine manuscripts to survive. Fifty-seven books in 500 years may seem a very small sample to statisticians. To the historian of medieval art its richness beyond compare. And each one, in its own peculiar way, tells us something of the aspirations and fears, the quality of life and a host of quantitative facts (e.g. the relative cost of a leaf of parchment) about the age that created it. In this way, Byzantine art is much more than a set of pretty pictures. It provides insight into a culture that, save on the fringes of south-eastern Europe and in the Slavic world, has all but disappeared. We now begin to understand why in its own day — a day that lasted more than a thousand years! — it was celebrated from Anglo-Saxon England to T'ang China as the greatest civilization that the world had ever seen. A general picture of Byzantine civilization is emerging, but to be accurate it has to be examined piece by piece, page by single page.

Choirs

(Continued from page 1)

sounds; the third, a real scherzo movement; light and fleet footed, nimble and playful; the fourth movement is the message — the transience of beauty and memory."

No tickets are required for the April 11 performance in Schwab.

Peter Quince at the Clavier

I
Just as my fingers on these keys
Make music, so the selfsame sounds
On my spirit make a music, too.

Music is feeling, then, not sound;
And thus it is that what I feel,
Here in this room, desiring you,

Thinking of your blue-shadowed silk
Is music. It is like the strain
Waked in the elders by Susanna.

Of a green evening, clear and warm,
She bathed in her still garden, while
The red-eyed elders watching, felt
The bases of their beings throbb
In wincing chords, and their thin blood
Pulse pizzicati of Hosanna.

II
In the green water, clear and warm,
Susanna lay
She searched
The touch of springs,
And found
Concealed imaginings.
She sighed,
For so much melody

Upon the bank, she stood
In the cool
Of spent emotions
She felt, among the lavas,
The dew
Of old devotions
She walked upon the grass,
Still autumning
The winds were like her maids,
On timid feet,

Fetching her wooden scarves,
Yet warring,

A breath upon her hand
Muted the night
She turned —
A cymbal crashed,
And roaring horns.

III
Soon, with a noise like tambourines,
Came her attendant Byzantines.

They wondered why Susanna cried
Against the elders by her side;

And as they whispered, the refrain
Was like a willow swept by rain.

Ah, their lamps' uplifted flame
Revealed Susanna and her shame.

IV
And then, the simpering Byzantines
Fled, with a noise like tambourines

Beauty is momentary in the mind —
The fitful tracing of a portal;
But in the flesh it is immortal.

The body dies; the body's beauty lives
So evenings die, in their green going,
A wave, interminably flowing.
So gardens die, their neck breath scenting
The cool of winter, done repenting.
So maidens die, to the aural
Celebration of a maiden's choral.
Susanna's music touched the bawdy strings
Of those white elders; but, escaping,
Left only Death's ironic scapting.
Now, in its immortality, it plays
On the clear viol of her memory,
And makes a constant sacrament of praise.

News in Brief

(Continued from page 1)

visiting professor of sociology at Harvard. In addition, numerous kibbutz members will take part, as will College of Human Development faculty members, who are to serve as discussion leaders.

The conference is intended for social scientists, educators, community planners and managers, economists, philosophers and other persons interested in democratic equality. Topics will include the ideology of kibbutz life, the labor value of the system, education as a life-long process, and democracy and self-management in the community.

Further information is available from Lawrence S. Cote, Radnor's assistant director, at 215-293-9870.

French linguist to speak

Professor Andre Martinet of the University of Paris will present a lecture on "Linguistic Dynamics and Diachrony" on Monday, March 30, at 7:30 p.m. in Room 101 Kern Building. The lecture is sponsored by the Department of French and the Linguistics Program.

A linguist of international reputation, Professor Martinet is the author of many books in both French and English, including *Economie des changements phonétiques*. He has been a faculty member at a number of institutions, including Columbia University, where he served as chairman of the Department of Linguistics.

Families needed to host foreign students

The Friendship Family Program of the Community International Hospitality Council is once again requesting individuals and families interested in international understanding to befriend foreign students at University Park.

More than 100 students — from Europe, the Middle East, Asia, Africa and South America — have expressed a desire to experience American family and community life. Persons interested in participating in the program or wishing to receive more information should call the International Office of Student Affairs, 865-6348, or Mary Goodwin, 238-3868.

Heat turn-off dates set

Heat systems in University Park classrooms and administration buildings are scheduled to go off around May 4, the Executive Energy Conservation Committee has announced.

In residence halls, heat will be turned off about May 11. Heating systems in research facilities will be turned off approximately May 18, and heat in the Ritenour Health Center around May 26.

Minor adjustments of these dates may occur if short range weather forecasts indicate the need," says Ralph E. Zilly, vice president for business and chairman of the committee.

An energy bulletin will be issued by the committee to keep appropriate University officials informed, Mr. Zilly adds.

Elms to be sprayed

American Elm trees at University Park will be sprayed sometime between April 1 and April 20, depending on weather conditions.

Spraying, which will continue for about three days, is to control Dutch Elm Disease. All spray materials have been approved by the Pesticides Committee of the College of Agriculture.

Any of the spray material settling on cars should be washed as soon as possible with soap and water.

"Artist with Model" by Augusto Perez is part of Gallu collection.

Museum showing two collections

Two private art collections molded by the contrasting tastes of discriminating collectors — husbands and wives in both cases — are currently on display at the Museum of Art. Selected works from the Mimi and Sanford Feld Collection and from the Samuel Gallu Collection will be shown there through May 24.

"When a private collection is publicly revealed, a unique experience unfolds for the viewer accustomed to institutional collections," the catalog for the Feld Collection points out. "Here is a group of pictures formed, not over scores of years by the tastes of a changing museum staff, but by persons for whom the company of beautiful objects has become a way of life."

Mimi and Sanford Feld, lifelong collectors of a variety of objets d'art, purchased their first painting in 1970. Today they own a distinguished group of English and American paintings, drawings, and watercolors, dating from the early 19th through the early 20th century. Most of the works have been widely exhibited individually, but this is the first time they have been shown as a group. Fifty paintings are on view in the current show.

Among the artists displayed are several members of the Hudson River School, including Jasper Cropsey and Sanford Gifford. The so-called Ashcan School — a

group of urban realist painters — is represented by William Glackens, George Luks, and Robert Henri. Works of Winslow Homer, Maurice Prendergast, J. M. W. Turner, and John Singer Sargent, are also included.

"Lyrical, charming, meditative — that's how I'd describe this exhibit," says Richard Porter, the Museum registrar. He characterizes the Gallu collection, conversely, as "forceful, aggressive, unconventional." Samuel Gallu, a noted playwright and Distinguished Alumnus of the University, and his late wife Harriet assembled over 30 years a distinctive and personalized collection of painting and sculpture.

"Allowing people to look at these pictures," Mr. Gallu says, "is like letting them read my love letters."

The Gallus followed their own tastes in art, rather than simply patronizing artists who were famous or fashionable. In Europe, following World War II, they purchased drawings by Austrian and German Expressionists who were then virtually unknown. Today the works of painters such as George Grosz, Ernst Kirschner and Egon Schiele are most sought after; all of these artists are represented in this exhibit. Approximately 30 pieces from the Gallu collection are gathered at the Museum.

Dance group is presenting 10 new works

The Contemporary Dance Company, now in its eighth year and under the direction of Paula Donahoe and Patricia Heigel-Tanner, will present its annual concert at Eisenhower Auditorium on Friday, March 27, at 8:30 p.m. and on Saturday, March 28, at 2:30 and 8:30 p.m.

Guest choreographers Betsy Hamilton and Kathy S. Stuart join the directors in presenting 10 new works.

Ms. Hamilton, an instructor in the Department of Theatre and Film, has choreographed two dances, "Corridors of Time" and "Taking Flight." She received her undergraduate degree in theatre/dance from the University of Texas and her graduate degree from the Mary Wigman School in West Berlin.

Kathy Short Stuart, a member of The Contemporary Dance Company, has also choreographed two pieces, "Sweat Suite" and "A Journey." A Penn State alumna, she has had additional dance training at the University of Utah and in a number of master classes.

Three works on the program were

choreographed by Paula Donahoe, an assistant professor of dance. They are: "Celebration: Rings Squared Off," "Dominoes" and "May I Have This Dance." Her choreography is based on music by Gustav Mahler, Erik Satie, Claude Debussy, Gabriel Faure and George Gershwin.

Rounding out the concerts are three works choreographed by Patricia Heigel-Tanner, also an assistant professor of dance. "Concerto for Violin, Lute and Figured Bass" employs music by Antonio Vivaldi. "That's It!" is set to a piece by Charles Ives.

Professor Heigel-Tanner's third piece, "Dinosaur's Dance," will be presented at the Saturday matinee. The music was composed by Bruce Trinkle, associate professor in the School of Music.

General admission for the evening performance is \$3, and for Saturday's matinee, \$2. Tickets are on sale at the Eisenhower Auditorium box office between 9 a.m. and 4 p.m. weekdays and will also be available at the door.

Football season ticket applications available

The Football Ticket Office mailed invoices the week of March 16 to members of the faculty and staff who held season tickets last year.

Applications are now available for full-time faculty and staff members wishing to request tickets for the first time. The cost of a season ticket is \$66, and no more than two tickets can be ordered at this special faculty/staff rate.

Assuming that all prior purchasers renew their tickets, new faculty/staff season ticket holders will be assigned to the North End Zone area.

The ticket office expects season tickets to be available until July 3. After that date, single game tickets will go on sale, and season tickets may not be available because of sold out games.

Persons wishing applications or additional information can contact the Penn State Ticket Office, Room 237 Recreation Building, University Park, (814) 865-7567.

The office is open weekdays from 8:30 a.m. to 4:30 p.m., and service is available over the lunch hour. Saturday hours are 8:15 to 11:45 a.m.

"Brel" revue at Kern

Jacques Brel Is Alive and Well and Living in Paris, a musical revue set in the mid-1960s, will be presented by the Department of Theatre and Film and the Kern UnCommon Theatre April 1-5.

Scheduled each date for 8 p.m. in the Kern Graduate Building, the show will feature popular tunes such as "Sons Of," "Old Folks" and "If We Only Have Love."

Tickets, priced at \$2 for students and \$3 for non-students, are on sale at the Kern Information Desk (telephone 865-1878).

Exhibit describing history of German society at HUB

"Between Art and Industry: The Deutscher Werkbund," an exhibition chronicling the history, work and philosophy of the German architects' society, will be on display in the University's HUB Gallery through April 3.

Founded in 1907, the Deutscher Werkbund was a group of artists, industrialists, architects, artisans and businessmen who believed man's future would be secure if laborers were able to take part in the creative work of society.

The Werkbund was dissolved by the Nazis in 1934. When the society regrouped in 1947, rapidly developing technology and its effects on the quality of human life were among its main concerns.

Festival speaker

(Continued from page 1)

age of 19, he began teaching in Baltimore.

After various careers as a steel chopper, public relations director, radio news writer and commentator and toy manufacturer, Mr. Irvs entered the University of Pittsburgh Law School, where he earned a Juris Doctorate.

After graduation, Mr. Irvs was appointed Allegheny County's first assistant district attorney. He was elected to the House in 1958, and has served 10 consecutive terms there.

In May 1977 he was elected speaker — the highest elected position ever held by a black in the State.

Mr. Irvs has sponsored more than 1,500 pieces of legislation, including the bill creating the Pennsylvania Human Relations Commission and the Pennsylvania Higher Education Equal Opportunity Program.

He also helped create the Pennsylvania Higher Education Assistance Agency, the community college system and the Minority Business Development Authority.

Penn State Intercom

Human Development Dean named

Dr. Evan G. Pattishall Jr. has been named dean of the College of Human Development, effective immediately. Penn State's Trustees approved the appointment last Friday upon the recommendation of President Oswald and Provost Eddy.

Dean Pattishall had been interim dean of the College since September 1979.

"Evan Pattishall has done a magnificent job as interim dean," Dr. Oswald told the Trustees. "Beyond the excellence with which he has handled the operation and organization of the College of Human Development, he has, in a relatively short time, vastly improved its academic programs and the morale of faculty and administrators."

"Faculty support for this appointment was exceptionally strong."

Dean Pattishall, who reports directly to Provost Eddy, is responsible for a 3,400-student college with programs in Administration of Justice, Health Planning, Individual and Family Studies, Man-Environment Relations, Nursing and Nutrition.

Prior to assuming the post of interim dean, Dr. Pattishall served for 13 years on the faculty at Hershey. He came to the University in 1966 to form the Department of Behavioral Science. Approaching the subject as a basic biological science, the department, under his leadership, became a model for medical schools.

Evan G. Pattishall

Senate to vote on two reports

At its April 7 meeting, the University Faculty Senate will consider a legislative report on the composition of the University Promotion and Tenure Committee and reconsider recommendations for the training of graduate teaching assistants.

The Senate will convene at 2:10 p.m. in Room 112 Kern Building.

The remaining items on the docket are informational, with Athletic Director Joseph V. Paterno leading off with a report on the role of varsity athletics in the University.

Dr. M. Lee Ucraft, director of residential life programs, will report on a study tracing the personal and academic development of a group of Penn State students from their freshman year in 1976 through their graduation in 1980.

A report on the Basic Skills Program will be submitted by the Committee on Undergraduate Instruction, and the final report of the Capitol Campus Review Committee will be presented. Two tables from the Basic Skills report appear on page 6.

- The Committee on Committees and Rules has proposed several changes in the University Promotion and Tenure Committee. They are:
- (1) The number of committee members to be elected by the Senate is increased from six to seven.
 - (2) The number to be chosen by the President is increased from three to four and the limitation that these be "senior academic administrators" is removed.
 - (3) The requirement that a Lindback Award winner and an Evan Pugh Professor be chosen by lot for membership on the Committee is deleted.
 - (4) Eligibility for membership on the Committee is made identical for both elected and appointed candidates.
 - (5) Continuous membership on the Committee is limited to two two-year terms for appointed and elected members.

The report on teaching assistants is making its third appearance before the Senate; it was returned to committee last month for a cost estimate of its proposals to ensure the quality of instruction offered by TAs.

The Committee on Academic and Physical Planning estimates that over a five year period (1981-86), the University would spend a total of \$34,000 to provide listening/speaking courses to TAs for whom English is a second language and \$46,200 to offer a seminar for all TAs.

A third section in the legislation, which occasioned some debate at the March Senate meeting, proposes that new students be informed during freshman orientation that certain of their courses may be taught by graduate assistants.

The Senate will receive a report from the Capitol Campus Review Committee. This report was submitted to Senate Council on March 24. In general, Council was satisfied that the delegation of authority made to Capitol has been well used and that the Campus is fulfilling its mission.

The Committee prepared several recommendations, and those requiring action will be reported to the Senate at the May of June meeting.

Libraries begin switch to computerized cataloging

The University Libraries are beginning a carefully staged progression from dependence on the conventional card catalog to computerized cataloging.

As of Jan. 1, 1981, no cards, except for certain non-Roman scripts, are being added permanently to the catalog, according to Libraries Dean Stuart Forth.

Since some access to currently cataloged material is necessary, however, title cards for the newly cataloged material will continue to be filed temporarily in the catalogs.

Dean Forth points out that title cards are now being filed within a week of a book's cataloging, an improvement on past practice. For many years, new books were cataloged quickly and made available to readers, but staffing limitations often precluded filing the cards in the catalog before three to five months had elapsed.

Library staff will continue to add title slips to the card catalog until the first non-card access to the catalog via computer Output Microform (COM) is ready in late

summer or early autumn.

COM will serve as intermediate access and, in the long term, as back-up for the Libraries' final on-line access program, Dean Forth explains.

Ultimately, on-line access will enable researchers to use a computer terminal to search the data base by author, title, subject and location, as well as to place personal reserves on material.

"Based on our present level of funding, we have set a target date of 1983-84 for public access to the data base," Dean Forth says. "With increased funds and staffing it could be sooner; if funds are further reduced, it will be later."

The first COM catalog will cover materials catalogued from Jan. 1, 1981, to the date of the COM's availability. Eventually academic departments may be able to buy microfiche copies of this catalog.

Several factors dictated the decision to "close" the card catalog, according to Dean Forth. Not only are card catalogs labor intensive and thus very expensive to

maintain, but they have also been rendered obsolescent by the advent of computerized cataloging and changes in national and international bibliographic records, upon which all research libraries depend.

The Library of Congress struck a final blow this year by deciding to change drastically its methods of recording bibliographic information. Research libraries rely heavily on the Library of Congress's bibliographic standards and practices.

"Penn State, with diminishing resources, simply cannot match old and new practices in the traditional catalog and still maintain its usefulness," Dean Forth points out, adding:

"While drastic changes from ancient practices are bound to be accompanied by occasional delays and irritations, the new computerized catalog is going to work. It will be cost effective and in time will become as familiar to our users as the present card cataloging system."

Alumni Fellows will visit Hershey, University Park

Three prominent alumni of the University return to their alma mater next week in the role of Alumni Fellows, one of the highest honors Penn State can bestow.

Charles L. Blockson of Norristown, Pa., authority and collector of African-American history and literature, and Samuel S. Vaughan of Tenafly, N.J., publisher and president of Doubleday Publishing Company, will visit the University Park Campus to share ideas and professional experiences with students, faculty and administrators.

Gilbert Nurick of Harrisburg, attorney and past president of the Pennsylvania Bar Association, will visit the College of Medicine at Hershey. He will speak about professional self-regulation and medical ethics.

The Alumni Fellows program, sponsored by the Penn State Alumni Association, was initiated in 1973.

Mr. Blockson, a member of the Penn State Class of 1956, will be a guest of the College of Health, Physical Education and Recreation April 6 through 8. He will present a lecture, "Reflections on Paul Robeson," and meet with parks and recreation and physical education classes.

Currently human relations adviser for the Norristown Area School District, Mr. Blockson has been a collector of African-American literature for more than 40 years

and has one of the nation's largest private collections of books about Black history.

An author himself, Mr. Blockson has published three books, *Black Genealogy*, *Pennsylvania's Black History* and *The Underground Railroad in Pennsylvania*, the last of which is being made into a television documentary.

Mr. Vaughan

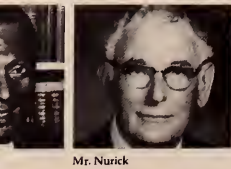

Mr. Blockson

Mr. Nurick

begin in 1952, Mr. Vaughan has achieved wide renown for his editing of political and public affairs books by such authors as Dwight D. Eisenhower, Nelson Rockefeller, Hubert Humphrey, Edmund Muskie and Eugene McCarthy.

Mr. Vaughan also has written three books for children: *The Two Thirty*

Bird, New Shoes, and Whoever Heard of Kangaroo Eggs?

Gilbert Nurick, a 1928 Penn State graduate and a 1931 graduate of The Dickinson School of Law, has been associated with the Harrisburg law firm of McNees, Wallace and Nurick since founding it in 1931. He served as a senior partner from 1959 to 1978.

As general counsel for Hershey interests, Mr. Nurick played an important role in the

(Continued on page 6)

Penn Staters

Dr. Joanne Trautmann, professor of humanities and English at Hershey, presented the commencement address for the College of Human Medicine at Michigan State University. Her title was "Two Life Forms: The Resume and the Story."

J. William Holl, professor of aerospace engineering at the Applied Research Laboratory, conducted a seminar before the Royal Institute of Engineers at The Netherlands, on March 10. He described "Cavitation Research at the Garfield Thomas Water Tunnel."

Invited lectures were recently given by Dr. Heine K. Henisch, professor of the history of photography and IAHS Fellow, at two Houston, Texas, universities. At Rice, Dr. Henisch spoke on "Early Photography in Vienna." "Non-Objective Photography" was the title of his presentation at the University of Houston.

Dr. Forrest J. Remick, professor of nuclear engineering and assistant vice president for research and graduate studies, has been named to a special education, training and qualification task force by the Institute of Nuclear Power Operations. INPO was established as an independent industry organization to improve the quality and safety of nuclear operations as an aftermath of the TMI-2 accident.

Patricia D. Byers, dean of student affairs at Mont Alto, has been elected to the Executive Board of the American College Personnel Association. ACPA has some 8,000 members nationwide.

Dr. George E. Andrews, Evan Pugh professor and head of the Department of Mathematics, presented a colloquium at Columbia University on "Ramanujan's 'Lost Notebook'."

While a visiting scholar at the University of London during Fall and Winter Terms, Dr. William Toombs, research associate, the Center for the Study of Higher Education, presented a lecture at Christian Albrecht University in Kiel, West Germany. He spoke on faculty roles and changing academic programs.

Dr. William E. Sopper, professor of forest hydrology, and Sonja N. Kerr, environmental research analyst at the Institute for Research on Land and Water Resources, have been awarded a plaque by the Professional Reclamation Association of America. They were honored for their outstanding technical paper in the poster session of the 1980 Symposium on Surface Mining Hydrology, Sedimentology, and Reclamation. The title of their paper was "Strip Mine Land Reclamation Using Municipal Sludge."

Joyce Crays, Armstrong County agent, has been named recipient of the 1981 New Worker Achievement Award presented by the Pennsylvania Association of Extension 4-H and Youth Workers. The award is presented annually to an Extension staff member with less than two years of service who demonstrates outstanding ability in teaching at community, county, regional and State levels.

Bookshelf

Donald J. Epp, associate professor of agricultural economics, and John W. Malone Jr., professor and department head of Agricultural Economics and Rural Sociology, have recently had a textbook, *Introduction to Agricultural Economics*, published by MacMillan Publishers, Inc.

Whether one is interested in reviewing back issues of the old weekly "Howard Hustler" or in researching the Bellefonte Central Railroad, a newly published bibliography tells where to look.

Centre County, Pennsylvania: A Bibliography and Guide to Sources of

Information has been compiled by Joan

Elaine Lee, senior assistant librarian. The 327-page book contains 2,378 separate listings on Centre County topics ranging from agriculture to water and sewage. Depending on the topic listed, the bibliography directs users to one of 23 separate library locations for information on county subjects.

The bibliography was funded by The University Libraries administration.

"In 1975," says Ms. Lee in the book's introduction, "the advent of the Bicentennial year brought an increased interest in local history and the tracing of roots."

"This, added to the ever-present questions relating to Centre County from librarians, public school and university students, teachers and administrators, historians and government officials, amateur genealogists, the media and the general public, led to... this work and subsequently determined its nature."

Both published and unpublished works are listed. Books, pamphlets, public documents, maps, public archival materials, dissertations and theses, periodical articles and a few selected newspaper articles comprise the bulk of the work. General State or regional works, when relevant to Centre County, are included.

"A systematic effort was made to include materials from the earliest days through 1976, with a few later references," Ms. Lee says.

"In the past, the greatest difficulty with the serious study of small localities was the lack of first-class local bibliographies," writes history professor emeritus Philip S. Klein in the book's foreword. "For Centre County, this book meets the need."

Drs. G. Phillip and Carol A. Cartwright, both professors in the College of Education, have combined their talents to write *Educating Special Learners*, a 475-page college textbook published this year by Wadsworth Publishing Company. In the text, the Cartwrights are joined by co-author Majorie E. Ward of Ohio State University; and in the accompanying 250-page teacher's manual (*Activities, Guidelines and Resources for Teachers of Special Learners*), they are joined by coauthors Dr. Herb and Dr. Sara Willoughby-Herd of Clarion State College.

Dr. G. P. Cartwright is professor and acting head of the Division of Special Education and Communications Disorders. Dr. C. A. Cartwright is coordinator of graduate studies and professor of education in the Division of Curriculum and Instruction.

Included in the comprehensive text, which in many sections could serve as a parent's manual as well as a guide for teachers, are 17 chapters containing a wide-range of topics related to special education. In addition, the book contains many case histories, anecdotes and photographs illustrating the hardships and successes of handicapped persons, as well as how teachers and parents can better serve the handicapped. The authors include an entire chapter of "Human Services and Placements," in which they list and describe the many services available to meet the needs of the handicapped.

In the accompanying teacher's guide, the authors have listed useful suggestions and resources for working in special education. Again, much of the information is as informative for parents as it is for teachers.

Two University faculty members have published the first critical edition of one of the works of 16th-century Spanish writer and poet Juan de la Cueva de Garza (ca. 1550-1610).

The two are Dr. Beno Weiss, associate professor of Italian, and Dr. Louis C. Perez, professor of Spanish. Their book is *Juan de la Cueva's Los Inventores de las Cosas - A Critical Edition and Study*. It was published by the Pennsylvania State University Press.

Los Inventores, one of Cueva's last works, was written during a visit to

Cuenca and was not published until the 18th century. The book by Drs. Weiss and Perez is the first critical edition of this long narrative poem on "The Inventors of Things." The authors offer a carefully edited text, a short biography of Cueva, a critical and textual introduction, a bibliography, and an annotated index (a glossary) of persons, places, and things cited in the poem. The text is based on the hitherto unpublished Madrid manuscript, with notes on all the variants from other manuscripts.

Professors Weiss and Perez are members of the Department of Spanish, Italian and Portuguese. Dr. Weiss has previously done translations and biographical and critical studies of Italian and Spanish literatures. Dr. Perez has published numerous articles and two books on Spanish Golden Age drama.

25-year chairs

Dr. H. Tracy Sturcken, professor of Spanish, is observing his 25th year as a member of Penn State's faculty.

Dr. Sturcken has written a book, *Don Juan Manuel*, and has co-authored two others, *Old Spanish Review* and *Spanish in Review*. He also has authored some 15 articles and 70 book reviews for professional journals and has presented a dozen papers at professional meetings. From 1960 to 1962, he was editor of the *Comparative Romance Languages Newsletter*.

Dr. Sturcken originated and taught for the first time a number of Penn State's graduate course offerings in the fields of Ibero-Romance and medieval Spanish linguistics and literature. He further served as acting head of the Department of Spanish and on the committee that established the College's Medieval Studies Area Program. From 1965 to 1975, he was chairman of the Department's Graduate Studies Committee.

To collect data on dialects for his graduate courses and books, Dr. Sturcken has traveled extensively in the rural areas of northern Spain.

Dr. Sturcken has directed some 40 M.A. degree theses and doctoral dissertations. He received his Ph.D. (1953) and M.A. degree (1950) from the University of North Carolina and his A.B. degree (1947) from the College of Charleston (S.C.) Prior to joining the Penn State faculty, Dr. Sturcken taught at Amherst and Colby colleges.

Dr. Deborah S. Austin, professor of English, is celebrating her 25th year as a University faculty member.

Dr. Austin is the author of a volume of poetry, *The Paradise of the World* (Penn State Press), and is in the process of preparing a second poetry manuscript, which she says is "probably long enough to fill two volumes." In addition, she has published individual poems in numerous publications, including *The Yale Review*, *The Nation*, *The Massachusetts Review* and the *Journal of General Education* (JGE). At present, she is in her fourth year as poetry editor of the JGE.

A specialist in 19th century British literature, Dr. Austin has written on William Blake, George Meredith and Henry James. Her study guide, *An Introduction to the Poetry and Prose of*

Dylan Thomas, was published by the University's Center for Continuing Liberal Education (CCLE) for use by adult study groups. She is also one of three co-authors of *Modern Fiction: Form and Idea in the Contemporary Novel and Short Story*, it, too, was published by CCLE.

During 1974, Dr. Austin was a visiting faculty member at Bucknell University in the double capacity of Blake expert and poet. A lecture she presented there, "Threefold Blake's Divine Vision, Intention and Myth," was included in *The Binding of Proteus, Perspectives on Myth and the Literary Process*, published in 1980 by the Bucknell University press. In 1975, Dr. Austin presented an invited lecture at Bryn Mawr College, "Blake's Illustrations to Bunyan's *The Pilgrim's Progress*."

At Penn State, Dr. Austin originated and developed the English Departmental Honors Program and served as chairperson for several years of the Liberal Arts Honors Committee during the period when the College was developing its Departmental Honors programs. Among numerous other activities, she chaired the Faculty Senate's Graduate Academic Standards Committee in 1977-78 and the Departmental Committee on Rank and Tenure in 1979-80. She also served three years on the Graduate Council.

Dr. Austin received her Ph.D. from Bryn Mawr College (1953), her M.A. degree from Radcliffe College (1946) and her B.A. degree from Smith College (1943), all in English.

Edward E. (Ned) Minshall, news editor in Continuing Education, joined the University on April 1, 1956, as news assistant - making him eligible for his 25-year chair.

A State College native and Penn State graduate, he has lived his entire life in central Pennsylvania, except for military service in the 82nd Airborne and 88th Infantry Divisions and four years in the capacities of general reporter, sports editor, and managing editor of several southwestern Pennsylvania daily newspapers.

He is married to Anne K. Minshall, personnel coordinator for University Libraries. They have five children: Susan Braun, Germany; Nancy Sabol and sons Ed and Bill, all of State College; and Maggie Smith, Julian, who is the mother of their only grandchild, Brian. Nancy and Maggie are University employees in the Physics and Student Aid Departments, respectively.

The family spends a lot of time during spring, summer and fall at its cabin along Penn's Creek near Coburn. The surrounding woods have provided a relatively new "hobby" - woodcutting to fill the seemingly insatiable appetites of woodburning stoves in both their home and their cabin.

A staunch advocate of woodburning as an alternative to burning imported oil, Mr. Minshall strongly urges anyone considering it to read everything he or she can find on safe woodburner installation and maintenance, then follow the specifications to a "T." Woodburning, like all other forms of heating, is not 100 percent fireproof, he emphasizes, but careful installation and maintenance can keep it in the high 90s.

Promotions

Staff Exempt

Doris J. Bickle to staff assistant, Center for Research in Business Administration. Gregory S. Kozma to assistant food service manager at Hershey. George G. Summers to staff pilot in Business Services.

Clerical

Norma J. Muck to clerk records A in Student Administrative Services.

Technical Service

Josephine M. Dunkle to anesthesia workroom aide at Hershey. Jay Minasi to janitorial worker, group leader, utility, in Physical Plant.

(Continued on page 3)

(Continued from page 2)

Charles H. Steele to residence hall preventive maintenance worker in Housing and Food Services. William Stouffer to janitorial worker, group leader (utility) in Physical Plant. Gregory K. Wert to preparation technician in Science.

Staff development

The University offers the EXCEL Program as a training and development program for senior, career-oriented office personnel. Recent graduates are:

Merrilee Barner, accounting clerk, Controller's Office; Mary Baylets, senior clerk, UDIS; Janet Bowman, secretary B, President's Office; Carol Brobeck, secretary B, Nuclear Engineering; Lois Cook, secretary B, Earth and Mineral Sciences; Dottie Duck, secretary B, Earth and Mineral Sciences; Laura Frey, secretary B, Business Administration; Ann Hagan, secretary B, UDIS; Beryl Holtzinger, secretary B, Liberal Arts.

Denise Jenkins, secretary B, Student Administrative Services; Judy Leonard, secretary B, Education; Elaine Malin, secretary B, HPER; Cynthia Miller, secretary B, Controller's Office; Sharon Rakowski, secretary B, Continuing Education; Karen Samsel, senior clerk, Student Administrative Services; Sherry Sharum, secretary A, Human Development; Peggy Spangler, secretary B, Education; Linda Steyers, secretary B, Science; Anna Strouse, secretary B, HPER; Debbie Struble, secretary A, Public Information.

Carpoolers

Drivers are wanted to join an existing carpool from Tyrone to campus. Hours 8 a.m. to 5 p.m. Call Joan Everhart 865-1402 or 684-4985.

Partings

George R. Barr closed the book on a 40-year chapter of Penn State employment when he retired on April 1.

Co-workers and friends marked the occasion with a party where Mr. Barr received a Nittany Lion statue, a traditional scroll signed by co-workers and warm wishes for the future.

"George was an A-1, A.O.K. employee," says supervisor Art Kelley. "If we could have more employees like George, the University would be a better place."

Mr. Barr had worked for the University since 1941 when he started in Landscape doing everything from mowing grass to running a high lift. He continued in his position, except for a few years of service with the Army, until the early 1950s. At that time, he transferred to Campus Patrol where he was involved with daylight traffic duties.

In 1961, he became a property inventory clerk and several years ago was promoted to assistant supervisor of equipment records in the Controller's Office. Mr. Barr's job took him to every corner of Pennsylvania as he travelled to the branch campuses to oversee the tagging of equipment for inventory purposes.

Joining Mr. Barr in his retirement will be his wife, Velmeda, who recently retired from Erie Tech. However, the Barr family will still be represented at Penn State by son, Gerald, and daughter, Darla, who are both University employees. Another son, George Jr., graduated from Penn State in 1973 in law enforcement and corrections and is currently attending law school in Oklahoma.

Retirement plans for the Barrs include the possibility of trips to Florida and Oklahoma.

Heleen J. Peters, janitorial worker in the Office of Physical Plant, retired April 1 after working for the University since Oct. 10, 1960.

Most recently assigned to Davey Laboratory, Mrs. Peters spent her entire tenure in the Office of Physical Plant, except for a five-year period from 1971 to 1976 when she served as a milk test-machine operator in the College of Agriculture.

Noting that her seven grandchildren are her "main interest," Mrs. Peters says her retirement plans include a trip to South Carolina, where two of her grandchildren reside.

Miriam E. Braucht, a senior operator in the sewing room for the Department of Housing and Food Services, retired March 11. She had been employed by the University since Sept. 18, 1957.

Mary Alwine, a campus scheduler with Continuing Education, retired April 1 after working for the University since March 1, 1971.

Freda McClenahan, a residence hall worker in Housing and Food Services since Sept. 30, 1969, will retire April 25.

Richard Marinac, an instructor in English at the DuBois Campus, left the University Jan. 8. He had been at the Campus since Oct. 31, 1966.

Robert R. Brownlee, senior research associate in Engineering, left the University April 1 after a tenure dating back to Feb. 1, 1958.

Doris Watson, a switchboard operator at Behrend College, left the University April 1. She has been at the College since March 29, 1971.

Linda J. Coughlin, a secretary in Continuing Education since June 22, 1970, left the University on March 28.

Obituaries

Charles T. Davis, professor of English at the University, where he taught from 1961 to 1970, died March 26. He was 62. At his death, Dr. Davis was chairman of the Afro-American Studies Program at Yale University. Dr. Davis helped develop Penn State's first black studies courses.

A graduate of Dartmouth College, where he was elected to Phi Beta Kappa in his junior year, he earned his M.A. from the University of Chicago and his Ph.D. at New York University. His chief research interests while at Penn State were in the poets Edward Arlington Robinson and Walt Whitman, and he edited books on the works of both men.

John L. Rosenberger, a former associate county agent on the College of Agriculture staff, died March 14. He was 69. Mr. Rosenberger was employed as a county agent from 1954 until his retirement in 1977.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Faculty/Staff Alerts

Withholding reminder

The Controller's Office wishes to remind those employees who filed a Withholding Exemption Certificate — Form W-4E — for 1980 that this certificate will expire April 30, 1981, for taxpayers on a calendar year basis. The exemption claimed on Form W-4E must be renewed annually.

If you qualify and wish to continue your exemption, or if you are applying for the first time, you must file a new Form W-4E for 1981. You may claim the exemption from withholding if you had no income tax liability for 1980 and if you anticipate no income tax liability for 1981. Forms are available from the Payroll Department, Room 301 Shields Building.

In general the elimination of the withholding applies only to those working part-time. The principal advantage is that it will eliminate the need to file an income tax return at the end of the year to obtain a refund of money withheld.

Anybody There?

The University is host for this year's Eastern Regional Conference for Fulbright Scholars, which will take place May 3-6 at Keller Conference Center. The theme of the conference is "Global Interdependence: Changing Perspectives in International Policy in the '80s." Penn Staters who have held Fulbright scholarships are invited to participate with the understanding that they will be encouraged to attend on a continuous basis throughout the conference in order to stimulate fellowship and informal exchange. For further information please write to the Chairman, University Committee on International Programs, Room 306 Willard Building, University Park, PA 16802, or phone 865-9549 between 10 a.m. and 12 noon.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division 865-1387 (ext. 100) or 865-1387. Applications for these staff vacancies will be accepted until 5 p.m., April 9, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment Practices (FEP-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ADMINISTRATIVE ASSISTANT FOR ACADEMIC SERVICES, BERKS CAMPUS. Assist, plan, organize and implement the student registration process. Responsible for the maintenance of student and faculty records and submission of required reports. Provide liaison with appropriate Campus and University offices, including Student Affairs Office, Computer Service, etc., with regard to instructional services, registration, records, orientation, etc. Assist in the development and delivery of instructional services by orientating, meeting and space requirements, preparing registration and admission analyses, etc. Prepare and validate class schedules. Responsible for the coordination and preparation of the final examination schedule. Master's degree in an academic discipline, higher education, or instructional technology, or equivalent outside study or training plus up to and including one year of effective experience, with teaching experience highly desirable.

EMPLOYMENT SPECIALIST/NURSING, COLLEGE OF MEDICINE, HERSHEY. Interview and screen registered nurses, licensed practical nurses and other nursing personnel in light of existing or proposed vacancies, inform applicants as to employment procedures, University policies, benefits, working conditions, etc. Determine employee qualifications for positions in accordance with positions' requirements and determine appropriate salary within established guidelines to include the establishment of training programs as necessary. Assist with special projects assigned to include traveling to schools of nursing to recruit potential employees, and annual affirmative action audit, the annual Department of Personnel Services report, salary surveys, etc. In absence of other employment specialists, perform duties as assigned.

Bachelor's degree (or equivalent) in nursing or related field, plus one to two years of effective experience.

NUTRITIONAL CARE TECHNICIAN, COLLEGE OF MEDICINE, HERSHEY. Responsible to Senior Nutritional Care Technician for the operation of the Diet Office and as a Clinical Dietitian when providing nutritional care to patients. Associate degree in foods and nutrition or equivalent, and six to twelve months effective experience.

MANAGER, ADMISSIONS DEPARTMENT, COLLEGE OF MEDICINE, HERSHEY. Responsible to the Associate Hospital Director/Director of Financial Affairs for carrying out the admissions and financial counseling policies of the hospital and for the supervision of the Admissions Office. A bachelor's degree in business or equivalent and two to three years of effective experience.

BOOKSTORE MANAGER, UNIVERSITY BOOKSTORE, DELAWARE AREA COUNTY CAMPUS. Responsible to Director, Penn State Bookstore System, for purchasing, financial and retail operation of Delaware County Campus Bookstore. Determines quantity of each textbook title, associated loss, material, supplies, and equipment items for each registration period of effective inventory. Approves all invoices for payment. Accountable for and controls cash, cash registers, and preparation of report of cash receipts. Studies new lines of merchandise and reacts to the new lines of merchandise and a varying number of part-time clerical employees. Associate degree or equivalent to two years of college-level training, with over one year and up to and including two years of effective experience, or high school graduation with two years of business school, plus over two years and up to and including four years of effective experience.

(357)-The National Institute of Mental Health has a June 1 deadline for several programs: (1) Manpower Research and Community Grants, Dr. Sam Silverstein (301-443-3003); (2) National Research Service Awards — Individual and Institutional, Dr. Peter Aronoff (301-443-3855); (3) Professional Education, Manpower & Training Programs, Mr. Donald Fisher (301-443-3331); (4) Psychology Education, M & T Programs, Dr. Stanley Schneider (301-443-3358); (5) Research in Minority Mental Health, Dr. James Ralph (301-443-3724); (6) Research Scientists Award, Dr. Leonard Lash (301-443-4347); (7) Short-term Training Grants for Non-Mental Health Persons, and Social Work Education, M & T Programs and Special Projects in Mental Health Manpower Development, Dr. William Denham (301-443-4257); and (8) Special Mental Health Manpower Training Grant, Dr. Juan Rangel (301-443-3533) (Ref: OHP Deadlines, June 1981)

Dean Pattishall

(Continued from page 1)

From 1962 until 1966, Dean Pattishall served as associate professor of psychiatry and psychology and chief of the Division of Behavioral Sciences at the University of Florida. Prior to that, he was on the faculty of the University of Virginia and Appalachian State College.

A native of Richmond, Va., Dr. Pattishall has an unusually diverse educational background. After attending Davidson College as a premedical student, he interrupted his schooling to serve as a Navy officer in the Pacific Fleet during World War II.

After the war, he earned his bachelor's and master's degrees in music from the University of Michigan. In 1951, he was awarded a doctorate in educational psychology from Michigan.

In 1958, he interrupted his teaching career to enroll at Western Reserve University, where he earned the doctor of medicine degree in 1962.

Dr. Pattishall has written widely in the field of behavioral science and medical research, and his articles have been published in numerous professional journals.

He is chairman of the national committee which established the behavioral sciences as an equal part of the national certification testing of medical students by the National Board of Medical Examiners. He is a charter member of the Behavioral Medicine Study Section of the National Institutes of Health and is on the Medical Advisory Commission of the Bureau of Health Manpower of the U.S. Department of Health, Education and Welfare.

University Park Calendar

April 2-14

Special Events

Thursday, April 2

Campus Colleagues, brown bag lunch, noon, Room 225 HUB William W. Ashbury, affirmative action, and Jane McCormick, student affairs, on "Penn State's Guidelines on Sexual Harassment."

Commons concert, State College Suzuki

Program, noon, Kern Lobby.
Sports: softball (women) vs. East Stroudsburg (DH), 2 p.m.

Cinemathèque, *It Came from Outer Space* (3D), 7 and 9 p.m., HUB Assembly Hall.

Football Office lecture, 7 p.m., Keller Auditorium. Ellington Darden, Athletic Center of Atlanta, on "General Conditioning and Strength Training."

URTC/Kern Theatre, *Jacques Bel is Alive and Well and Living in Paris*, 8 p.m., Room 112 Kern.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Black Arts Festival, 8 p.m., Ray Memorial Lounge. HUB. Leroy Irvin, minority leader, Pa. House, on "Black Perspectives of the 80s in the Political Arena."

Friday, April 3

Craft demo, Charles Hollingsworth, drawings, 11:30 a.m., Kern Lobby.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Paul Simkins,

geography, on "The Prospects for Curbing Population Growth in Latin America."

Sports: tennis (women) vs. James Madison, 6 p.m.

Cinemathèque, *It Came from Outer Space* (3D), 7 and 9 p.m., HUB Assembly Hall.

URTC/Kern Theatre, *Jacques Bel is Alive and Well and Living in Paris*, 8 p.m., Room 112 Kern. After dinner refreshments, Room 102 Kern. Also April 4, 5.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Artist Series, Gewandhaus Orchestra of Leipzig, 8:30 p.m., Eisenhower Auditorium.

Saturday, April 4

Penn State Alumni Association, Alumnae Day, 9 a.m.-4:30 p.m., Keller Bldg.

Sports: softball (women) vs. Temple (DH), 1 p.m.; tennis (women) vs. Rutgers, 8 p.m.

URTC, *The Cherry Orchard*, 8 p.m., The Pavilion Theatre.

Penn State Symphony Orchestra, Young Artists Concert, 8:30 p.m., Eisenhower Auditorium.

Sunday, April 5

Sports: tennis (women) vs. Bucknell, 9 a.m.

University Chapel Service, 11 a.m., Eisenhower Chapel. M. Lee Upreti, director, Residential Life Programs, speaker.

France-Cinema, *The Virgin Spring*, 7 and 9 p.m., Room 112 Chambers.

Monday, April 6

Commons film, "Thank God I'm a Country Boy: Terry Bradshaw," noon, Room 112 Kern.

France-Cinema, *The Virgin Spring*, 7 and 9 p.m., Room 112 Chambers.

Black Studies lecture and film, Charles

Blockson, 1981 Alumni Fellow, on "Reflections on Paul Robeson," and film, *Song of Freedom*, 7:30 p.m., Robeson Cultural Center. Reception following film.

Interdisciplinary Symposium on Value, 7:30 p.m., Room 101 Kern. John McDermott,

Tras AGM Univ., on "Worrying About Interdisciplinary Studies and Applied Philosophy."

Albert Paley, metalsmith, presents a slide lecture and film about his work, 8 p.m., Room 102 Chambers.

Archaeological Institute lecture, 8 p.m., Room 113 Forum. Stuart Fleming, director, applied science section, Univ. of Pa. Museum, on "The Egyptian Mummy: Secrets and Science."

Jeanne Swack, flute, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, April 7

Comp. Lit. Luncheon, 12:15 p.m., Room 204

HUB. Martin Quaver (Beaver) on "Islam and the Iranian Revolution: Perceptions and Misperceptions."

School of Music Common Hour, 1 p.m., Music Bldg. Recital Hall. Music by Dominick

Argento.

IAHS/English Dept. lecture, 1:30 p.m., Room 101 Kern. James L. Kinneavy, Univ. of Texas, on "From Theory to Practice in

Thorsten Erik Edvar, a junior at the Curtis Institute of Music, will be guest trombone soloist during an April 12 Blue Band concert, directed by Dr. Ned C. Dreihl.

Teaching Composition, An Historical Perspective.

Sports: tennis (men) vs. Univ. of Pa., 2 p.m.

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Comp. Lit. Film Series, *Everything for Sale*, 7 and 9 p.m., Room 112 Kern.

IAHS lecture, 8 p.m., Room 102 Forum.

Dominick, Argento, composer of new choral work for Penn State Singers, speaker.

Linguistics Program/IAHS lecture, 8 p.m., Room 167 Willard. Wolfgang Dressler,

Univ. of Vienna, on "Sociolinguistic Problems of German as Spoken in Austria."

Artist Series film, Brooks, *Young Frankenstein* (1975), 8 p.m., Schwab.

Wednesday, April 8

Original print exhibition and sale, 10 a.m.-5 p.m., Kern Lobby. Also April 9.

STS/TCO luncheon, noon, talk, 12:30 p.m., Room 101 Kern. William H. Allison,

Arts and Architecture, on "Some Applications of Modern Technology to the Theatre."

School of Music, Music in Interesting Times, *Musica da Camera*, "Queen of Tonga Suite," 2:20 p.m., Music Bldg. Recital Hall.

Melissa Dixon, violin, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, April 9

Fixed date for meetings involving Commonwealth Campus Faculty. Also April 11.

Third Annual Slavic Folk Festival, 9 a.m.-11 p.m., Robeson Center, Walnut.

Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. Charles Keil, SUNY-Buffalo, on "Devo: Music from an Anthropological Perspective."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Frederick Wernstedt,

geography, on "Tourists in Mexico. Why They Are, Where They Go, and Why They Matter."

Artist Series, Vincent Price as Oscar Wilde in *Divinations and Delights* by John Gay, 8:30 p.m., Eisenhower Auditorium.

Saturday, April 11

Third Annual Slavic Folk Festival, 9 a.m.-5 p.m., Robeson Center, Walnut.

Sports: lacrosse (women) vs. William and Mary, 1 p.m. (men) vs. Drexel, 7:15 p.m.; softball (women) vs. Cornell State (DH), 1:30 p.m.

France-Cinema, *Cocotea, Beauty and the Beast*, 7 and 9 p.m., Room 112 Kern.

Raymond Brown and the Penn State Singers, premiere performance of "Peter Quince at the Clavier," by Dominick Argento, 8:30 p.m., Schwab.

Sunday, April 12

University Chapel Service, 11 a.m., Eisenhower Chapel. Roosevelt Green, Jr., minority affairs, PSU Graduate School, speaker.

Sports: softball (women) vs. Ithaca (DH), 2 p.m.

Penn State Symphonic Blue Band, 3 p.m., Eisenhower Auditorium.

Loretta Greiman, flute, 7:30 p.m., Music Bldg. Recital Hall.

Seminars

Thursday, April 2

Computer Science, Michael K. Molloy, UCLA, on "Modeling the Performance of Distributed Systems with Stochastic Petri Nets," 4 p.m., Room 325 Whitmore (new listing).

Mathematics, Everett Fischer, Lehigh Univ., on "A Sphere Is a Sphere Is a Sphere," 4 p.m., Room 102 McAllister (new listing).

Friday, April 3

Physical Chemistry, William Jorgensen, Purdue Univ., on "Theoretical Studies of Organic Chemistry in Solution," 2:30 p.m., Room 333 Whitmore.

Astronomy, Robert D. Chapman, NASA, on "The 1979-80 Eclipse of Zeta Aurigae," 4 p.m., Room 445 Davey.

Monday, April 6

MC3B, Steve Gills, Fred Hutchison Cancer Center, on "Interlegin 2 - A Modulator of T Cell Proliferation," 4 p.m., Room 101 Althouse.

Philosophy, Paul Allen, East Stroudsburg State College, on "Moral Judgments: Subjective Yet Universal," 4 p.m., Room 101 Kern.

Tuesday, April 7

MC3B, Steve Gills, Fred Hutchison Cancer Center, on "Cytotoxic T Cell Lines," 11 a.m., Room 101 Althouse.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Economics/Institute for Policy Research.

Edward Denison, economic analysis, U.S. Dept. of Commerce, on "Setback to Productivity Gains," 2 p.m., Room 124 Sparks.

Environmental Pollution Control, G. William Myers, L. Robert Kimball Engineers, on "The Role of the Lawyer in Hazardous Wastes Regulations," 2:20 p.m., Room 128 Sackett.

Chemical Engineering, A. DeCana, Gulf Research, Hamarville, on "Field Measurements and Mathematical Modeling of Exchange of Gaseous Pollutants at the Earth Surface," 3:45 p.m., Room 140 Fenske.

Plant Pathology, Susan Sim, grad. student, on "Around the World in 80 Days (or Less): Long Distance Spore Dispersal," 3:55 p.m., Room 213 Buckhout.

Microcomputer Users, 7:30 p.m., Room 189 MRL.

Wednesday, April 8

Geosciences, Stephen J. Gould, Harvard Univ., on "Part I: Interaction and Replacement in the Fossil Record - The Story of Clams and Brachiopods. Part II: The Genius of Steno's *Prodromus*," 3:45 p.m., Room 26 Mineral Sciences Bldg.

Thursday, April 9

Ceramic Science and Engineering, William J. Minford, Bell Labs, Allentown, Pa., on "Ceramics for Integrated Optics," 11 a.m., Room 301 Steidle.

Chemistry, Ronald MacFarlane, Texas A&M Univ., on "C¹³-Plasma Desorption Spectroscopy - A Novel Application of Nuclear Energy to Studies of Involatile Molecules," 12:45 p.m., Room 333 Whitmore.

Astronomy, Normal Hummel, grad. student, on "Career Alternatives for an Astronomer with Advanced Degrees," 3:55 p.m., Room 111 Tyson.

Physics, Patrick Lee, Bell Labs, on "Electronic Instabilities in Quasi-One and Two Dimensional Systems," 3:55 p.m., Room 445 Davey.

Fuel Science, John Larsen, chemistry, Univ. of Tennessee, on "Solvent Interactions with the Macro-Molecular Structure of Coals," 4 p.m., Room 301 Steidle.

MC3B, Lee Hood, CIT, on "Anobodies, Split Genes and Jumping Genes," 4 p.m., Room 101 Althouse.

Philosophy, Albert Tsugawa, philosophy, on "Heraclitus and the Discursive Forms," 4 p.m., Room 167 Willard.

Friday, April 10

Analytical Chemistry, F. Scheller, Central Institute of Molecular Biology, Academy of Sciences of German Democratic Republic, on "Enzyme Electrodes of Oxidoreductases," 11:10 a.m., Room 333 Whitmore.

Analytical/Physical Chemistry, Glenn Brown, Kent State, on "Properties, Structure and Application of Liquid Crystals," 2:30 p.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Edward Betenas, sculpture, and Frank Chetelat, mixed media, through April 7.

HUB Galleries: Third Annual Slavic Folk Festival Exhibit, Art Alley, Jim Weigle, landscapes of handmade paper, Browning College, "Between Art and Industry - The Deutscher Werkbund," through April 3; Benny Anderson, paintings, opens April 4, The Gallery.

Kern Gallery: John Seitz, glass work; Mary Weidner, drawings; PSU Art Dept. Juried Photography Exhibit.

Museum of Art: Recent acquisitions to the Museum's collection. Selected works from the collections of Mimi and Sanford Feld and Samuel Galla. Selections from the Museum's American collection. Watercolors from the permanent collection, opens April 5.

Pattie Library: Rome Hanks, landscape photographs, through April 9; Mary Barnes, drawings and paintings, opens April 9, East Corridor Gallery. Paul Flexner, drawings, Lending Services Lobby. Andrew Peck and Thomas Hubben, ceramics and ceramic sculpture, Main Lobby. "Photography and Humor," arranged by G. and L. Greenhill and B. and H. Henrich, Rare Books Room. Mi Park, paintings, West Pattee Lobby.

Visual Arts Zoller Gallery: Visiting Artist Exhibition, through April 12.

From the Trustee Docket

Private giving increases

During the first half of the current fiscal year, private giving to the University increased by more than 25 percent over the same period of the previous year, Penn State's Trustees were told.

Dr. Richard E. Grubb, senior vice president for administration, said private contributions for the period from July 1 to Dec. 31, 1980, totaled \$5,329,687, up from \$4,260,074 during the same months in 1979.

"We're reaching more and more alumni and friends with our message that their gifts of all sizes are important and do make a difference," Dr. Grubb said. "We're especially pleased that the number of individual gifts has been growing."

In the second half of 1979, the University received 15,791 private gifts. The comparable figure for 1980 was 19,598.

During the months in question in 1980, alumni and friends gave a total of \$1,647,160, Dr. Grubb said. The previous year, alumni and friends gave \$1,173,538 during those months.

Corporations and businesses gave more than \$1.68 million from July to December 1980, while foundations and organizations contributed more than \$1.58 million. Deferred giving, primarily bequests, added an additional \$407,864.

Most gifts — more than 95 percent — are used for special purposes specified by the donor. Student aid and enrichment of educational programs are two major areas that receive support. Undesignated contributions are allocated to a limited number of special projects.

Alumni emphasis on fund raising, recruitment

Efforts to support the University's agenda for action in this decade — as put forth in *A Perspective on the '80s* — were the focus of the past year's activities of the Penn State Alumni Association.

Jay Feldstein, president of the Alumni Association, said in his annual report to the Board that the 50,000-member organization has increased its emphasis on private fund-raising and the recruiting of students.

"About 70 percent of alumni contributors to the Penn State Fund are members of the Alumni Association," Mr. Feldstein told the Board. "Association members are much more likely to become involved in advisory, supportive and leadership roles with the University."

In reporting on the Association's support of the University's Admissions Office, Mr. Feldstein said the two groups are working closely to develop a systematic plan under which the admissions staff trains alumni volunteers to help recruit outstanding students for Penn State.

"So far," Mr. Feldstein said, "alumni volunteers have been trained in a dozen clubs in New Jersey, New York, Connecticut, Ohio, Maryland and the District of Columbia. The admissions staff feels these alumni have had considerable impact on the applications from out-of-state residents, which increased this year."

Mr. Feldstein added that at the request of Donald G. Dickson, dean of admissions, he has appointed an Alumni-Admissions Advisory Board, which includes the following alumni:

John Bott of Washington, D.C. (class of 1959); Dr. Stanley Bushoff of Pittsburgh (1953); Philip Coase of Mountaineers, N.J. (1949); Mary Ann Passa of Bethlehem (1975); Ann Riley of Edison, N.J. (1969); Irving Segal of Westlake Village, Calif. (1956); Marcia Wharton of Mechanicsburg (1963); Susan Wilson of Macedonia, Ohio (1971); and Harry Young of Pittsburgh (1980).

Alumni are involved also in supporting the University's Career Development and Placement Center. Mr. Feldstein observed, noting that a new program was initiated

last spring to bring regional career development workshops to several Commonwealth Campuses.

In addition, alumni volunteers are providing career counseling and job placement assistance, and alumni societies in Penn State's academic colleges have held a number of career days over the past year.

Reporting about the alumni body, Mr. Feldstein noted that "about one out of every 1,100 persons in the U.S. is a Penn State graduate. We have records on 238,000 alumni."

Other 1980-81 activities reported on by Mr. Feldstein included the Alumni Fellows program, an Alumnae Day planned around topics for women, the Alumni Vacation College, and the modernizing of the Alumni Association's record keeping systems.

Mr. Feldstein observed also that the Association's membership increase has slowed since last July, when the annual membership rate was raised from \$10 to \$15. He further noted that although the number of the Association's annual members had decreased by 400 since last July, the number of life members increased by about 1,100.

A 1959 graduate of Penn State, Mr. Feldstein is a practicing attorney in Pittsburgh and chairman of the Pennsylvania Lottery Commission.

Room, board charges up

An increase in student room and board charges, effective in September 1981, was approved by the Trustees.

"We have done our best, in the face of high inflation, to keep the charges to a minimum," President Oswald told the Board.

"As you know, the residence and dining halls are a self-sufficient operation with no State funds and must run on a break-even basis. The costs of the goods and services needed to run them are now going up faster than the inflation index."

"Although the administration has worked hard to minimize costs, it is inevitable that the students will have to pay some of the difference. The overall 11.3 percent increase in room and board fees is less than the 1980 inflation rate of 12.7 percent."

"The cumulative inflation rate since 1974 has been 87.6 percent, while Penn State room and board increases have been held to 54.7 percent in the same period."

Dr. Oswald said the new rates will change the room and board charge for an undergraduate double room from \$610 per term to \$679, an increase of \$69. The rate for an academic year of three terms will be \$2,037. The cost of single room with board will increase from \$655 to \$729 per term. The \$69 double-room increase represents \$26 per term for room rental, \$40 for board and \$3 in the counseling fee included in overall residence hall costs.

Room and board for graduate students will increase from \$610 to \$680 per term for double rooms; from \$655 to \$730 for singles. Rooms for graduate students who do not use campus dining halls will go from \$282 to \$322 for double rooms and from \$322 to \$377 for single rooms. Rooms for graduate students electing to use food coupons will be \$397 for a double room and \$442 for a single.

Rates for Atherton Hall apartments for graduate students at University Park have increased to \$447 per term for a single with a shared bath; \$477 for a single with a private bath; and \$626 for a double size with a bath.

Meade Heights Housing will increase to \$341 for a two-bedroom house (four persons per house); \$379 for two bedrooms (three persons).

Family housing apartments, charged on a monthly basis, have the following new rates: Eastview Terrace, one bedroom, \$155; two bedroom, \$175; Graduate Circle, one bedroom \$162, two bedroom, \$182; Meade Heights (faculty), small, \$240, large \$265; Meade Heights

(students), small, \$235, large, \$260; Capitol Campus, one bedroom, \$190, two bedroom, \$200.

Apartments at University Manor at the Hershey Medical Center will increase by an average of 6.5 percent.

Other apartments in the Penn State system have increased at varying rates.

Water consumption at U.P. tripled over past 20 years

Water consumption at University Park has more than tripled in the past 20 years according to a report presented by Ralph E. Zilly, vice president for business.

Approximately 500 million gallons were used in the 1959-60 school year, compared to more than 1.6 billion gallons in 1979-80 — reflecting increased numbers of students and campus facilities.

"An adequate and reliable water supply is vital," Mr. Zilly said. "Continuing water conservation and leak detection programs are needed to assure the supply."

The University routinely performs surveys for water leaks and has taken several large-scale steps to curb water use. Flow restrictors on shower heads were installed more than five years ago, and the flow rate of flushometers on toilets has been reduced by nearly 50 percent.

In addition, equipment cooling water is recycled, wherever possible, instead of running it "to drain."

Water has been of concern to Penn State officials since the University's founding, Mr. Zilly noted. References on water supplies date back to the first annual report of the Board of Trustees in 1857.

Penn State has used various sources to obtain water through the years. Today there are nine active wells on University grounds. Peak water demand periods are between 7 a.m. and 5 p.m. each day during the academic terms. Demand at those times is nearly 4,000 gallons per minute.

"Since the earliest days," Mr. Zilly said, "there has been a history of water system interconnection with the adjoining community."

At various times in past years, the University and the State College Borough Authority — which obtain water from different sources — have shared water when the situation called for it.

There are four connection points between University and Borough Authority water lines, Mr. Zilly said.

The University supplies Centre Community Hospital with water. The Borough Authority meters the use and replaces the supply to the University through a connection at the West Campus Steam Plant, Mr. Zilly explained.

Through this arrangement, the Borough Authority avoided the expense of laying water lines to the hospital.

In addition to conservation and leak detection programs, the University's water plans call for monitoring and developing existing wells, along with examining development of a potential new well field in the Spring Creek area.

Another potential water source is Thompson Springs, near the Benner Pike. Using the spring, however, would require chlorination and other efforts to make the water pure enough for consumption.

Graduate programs will combine French, business

Penn State will institute two new programs of study combining graduate degree work in business with advanced proficiency in the French language and culture. The programs are designed to meet the American business community's obvious and pressing need for professionals with extensive training in foreign languages.

"Using existing resources, the Colleges of Business Administration and the Liberal Arts are prepared to implement both programs immediately," Provost Eddy said. One program will lead to a Master of Business Administration Degree and Master of Arts Degree in French studies; the other, to a Master of Science Degree in

business administration and Master of Arts Degree in French studies.

Dr. Eddy said the MBA-M.A. program will give students a chance to develop general skills in management, with competency in the French language and culture. The MS-M.A. program will offer more specialized training in one area of business administration, such as finance, accounting or marketing, with advanced training in the French language and culture.

Architects to be identified for new Schuylkill center

Officers of the University have been given permission by the Trustees to work with the Schuylkill Campus Advisory Board to initiate procedures to identify architects qualified to design a proposed student-community activity center at Schuylkill.

A fund drive is under way to raise \$500,000 for the activities center, which would contain a 300-seat auditorium/lecture room, a hookstore, food service facility and activities room. The drive is expected to be completed next month.

Williamsport hospital, Hershey affiliation approved

An affiliation agreement between the College of Medicine and Divine Providence Hospital in Williamsport was approved by the Board.

Under the pact, Penn State medical students will be able to choose the hospital for elective clinical clerkships, and a variety of hospital staff members will be able to attend co-sponsored continuing education programs.

Divine Providence becomes the 19th hospital with which the Medical Center has an affiliation.

Physicians from Divine Providence who make significant contributions as volunteer teachers of medical students will receive clinical appointments to the Penn State College of Medicine faculty.

New programs described

Several changes in graduate and undergraduate programs will take effect in the 1981 Summer Term.

The University will offer four graduate health education degrees — the Master of Science, Master of Education, Doctor of Education and Doctor of Philosophy degrees. Previously, health education was offered as an area of specialization within the graduate physical education program.

In addition, Provost Eddy said, Penn State will offer a new Bachelor of Science Degree in wildlife science.

"The program is designed for students

interested in conservation and

management of wildlife species and their

environments," Dr. Eddy explained.

Graduates will be prepared for careers in

wildlife management or in related research

and education areas, or they may go on to

seek advanced training. They will have

fulfilled standards established by The

Wildlife Society and the Federal Office of

Personnel Management for employment as

wildlife biologists.

The program will be kept flexible, Dr.

Eddy said, so that students can design in

part their own courses of study, subject to

faculty approval.

Dr. Eddy also said the two options

within the undergraduate major in

metallurgy — general metallurgy and

extractive metallurgy — are being dropped

from University course offerings because

they have tended to duplicate each other.

The 138-credit major in metallurgy will

continue to be offered but without formal

option designations.

Through appropriate course selection,

students may continue to emphasize a

particular area within the major, he noted.

No additional courses, faculty members

or University funds will be required for

any of these changes.

Trustee docket

(Continued from page 5)

Gifts announced

The University, through its Office of Gifts and Endowments, has developed 11 new programs for assisting students, recognizing outstanding achievement and supporting other activities at the University.

The privately funded programs include:

— The William J. and Lois Kesterson Leight Memorial Fund, which will provide guest speakers and artists, scholarships in art, music and engineering, and art objects for the University Museum of Art and College of Engineering. The initial principal is a gift from Col. Leight, a 1934 electrical engineering graduate who lives in Hampton, Va. Two-thirds of the fund's income will be awarded, alternately, to the Colleges of Arts and Architecture and Engineering for the above purposes, with the remaining third returning to the principal. Scholarships are for one year, and are non-renewable.

— The David J. Peery Award, to recognize annually an outstanding graduating senior majoring in aerospace engineering. The initial principal is a gift from friends, colleagues and former students of Dr. Peery, who established Penn State's aerospace engineering department in 1942 and served as its head until 1954. Each award is for one year. Only seniors graduating at the end of Spring Term are eligible.

— The International Association of Holiday Inns, Inc., Scholarship, to help needy senior students enrolled in the service administration option of food service and housing administration. The association will make an annual contribution for the award. Scholarships are one-year, non-renewable awards.

— The College of Science Academic Review and Scholarship Fund, which has the two-fold purpose of providing for regular academic reviews and evaluations of departments within the College of Science for the sake of improvements, and also providing scholarships for outstanding students in the College. The fund's initial principal was an anonymous donation to the University. The Dean of the College will designate the portions of the annual fund earnings to be used for scholarships and evaluations, and each department will be examined according to a schedule drawn up by the Dean. Scholarship recipients will be chosen according to demonstration of, or potential for, academic excellence.

— The John Ormsbee Simonds Honor Award, to recognize annually outstanding students of landscape architecture. The fund's principal has been contributed by Penn State faculty, friends and alumni in honor of Mr. Simonds, a prominent Pennsylvania landscape architect. Landscape architecture students of at least junior standing with superior academic records in the field who show potential for great professional contributions are eligible.

— The John E. Flynn Memorial Illumination Research and Scholarship Fund, which has the two-fold purpose of assisting graduate and undergraduate architectural engineering students conducting research projects in illumination, and providing scholarships for any such students desiring to emphasize illumination studies in their coursework. The initial principal of the fund is a gift to the University from the Illuminating Engineering Research Institute in honor of the late Dr. Flynn, an internationally recognized professor of architectural engineering at the University. Both grants and scholarships will be given to architectural engineering students with an interest in illumination studies and demonstrated or potential academic excellence.

— The John Danhouse Martz Jr. Scholarship, which will help outstanding College of Agriculture students. The initial principal is a gift from Col. Martz, a 1928 graduate in agricultural education, and Margaret Sipe Martz, both of Clearwater, Fla. Undergraduate students in the College with superior academic achievements and a need for financial aid to complete college are eligible.

— The Accu-Weather Scholarship, which will recognize outstanding senior meteorology students with superior capabilities in weather forecasting. Accu-Weather, Inc., of State College will make an annual contribution for the scholarship. Two awards will be given each year on recommendations from the weather-prediction faculty. Awards are for one year and are not renewable.

— The James M. Driscoll Scholarship, to give financial aid to students at Fayette. The initial principal of the scholarship is a gift from Mr. Driscoll, of Addison, Pa. He served on the Fayette Campus Advisory Board from its inception until May 1979. Full-time students at the Campus who have demonstrated good citizenship and have financial need are eligible. Recipients will be selected by the Scholarship Committee of Fayette Campus.

— The Penn State Men's Varsity Fencing Scholarship, which will honor outstanding students with fencing ability, a commitment to scholarship and a record of participation in extracurricular activities. The fund's initial principal comes from combining the assets of the Penn State Men's Varsity Fencing Award with gifts from alumni and friends of the University. Students of at least sophomore standing with the above qualities are eligible.

— The Shenango Valley Campus Advisory Board Scholarship, to recognize outstanding students at Shenango Valley. The initial principal was donated by the Campus Advisory Board. All awards will be made from the fund's earnings. The number and amount of scholarships will be decided by the Shenango Valley Scholarship Committee which also will award the scholarships with approval of the Office of Student Aid.

Contributions to any of the fund's principals may be made by interested parties.

Arts Roundup

Gewandhaus Orchestra to perform April 3

Long considered one of the world's finest musical ensembles, the Gewandhaus Orchestra of Leipzig will perform Friday, April 3, at 8:30 p.m. in Eisenhower Auditorium as part of the Artists Series Music Series.

Founded in 1743 as the Collegium Musicum with Johann Sebastian Bach as its leader, the orchestra acquired its current name from the Gewandhaus, the building that housed the linen merchants of Leipzig where it began performing later in the 18th century.

Among its renowned conductors have been Felix Mendelssohn, Arthur Nikisch, Gustav Mahler, Bruno Walter, and Wilhelm Furtwaengler.

Kurt Masur, formerly the conductor of the Leipzig Opera House, was appointed Music Director of the Gewandhaus Orchestra in 1970. A musician of world stature, he has participated in major music festivals, including that at Salzburg, and has conducted the Dresden Staatskapelle, Leningrad Philharmonic, and New Philharmonia of London. Mr. Masur's extensive recordings include all the Beethoven and Schumann symphonies and all the Mozart and Prokofiev piano concertos.

At Penn State the Gewandhaus Orchestra will perform Mendelssohn's Overture to *Ruy Blas*, Schumann's Symphony No. 1 ("Spring"), and Beethoven's Symphony No. 7.

Tickets are now on sale at the Eisenhower Auditorium box office and HUB booth, 9 a.m. to 4 p.m., weekdays. Phone orders to Mastercard/Visa are accepted at 863-0255 during hours of sale.

Argento to be in residence April 6-11

In conjunction with the premiere of his new work for the Pennsylvania Bicentennial, Dominick Argento will be in residence at University Park during the week of April 6-11.

Several public events involving the composer have been scheduled.

The week will culminate with the first public performance of "Peter Quince at the Clavier," the work commissioned from Mr. Argento by the Institute for the Arts and Humanistic Studies for the Penn State Singers.

The premiere is scheduled for 8:30 p.m. Saturday, April 11, in Schwab Auditorium. The concert, which will also include Mr. Argento's "Queen of Tonga Suite" to be sung upon Waters, "is open free to the public."

Other public events of the Argento residency are:

Two programs of the composer's music performed for School of Music Common Hours at 1 p.m. Tuesday, April 7, and Thursday, April 9, both events in the Music Building Recital Hall.

A public lecture by Mr. Argento at 8 p.m. Tuesday, April 7, in Room 102 Forum Building; and

A performance of "The Queen of Tonga Suite" by Musica da Camera at 2:20 p.m. Wednesday, April 8, in the recital hall.

Flutist to play

Jeanne Swack, flutist and an instructor in the School of Music, will present her first campus recital Monday, April 6, at 8:30 p.m. in the Music Building Recital Hall.

Her program includes the Sonata in E Flat Major by J.S. Bach; Cesar Franck's Sonata in A Major; Fantasie, opus 79 by Gabriel Faure; and Prokofiev's Sonata in D Major, opus 94.

Harpisichordist June Miller, an associate professor of music, and pianist Philip Dettra, an assistant professor of music, will provide accompaniment for the recital.

Ms. Swack plays the Baroque flute, the recorder and the viola da gamba as well as the flute. She received her B. Mus. and M. Mus. degrees in performance from the University of Southern California.

Alumni Fellows

(Continued from page 1)

founding of the Medical Center, working out all the legal requirements, including the transfer of \$50 million from the Hershey trust to Penn State. He is now a member of the Advisory Board of Capitol Campus.

Currently an adjunct professor of law at Dickinson, from which he also received an honorary LL.D. in 1967, Mr. Nurick served as president of the Pennsylvania Bar Association and was the first recipient (1978) of its Medal for Distinguished Service.

Penn State Intercom

Dr. Hayes to be FDA director

A Hershey faculty member, Dr. Arthur Hull Hayes Jr., has been named Commissioner of the U.S. Food and Drug Administration.

The appointment was made last week by Richard S. Schweiker, Secretary of Health and Human Services.

Dr. Hayes will assume his new responsibilities April 13.

President Oswald, on learning of Dr. Hayes's appointment, issued the following statement: "I congratulate Dr. Hayes on this important appointment as Commissioner of the U.S. Food and Drug Administration. In the name of the University, its Board of Trustees, and all his colleagues and friends, I wish him every success in this challenging position of public trust. The tradition of Penn State has always been one of dedication and service to the public. Many of Dr. Hayes's fellow faculty members have responded to the call to give their time and talents to work for the betterment of their fellow citizens in critical areas of health and human welfare, reflecting in a most positive and productive manner the spirit of the University. Dr. Hayes's appointment and acceptance of this demanding and sensitive position are

Dr. Hayes

entirely consonant with his character and that of the University. We shall miss him as a valued member of our faculty, but assure him of our wholehearted encouragement and support with his new responsibilities. We are certain he will discharge his duties of professionalism, bringing credit upon himself, his profession and the University."

(See related story, page 6.)

Engineering Dean named

Dr. Wilbur L. Meier Jr., head of the School of Industrial Engineering at Purdue University for the past seven years, has been named dean of the College of Engineering, effective July 1.

President Oswald, in announcing the appointment, indicated that final ratification by Penn State's Trustees will take place at their May meeting.

Dr. Meier, 42, will succeed Dean N. J. Palladino, who has announced plans to step down to finish his career in writing, teaching and research. Dean Palladino will become a University professor.

"This appointment is the result of a careful nationwide search involving many able people," Dr. Oswald said. "I feel that the University is fortunate indeed that Dr. Meier will be joining us in July."

Dr. Meier, who has been at Purdue since 1974, has built a national reputation as a scholar, academic administrator and engineering consultant.

"His record at Purdue speaks for itself," Provost Eddy commented. "In a comparatively short time, he made the industrial engineering program at his school one of the finest in the country at both undergraduate and graduate levels. Dr. Meier is a creative, aggressive

Dean Meier

administrator and a top-quality educator." Dr. Eddy further noted that Dr. Meier's efforts at Purdue led to improvements in the quality of both programs and facilities. Externally funded research increased from \$281,000 to more than \$1.2 million under his leadership.

A 1962 graduate of the University of Texas at Austin, Dr. Meier earned the

(Continued on page 4)

News in Brief

Faculty-staff perceptions to be surveyed by Senate

The University Faculty Senate mailed a limited number of survey questionnaires on April 6 to a representative sample of University faculty and staff members at all locations.

The survey has two purposes—to determine the current perceptions of the institutional functions of the University and the goals that Penn State should have as it sets its priorities for the '80s.

The questionnaire measures perceptions along 11 scales: (1) Intellectual-Aesthetic

Extracurriculum, (2) Freedom, (3) Human Diversity, (4) Concern for Improvement of Society, (5) Concern for Undergraduate Learning, (6) Democratic Governance, (7) Meeting Local Needs, (8) Self-Study and Planning, (9) Concern for Advancing Knowledge, (10) Concern for Innovation, and (11) Institutional Spirit.

The Senate commissioned a similar study in 1970, using the same questionnaire. That survey was conducted by Dr. Richard E. Grubb, who is now senior vice president for administration. The present study is intended to update the 1970 report since the earlier data are 10 years old.

All responses will be considered confidential. When a report on the outcome of the study is prepared for the

Senate—probably sometime next fall—only aggregate data will be reflected.

Anyone wishing further information should contact Owen F. Cargol, project director of the study, at 863-0221.

Fund campaign a success

More than \$666,000 has been raised in the "Partners in Progress" campaign for a Student-Community Activity Center at the Schuylkill Campus.

Announcement of the total, which exceeded the goal of \$500,000, was made at a March 24 victory dinner where Joseph H. Jones and Lewis M. Koch, general co-chairmen of the drive, presided at a meeting of team captains, volunteers and

executive committee members.

Special Gifts Division co-chairmen Albert H. Foltin and George M. Gebhardt announced that their division had exceeded its \$100,000 by more than \$40,000, with more contributions yet to be reported.

Merged units named

The Commonwealth Educational System is the new name of the administrative unit formed by the merger of the Continuing Education and Commonwealth Campus systems.

Penn State's Board of Trustees has approved the new designation.

Dr. MacCluer

Correlating fertility with genetic variability

Editor's Note: This article, in which a faculty member describes her on-going research, is one in a new series which INTERCOM will publish from time to time.

By Jean W. MacCluer
Associate Professor of Genetics

I am an avid non-skier, and I've always known that someday my good sense would be rewarded. The payoff came about two years ago at Keystone, Colorado, a popular ski resort and conference center. After an exhausting three and a half day meeting, while most of my colleagues took to the slopes in search of compound fractures, I sat in front of a fire and renewed my acquaintance with another non-skier whom I had known in graduate school at Michigan, and who was now at the University of Rochester Medical School.

Our scientific interests had never been very similar. I was a human population geneticist with a fascination for evolutionary theory, and he was a physician trained in biochemical genetics. However we discovered that since our graduate school days, our work had converged to a remarkable extent. I had become interested in the possibility that much of the genetic variability which we see in humans and other species might be accounted for by subtle, genetically determined differences in fertility between individuals; and he had begun to see evidence for just such a fertility differential associated with genetically determined differences in a particular blood protein called transferrin. His data came, not from humans, but from Standardbred horses. His preliminary findings were all the more exciting because

fertility effects associated with transferrin had also been found in other species, including cattle and pigeons.

We both realized that a combination of mathematical and biochemical expertise would be required to do a thorough study of this phenomenon. We applied for and received NIH funding to pursue the investigation of fertility.

At this point, nine months after the beginning of our collaboration, we are a little closer to understanding the nature of the transferrin effect: it appears that foals who have received different types of transferrin genes from each parent and are thus heterozygotes (as opposed to homozygotes, who receive two of the same type) are less likely to be stillborn. One can think of at least two explanations for this finding. First, we know that transferrin is

(Continued on page 5)

Penn Staters

Dr. James Garbarino, associate professor of human development, presented the keynote address at a symposium on "The Child and the City" held March 26-28 in Tokyo. His topic was "The Child as an Organism: Implications for Family Structure." The symposium was sponsored by the National Institute for Research Advancement, the International Pediatric Association and the Japan Pediatric Association.

Ray T. Fortunato, assistant vice president for personnel administration, has been responsible for the production of a Ford Foundation-funded monograph on tenure and retrenchment policies and practices in over 1,000 institutions of higher education. Kathryn M. Moore, associate professor of education in the Center for Higher Education, contributed a chapter on the history of tenure in the United States. The monograph was published by the College and University Personnel Association as its Fall-Winter 1980 issue of *The CLUPA Journal*.

"Museum Education and Society: Relevance Today" was the title of the keynote address presented by Dr. Robert W. Ott, associate professor of art education, at a conference on "Orientations: Art, Culture and the Museum" at Concordia University in Montreal.

Dr. Gerald M. Phillips, professor of speech communication, recently presented an invited lecture, "Conversation Analysis and Human Discourse," at the University of North Carolina-Chapel Hill. Dr. Phillips has also been selected as editor of *the Communication Quarterly*, the journal of the Eastern Communication Association, for the 1982-83 volumes.

Two intro-prints by Peter Jogo, assistant professor of art, have received purchase awards at two major printmakers' exhibitions. "Runways," part of the 8th International Print Exhibition held at the Pratt Graphics Center's Pratt Manhattan Center Gallery, received the Dr. and Mrs. Paul Bradlow Purchase Award of \$200. A lithograph by Professor Jogo, "1-80-90," was also included in this exhibition.

A corporate purchase award from the Shamrock Management Corporation was given to Professor Jogo for "Untitled," which was on display at the Charlotte Printmakers 4th Annual Eastern United States Print Exhibition in Charlotte, N.C.

Recent activities of Philip Klass, professor of English, include serving as a visiting professor at John F. Kennedy University, a lecture at Mills College on "The Morality of Early Science Fiction," and acting as toastmaster at the fourth annual Science Fiction Convention, held in Seattle for practitioners and enthusiasts in the northwestern United States.

Dr. Peter Gould, professor of geography, recently gave two invited lectures at the Department of Geography of the University of the West Indies in Kingston, Jamaica. His topics were "Expanding Our View of the Map" and "A Contemporary Introduction to Human Geography."

Carpoolers

Ed Lopuski, Room 213 Deiker Building, seeks drivers and/or riders for a carpool between Rolling Meadows Estate (in the Howard-Jacksonville area) to arrive on campus at 8 a.m. and depart at 5 p.m. Mon.-Fri. He can be reached days at 863-1665 or evenings at 625-2864.

William Damerst

25-year chairs

This year marks the 25th year William A. Damerst, professor of English, has served on the University faculty.

Professor Damerst, whose fields of specialization are technical writing and business writing, has authored several books, including *Resourceful Business Communication* and *Clear Technical Reports*, both published by Harcourt Brace Jovanovich. He also has published three study guides — *Business Writing*, *Technical Reports and Technical Writing* — all of which have generated revised editions. He further has published a completely revised edition of *Technical Reports* for use as a correspondence study guide, and the second edition of *Clear Technical Reports* is scheduled for publication next year.

A frequent contributor to professional journals, Professor Damerst has had articles appear in publications of the American Business Communication Association (ABCA) and in those of the Society for Technical Communication. This fall, he will present an invited paper during the International Convention of the ABCA, to which he was named a Fellow in 1972.

Professor Damerst, who is active in a number of professional organizations, has served as regional vice president, vice president and resident of the ABCA.

At Penn State, he developed the English Department's "Advanced Technical Writing" course and has taught other courses in technical writing. He also

Marian Lohr

teaches humanities courses such as modern science and human values.

In 1959, Professor Damerst authored a writer's manual, *Good Gulf Letters and Reports* (published by the Gulf Oil Corporation); and that same year, he received the Gulf Aid to Education Grant, which he was re-awarded the following year. As a result of his work, the English Department received a non-restricted Gulf Oil grant in 1961.

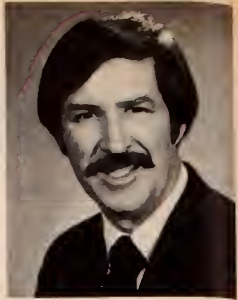

Professor Damerst received his B.S. degree from the University of Illinois (1946) and his M.A. degree from the University of Massachusetts (1955). After joining the University faculty as an instructor in 1955, he was named assistant professor in 1960, associate professor in 1965 and professor in 1972.

Marian M. Lohr, food preparer in the Department of Housing and Food Services, recently enjoyed an informal luncheon in honor of her 25 years as a University employee.

Mrs. Lohr was joined in the Donovan Room of the HUB not only by University personnel, but also by her husband, Charles, and her daughter, Ruth Ann.

After beginning her University employment as a counter assistant, Mrs. Lohr advanced to assistant food preparer in 1967 and to food preparer in 1970. She has spent her entire University tenure in Waring Dining Hall, where she is responsible currently for assisting with the preparation of breakfast and lunch.

Not surprisingly, Mrs. Lohr enjoys cooking in her free time, as well as crocheting and relaxing around the house.

Ronald L. Wiser

Ronald L. Wiser, systems analyst in microfilmatics in Management Services, is observing his 25th year of University employment this month.

It's been an eventful tenure for Mr. Wiser, who has been on the cutting edge of Penn State's implementation of state-of-the-art electronic technology.

After working as a tabulating operator and then as a computer programming operator, he became supervisor of computer operations in 1967. The latter promotion, he notes, occurred on "the day computer operations moved into Shields Building after 12 years in Old Main."

When the microfilmatics department was formed in 1971, he was named supervisor of microfilmatics and computer operations, and assumed his present position a year later.

Mrs. Wiser designs and plans "all types of microfilmatics systems," both conventional and computerized. Penn State, he explains, "is using microfilm and microfiche to replace huge quantities of paper in the keeping of records, with obvious benefits in the saving of space."

Furthermore, microfilm and microfiche — like other information — may be stored on computers, thereby making recall of the information quick and available to more people through computer terminals.

Mrs. Wiser says there's "always something new and exciting" in his work. Because Penn State has been one of the leaders in installing sophisticated micrographic technology, he is frequently called on to give seminars and demonstrations at other institutions.

Partings

Robert S. Struble, supervisor-facilities and services in the College of Agriculture, retired April 1 after working for the University since 1947, but his association with Penn State began much earlier.

"I was actually born at the University," Mr. Struble says, explaining that he was born on University Farm Number 5, near Houlierville, where his father was employed by the Department of Animal Husbandry. His mother also worked for the University in Housing and Food Services.

In his most recent position, Mr. Struble was responsible for supervising the care of vegetable crops in one of the greenhouses adjacent to Tyson Laboratory. He also has worked for the College of Agriculture in Buckhout Laboratory and in the field, where he assisted with crop pollination.

Noting that he lives on a farm in Runville with four of his children, Mr. Struble says he plans to continue working with crops and raising vegetables for canning. Of his children, Ellen Jean is a senior at the University. Robert attended the Wilkes-Barre Campus, and James and Wendy Ann are high school students. A fifth daughter, Sharon Horner, works in State College.

His family affiliations with Penn State also include three sisters and a brother. Helen Ishler, who retired as a laboratory technician in 1977 from the Department of Plant Pathology; Jane Baughman, a secretary in Military Science; Mary Ellen

Corl, an accounting clerk in student loans and scholarships; and Harold, a guard at the Applied Research Laboratory.

Mr. Struble — who served with the 8th Air Force in Europe and America during World War II — is a member of the Bellefonte VFW and the Milesburg American Legion. He also is active with the Runville Little League.

Mary L. Heckman, dining hall worker in Housing and Food Services, will retire April 11. She has been a University employee since Sept. 17, 1961.

Lois H. Shay, a janitorial worker with Physical Plant, is retiring May 1 after being employed since July 1, 1962.

Beulah B. Behrer, residence hall worker in the Department of Housing and Food Services, will retire May 1 after working for the University since Jan. 23, 1969.

Rose Ann Bobak, a secretary in the Office of Planning and Budget, left her job on Jan. 7. She had been a staff member since Sept. 1, 1967.

Carol J. Gordon, a senior clerk in the University Libraries, left the University March 6. She had been employed since Jan. 1, 1969.

Obituaries

Dr. Irwin L. Baird, professor of anatomy at the College of Medicine, died April 1. He was 56 years old.

Dr. Baird joined the faculty in 1967, one year after the founding of the College. He had earned B.A. and M.A. degrees in zoology at the University of Kansas and his doctorate in biology at Harvard. A member of the editorial board of *The Anatomical Record*, he taught at the University of Tennessee before coming to Hershey.

Donald F. Spooner, research associate in the College of Engineering, died April 1. He was 60 years old.

A 1943 honors graduate of Susquehanna University, Mr. Spooner came to Penn State in 1945 as an instructor in the College of Engineering. Prior to assuming his most recent position in 1964, he was a research assistant, public relations officer, safety officer and secretary of the industrial and professional advisory council, all in the College.

Robert W. Eisenhart, a mail carrier with Business Services at his retirement in 1975, died March 28 at the age of 65. A native of Steelton, he worked at the University from 1949 to 1954 and again from 1960 to 1975. He was employed by Physical Plant at first, holding the position of janitor group leader before his transfer to Business Services in 1967.

C. Ruth Behers, a dining room woman with Housing and Food Services from 1944 to 1953, died March 27. She was born in Bellefonte on April 27, 1893.

University Park Calendar

April 9-19

Special Events

Thursday, April 9
School of Music Common Hour, 1 p.m., Music Bldg. Recital Hall. Music by Dominick Argento.
Sports: tennis (men) vs. Howard, 2:30 p.m.; baseball vs. Juniata, 3 p.m.
Agriculture Education lecture, 3:30 p.m., HUB Assembly Hall. Richard A. Baer, Jr., Cornell Univ., on "The Fact/Value Split in the College of Agriculture."
Cinema: *Bedazzled*, 7 and 9 p.m., HUB Assembly Hall. Also April 10.
Colloquy/ISA lecture, 8 p.m., Room 112 Kern. Tim Cullen, World Bank, on "American Attitude Toward Developing Countries."

Friday, April 10
Fixed date for meetings involving Commonwealth Campus faculty. Also April 11. Shaver's Creek Nature Center, overnight trip for children 8 and older, Stone Valley. Registration, 8 a.m.-5 p.m., 865-1851.
Third Annual Slavic Folk Festival, 9 a.m.-10 p.m., Robeson Center.
Craft demo, Janis Mershon, card weaving, 11:30 a.m., Kern Lobby.
Music in Interesting Times, Charles Keil, SUNY/Buffalo, on "Devo: Music from an Anthropological Perspective," 2:20 p.m., Music Bldg. Recital Hall.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Frederick Westmeyer, geography, on "Tourists in Mexico: Who They Are, Where They Go, and Why They Matter."
Commonsplace Theatre, *Sweet Atomy*, 7 and 9 p.m., Room 112 Kern. Also April 12.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.

Artists Series, Vincent Price as Oscar Wilde in *Dimensions and Delights* by John Gay, 8:30 p.m., Eisenhower Auditorium.

Saturday, April 11
Stone Valley boat rentals begin for season. Mineral Industries dock.
Third Annual Slavic Folk Festival, 9 a.m.-5 p.m., Robeson Center.
Sports: lacrosse (women) vs. William and Mary, 1 p.m.; and (men) vs. Drexel, 7:15 p.m.; softball (women) vs. Cortland State (DH), 1:30 p.m.
France-Cinema, *Coteau, Beauty and the Beast*, 7 and 9 p.m., 112 Kern. Also April 13.
Raymond Brown and the University Chorus, premiere performance of "Peter Quince at the Clavier," by Dominick Argento, 8:30 p.m., Schwab.
Student Foundation for the Performing Arts, "Mozart on Fifth," 8:30 p.m., HUB Ballroom.

Sunday, April 12
University Chapel Service, 11 a.m., Eisenhower Chapel. Roosevelt Green, Jr., ministry affairs, PSU Graduate School, speaker.
Sports: softball (women) vs. Ithaca (DH), 2 p.m. Penn State Symphonic Blue Band, Spring Concert, 3 p.m., Eisenhower Auditorium.
Loreta Greiman, flute, 7:30 p.m., Music Bldg. Recital Hall.

Monday, April 13
Visiting artist Caro Antreasian on "Stone, Ink, Paper: A Capsule History of Lithography," 10 a.m. For location, phone 865-0444.
Spring plants and flowers sale, 11 a.m.-3 p.m., Kern Lobby. Also April 14.
Commons film, "The Mood of Zen," noon, Room 112 Kern.
Music in Interesting Times lecture, 2:20 p.m., Music Bldg. Recital Hall. Charles Keil, SUNY/Buffalo, on "Top Forty in China After the Cult of Four."
Sports: lacrosse (women) vs. Slippery Rock, 3 p.m.
Gallery talk on "History and Process in the Evolution of My Work" by visiting artist Caro Antreasian, 8 p.m., Zoller Gallery.

Tuesday, April 14
Visiting artist Caro Antreasian on "Contemporary Printmaking Issues," 10 a.m. For location, phone 865-0444.
HUB Craft Center, 1st session classes end, registration for 2nd session classes begins, noon-5 p.m., Room 312 HUB.
Comp. Lit. Luncheon, 12:15 p.m., Room 204 HUB. Murray Martin, library, on "Speaking Through the Inarticulate: The Art of Frank Sargson."

Lithographer Caro Antreasian will be a visiting artist next week.

Wittgenstein's Vienna seminar, 3:30 p.m., Room 319 Walker. Allan Janik, scholar of Austrian and German intellectual life in the 19th and early 20th centuries, discusses the philosopher Ludwig Wittgenstein.
HPER, registration for children's (K-3rd grade) movement education program, 3:45 p.m., White Bldg. Lobby. Program held Tuesdays, 4-5 p.m., April 14-May 19.
Comp. Lit. Film Series, *Vidas Secas*, 7 and 9 p.m., Room 112 Kern.
Sports: volleyball (men) vs. Pittsburgh, 7 p.m. Yachad lecture, 8 p.m., Room 111 Boucke.
Nimrod Barkan, Israeli vice consul, on "Current Events in the Middle East."
Artists Series, Heinz Holliger, oboist, 8:30 p.m., Schwab.

Wednesday, April 15
Commons concert, Stan Shepherd, noon, Kern Lobby.
Colloquy lecture, 8 p.m., Eisenhower Auditorium. Gerard K. O'Neill, physics, Princeton Univ. and Space Studies Institute, on "The High Frontier—Space Colonization and Energy from Space."
Mu Phi Epsilon concert, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, April 16
Commons Concert, Phi Mu Alpha Band, noon, Kern Lobby.
Sports: lacrosse (women) vs. Temple, 3 p.m. Sigma Xi initiation and reception, 4 p.m., Nittany Lion Inn.
Cinema: *The Gospel According to St. Matthew*, 7 and 9:30 p.m., HUB Assembly Hall. Also April 17.
HUB Craft Center open house, 7:30-9:30 p.m., Room 312 HUB.
Blacks Arts Festival, Miss Black PSU Pageant, 8 p.m., Schwab.

Friday, April 17
Shaver's Creek Nature Center, "Ecoventure" for 5th and 6th graders, 4 a.m. to Sunday, Stone Valley. Information, 8 a.m.-5 p.m., 865-1851.
Sports: track (women), Lady Lion Relays, 10 a.m.; volleyball (men) vs. George Mason, 7 p.m.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Arthur Anderson, architecture, on "Post Modernism."
Commonplace Theatre, *And Justice for All*, 7 and 9 p.m., Room 112 Kern. Also April 19.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, April 18
Fishing season opens at Stone Valley.
Sports: tennis (women) vs. William and Mary, 9 a.m.; track (men), Memorial Invitational, noon; baseball vs. Robert Morris (DH), 1 p.m.; softball (women) vs. Rutgers (DH), 1 p.m.
Shaver's Creek Nature Center, kite-flying workshop, 2 p.m., Stone Valley. Registration, Mon.-Fri., 865-1851.
France-Cinema, *14th Tournee of Animation*, 7 and 9 p.m., Room 112 Kern.

Sunday, April 19
Shaver's Creek Nature Center, bird walk breakfast, 7 a.m. (registration, Mon.-Fri., 865-1851); wildflower workshop, 2 p.m., Stone Valley.
HUB Craft Center, 2nd session classes begin, Room 312 HUB.
University Chapel Service, 11 a.m., Music Bldg. Recital Hall. University Chapel Choir Easter Service, Tommie Irwin, director.
Tracey Layer, oboe, and Maureen Haley, piano, 3 p.m., Music Bldg. Recital Hall.

Seminars

Thursday, April 9
Nuclear Engineering/Solid State Science, Robert W. Ramsey, Jr., Dept. of Energy, on "Remedial Actions in Nuclear Waste Management," 3:55 p.m., Room 189 MRL (new listing).
Mathematics, P.J. Davis, Brown Univ., on "Circulants and Fourier Matrices," 4 p.m., Room 102 McAllister (new listing).
Statistics, G.P. Patel, statistics, on "Weighted Distributions and Size Biased Sampling with Applications," 4 p.m., Room 62 Willard (new listing).

Friday, April 10
Analytical/Physical Chemistry, Glenn Brown, Kent State Univ., on "Properties, Structure and Application of Liquid Crystals," 2:30 p.m., Room 333 Whitmore.

Monday, April 13
UDIS, "Enhancing Classroom Communication," Part II, 2 p.m., Room 128 Mitchell. Reservations and information, 863-0668. Also April 14.

Tuesday, April 14
Applied Research Lab, Ralph Seeley, engineering research, on "Switching Mode Power Supplies," 10:45 a.m., Walker Conference Room, Applied Science Bldg.
Metallurgy, J. Fritz, grad. asst., on "Electrochemical Behavior of Iron-Phosphorus Alloys," 11 a.m., Room 301 Steidle.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Environmental Pollution Control, Dana Wirries, land and water research, on "Analytical and Sampling Pitfalls in Hazardous Waste Monitoring," 2:20 p.m., Room 128 Sackett.
Chemical Engineering, Eduardo D. Glandi, Univ. of Pa., on "Distribution of Molecular and Colloidal Solutes in Micro pores," 3:45 p.m., Room 140 Fenske.
Plant Pathology, Garfield Thomas, grad. student, on "Expected Economic Impact: A Model for Ranking Potential Emigrant Pests," 3:55 p.m., Room 213 Buckhout.

Thursday, April 16
Ceramic Science and Engineering, Michael R. Notte, Lehigh Univ., on "Solid Solution Additives and Microstructure Modification During Densification of NiO and CoO," 11 a.m., Room 301 Steidle.
Chemistry, Robert Barker, Cornell Univ., on "Studies with Carbon-13 Enriched Carbohydrates," 12:45 p.m., Room 333 Whitmore.
Anthropology, Derek F. Roberts, Univ. of Newcastle-upon-Tyne, on "The Biology of Human Isolates," 3:30 p.m., Room 107 Carpenter.
Agronomy, Bessie Blumberg, grad. student, on "Evaluating Soil Conditioners," 3:55 p.m., Room 111 Tyson.
Physics, John Vossen, RCA Research Labs, on "Thin-Film Deposition and Etching Processes," 3:55 p.m., Room 445 Davey.

Friday, April 17
Physical Analytical Chemistry, Abraham Bahta and Sonia Vasquez-Garcia, grad. students, on "Reactions of Peroxy Radicals with NO and NO₂ and the Decay of Peroxynitrites," 11 a.m., Room 333 Whitmore.
Physical Chemistry, Donald Smyth, Lehigh Univ., on "Non-Stoichiometry and Its Effect on the Properties of Metallic Oxides," 2:30 p.m., Room 333 Whitmore.
Geosciences, Irwin Remson, Stanford Univ. and Birdsall Distinguished Lecturer, on "Optimal Groundwater Management," 3:45 p.m., Room 22 Deike.

Exhibits

Chambers Gallery: Undergraduate Art Education Student Exhibit, opens April 13.
HUB Galleries: Third Annual Slavic Folk Festival Exhibit, Art Alley, Jim Weigle, landscapes of handmade paper, Bowstring Gallery, Benny Andrews, paintings, The Gallery.
Kern Gallery: John Seitz, glass work, Mary Weidner, drawings, PSU Dept. Juried Photography Exhibit.
Museum of Art: Recent acquisitions to the Museum's collection. Selected works from the collections of Mimi and Sanford Feld and Samuel Galla. Selections from the Museum's American collection. Watercolors from the permanent collection.

Pattee Library: Mary Barnes, drawings and paintings, East Corridor Gallery. Paul Flexner, drawings, Lending Services Lobby. Andrew Peak and Thomas Hubben, ceramics and ceramic sculpture, Main Lobby. "Photography and Humor," arranged by G. and L. Greenhill and B. H. Henrich, Rare Books Room. Mi Park, paintings, through April 16. Frank Schraeder, paintings, opens April 16, West Pattee Lobby.

Visual Arts Zoller Gallery: Visiting Artist Exhibition, through April 12; Caro Antreasian, April 13-14.

INTERCOM is an internal communications medium published weekly through the four terms of the class scheduled for the faculty and staff of The Pennsylvania State University. USPS 351-170

Research agreements renew Penn State-China relationship

It's unofficially known as "The Penn State House," but it isn't located in Pennsylvania, or even in the United States.

Rather, it is located in China, on the campus of Doctor Sun Yat-sen University, where it symbolizes a China-Penn State "connection" dating back to 1907.

Penn State's College of Agriculture and the South China Agricultural College (SCAC) — which traces its roots to Sun Yat-sen University and a founder who was a Penn State graduate — have entered into agreements for three collaborative research projects.

"These projects, which will focus on poultry genetics and management, vegetable production, and integrated pest management, mark a return to a Penn State-China relationship that, until its interruption in the late 1940s, had been most fruitful," said Dr. Robert McAlexander in announcing the agreements.

Under terms of the agreements, Penn State and SCAC will exchange researchers in each of the three project areas, with the first exchanges expected to begin next fall.

Dr. McAlexander explained that project leadership from Penn State will be provided by:

- Dr. Kenneth Goodwin, head of the division and professor of poultry science, who will direct the poultry genetics and breeding project. The researchers will focus on developing breeding stock and on nutrition problems associated with nutrition, insects, diseases and poultry management.

- Dr. Ernest Bergman, professor of plant nutrition, who will head the project on vegetable production and management. The project will address such problems as plant nutrition, plant and soil analyses, fertilizer applications, and testing Chinese vegetable varieties for possible adoption in Pennsylvania.

- Dr. David MacKenzie, associate professor of plant pathology, who will direct the research on integrated pest management. This project will focus on the use of selective pesticides, selection for resistance, virus control, surveys, and mathematical modeling.

In addition to the research projects, Penn State and SCAC are completing agreements under which Chinese students would enroll at Penn State through assistantships provided by the College of Agriculture.

The College also is making available to the Chinese a "Groff Fellowship," named in honor of the late George Weidman Groff, a 1907 Penn State alumnus who, shortly after his graduation, began the Penn State-China "connection."

"Daddy" Groff, as he was known, developed a College of Agriculture (now SCAC) at Lingnan University (now known as Sun Yat-sen University). As dean of Lingnan's agricultural programs, Mr. Groff brought Penn State students to China and eventually helped plan exchange scholarships between Lingnan and Penn State, which remained in existence from 1935 until World War II.

In addition, a provision was made for numerous Lingnan faculty members to study at Penn State under assistantships and a "Penn State in China" Committee was formed on the University Park campus to assist with various aspects of the program.

Among other activities, the committee collected money at University chapel services from 1911 to 1952 and sent these funds to Professor Groff in China, and later to Florida, where he continued to grow and experiment with Chinese plants. Professor Groff died in 1954, and after his widow's death in 1972, a \$100,000 scholarship fund was established from their estate. In addition, the Penn State Room in Pattee Library received a large collection of Professor Groff's books, notes and botanical information.

All Penn State programs at Lingnan, however, were terminated in 1949, after a period of 42 years.

In 1952, the College of Agriculture at Lingnan was moved to a new location and renamed the South China Agricultural College. Many members of that faculty, who were associated with Professor Groff, are still at SCAC.

The renewal of ties between Penn State and SCAC began in 1974 when President

In 1974, while leading a Penn State delegation to China, President Oswald visited "The Penn State House" with a Chinese official.

Oswald led a delegation to China. While in China, Dr. Oswald visited Sun Yat-sen University (where the Chinese remember the former "Groff House" as "The Penn State House"), thereby renewing — during the Cultural Revolution — communication that had been cut off by the Communist Revolution.

Two years ago, Dr. James M. Beattie, dean of the College of Agriculture, traveled to SCAC and made arrangements for signing a mutual, collaborative agreement, opening the way for further discussion about specific projects.

Then, just after last Christmas, Drs.

Goodwin, Bergman and MacKenzie went to China to formulate specific proposals for the three research projects that have since been agreed upon. Their Chinese counterparts also will visit Penn State.

"We're quite enthusiastic about the agreements and anticipate that our collaborative research projects with the Chinese will prove very beneficial to both SCAC and Penn State," Dr. McAlexander concluded, noting that "it's good that the building referred to as the 'Penn State House' is now a symbol of the future as well as of the past."

Staff Vacancies

The following vacancies for positions classified as staff exempt of staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., April 16, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

PROGRAM ASSISTANT, COMMONWEALTH EDUCATIONAL SYSTEM, CONTINUING EDUCATION, RADNOR CENTER FOR GRADUATE STUDIES AND CONTINUING EDUCATION. Responsible to the Assistant Director, Radnor Center, for planning, organizing, marketing and administering Continuing Education and Graduate programs offered through the Center. Bachelor's degree or equivalent education or training, plus one to two years of effective experience in an administrative area such as program development and coordination, scheduling, registration. Supervisory experience in a University environment highly desirable.

ASSISTANT DIRECTOR OF PERSONNEL, COLLEGE OF MEDICINE, HERSHEY. Responsible to the Director of Personnel, Milton S. Hershey Medical Center, for assisting with the administration of the Medical Center personnel program within University policy. Specifically responsible for coordinating activities involving recruitment and classification under the University's plans, and administration of the University's employee benefits programs and retirement counseling, as well as assisting the Director with employee relations activities by handling routine problems and interpreting University personnel policies and union contracts. Bachelor's degree or equivalent, plus four to five years of effective personnel administration, with specific emphasis in the area of wage and salary administration, labor relations, and employee benefits.

ENERGY EDUCATION SPECIALIST, COLLEGE OF ENGINEERING, UNIVERSITY PARK. Position involves presenting various programs, including Energy Today and Tomorrow, to high school groups, civic and service organizations, employee groups, seminars and institutes. B.S. degree or its equivalent in a physical science, with one to two years of effective experience. Some advanced work in an energy related field, and knowledge of teaching techniques and educational methods. Residence may be maintained in any central Pennsylvania area.

AUDITOR, CONTROLLER'S OFFICE, UNIVERSITY PARK. Responsible to the Audit Manager for performing procedures, adequacy and reliability of records and management information reports, soundness and adequacy of accounting, financial, and other operating controls, and safeguarding of assets within any of the diverse operational, financial and administrative functions or organizations of the University as directed by and under the general supervision of the Audit Manager. Bachelor's degree (or equivalent) in accounting or related field, plus up to and including two years of effective experience.

CLASSIFICATION ANALYST, OFFICE OF PERSONNEL ADMINISTRATION, UNIVERSITY PARK. Responsible to the Manager for assisting in various administrative duties related to the University's various employee classification plans. Gather information for review of existing positions or the classification and evaluation of new positions. Write job descriptions based on the completed data. Assist in conducting research, surveys and compiling data for a wide variety of special projects and reports. Bachelor's degree or equivalent, preferably in personnel administration or industrial engineering, plus a minimum of one to two years of effective administrative experience preferably in job evaluation and classification activity.

ASSISTANT TO THE DIRECTOR, EXECUTIVE PROGRAMS, BUSINESS ADMINISTRATION, UNIVERSITY PARK. Responsible to Director for assistance in the research, marketing, and administration of new and existing Executive Programs of two weeks and four weeks residence education for corporate executives. Duties include writing brochures and administering production, planning direct mail campaigns, and producing advertising copy. Master of Business Administration or equivalent, plus one year of

marketing experience. Position funded until June 30, 1982.

There are positions in certain work units that, because of the large number of such positions, frequently are still available after employees in the work unit have been considered. They are listed below and will not be listed on an individual vacancy basis. Application for such positions may be made at any time, and you are welcome to make your interests known now to the Employment Division for future consideration when such vacancies occur. These positions are:

POSITION TITLE	LOCATION
Assistant Coordinators	Student Affairs
Assistant I/O Supervisors	Housing and Food Services
Computer Operators	IRP
Shifts: 8:00 a.m. to 4:30 p.m. 4:30 p.m. to 1:00 a.m. 12 midnight to 8:00 a.m.	
Programmers	Management Services
Residence Hall Area Coordinators	Student Affairs
Cardiology Technicians	Hershey
Clinical Laboratory Assistants	Hershey
Clinical Laboratory Technologists (HEV)	Hershey
Critical Care Monitoring Technicians (Jr. & Sr. Levels)	Hershey
Cytotechnologists	Hershey
Licensed Practical Nurses	Hershey
Medical Technologists (CLIA, MLT, CLT-HEV)	Hershey
Nuclear Medical Technicians	Hershey
Perfusionists	Hershey
Pharmacists	Hershey
Physical Therapists	Hershey
Physician's Assistants	Hershey
Psychiatric Assistants	Hershey
Radiology Technicians	Hershey
Research Technicians	Hershey
(Jr. & Sr. Levels)	
Respiratory Therapy Technicians	Hershey
Staff Nurses	Hershey

Engineering Dean

(Continued from page 1)

M.S. degree there in 1964 and the Ph.D. in 1967.

He joined the faculty of Texas A&M University in 1967 as an assistant professor of industrial engineering. He was promoted to associate professor in 1968 and to full professor in 1970. In 1972-73, he served as assistant head of the Department of Industrial Engineering.

Dr. Meier was named professor and chairman of the Department of Industrial Engineering at Iowa State University in 1973. He served in that capacity until his appointment at Purdue.

A licensed professional engineer, Dr. Meier has served in key investigating and consulting capacities on a large number of projects in both government and in private fields.

The new dean's professional interests include industrial and systems engineering, operations research and engineering and public policy. He is the author of a large body of technical papers and reports, and he has delivered invited lectures throughout the United States and abroad.

Dr. Meier and his wife, Judy, are the parents of three daughters, Melynn, Marla and Melissa.

A Senate door handout

Editor's note. The following document was distributed as a door handout at the April 7 meeting of the University Faculty Senate

For the second time in as many years, Penn State offered the most cost-effective educational programs of any State-owned or State-related college or university in the Commonwealth.

The University was hailed for this accomplishment during its 1981-82 budget hearings March 2 and 10 before the House and Senate Appropriations Committees.

During the hearings, legislators questioned President Oswald about faculty productivity, based on an evaluation prepared by the Joint State Government Commission, a legislative support organization in Harrisburg.

The evaluation is part of a "Faculty Output and Salary Costs" report (the "Snyder Report"), which all State-related and State-owned institutions of higher education in the Commonwealth are required to submit annually. The current report covers the period from Summer Term 1979 through Spring Term 1980.

Among the findings in this year's report are: — Not only has Penn State been able to deliver more service at less cost than any public college or university in Pennsylvania, but it has also been able to do so by wide margins over some of the other institutions. The State appropriated \$32.90 per unit of production for Penn State (units of production refer to a weighted sum of student credit hours and number of degrees granted). By contrast, the figures for Pitt and Temple were \$36.11 and \$47.61, respectively, and for all State-owned, the average was \$60.15 (with three in the \$90-plus range and the lowest at \$44.52).

— Total credit hour production (from 1978-

79 to 1979-80) increased at Penn State by 21,505 and at Pitt by 11,553, while declining by 9,010 at Temple. This marked a reversal for the University, which along with Pitt, Temple and Lincoln had experienced slight declines over the previous two years. In 1979-80, however, Penn State's credit hour total of 1,610,024 was only 5,000 less than its all-time high, recorded in 1976-77.

— Penn State's costs per student credit hour in 10 selected program classifications (such as biological sciences, business and management, education and mathematics) are equal to or lower than the average of all institutions combined for each of the classifications. Further, the University's costs per student credit hour are lower than either Pitt's or Temple's in eight of the 10 classifications, which were selected by the Commission as being offered by nearly all of the institutions.

— Resident undergraduates at Penn State and the other State-related universities paid, in tuition, between 45 and 50 percent of total instructional costs. Non-residents paid about 83 percent at Temple and approximately the full costs at Penn State and Pitt. (Allocated State appropriations plus tuition charges — weighted in accordance with resident/nonresident proportions — can be viewed as an approximation of total instructional costs per student.) At State-owned institutions, resident undergraduates paid about 30 percent and nonresidents paid about 54 percent of the total instructional costs. Both resident and nonresident graduate students paid only 19 percent of total costs at State-owned schools, while nonresident graduate students paid from 60 to 70 percent of total costs at State-related universities.

— The number of total full-time equivalent

faculty decreased by 0.36 percent between 1978-79 to 1979-80 at Penn State. During this same period, the number of full-time equivalent students increased approximately 1.35 percent.

— Full-time faculty members at Penn State reported an average of 13.4 class contact hours in Fall Term 1979, as compared to 11.1 at Pitt and 11.3 at Temple.

— Penn State reported average class size in lower division courses of 31.2, upperdivision, 26.7, and master's level, 12.8. Pitt, too, reported an average class size of 31.2 in lower division courses, and 23.2 and 16.7 for upperdivision and master's level courses, respectively. Temple did not report.

— Penn State reported proportionately fewer faculty members at the rank of professor (21 percent) and associate professor (25 percent) than any other public college or university in Pennsylvania. At Pitt, 23 percent of the faculty hold professorial rank and 34 percent are associate professors. At the State-owned institutions, faculty with the rank of professor or associate professor combined range from 67 percent of total ranked faculty at Mansfield (the low) to 86 percent at California (the high).

— Tenured faculty at State-owned institutions range from 59.8 percent of the total faculty at Cheyney and 82.5 percent at Clarion (the lows) to more than 95 percent at California and West Chester (the highs). In contrast, tenured faculty at the State-related universities average about 64 percent of the total.

Arts Roundup

Distinguished lithographer in residence next week

Garo Antreasian, who is regarded as one of the foremost lithographers in America, will be a visiting artist at the University on April 13 and 14. In conjunction with his visit, an exhibition of his work will be held in the Zoller Gallery.

The formal opening of the exhibition will be held Monday evening, April 13, at 8 p.m. Mr. Antreasian will deliver an illustrated talk on "History and Process in the Evolution of My Work."

He will present slide talks on two other occasions during his visit. At 10 a.m. Monday, he will speak on "Stone, Ink, Paper: A Capsule History of Lithography"; and at 10 a.m. Tuesday, April 14, he will discuss "Contemporary Printmaking Issues." The location of the lectures may be obtained by telephoning the School of Visual Arts at 865-0444.

Mr. Antreasian's works are included in most of America's major collections, including those of the Boston Museum of Fine Arts, the Metropolitan Museum of Art, the Museum of Modern Art, the Guggenheim and Brooklyn Museums and the Philadelphia Museum of Art. He has also exhibited prints in the Venice Biennale and the International Biennial in Tokyo.

Currently professor of printmaking at the University of New Mexico, Mr. Antreasian is co-author of *The Tamarind Book of Lithography: Art and Techniques*, perhaps the most widely respected work in the field.

Guest trombonist solos with Blue Band

Trombonist Torsten Erik Edvar will be the featured soloist in Gullian's "Concert Piece" at the Penn State Symphonic Blue Band's Spring Concert Sunday, April 12, at 3 p.m. in Eisenhower Auditorium.

The audience will also hear music by Morton Gould, Vincent Persichetti, Jacques Offenbach, Edwin Franko Goldman and Malcolm Arnold, as well as a solo by flutist Peggy Shipley, a senior music education major.

A graduate of State College Area Senior High School, Mr. Edvar is currently a junior scholarship student at the Curtis Institute of Music in Philadelphia, where he is studying with Glenn Dodson, principal trombonist with the Philadelphia Orchestra.

Parker exhibit at Zoller Gallery

An exhibition of paintings, prints and drawings by Robert Andrew Parker is on display at the Zoller Gallery through April 12.

Mr. Parker studied at the Chicago Art Institute School, the Skowhegan School of Painting and Sculpture and Atelier 17 of New York, and has been the recipient of a Rosenthal Grant from the American Academy of Arts and Letters, a Guggenheim Fellowship and a Tamarind Artist Fellowship for lithography.

One-man exhibitions of Mr. Parker's work have been held at the Terry Dintenfuss Gallery, the J.L. Hudson Gallery and the Roko Gallery, among others. He has been included in a group exhibition at the Metropolitan Museum of Art, and his artworks are in the permanent collections of the Museum of Modern Art and the Whitney and Brooklyn Museums.

Painting by Vanessa Bell from the Fied Collection, currently on display at the University Museum of Art.

Genetics

(Continued from page 1)

an iron binding protein and that bacteria require iron for growth. Could it be that heterozygotes, who make two kinds of transferrin, are more successful in depriving bacteria of needed iron and that prenatal infection is thus less likely? A second possible explanation is less direct. We know that Standardbred horses are highly inbred, and that in general, inbred individuals of many species seem to suffer varying degrees of developmental retardation. Furthermore, inbreeding leads to a general reduction in heterozygosity. Could it be that horses which seem to be less susceptible to stillbirth are simply less inbred than average, and that what appears to be an effect of transferrin heterozygosity is in reality a more general effect of outbreeding?

Each of these hypotheses has generated enough projects to keep us busy for several years to come. The group at Rochester is collecting blood from additional horses so that we may increase our sample size and typing each horse for a large number of blood proteins. We at Penn State are constructing pedigrees for every horse in the study, in some cases tracing their ancestries back to Messenger, the founding sire of the Standardbred stock who was foaled in 1780. We will soon be in a position to calculate inbreeding levels for every horse in our study and to determine degrees of relatedness between them. For a breeder interested in minimizing inbreeding, this information alone will be valuable.

There have also been fringe benefits which are rare in a scientific research project. I have begun to learn about the inner workings of breeding farms; I have made the acquaintance of a breeder in Centre Hall, who has been extraordinarily generous in lending me out-of-print books which contain breeding information; I have had the pleasure of watching my first harness race from the best seat in the house; and I have become, as a result of bitter experience, an avid non-better.

Alumni Fellows visit Penn State

Mr. Klein

Two Alumni Fellows will visit University Park next week. They are Robert Klein of Allentown, Pa., chairman of the board and chief executive officer of AllianceWall Corporation, and John F. Speer of Washington, D.C., president of the Milk Industry Foundation and the International Association of Ice Cream Manufacturers.

Mr. Klein, a 1948 Penn State graduate, will be a guest of the College of Business April 13-16. He has been chairman of AllianceWall's board since 1977, and previously served the firm as president and chief executive officer.

He also has been chairman and director of Wolverine Porcelain Enameling Company, Detroit, since 1977; chairman of the board of Pentagon S/A, Odense, Denmark, since 1972; and chairman of the board of Alliance Europe, S.A., Genk, Belgium, since 1977. In addition, he has been a director of Le Rineau, Inc., New York City, since 1975; Ski Ventures, Inc., Atlanta, since 1974; and Blanqueford Vineyard Group, Bordeaux, France, since 1974.

Associated with the Caloric Corporation from 1948 to 1969, Mr. Klein advanced from the position of industrial engineer to chief executive officer.

He serves on the alumni board of directors of Penn State's College of Business and as a trustee of Muhlenberg College.

Mr. Speer

Mr. Speer received his undergraduate degree in 1955 and his master's degree in 1957. He will be at University Park April 14-16 as a guest of the College of Agriculture.

The Milk Industry Foundation (MIF) is a trade association representing 350 processors and distributors of fluid milk and fluid milk products throughout the United States. The member companies operate 800 plants and process about 75 percent of the total fluid milk processed, bottled and consumed in this country.

The International Association for Ice Cream Manufacturers is a completely separate and autonomous organization. Its 250 member companies operate 600 plants and manufacture about 80 percent of the total ice cream and related products Americans use.

A past president of the National Association Executives Club and the Washington Food Group, Mr. Speer currently serves as president of the Dairy Training and Merchandising Institute, which sponsors a number of continuing education activities for member companies.

In 1973 he was appointed as a member of the U.S. Delegation to the Joint FAO/WHO Committee of Government Experts on Milk and Milk Products, a position he still holds.

Diverse background characterizes new FDA head

Even before his official nomination as FDA director, Dr. Arthur Hull Hayes Jr. was being hailed in the pharmaceutical trade press as a "get-doner" kind of guy who doesn't waste time."

The most cursory examination of his 16-page curriculum vitae confirms that view.

The author of more than 100 publications, Dr. Hayes has just completed a term as president of the American Society for Clinical Pharmacology and Therapeutics. He is currently serving an elected five-year term as one of seven members of the Board of Trustees of the U.S. Pharmacopoeial Convention, the nation's drug-standard setting organization.

At Hershey, where he directs the Hypertension Clinic, he is professor of medicine and pharmacology and chief of clinical pharmacology. He has been active in many leadership positions in the Medical College, among them the chairmanship of the Medical Student Selection Committee and of the Faculty Organization.

In 1978, Dr. Hayes was ordained a permanent deacon in the Roman Catholic Church for the Diocese of Harrisburg. He is well known in his community for the literary, substantive and oratorical qualities of the homilies he delivers when he conducts worship services at the St. Joan of Arc Church. He also was appointed a Papal Knight in the Equestrian Order of the Holy Sepulchre of Jerusalem and a faculty advisor to the Catholic Campus Ministry.

As the father of three children, he has also managed to find time to serve on the School Advisory Board for the local junior high school — and this year added the job of being class secretary for his medical school alumni association.

Dr. Hayes was born 47 years ago in Highland Park, Mich. He was graduated magna cum laude from the University of Santa Clara (Cal.) in 1955, with a major in philosophy, and then went to Oxford University where he was a Rhodes Scholar and a Danforth Fellow. In England, he earned his M.A. degree with honors in philosophy, politics and economics.

He then took a year of pre-medical and two years of medical education at Georgetown — serving as an instructor in public speaking while there. In 1964, he earned his M.D. from Cornell, where he was also a graduate student in pharmacology. Santa Clara

awarded him an honorary Doctor of Public Service degree last year.

After an internship at New York Hospital, Dr. Hayes served as a captain in the U.S. Army Medical Corps for two years as chief of the Clinical Investigation Branch of the Medical Research Laboratories at Edgewood Arsenal, Md. Following a return to Cornell-New York Hospital as a resident and fellow in medicine, he became assistant professor of medicine in Cornell's Medical College and associate professor of pharmacology in the Medical College and in the Graduate School of Medical Sciences. He also was an associate dean for academic programs at the medical school and chief of the cardiac pacemaker clinic at New York Hospital. He came to Hershey in 1972.

His research is primarily in the area of drug use to treat hypertension and heart disease in general, the metabolism of drugs and the interaction of drugs. He serves on the editorial boards of five journals and has been a visiting professor at a number of institutions (including the People's Republic of China's Academy of Medical Science).

He is a fellow of the American College of Clinical Pharmacology, American College of Cardiology, College of Physicians of Philadelphia, New York Academy of Medicine, Royal Society of Medicine and the Harvey Society. He is chairman of the Commission of Therapeutics of the Pennsylvania Medical Society and an associate member of the American Pharmaceutical Association and its Academy of Pharmaceutical Sciences.

Dr. Hayes is married to a registered nurse, the former Barbara Carey, of Washington, D.C. They met at Georgetown where she earned a B.S. degree in nursing. She also holds an M.A. degree in education from New York University and is a part-time instructor in the Department of Obstetrics and Gynecology at Hershey, primarily involved in outpatient education. A certified child education and a certified CMBST (cervical vacuum basal body temperature) instructor, her special interests are in family planning and pregnancy, particularly for diabetic mothers and pregnant adolescents.

The Hayes have one son, a college student, and two daughters in high school.

News in brief

(Continued from page 1)

Soviet dissident to visit Shenango Valley

The Shenango Valley Campus is sponsoring a special lecture tomorrow (April 10) by Alexander Ginzburg, the well-known exiled Soviet dissident and human rights activist. Mr. Ginzburg is speaking on "Human Rights in the U.S.S.R."

Mr. Ginzburg, the editor of a literary journal, was imprisoned in 1967 and again in 1977 for his attempts to aid Soviet prisoners and their families. In the third year of his second sentence, he was stripped of his citizenship and exiled to the West.

Stone Valley lake opens April 11

Boat rentals will be available at Stone Valley beginning Saturday, April 11. The fishing season opens the following Saturday, April 18, at 8 a.m.

At the Mineral Industries docks, visitors will be able to rent canoes, rowboats and sailboats daily.

Princeton lecturer to discuss space colonization

Dr. Gerard K. O'Neill, professor of physics at Princeton University, will speak on "The High Frontier — Space Colonization and Energy from Space" on Wednesday, April 15, at 8 p.m. in Eisenhower Auditorium. His talk is sponsored by Colloquy.

President of the Space Studies Institute, Dr. O'Neill chairs the Task Group on Power from Space of the United States Space Research Association. His book, *The High Frontier*, received the Phi Beta Kappa award as the best science book published in 1977. He holds a Ph.D. from Cornell University.

Author will speak on Ludwig Wittgenstein

Allan Janik, co-author of *Wittgenstein's Vienna* with Stephen Toulmin, will talk on philosopher Ludwig Wittgenstein on Tuesday, April 14, at 3:30 p.m. in Room 319 Walker Building.

His talk is part of the Vienna Seminar, an informal faculty-student interdisciplinary group, and is open to the public.

Dr. Janik, whose visit is being sponsored by the Institute for the Arts and Humanities Studies, is nationally recognized for his studies of Austrian and German intellectual life in the 19th and early 20th centuries.

PSU Naiads to give swimming performance

Penn State Naiads will present their annual synchronized swimming performance on April 23, 24 and 25. "Water Works" combines the efforts of nine student choreographers and 32 swimmers in a program of 13 routines swum to the music of a variety of composers.

Lighting and costumes are designed to enhance the creativity of the movement in the water.

The performances begin at 8 p.m. at the Natatorium each night. Tickets will be available at the door starting at 7:30 p.m. and will be sold from April 13 at the Athletic Ticket Office in the Recreation Building.

The ticket price is \$1.50.

Upcoming festival showcases State's Slavic heritage

Displays of Slavic folk arts and artifacts — including demonstrations of Ukrainian Easter egg painting and icon painting — will be featured during the Third Annual Penn State Slavic Folk Festival on Friday and Saturday, April 10 and 11.

Sponsored by the Department of Slavic Languages, the Festival will be held in the Paul Robeson Cultural Center. It will run from 9 a.m. to 10 p.m. on April 10, and

from 9 a.m. to 5 p.m. on April 11.

Lorraine Kapitoff, assistant professor of Russian and festival coordinator, observes that the event is designed to showcase the music, dances and folk arts of the various Slavic peoples whose descendants form a large part of Pennsylvania's population. The spring festival format was chosen in keeping with the spring rituals common to all Slavic

cultures.

The Ukrainian style of painting Easter eggs will be demonstrated by Dr. and Mrs. Nicholas Miskovsky. Dr. Miskovsky, assistant professor of physics at the Altoona Campus, and his wife teach Ukrainian painting, which has long been one of their hobbies. Susan Guenther, 12th-term Russian technical translation major, will demonstrate icon painting, the traditional religious art form of the Eastern Orthodox Church.

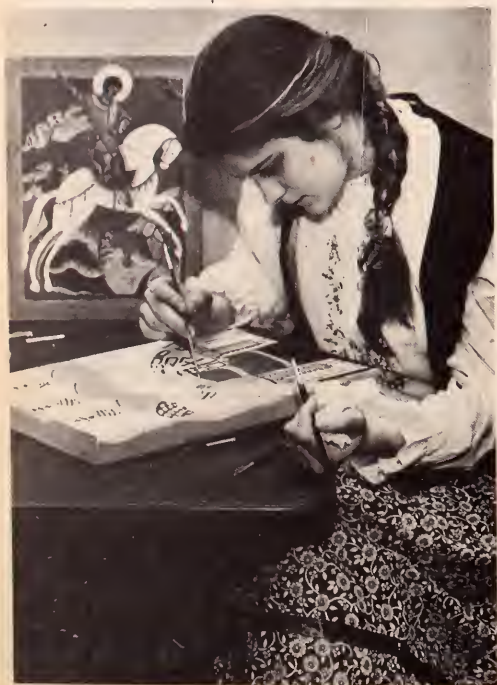

On April 10, the morning program will feature entertainment designed especially for young children and will include puppets and story-telling events. The afternoon program will showcase the Penn State Slavic Dance Ensemble, under the direction of Teresa Wilson, as well as individual performers. Ms. Wilson is a graduate assistant in the Department of Slavic Languages.

The evening program on April 10 will be opened by the Penn State International Dancers under the direction of Elizabeth Hanley, assistant professor of physical education. The Tom Duda Orchestra with Johnny Y of DuBois will follow with music for dancing, and polka and waltz contests will be held to determine prize winners.

Programs on April 11 will include performances by the Penn State Ukrainian Club dancers and singers, Interludia Folk Dance Club and the State College Little German Band.

Exhibitions of books, records and artifacts will be displayed during the Festival, as will a traveling museum collection from Pennsylvania and New York. A series of films also will be shown and a Slavic snack bar will offer hot and cold beverages and light ethnic food items.

Assisting Mrs. Kapitoff with coordinating the Festival are five members of the Department of Slavic Languages — Professors Thomas F. Magner, Sigmund S. Birkenmayer and Joseph Paternost; and assistant professors James J. Gebhard and Linda J. Ivanits. Also assisting are Ms. Wilson; Ann Mary Smaley, department secretary; and Mary Witham, graduate student and Festival treasurer.

Susan Guenther demonstrates icon painting.

Penn State Intercom

Senate accepts changes in University Committee

President Oswald, expressing cautious optimism over the fate of the University's 1981-82 budget request in Harrisburg, led off a series of oral informational reports to the University Faculty Senate at the April 7 meeting.

In describing Penn State's budget proposal (as reported in the March 13 and 19 INTERCOMs), Dr. Oswald noted the important contribution of the University's staff benefits programs in augmenting faculty/staff salaries. A complete text of this section of his statement appears at the right.

Dr. Oswald said that while Governor Thornburgh's proposed increase of 5.5 percent in the University's appropriation fell considerably short of the 12 percent inflation rate, the increase recommended in the overall State budget was only 5 percent, and that the Governor was expressing a concern for higher education.

Two legislative items appeared on the April docket.

The first, from the Committee on Committees and Rules, proposed several changes in the composition of the University Promotion and Tenure Committee.

The changes accepted by the Senate included:

- The number of committee members to be selected by the Senate is increased from six to seven;
- The number chosen by the President is increased from three to four, and the limitation that these be "senior academic administrators" is removed;
- The requirement that a Lindback Award winner and an Evan Pugh Professor be chosen by lot for membership on the Committee is deleted;
- Eligibility for membership on the Committee is made identical for both elected and appointed candidates.

At the suggestion of Commonwealth Campus faculty, a proposal that no member of the Committee serve more than two successive terms and after serving these terms not be returned to the committee for four years (two terms) was amended to two years (one-term).

The rationale was that Committee membership is limited to faculty members with the rank of full professor, and Campus faculties do not have a large pool of candidates at this level.

The Council of Liberal Arts Senators expressed opposition to deleting the stipulation that Lindback awardees and Evan Pugh Professors serve on the committee.

Representing the Subcommittee on Promotion and Tenure, Chairman Joseph

Benefits add to salaries

"It is important that the faculty understand that the University's staff benefits constitute a substantial tax free augmentation of the salary of each faculty and staff member. They represent approximately 25 percent of the costs of salaries for 1980-81. To illustrate, a faculty member whose salary is \$25,000 and who is in the 30 percent tax bracket has an additional \$6,250 provided by the University on behalf of the faculty member as a tax free benefit, for a total compensation of \$33,125.

(Continued on page 6)

Dixon noted that Committees and Rules, after extensive discussion, had agreed that the best way to ensure a strong Promotion and Tenure Committee was by not putting arbitrary restrictions on membership.

The second piece of legislative business, was designed to ensure teaching standards for graduate assistants. The Senate adopted the first two sections of this proposal.

As a result, teaching assistants will henceforth be required to attend teacher training programs. Their competence in the understanding and use of spoken English will be determined, and those deemed deficient will receive training at the Center for the Study of English as a Second Language.

The third part of the proposal, which had been questioned during previous hearings on the legislation, was voted down. It required that freshmen be informed during Orientation Week that

(Continued on page 6)

Mr. Richardson

Richardson is Elliott lecturer

Elliott L. Richardson, former diplomat and federal cabinet officer, will deliver the 1981 William Elliott Lecture on Wednesday, April 29, at 9:45 a.m. in Room 112 Kern Building.

The address, "Corporate

Responsibility: To Whom and For What," will open the seventh annual William Elliott Invitational Conference April 29-30 in the College of Business Administration.

Senior executives of the insurance industry, its trade and professional associations and leading academicians in the field have been invited to the conference, according to CBA Dean Eugene J. Kelley.

Mr. Richardson is senior resident partner in the Washington office of Milbank, Tweed, Hadley & McCloy, a New York law firm.

Before joining the law firm last October, he was ambassador-at-large and special representative of the President of the United States to the Law of the Sea Conference from 1977 to 1980.

Mr. Richardson served as Secretary of Commerce from February 1976 to January 1977. Prior to that he was U.S. Ambassador to Great Britain.

Among his other government posts were tenures as Attorney General of the United States; Secretary of Defense; Secretary of Health, Education and Welfare, and Undersecretary of State.

(Continued on page 4)

Abrams visit, nuclear debate set

Mr. Abrams

Gerald W. Abrams, president of Cypress Point Film Productions at Universal Studios in Los Angeles, will visit University Park April 21-24 as an Alumni Fellow. He will be a guest of the College of Arts and Architecture.

A 1961 business graduate, the

Harrisburg native started out as a radio sportscaster. He joined CBS Television Network in 1967, going from National Spot Sales to the head of West Coast Sales in four years. He moved into the creative side of the medium by joining The Jozak Company in 1972 as assistant to the producer of "It's Good to Be Alive: The Roy Campanella Story."

After serving as an associate producer for a series of television films, Mr. Abrams founded his own company in 1978. Through Cypress Point Productions, he has been executive producer of "Flesh and Blood," "Letters From Frank," "The Gift," "Steelwound," "Act of Love" and the recently aired "Berlin Tunnel 21."

Commoner, Weinberg to discuss energy needs

Environmental spokesman Barry Commoner and Alvin M. Weinberg, director of the Institute of Energy Analysis at Oak Ridge Associated Universities, will debate the topic, "National Energy Needs Call for a

(Continued on page 2)

Dr. Beittel

Beittel honored by two one-man shows in Japan

Fourteen years ago, Kenneth Beittel went to Japan in the spirit of an apprentice to learn porcelain techniques on the potter's wheel.

A professor of art education and already a mature potter working in stoneware, he was seeking, in his own words, "a tradition that would transcend my own personality and yet allow me to grow through experience and expression."

This winter, the art he has fashioned from his personal fusion of East and West brought him two honors. The first was a one-artist show in which 65 pieces were chosen to open the new Saga Museum of Porcelain and Ceramic Arts in Artia, Japan. Because of positive response, this show was subsequently extended by the museum director for an additional two weeks.

Dr. Beittel was then asked to exhibit his

porcelain, stoneware and raku ceramic pieces at the Art Gallery of the Iwatawa Department Store in Fukuoka.

Most large Japanese department stores have galleries which exhibit works by leading artists, Dr. Beittel explains. His exhibit again broke new ground since it was the first one to be shown in this gallery, which had just opened as part of a new wing of the main store. By computer count, 100,000 persons pass through this large complex on a good day.

Both the Saga Museum of Porcelain and Ceramic Arts and Iwatawa acquired works by Dr. Beittel for their collections, as did the Saga Museum of Fine Arts and a number of private collectors. In addition, Kakiemon and Immaemon, world famous 13th generation names in pottery, purchased pieces.

When Dr. Beittel first went to Arita in 1967, he studied with master potter Manji Inoue. Inoue, who has since taught at Penn State, was present along with 100 other potters for the "Shukuga-Kai," the celebration dinner party in honor of the opening of Dr. Beittel's museum show.

"The exhibitions were rewarding in many ways," Dr. Beittel says, "not least the emotional experience of going back to the place where I first made contact with the Arita tradition that has become so important in my work."

"During this visit, however, there were many times when I felt that I was bringing back their own traditions to the Japanese. They have become so geared to success that art is becoming a commodity to them."

(Continued on page 5)

Penn Staters

Dr. **Stuart Forth**, dean of University Libraries, received the Distinguished Alumnus Award of the University of Michigan's School of Library Science as part of the School's Alumni-in-Residence Program in which Dean Forth participated on April 2-3.

The program was established in 1969 "to give students an opportunity to become personally acquainted with leaders in the library profession and their professional education at Michigan." During his residency, Dean Forth delivered an address at a banquet in his honor. His topic was "Myths and Realities: The Politics of Library Administration."

Dean Forth earned both his B.A. (English literature and history) and M.A.L.S. at Michigan. His Ph.D. in American history was conferred by the University of Washington.

Prior to joining Penn State in 1973, Dean Forth held administrative posts at Oregon State University, the Seattle Public Library, the University of Kansas and the University of Kentucky. Long active in professional association work at both the state and national levels, he is also a participating member in the new Jane Austen Society of North America.

John S. Nichols, assistant professor of journalism, was one of five Cuban specialists who met in Washington last week with government officials responsible for U.S. policy toward Cuba.

The seminar, funded by the State Department, was titled "Cuba in the 1980s," and its proceedings will be published in a book of the same title to be edited by Jorge I. Domínguez of Harvard University, the project head. Dr. Nichols' topic was "The Cuban Mass Media in Its Social Context."

Dr. **Robert W. Carruba**, professor of classics, has been named one of 35 Fellows in Academic Administration by the American Council on Education for 1981-82. Fellows are nominated by the presidents or chancellors of their institutions and selected in a national competition. This year, there were 140 nominees.

The program, established in 1964, is designed to prepare faculty and staff for positions in administration.

Janice M. Margle, assistant professor of engineering at the Ogonot Campus, has been awarded a two-summer ASEE-NASA Faculty Fellowship. As one of 14 first-year fellows in the jointly sponsored American Society for Engineering Education-National Aeronautics and Space Administration program, Professor Margle will do research this summer and next at the Lewis Research Center in conjunction with Case Western Reserve University in Cleveland, Ohio.

Herman Cohen, professor of speech communication, was recently named a Distinguished Alumni of Delta Sigma Rho-Tau Kappa Alpha in recognition of his contributions to community and national life. DSR-TKA is the National Society in forensics with over 175 chapters in colleges and universities throughout the United States.

Dr. Cohen was editor of *Western Speech Journal*, an associate editor of *Quarterly Journal of Speech*, and is the book reviewer editor of *Philosophy and Rhetoric*. In 1975, he was elected president of the National Speech Communication Association and is president of the Pennsylvania Speech Communication Association.

Dr. **Gerald E. Gipp**, former director of the University's Native American Leadership Training Program and assistant professor of education, was inaugurated April 12 as president of Haskell Indian Junior College in Lawrence, Kan.

Before joining the University faculty in 1974, Dr. Gipp received his master's

degree (1971) and his doctorate (1974) at Penn State, both in educational administration. He left his faculty position in 1977 to accept a position as deputy commissioner for the Office of Indian Education, U.S. Office of Education. His title was later changed to deputy assistant secretary for Indian affairs.

Dr. **David B. Geselewitz**, professor and head of bioengineering, gave a series of invited lectures on bioelectricity and biomagnetism at the Winter School in Lamm, Finland. The Winter School was organized by The Low Temperature Laboratory of the Technical Physics Department of the Helsinki University of Technology.

Dr. **Robert Lima**, professor of Spanish and comparative literature, was invited recently to initiate the Spring Lecture Series at the University of Cincinnati. Under the auspices of the Department of Romance Languages, Dr. Lima spoke on "Farce, Esperanto and Death: The Last Phase of Valle-Inclán in the Theatre." Dr. Lima also visited a class on translation and read some of his poems and translations.

Earlier, Dr. Lima participated in a group reading of his poems and translations at Ithaca College.

Dr. **Barnes W. McCormick**, professor and head of aerospace engineering, was an invited speaker at Princeton University's Department of Mechanical and Aerospace Engineering on April 2. Dr. McCormick's seminar was entitled, "General Aviation Stalling Aerodynamics."

Dr. **Rustum Roy**, Evan Pugh professor and director of the Materials Research Laboratory, was the speaker at the colloquium in the Physics Department at Cornell University. He described the University's extensive work on the science underlying radioactive waste management.

Richard L. Crowley, assistant vice president for business services, has been elected vice president of the National Association of Educational Buyers. The Association serves the business side of higher education with more than 2,000 member institutions.

Dr. **Norman Freed**, associate professor of physics and associate dean for resident instruction in the College of Science, has been elected to a three-year term on the Executive Committee for Nuclear Theory at the Bates Linear Accelerator Laboratory at the Massachusetts Institute of Technology. The Bates Lab, a national facility, is one of the largest in the world devoted to high energy nuclear physics research.

Dr. **Edward J. Massaro**, director of the Center for Air Environment Studies and professor of veterinary science, has been appointed to the editorial board of *Environmental Research*. He has also been designated as founding president, and elected as counselor, of the Metals Specialty Section of the Society of Toxicology.

Dr. **E. Willard Miller**, professor of geography emeritus and associate dean for resident instruction emeritus in the College of Earth and Mineral Sciences, and Ruby M. Miller, former map librarian at Pattee, are the authors of a bibliography, entitled *The Third World: Natural Resources, Economics, Politics and Social Conditions* published by Vance Bibliographies. With more than 1,000 references, the book offers a wide perspective on the human problems of the Third World.

Partings

Joseph R. Berich, a janitorial worker with the Office of Physical Plant, retired April 17. He had been a staff member since April 17, 1971.

Promotions

Staff Exempt

Gale D. Bowman to manager, centralized office support services in Business Services.

Philip G. Burris to assistant supervisor, equipment records in Controller's Office.

Stephen R. Curley to financial and administrative services officer in Controller's Office.

Jay C. Johnson to chief nurse anesthetist at Hershey.

Mary L. Kanaskie to staff development instructor at Hershey.

Roseann C. Lanyon to assistant director in Undergraduate Admissions.

Michael Lippincott to textbook assistant (used books) in Penn State Bookstore.

Theresa A. Novak to assistant director in Undergraduate Admissions.

Donald N. Plourde to financial officer at Capital.

Mary E. Puffer to administrative assistant in Agriculture.

Mary S. Shore to assistant manager, respiratory therapy at Hershey.

Jeffrey P. Wirth to financial officer at Delaware County.

Staff Non-Exempt

Patricia M. Alsters to administrative aide in Agriculture.

Sharon K. Fox to cardiology technician at Hershey.

Kathy L. Vanovich to donor recruiter/Blood Bank at Hershey.

Clerical

Cathy J. Arney to secretary A in Agriculture.

Ruth Brautigam to senior registration clerk at Hershey.

Sandra L. Fetzter to secretary C in Agriculture.

Tammy Grimes to clerk, typist B in Penn State Bookstore.

Betty R. Hazel to secretary B in Agriculture.

Dorothy J. Thomas to secretary B in Agriculture.

Technical Service

Paul E. Brown to senior mailroom clerk in ARL.

Luther W. Musser to preventive maintenance worker (mechanical and plumbing) in Physical Plant.

Beverly A. Nye to laboratory attendant A, Blood Bank at Hershey.

Richard S. Smalley to mail sorter and relief clerk in Business Services.

Jean M. Standley to residence hall worker in Housing and Food Services.

George R. Stoltz to patrol officer at Hershey.

Franklin R. Straub Sr. to patrol officer at Hershey.

William P. Wegman to utility worker at Hershey.

Carpoolers

Bill Kantoski is interested in carpooling from the Altoona area. He is on an 8 a.m. to 5 p.m. schedule. Phone 865-5012 or 942-1464.

Shirleen Lofe, Simmons Hall Dining Room, seeks riders and/or drivers for a carpool from Millheim through Spring Mills and Centre Hall, to arrive on campus at 10 a.m. and depart at 7 p.m. She can be reached on campus at 865-2172 and at home at 422-8100.

Obituary

John U. Reuf, professor emeritus of pomology Extension, died April 2 at the age of 85.

A Swiss native, he joined the University in 1925 and retired in 1961. He held a bachelor's degree from Syracuse University and a master's from Iowa State.

Among his research contributions was the procuring and releasing of virus-free cherry stocks for general use. These stocks have since won wide acceptance.

Faculty/Staff Alerts

Review of health care coverage advisable

Regular University faculty and staff members are urged to review periodically the deductions being taken for their health care coverage (hospital/surgical/major medical, dental and vision) to be certain that they are paying for the correct coverage.

A change in family status may affect your cost and your coverage. For example, when you get married, when you have a first child, or when your spouse stops working for the University, you run the risk of having inadequate dependent coverage, if you haven't taken steps to indicate the change in coverage desired.

Consideration should be given to changing coverage if any of the following circumstances arises:

1. You get married.
2. You get divorced (or separated and no longer wish to provide spouse dependent coverage).
3. You become the parent of a first child (note: a baby is covered automatically for 31 days following birth; however, to provide for coverage beyond that time for a child, a coverage form must be completed).
4. Your only dependent child reaches age 19 (or 23 in the case of a full-time student).
5. Your only dependent child gets married.
6. Your spouse begins or ceases working for the University as a regular employee.
7. Your only dependent child begins or ceases working for the University as a regular employee.
8. Your spouse enters military service.
9. Your only dependent child enters military service.
10. Your spouse dies.
11. Your only dependent child dies.

If you feel a change should be made, call, write, or visit the Employee Benefits Division, Room 133 Willard Building, 865-1473.

Faculty or staff members located away from University Park may receive assistance by contacting the appropriate Business Manager or Regional Personnel Officer.

The University has no way of knowing whether a change should be made, so it is the responsibility of the individual faculty or staff member to keep his or her records up to date. No refunds for overpayment will be made, unless it can be shown that the University was in error.

Debate

(Continued from page 1)
Substantial Role for Nuclear Power," on Tuesday, April 21, at 8 p.m. in the HUB Ballroom.

Their debate is sponsored by Colloquy and the Science, Technology and Society program. The two men will also present individual seminars. Dr. Weinberg, who was director of the Oak Ridge National Laboratory for more than 25 years, will discuss "Alternative Energy Scenarios for the United States" at 4 p.m. on April 21 in the HUB Assembly Hall. Known for his development of the pressurized water reactor, Dr. Weinberg shared the Atoms for Peace Award in 1960 in recognition of his role in nuclear reactor development.

Dr. Commoner will speak on "The Industrial Environment as a Cause of Cancer" at 4 p.m. on Wednesday, April 22, in the HUB Assembly Hall. Currently a professor of environmental science and director of the Center for the Biology of Natural Systems at Washington University, Dr. Commoner is the author of several books, including *Science and Survival*, *The Closing Circle* and *The Politics of Energy*.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

April 16-26

Special Events

Thursday, April 16

Commons Concert, Phi Mu Alpha Band, noon.
Kern Lobby.
Sports: lacrosse (women) vs. Temple, 3 p.m.
Sigma Xi initiation and reception, 4 p.m., Nittany Lion Inn.
HPR lecture, 7 p.m., Room 26 Mineral Sciences, John Crompton, Texas A&M, on "The Marketing of Leisure."
Gnomathèque, *The Gospel According to St. Matthew*, 7 and 9:30 p.m., HUB Assembly Hall. Also April 17.
HUB Craft Center Open House, 7:30-9:30 p.m., Room 312 HUB.
Black Arts Festival, Miss Black PSU Pageant, 8 p.m., Schwab.
Foreign Studies/Yachad lecture, 8 p.m., Eisenhower Chapel lounge. Efraim Turgovnik, Tel Aviv Univ., on "The Penn State Foreign Studies Program at Tel Aviv University."

Friday, April 17

Sports: track (women), Lady Lion Relays, 10 a.m.; volleyball (men) vs. George Mason, 7 p.m.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Arthur Anderson, architecture, on "Post Modernism."
Commonsplace Theatre, *And Justice for All*, 7 and 9 p.m., Room 112 Kern. Also April 19.

Saturday, April 18

Fishing season opens at Stone Valley.
Sports: tennis (women) vs. William and Mary, 9 a.m.; track (men), Memorial Invitational, noon; baseball vs. Robert Morris (DH), 1 p.m.; softball (women) vs. Rutgers (DH), 1 p.m.
Shaver's Creek Nature Center, kite-flying workshop, 2 p.m., Stone Valley, Registration, Mon.-Fri., 865-1851.
France: Cinema, *14th Tournee of Animation*, 7 and 9 p.m., Room 112 Kern. Also April 20.

Sunday, April 19

Shaver's Creek Nature Center, birdwalk breakfast, 7 a.m. (registration, Mon.-Fri., 865-1851); wildflower workshop, 2 p.m., Stone Valley.
HUB Craft Center, 2nd session classes begin, Room 312 HUB.
University Chapel Service, 11 a.m., Music Bldg. Recital Hall. University Chapel Choir Easter Service, Tommie Irwin, director.
Easter Buffet, noon-2:30 and 6-8 p.m., Nittany Lion Inn.

Tracey Layer, oboe, and Maureen Haley, piano, 3 p.m., Music Bldg. Recital Hall.

Monday, April 20

Commons film, "Albert Schweitzer," noon, Room 112 Kern.
Sports: tennis (men) vs. Navy, 2:30 p.m.
Public lecture, 4 p.m., Room 123 Chambers, Clive Ashwin, Middlesex Polytechnic, London, on "Drawing Programmes in 19th Century German Schools."
Color Slide Club meeting, 7:30 p.m., Room 189 MRL.
College of Science, Priestley Lecture, 8 p.m., Room 333 Whitmore. Michael J.S. Dewar, Univ. of Texas, on "Quantum Mechanics," through April 23. See "Seminars" for details.
History of Photography lecture, 8 p.m., Room 101 Kern. Robert C. Snider, photohistorian, Washington, D.C., on "From Talbot to Television."

Tuesday, April 21

Comp. Lit. Luncheon, 12:15 p.m., Room 204 HUB. Gregory Rabassa, Queens College, on "Aguilera Milla and Magical Realism in Latin American Literature."
Sports: lacrosse (women) vs. Luck Haven, 3 p.m.
Colloquy/STS lecture, 4 p.m., HUB Assembly Hall, Alvin M. Weinberg, dir., Institute for Energy Analysis, Oak Ridge Assoc. Universities, on "Alternative Energy Scenarios for the United States," debate, 8 p.m., HUB Ballroom, Alvin Weinberg and Barry Commoner, environmentalist, Washington Univ., on "Resolved: National Energy Needs Call for a Substantial Role for Nuclear Power."
Dance workshop, 5:45 p.m., White Bldg. Dance Theatre. Student choreography presented.

Comp. Lit. Film Series, *Madame Bovary*, 7 and 9 p.m., Room 112 Kern.
Shaver's Creek, Armchair Naturalist, "Animals at Shaver's Creek," 7:30 p.m., Room 273 Rec. Hall.
History of Photography lecture, 8 p.m., Room 101 Kern. John Faber, photohistorian, National Press Photographers Assn., on "Photojournalism: Ambition and Reality."

IAHS/Dept. of German lecture, 8 p.m., Room 124 Sparks. Fritz Rudolf Fries, East German author and translator, reads from his works.
Museum of Art lecture, 8 p.m., Museum of Art. Anthony Cutler, art history, on "Icons and Iconography."

Wednesday, April 22

Commons Concert, Nittany Highlanders, noon, Kern Lobby.
Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. Shem Guilbory, New

Haven Chamber Ensemble, on "Concert Music: A Performer's View."

Colloquy/STS lecture, 4 p.m., HUB Assembly Hall. Barry Commoner, environmentalist, Washington Univ., on "The Industrial Environment as a Cause of Cancer."
SO Clark Theatre, Howard Mermel, *Long Distance*, 5:30 p.m., The Pavilion Theatre. Also April 23 and 24.
Dept. of Architecture lecture, 8 p.m., Mineral Sciences Auditorium. Kendrick Bangs Kellogg, California architect, discusses his work.
Music da Camera, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, April 23

Deadline for submitting reserve reading lists for Summer Term, Reserve Reading Room, W11 Patte.
Commons Concert, Phi Mu Alpha Band, noon, Kern Lobby.
Sports: baseball vs. Bucknell (DH), 1:30 p.m.; lacrosse (women) vs. Maryland, 3 p.m.
Black Studies symposium, 3:30 p.m., Rure Soko's Room. Patten, Don Lego, human development, on "Research Opportunities Focusing on the Black Aged."
Medieval Studies Week lecture, 4 p.m., Room 230 Visual Arts Bldg. Zehava Jacoby, Univ. of Haifa, on "Twelfth-Century Nazareth Rediscovered."
Gnomathèque, *The Reibers*, 7 and 9 p.m., HUB Assembly Hall. Also April 24.
Archaeological Institute lecture, 8 p.m., Room 101 Kern. Dwight Wallace, SUNY/Albany, on "The Quiche Maya."
Naiads, synchronized swimming, "Waterworks," 8 p.m., Natatorium.

Friday, April 24

Craft demo, Richard Rutowski, calligraphy, 11:30 a.m., Kern Lobby.
Sports: volleyball (men) ECVL Championships, through April 25.
Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. Hansa Bhankar, Indian classical musician, on "Non-Western Music."
Medieval Studies lecture, 3 p.m., Room 230 Visual Arts Bldg. David Jacoby, Hebrew Univ., on "Acre: A City in the Crusader Levant."
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Charles Ameringer, history, on "Costa Rican Democracy: Is There Trouble Ahead?"
Commonsplace Theatre, *King of Hearts*, 7 and 9 p.m., Room 112 Kern. Also April 26.
Shaver's Creek Nature Center, Frogs, Toads and Salamanders, 7:30 p.m., Stone Valley.
Naiads, synchronized swimming, "Water Works," 8 p.m., Natatorium.
Artists Series, Bella Lewitzky Dance Company, 8:30 p.m., Eisenhower Auditorium.
Jazz Blue Band, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, April 25

Little International Livestock Show, 8 a.m.-3 p.m., University Beef/Sheep Center.
Sports: golf (men), Nittany Lion Invitational, 8 a.m., through April 26; softball (women) vs. Ohio State, 11 a.m.; lacrosse (men) vs. Hofstra, 2:15 p.m.
Shaver's Creek Nature Center, hike around Stone Valley Lake, 9 a.m., Stone Valley; pioneer crafts for children 7-14 (weaving), registration, 865-1851.
Phi Psi 500.
France: Cinema, *Rademakers*, *Max Havelaar*, 7 and 9 p.m., Room 112 Kern.
Naiads, synchronized swimming, "Water Works," 8 p.m., Natatorium.
Artists Series, Bella Lewitzky Dance Company, 8:30 p.m., Eisenhower Auditorium.

Sunday, April 26

Sports: softball (women) vs. Ohio State, 10:30 a.m. and Slippery Rock, 2:30 p.m., baseball vs. Temple, 1 p.m.
University Chapel Service, 11 a.m., Eisenhower Chapel. Eston Williams, Program for Churches, Ideals, Inc., State College, speaker.
Artists Series, Bella Lewitzky Dance Company, *Jig au Gamin Plan*, 2:30 p.m., Eisenhower Auditorium.
Phi Mu Alpha pledge recital, 9 p.m., Music Bldg. Recital Hall.

Seminars

Thursday, April 16
Computer Science, Richard D. Schlichting, Cornell Univ., on "Axiomatic Verification of Fault Tolerant Software," 4 p.m., Room 325 Whitmore (new listing).

Friday, April 17

Physical/Analytical Chemistry, Abraham Bahta and Sonia Vasquez, Garcia, grad. students, on "Reactions of Peroxy Radicals with NO + NO₂ and the Decay of Peroxynitrate," 11 a.m., Room 333 Whitmore.
Physical Chemistry, Donald Smyth, Lehigh Univ., on "Non-Stoichiometry and Its Effect on the Properties of Metallic Oxides," 2:30 p.m., Room 333 Whitmore.
Geosciences, Irwin Remmon, Stanford Univ., and Birdslaw Distinguished Lecture, on "Optimal Groundwater Management," 3:45 p.m., Room 22 Delke.

Monday, April 20

Nittany, Roland Leach, poultry science, on "Experimental Diets, Lice and Abuse," 3:55 p.m., Room 117 Henderson.
MC3B, Ray Wu, Cornell Univ., on "Yeast Cytochrome C Gene: Cloning and DNA Sequence Analysis of a Wild Type and a Mutant Gene," 4 p.m., Room 101 Altohouse.
Priestley Lecture Series, Michael J.S. Dewar, Univ. of Texas, on "Problems Involved in the Prediction of Chemical Behavior: Scope of Existing Quantum Mechanical Procedures," 8 p.m., Room 333 Whitmore.

Tuesday, April 21

Metallurgy/Mineral Processing/Chemical Engineering, Norman L. Exson Research, on "Metal Extraction by Liquid Membranes," 11 a.m., Room 301 Steidle.
MC3B, Ray Wu, Cornell Univ., on "Rat Cytochrome C Gene: Cloning and DNA Sequence Analysis of a Wild Type and a Pseudogene," 11 a.m., Room 101 Altohouse.
Environmental Pollution Control, George Polansky, D.E.R. Bellefonte, on "Regional Overview of Hazardous Waste Activities," 2:20 p.m., Room 128 Sackel.
Plant Pathology, Robert Theberge, grad. student, on "Spore Biology: The Role of Plant Pathology in Bio Warfare," 3:55 p.m., Room 213 Buckhout.
Priestley Lecture Series, Michael J.S. Dewar, Univ. of Texas, on "The Prediction of Molecular Properties: Conjugation and Aromaticity," 8 p.m., Room 333 Whitmore.

Wednesday, April 22

Entomology, Roger Ratcliffe, USDA, Beltsville, on "Selection for Insect Resistance in Turf Grasses and Alfalfa," 7 p.m., Room 204 Patterson.
Priestley Lecture Series, Michael J.S. Dewar, Univ. of Texas, on "Mechanisms of Pericyclic Reactions: The Role of Radicals," 8 p.m., Room 333 Whitmore.

Thursday, April 23

Ceramic Science and Engineering, David W. Johnson, Jr., Bell Labs, Murray Hill, on "Ceramic Ion Conductors," 11 a.m., Room 301 Steidle.
Priestley Lecture Series, Michael J.S. Dewar, Univ. of Texas, on "Some Reactions of Radicals and Ions," 2 p.m., Room 333 Whitmore.
UDIS, Teaching Information Processing System," 2:20 p.m., Room 62 Willard.

Geosciences, Robert Newham, geosciences, on "Twining in Minerals," 3:45 p.m., Room 112 Walker.
Agronomy, William Waltman, grad. student, on "Frangipani Morphology in Late Wisconsinan and Pre-Wisconsinan Sites," 3:55 p.m., Room 111 Tyson.
Physics, Jan Matlovič, IBM, Yorktown Heights, on "The Superconducting Computer," 3:55 p.m., Room 445 Davey.
Fuel Science, Eric Sueberg, Carnegie-Mellon Univ., on "Modeling of Coal Devolatilization Phenomena: The Role of Mass Transfer," 4 p.m., Room 301 Steidle.
Mathematics, J.A. Nitsche, Freiburg Univ., on "The Numerical Solution of the Stefan Problem: Straightening the Moving Boundary," 4 p.m., Room 102 McAllister.
Mechanical Engineering/Acoustics, Gerhard Reithof, mechanical engineering, on "Acoustic Agglomeration of Submicron Particles for Air Pollution Control and Hot Gas Cleanup," 4 p.m., Room 105 Mech. Eng. Bldg.

Friday, April 24

Metallurgy, David Michel, Naval Research Lab., on "Fatigue and Fracture in Naval Materials," 11 a.m., Room 301 Steidle.

Exhibits

Chambers Gallery: Undergraduate Art Education Student Exhibit.
HUB Galleries: Third Annual Slavic Folk (Continued on page 6)

Three lectures will be presented during Medieval Studies Week, April 21-24. At left, a 12th century German manuscript showing "Barbarossa and his Sons." See story, page 4.

News in Brief

Seminar offers 'System' to individualize feedback

The University Division of Instructional Services will sponsor a seminar to acquaint faculty members with the Teaching Information Processing System on Thursday, April 23, from 2:20 to 3:35 p.m. in Room 62 Willard Building.

The System was originally designed by a professor of economics to assist instructors of large classes in providing individualized feedback to each student, based on the student's performance. It has been employed by the Department of Chemistry in teaching classes of more than 300 students.

At the seminar, Dr. Charles Haas, professor of chemistry, and UDIS staff members will describe the features of the System and explain how instructors can implement it in their own courses.

The software for the system was acquired by the University with funds supplied by the Chemistry Department and by UDIS. However, the software is not specialized for any particular course or type of course and is available for any instructor to use.

All interested faculty members are welcome to attend the April 23 seminar.

Spring enrollment up

Spring Term enrollment at the University has increased 1,453 over last year to a total of 50,195 students.

Of that total, 30,334 students are enrolled at the University Park campus, 712 more than last year. Enrollment at the 17 Commonwealth Campuses is up 666, to 15,450.

Spring Term enrollment is 1,589 at the Behrend College, 1,993 at Capital Campus, 332 at the Radnor Graduate Center and 497 at Hershey.

Inn to feature special Easter Buffet

The Nittany Lion Inn will feature a special Easter Buffet from noon to 2:30 p.m. and from 6 to 8 p.m. on Sunday, April 19.

The menu includes roast top round of beef, seafood chicken, baked ham with brandy sauce, newberg coq au vin, and kiabi and sauerkraut. A wide array of salads, cheeses and desserts will be offered, and the chef is preparing specially decorated centerpieces for the occasion.

The dinner is available for \$9.50 for adults and \$4.95 for children under 12. Those attending the evening meal may register for two free dinner-theatre tickets (\$36 value) for the April 25 Artist Series production of the Bella Lewitzky Dance Company.

Quiche Maya topic of SUNY professor

"The Quiche Maya" is the topic of a lecture by Dwight Wallace, an associate professor at SUNY/Albany, on Thursday, April 23, at 8 p.m. in Room 101 Kern Building.

His slide lecture is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Dr. Wallace will survey the achievements of the Quiche, a highland Maya group who were politically dominant in Guatemala until Alvarado conquered them and destroyed their capital at Utatlan.

The lecture, an archaeological and ethnohistorical integration, will concern itself with three contemporaneous elite-ceremonial centers, each situated on a defensible plateau with palaces and temples.

Three lectures set for Medieval Studies Week

Dr. Anthony Cutler, professor of art history, and two visiting speakers — Drs. Zehava and David Jacoby, Israeli educators and authors — will present lectures during the annual Medieval Studies Week, April 21-24.

Dr. Cutler, whose principal area of interest is Byzantine art, will speak about "Icons and Iconography" on Tuesday, April 21, at 8 p.m. in the Museum of Art. Among Dr. Cutler's many publications is a book, *Transfigurations: Studies in the Dynamics of Byzantine Iconography*.

Dr. Zehava Jacoby, lecturer in art history at the University of Haifa, will present the second of the week's lectures on Thursday, April 23, at 4 p.m. in Room 230 Arts Building. The author of numerous articles on art and sculpture in the Middle Ages, she will speak about "12th-Century Crusader Nazareth Rediscovered."

On Friday, April 24, Dr. David Jacoby will present the week's lectures with a presentation on "Acre: A City in the Crusader Levant" at 4 p.m. in Room 230

Arts Building. Dr. Jacoby, professor of medieval history at the Hebrew University of Jerusalem, is a visiting professor this year at the University of Pennsylvania. He has published three books on feudal structure and society in the Middle Ages and is finishing a fourth on cities founded by the crusaders.

A highlight of the week's activities will be a Medieval Banquet at 6:30 p.m. in the Maple Room, Henderson Human Development Building. During the banquet, Dr. Z. Jacoby will present awards to undergraduate and graduate student winners in the annual Medieval Studies Essay Contest. The banquet is open to the public, but reservations should be made as soon as possible by telephoning 865-3719.

Medieval Studies Week has been organized by the Medieval Studies and the Middle East Studies programs, with support from the Departments of Architecture, Classics and History. Dr. Cutler's lecture is sponsored by The Friends of the Museum of Art.

Students can register by mail for Fall Term

Many University students will be able to register by mail for Fall Term 1981 classes, according to Richard Soderger, director of registration and scheduling.

"This new option will allow eligible students to bypass the traditional arena registration," Mr. Soderger says. "This is an extension of the early registration concept already available to eligible students."

Undergraduate and graduate degree candidates enrolled at University Park Campus this term or Summer Term who preregister for Fall Term 1981 between May 1 and July 7 are eligible for the registration-by-mail option.

Students coming to University Park Campus for the first time Fall Term are not eligible, Mr. Soderger says. This includes first-term freshmen, transfers from Commonwealth Campuses and transfer students from other institutions.

Students who don't preregister, nondegree students and provisional students are not eligible either.

Students able to take advantage of the option can follow these procedures:

- (1) Purchase a Fall Term 1981 schedule of classes at the University Bookstore, HUB or Kern desks, or Registrar's Office. They will be available after May 1.
- (2) Meet with the academic adviser to plan the schedule for Fall Term and complete a preregistration form.
- (3) File the preregistration form at the Registrar's Office or the HUB desks. Deliver a self-addressed, stamped, business-size envelope to the Registrar's Office before July 30. Students who plan to graduate at the end of Fall Term should inform the registration clerk to make diploma arrangements. Free envelopes will

be available at the Registrar's Office, and postage stamps may be purchased there.

(4) Ensure that payment for tuition fees and other charges which will have been sent to the student's permanent home address are paid by the Aug. 14 deadline.

By about Aug. 10, the advance class assignment schedule, a registration-by-mail card and a diploma card, if appropriate, will be sent to the students in their self-addressed stamped envelopes.

University Park students who follow the procedures have three options, Mr. Soderger explains.

"Students who are satisfied with their schedule as shown on their advance class assignment schedule (pink slip) should sign the registration-by-mail card, complete the address information on the reverse side and mail the card to The Pennsylvania State University, Registration-By-Mail, Room 112 Shields Building, University Park, Pa. 16802."

"Or students may attend early registration, which will be held at 112 Shields from 8:30 a.m. to 4:30 p.m., Aug. 17 through 21. The pink slip and I.D. card must be presented for admittance."

The third option is regular registration. These students must report to the Intramural Building at exactly the time shown on their pink slip. The pink slip, tuition receipt, I.D. card and — if the class schedule is being revised — the revised number 2 card, must be presented."

Regular registration is scheduled for Sept. 3 and 4.

Students who register by mail will report to the Registrar's Office when they return to campus to have a Fall Term validation sticker placed on their I.D. card. Mr. Soderger says.

China-Penn State connection update

Dr. Charles Hosler, dean of the College of Earth and Mineral Sciences, reports that a person with a direct "link" to the China-Penn State "connection" (INTERCOM, April 9) is actually on campus.

The "link" is Mrs. Yu-Fang "Fragrance" Li, a research assistant in meteorology and daughter of Dr. Lai-Yung Li, a 1941 Penn State Ph.D. recipient in horticulture, who came to the University as a protégé of G.W. "Daddy" Groff.

Mrs. Li, while serving as a translator for two Americans visiting China — Dean Hosler and Dr. A.K. Blackadar, head of the Department of Meteorology — mentioned her father and Penn State, not realizing she was talking to two Penn Staters. After

telling them that she was being sent to Canada to study, Mrs. Li added that she would prefer to study in the U.S., because the weather patterns here are closer to those in which she is interested.

Dean Hosler and Dr. Blackadar, upon their return from China, invited Mrs. Li to study and do research here, and the Chinese government agreed.

And a final note on this chapter of the Penn State-China "connection": Dr. Li is planning to visit the University (and, of course, his daughter) this summer, marking his first return to the University since his departure on the eve of Pearl Harbor and World War II.

Mr. Rowell

Elliott lecture

(Continued from page 1)

Mr. Richardson was graduated cum laude from Harvard University in 1941 and also received his law degree from Harvard in 1947. He is the recipient of numerous honorary degrees.

He is chairman of the Public Advisory Committee on the Law of the Sea and also chairs the United Nations Association of the United States of America.

He is on the board of the World Wildlife Fund-U.S., the Advisory Board of the Center for Oceans Law and Policy, the Advisory Committee to the U.S. Coast Guard Academy, and numerous other public and professional organizations.

Mr. Richardson received the Albert Lasker Special Public Service Award in 1978, the Penn Club Award in 1977, the Federal Bar Council's Emory R. Buckner Medal for Outstanding Public Service in 1977, the Kansas City Art Institute's Thomas Hart Benton Award in 1976, and the American Institute for Public Service 1974 Jefferson Award.

He is the author of *The Creative Balance — Government, Politics, and the Individual in America's Third Century*, and of many articles on government, law and foreign policy.

Mr. Richardson will lead a seminar discussion with conference participants from 2 p.m. until 4:30 p.m. on Wednesday afternoon, following his public lecture.

On Thursday, April 30, at 9 a.m., Lester J. Rowell Jr., executive vice president and senior officer of Provident Mutual Life Insurance Co., will lead a discussion among conference participants.

Mr. Rowell joined Provident Mutual several months ago after a long career with Mutual of New York, where he rose to the position of senior vice president.

He is an alumnus of Penn State (Class of '55) and was graduated from Harvard's advanced management program in 1971.

A running back on the Penn State football team from 1951 through 1954, he received the State College Quarterback Club's 1973 Alumni Award for the "former athlete achieving outstanding success in another field."

Mr. Rowell is director of the Life Insurance Marketing and Research Association and chairs the Agency Officers Round Table.

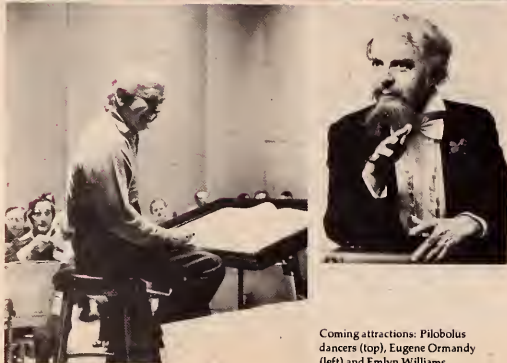

The annual conference is named for William Elliott, consultant and former chairman of the Executive Committee of Philadelphia Life Insurance Company and donor of the William Elliott Chair at Penn State.

Sigma Xi award

Timothy P. Mack of State College has been named recipient of the 1981 Sigma Xi Graduate Research Award at the University.

The award is presented annually to a graduate student for outstanding research. Dr. Mack received his M.S. degree in entomology at Penn State where he is a doctoral candidate. He received his B.A. in biology from Colgate University.

His current research centers on predators of the green peach aphid, a species found on potato plants.

Coming attractions: Pilobolus dancers (top), Eugene Ormandy (left) and Emlen Williams.

Artists Series announces '81-82 season

The Juilliard String Quartet will open the Artists Series 1981-82 season with a concert Sept. 22 in Schwab Auditorium.

As was the case last year, subscribers to one of the four series — Fine Arts, Music, Theatre/Dance, and Drama/The Actor — will be given priority for tickets to a special event, a January production of the musical, *The Best Little Whorehouse in Texas*.

In addition, subscribers to each one of the four series receive a 25 percent discount off the price of individual tickets; and subscribers to both the Music and Theatre/Dance series receive a 30 percent discount — or 12 events for the price of eight.

The Juilliard String Quartet's appearance is part of the Fine Arts Series, which also includes the Suzuki Strings, an internationally acclaimed group from Japan, on Oct. 15; the Gregg Smith Singers, recipients of three Grammy Awards, on April 30; and a "mini-series" of three prize-winning pianists — Gregory Allen on Oct. 30, Ursula Oppens on Feb. 5, and Cecile Licad on April 17.

Children of a Lesser God, Mark Medoff's Tony Award-winning play, will begin the six-performance Theatre/Dance Series on Sept. 23. The other five offerings are the Pilobolus Dance Theatre, an innovative company of six artists, on Nov. 6; Paul Osborn's *Morning's at Seven*, a comedy which also received a Tony Award, on Jan. 15; the 115-member Mazowiec Polish Dance Company, on Feb. 3; the Royal Winnipeg Ballet (with orchestra), a past favorite of Penn State audiences, on Feb. 19; and the Paul Gaudin Mine Company's presentation of *Mirage*, which combines theatre, dance and humor, on March 13. All Theatre/Dance performances will be in Eisenhower Auditorium.

The Music Series — also set for Eisenhower Auditorium — will begin on Oct. 2 with a concert by Carlos Montoya, flamenco guitarist. The additional five

offerings are the Chamber Music Society of Lincoln Center, in concert on Oct. 24; the Philadelphia Orchestra, with Eugene Ormandy conducting, on Jan. 19;

Frederica von Stade, mezzo soprano, on Feb. 13; the Pittsburgh Symphony Orchestra, in its 10th annual residency, with Michael Tilson Thomas conducting, on March 19; and *The Threepenny Opera* by Kurt Weill, produced by La Mama Etc. and Heritage Theatre Company, on April 3.

The fourth series, Drama/The Actor, will begin on Oct. 9 with Phyllis Newman starring in *The Madwoman of Central Park West*, which features an acting-singing-dancing cast of one. On Jan. 27, 29 and 30, five distinguished actors from the Royal Shakespeare Company will be actors-in-residence at the University, presenting three performances, two of which will be devoted to Shakespeare. (Specific programs will not be chosen until Fall 1981, and details will be sent to subscribers in November, together with an order form on which they may select two performances.) On March 26, the eminent Welsh actor Emlen Williams stars in *Charles Dickens: Scenes from the Famous Novels and Stories*. All Drama/The Actor performances are set for Schwab Auditorium.

Lively Arts for Young Audiences programs will be continued by the Artists Series during the 1981-82 season. Shinichi Suzuki will present his Talent Education Tour on Oct. 15, displaying his success in teaching violin to young children. The Pittsburgh Symphony Orchestra will offer a "Youth Concert" on March 20; and the Prince Street Players, an Emmy Award-winning company, will present *The Wizard of Oz* on April 24.

The Artists Series will begin sales to new subscribers on Thursday, April 30. Subscription order forms are available at the Artist Series office in Pine Cottage. Further information may be obtained by telephoning 865-1871.

Arts Roundup

Talks by photohistorians arranged for April 20-21

The 1981 History of Photography Events will resume April 20 and 21 with talks scheduled for 8 p.m. in Room 101 Kern.

The first lecture, "From Talbot to Television," will be presented by photohistorian Robert C. Snider. John Faber, photohistorian for the National Press Photographers Association, will discuss "Photojournalism: Ambition and Reality" for the second presentation.

Dr. Snider, who has taught English, journalism and photography at the Marine Corps Institute, the University of Minnesota, Indiana University and the University of Chicago, has written extensively on photohistorical and educational themes. His collection of books on the history of American photography is viewed as one of the major private holdings of its kind in North America.

The official historian to the National Press Photographers Association, Mr. Faber is also a senior technical sales representative with Kodak, specializing in press photography. He has had one-man shows in this country and abroad and has been the recipient of many awards as a photographer, including the President's Medal. The author of numerous articles as well as five books, Mr. Faber has also served as an advisor to newspapers in more than a dozen countries.

The free public talks are being sponsored by the Institute for the Arts and Humanistic Studies, the Departments of Art History and English and the School of Journalism. The 1981 History of Photography Events are being coordinated by Dr. Heinz K. Henisch, Institute Fellow and professor of the history of photography.

Fenner composition on April 22 program

A varied program of baroque, classical and 20th century pieces — including a composition by a University faculty member — will be performed by Musica da Camera Wednesday, April 22, at 8:30 p.m. in the Music Building Recital Hall.

"La Primavera," the third of the four Vivaldi "Seasons" concerti to be performed this year by Musica da Camera, will be the opening work on the program. It will be followed by "Suite for Strings," written in 1976 by Burt Fenner, professor of music.

The final selection for the evening, Haydn's Symphony No. 45 (known as the "Farewell" symphony), has been included in the program for a reason — many of the members of Musica da Camera will be graduating this spring. In the last movement of the symphony, musicians leave the stage one by one as their parts end.

Musica da Camera, which is composed largely of graduate students in the School of Music, is directed by Dr. Douglas Miller, associate professor of music.

California architect to describe his work

California architect Kendrick Bangs Kellogg will present a public lecture and slide show at 8 p.m. on Wednesday, April 22, in the auditorium of the Mineral Sciences Building. His visit will be sponsored by the Department of Architecture.

Mr. Kellogg, whose work with private residences has been said to show the influence of Frank Lloyd Wright, has designed homes in southern California and Hawaii.

Beittel

(Continued from page 1)

Arita is a town of about 50,000, and almost all its people are concerned in one way or another with the production and sale of pottery. Among its 70 kilns, Arita has three "big name" studios. Dr. Beittel observes. The largest employs about 180 potters — but only the "big name" potter signs his name on the work all these people produce.

"A plate from this studio can sell for as much as \$10,000," Dr. Beittel continues. "A tea bowl may bring \$4,000 or more. Pottery has become a fine art in terms not only of the respect it engenders but also of the financial rewards it brings to the Arita potters."

"When I went to Japan in 1967, I was searching for a tradition larger than my ego-bound one; now it seems to me that the Japanese are in danger of losing the very thing that drew me to them."

Dr. Beittel noted certain cultural differences in Japanese and American expectations of exhibiting artists. Japanese potters package the works they sell in beautifully crafted wooden boxes, which the artist then signs. Since Dr. Beittel did not have such boxes, the department store made photographs of each piece, which he subsequently signed in lieu of boxes. Unlike the United States, where artists only appear for the openings of their shows, in Japan they are expected to be on hand each day to talk to visitors.

Dr. Beittel estimates that he sold about 60 percent of the pieces he had brought with him. Not all of the works were for sale, for this was a representative show, covering the decade of 1970-1980. "One of the sales that pleased me most," he recalls, "was a natural clay bowl which was bought by a tea ceremony master. He was taking it to his home in the mountains to eat rice in after his retirement, and he expressed his delight in the bowl by presenting me with four of his calligraphies."

A further indication of Dr. Beittel's acceptance by the Japanese is an invitation he has received to exhibit with the potters of Arita in May at a special exhibit to be held at Mitsukoshi of Park Avenue in New York City.

A member of the faculty since 1953, Dr. Beittel came to Penn State from Winthrop College. He is a graduate of Carnegie-Mellon and holds M.Ed. and D.Ed. degrees from Penn State.

During his 1967 sabbatical, the University gave him funds to purchase a permanent collection of Japanese pottery for Penn State, and the pieces which he selected are on display in Chambers Building and in the Museum of Art.

"The University made a good investment," Dr. Beittel observes. "A Hamada plate I bought for \$150 in 1967 would sell now for about \$8,000."

Partial support for Dr. Beittel's exhibits in Japan was given by the School of Visual Arts, the Office of the Dean of the College of Arts and Architecture, the Provost's Office and the Institute for the Arts and Humanistic Studies, of which he is a Fellow. The American Center at Fukuoka contributed toward publication of the catalog.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Senate

(Continued from page 1)

some of their classes might be taught by graduate assistants.

Senator Edward Klevans noted that this legislation implied that "freshmen would have to be warned that graduate students are inferior teachers, but you are going to have to have them, terrible as that may be." Dr. Klevans added that TAs are used at every major university.

Several other senators pointed out that the proposal put the University in the position of singling out graduate students as second-rate teachers.

Four informational reports, in addition to Dr. Oswald's, were presented.

Athletic Director Joseph V. Paterno, describing "The Role of Varsity Athletics in the University," pointed to the importance of faculty members maintaining control over the program in such areas as admissions, eligibility, normal progress and grading. "Normal abuses have occurred," Mr. Paterno emphasized, "when university faculties have been unwilling to face up to their responsibilities."

Mr. Paterno noted, however, that is was

essential that the Athletic Department maintain certain administrative controls—for example, being able to close Rec Hall during basketball practices.

Penn State has 31 intercollegiate sports, probably the largest program in the country, according to Mr. Paterno, who pointed out that none of them makes any money. "We subsidize the faculty," Mr. Paterno said. "You pay a cheaper price to see a football game than the general public. I don't pay a cheaper price to see a play on campus," he added.

Mr. Paterno also predicted that inflation was going to force some belt tightening in the athletic program. Between 1968-75, the football team played in seven major bowls and had a "windfall profit" of between \$3½-4 million. Since 1975, the University has had only one major bowl, and it does not make money from appearances in other than major bowls.

The results of a four-year study conducted by the Office of Residential Life Programs were reported on by its director, Dr. M. Lee Ucraft. A group of 1976 freshmen were followed from their entry at University Park to their graduation to determine what impact, if any, their experiences had upon their academic and personal development. Some of the

findings were:

- Black and white students with similar academic records have about an equal chance of staying in school.

- Intellectually oriented students are more isolated in their freshman year and are more likely to leave the University.

- Freshmen who live in residence halls drop out at about half the rate of those living at home.

- Students working more than half-time were more likely to drop out.

- Seniors expressed strong endorsement of their academic and personal experiences (although Dr. Ucraft pointed out that these were students who stayed in school.)

- While many seniors felt their academic preparation was good, the intellectual climate at the University was less highly rated.

- About one fourth of the seniors felt that the academic advising they received was poor.

- The theme that ran throughout the findings, Dr. Ucraft said, was that the students who were more likely to succeed were those who were able to establish meaningful relationships with their roommates, their fellow students and faculty members.

An Informational Report on the Basic Skills program was presented—tables appeared in the April 2 INTERCOM. Commenting on the report, Undergraduate Instruction Chairman Robert J. Heinsohn pointed out that, "While we look at freshman admissions and say how good we are, 30 percent of the students admitted are deficient in mathematics, English or both," and that the inability to control admissions means that there must sometimes be a "brutal" weeding out process after the student is admitted, sometimes as late as the junior year.

In connection with a report of the Capitol Campus Review Committee, Capitol Provost Theodore Gross addressed the Senate on that Campus's role in the coming decades. Its major contribution, he said, "can be to help Penn State have an urban presence because that's where most of the nation's problems are."

He also pointed to the need for Penn State to have a University presence near the State Government in Harrisburg.

Because of the length of the docket, the final item, a discussion by Dr. Kenneth P. Mortimer on "Collective Bargaining: The National Scene," was postponed until the May meeting.

Benefits

(Continued from page 1)

Benefits have been increasing in both value and services. For example, during the last three years the University has added dental and vision care programs to its already substantial health benefits. The cost of our group insurance programs has increased by 94.5 percent since 1974-75.

Penn State will pay \$27.7 million for retirement costs and \$14 million for social security costs in 1980-81. These costs have increased since 1974-75 by 118 percent and 90 percent respectively. Over the last eight years, 64 percent of the University's entire State appropriation increase has been required to meet mandatory cost increases in the University's share of costs of retirement and social security.

"We are now faced with a special problem. During the last two years, the costs of our group insurance programs, particularly health, have unexpectedly increased, principally as the result of much heavier utilization of benefits. Costs for 1980-81 are up \$2.7 million, or approximately 40 percent higher than for 1979-80, resulting in a serious budget problem for the University. It is important to note that if individuals were to provide health insurance from their own resources, the increased costs would have had to be borne personally through higher rates. Since 1968, the University has borne the entire cost of faculty and staff members' health insurance. Costs to the University in 1975 were \$27 per month (\$324 a year) per employee. Today the University provides \$67 per month (\$804 a year) per employee.

Exhibits

(Continued from page 3)

Festival Exhibit, Art Alley, Jim Weigle, landscapes of handmade paper, Browning Gallery, Benny Andrews, paintings The Gallery.

Kern Gallery: PSU Art Dept. Juried Photography Exhibit, through April 25. John Setz, glass work Mary Weidner, drawings.

Museum of Art: Recent acquisitions to the Museum's collection, through April 26. Selected works from the collections of Mimi and Sanford Field and Samuel Callu. Selections from the Museum's American collection. Watercolors from the permanent collection.

Pattee Library: Mary Barnes, drawings and paintings, East Corridor Gallery. Paul Flexner, drawings, through April 22. Frank Chesler, photographs, opens April 22. Lending Services Lobby, Andrew Risk and Thomas Hubben, ceramics and ceramic sculpture, through April 20. Ukrainian Folk art, opens April 20. Main Lobby, "Photography and Humor." Rare Books Room.

Dewar to give Priestley lectures

Dr. Michael J.S. Dewar, Robert A. Welch Professor of Chemistry at the University of Texas at Austin, will be the featured speaker for the 55th Annual Priestley Lectures, sponsored by the Mu Chapter of Phi Lambda Upsilon and the College of Science. The lectures are scheduled for April 20, 21, 22 and 23.

Dr. Dewar's topic will be "Quantum Mechanics as a Practical Chemical Technique." A complete schedule of his talks appears in the calendar on page 3.

Dr. Dewar is credited with improving the understanding of organic chemistry through the use of quantum mechanical methods. Specifically, he has made notable contributions to the knowledge of ground state properties of organic molecules and to the transition states involved in their reactions. As a beginning researcher, he postulated the structure of an important new class of natural compounds with the tropolone nucleus—at a time when organic chemists were just starting to use theoretical methods. His findings prompted organic chemists to begin using molecular orbital methods in their work.

A graduate of Oxford University with B.A., M.A. and D.Phil. degrees, Dr. Dewar remained at Oxford following his graduation, first as a postdoctoral researcher and then as the University's 1945 Imperial Chemical Industries Fellow. He spent six years as a research chemist in physical chemistry at Courtauld, Ltd., before joining the faculty of the University of London's Queen Mary College as professor and head of the department of chemistry. He was appointed professor of chemistry at the University of Chicago in 1959, and has been Robert A. Welch Professor of Chemistry at the University of Texas since 1963.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., April 23, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with fair employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

SENIOR APPLICATIONS PROGRAMMER/ANALYST, OFFICE OF PLANNING AND BUDGET, UNIVERSITY PARK Responsible to a Line Applications Programmer/Analyst or Systems Planning Specialist for the analysis, design and documentation of computer systems, the definition of program requirements, and the computer programming. Define requirements for information and/or computer assisted processing in consultation with supervisor. Bachelor's degree or equivalent in computer science or related field, plus two to three years of effective experience in computer programming and analysis required. Demonstrated success in oral and written communication is essential.

RESEARCH DATA WRITER, COLLEGE OF MEDICINE, HERSCHEY Responsible to the Chairperson, Department of Psychiatry, and to the Chief of Research for the preparation and writing and/or assistance in writing of various reports, articles, manuscripts, etc., related to the departmental research program. A bachelor's degree in composition or journalism, plus one to two years of effective experience in the writing and preparation of reports.

SERVICE ADVISOR, OFFICE OF BUSINESS SERVICES, UNIVERSITY PARK Responsible to the Manager of Telecommunication Services for the training and advising of telephone users in the proper and effective use of services and equipment provided by Telephone Services. Explain use of State Network system. Conduct customer service evaluations. Associate degree or equivalent in business, marketing or public relations, plus one to two years of effective experience with experience in telecommunication preferred. Good oral communication skills and experience in dealing with the public essential.

ACCOUNTING/IDP MANAGER, PENN STATE BOOKSTORE, UNIVERSITY PARK Supervise daily accounting requirements. Develop the control accounting function. Prepare computer programs that accomplish the requirements developed by appropriate systems analysis and problem definition techniques. Modify existing computer programs as necessary. Train and supervise data collection personnel and machine operators. Design forms. Responsible for the control and security of cash funds. Bachelor's degree or equivalent, preferably in computer science or accounting, with working knowledge of accounting principles and electronic data processing methods required. Two to four years of effective experience in accounting with supervisory and E.D.P. experience required. Retailing experience preferred.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS, BEAVER CAMPUS Responsible to Dean of Student Affairs for the administration and coordination of student aid programs and part-time

and summer student employment, for the coordination of special programs and services for veterans' affairs and for student receiving the EOP program on Beaver Campus. Supervise, coordinate, and, at times, initiate and implement special programs and services including orientation of new students, informal educational programs, leadership training, communication workshops, and services related thereto. Master's degree in student personnel or other related field, plus up to one year of effective experience or bachelor's degree with two to three years of effective experience.

ASSISTANT DEAN OF STUDENT AFFAIRS, BEAVER CAMPUS Assume responsibility for the Beaver Campus Student Affairs programs in the absence of the Dean of Student Affairs and carries out specific responsibility for Residence Hall Life, Student Activities, Student Organizations, Cultural Affairs and the Disciplinary System. Responsible for student activities programming, coordinate student activities and organizations, serve as advisor to Student Union Board and Student Government Association; coordinate and communicate with advisors and officers of all student organizations; advise Religious Affairs Committee in its promotion and coordination of religious programs. Master's degree in student personnel administration or relevant field or the equivalent, plus two to four years of effective experience in responsible student affairs positions.

ASSISTANT DIRECTOR OF NURSING SERVICE, COLLEGE OF MEDICINE, HERSCHEY Responsible to the Assistant Hospital Director/Director of Nursing Services for assisting with administration of the Department of Nursing Services within assigned patient care areas, including planning, organizing, staffing, coordinating, and evaluating activities necessary for continuation and supervision of nursing care. Master's degree in administration or related area preferred or equivalent, and three to four years of effective experience within a hospital setting and relating to the area of accountability as designated and current literature as a registered nurse with the Pennsylvania Board of Nurse Examiners.

Research Staff Pool

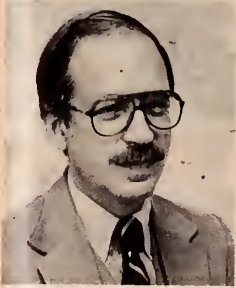

The University annually receives grants for projects designed to fulfill specific research responsibilities. Often the research grant or project is of relatively short or temporary duration. In most instances, University project administrators must react quickly in making selections of support staff personnel for their projects. Therefore, it is desirable to have an available pool of faculty and staff members who are interested in applying for such research support staff positions.

This announcement is made so that qualified individuals may make their own known. The types of temporary research support staff positions typically available are: Senior Project Associate, Project Associate, Project Assistant, Senior Research Technologist, Research Technologist and Research Technician.

The types of discipline backgrounds required vary depending on the projects involved. They may include physics, engineering, agriculture, mathematics, chemistry, but are not limited to these areas. If you apply, your name will be placed in the pool of candidates that will be considered as such opportunities arise. An announcement similar to this will be made each six months.

If you and that you are interested in and have background relating to typical University research projects, you may apply now or in the future for such temporary research support staff positions by calling the University's Employment Division, 865-1387 (network 475-1387).

Penn State Intercom

Courses in Arabic Civilization or Middle Eastern History are usually not among the biggest draws at any campus, but when word gets out that Dr. Goldschmidt will be teaching them, the classrooms are filled.

Dr. Goldschmidt heads the Middle East Studies Option, for which he has developed five courses. In large lecture classes, he divides students into small discussion groups, each handled by an intern whom he has carefully trained and supervises. Everyone in a discussion group — whose sessions Dr. Goldschmidt regularly attends — is expected to take part, to ask and respond to questions. Dr. Goldschmidt believes students should learn to think, not simply absorb their instructor's expertise.

Dr. Goldschmidt has experimented with various methods of testing. One of his innovations is the group oral exam: students will work harder, he says, to make a good impression in public on their peers.

Concern for his students extends well beyond the classroom. He invites them to his home to sample Middle Eastern food and music — his home phone number and address are always posted. One student recalls reporting as a freshman to Dr. Goldschmidt, his assigned advisor. On hearing that he was an English major, Dr. Goldschmidt walked him over to the English Department to meet some of the faculty members. On another occasion, when students complained to him about the food in their dormitory cafeteria, he took a meal there himself to evaluate the problem.

A former student, now a professor, says that even after ten years, Dr. Goldschmidt's influence as a role model persists. "I still find myself asking, 'How would Art Goldschmidt teach this?' My answer is always the same: 'Know your subject thoroughly, continue to be excited by it and let your students feel that joy.'" Dr. Goldschmidt came to Penn State in 1965. A graduate of Colby College, he earned his M.A. and Ph.D. at Harvard. He has already won the College of the Liberal Arts Outstanding Advisor Award and the Class of 1933 Award for Outstanding Contributions to the Teaching of Humanities. He received word this month that he has been named a Fulbright research fellow — his second such award.

The author of a textbook, *A Concise History of the Middle East*, Dr. Goldschmidt donates the royalties from copies bought by students in his courses to a fund which supports undergraduates who apply for the University's Foreign Studies Program at Tel Aviv University — a program he helped establish.

Five hailed for instruction

Five faculty members will be honored for their contributions to instruction as part of the Sunday, May 10, Honors Day program.

Receiving the 1981 AMOCO Foundation Outstanding Teaching Awards will be Arthur Goldschmidt Jr., associate professor of history; Charles G. Haas Jr., professor of chemistry; Neil A. Mercado, assistant professor of biology at Ogontz; and M. Leonard Shaevel, associate professor of physics at Hazleton. A \$1,000 check accompanies these awards, which are given to recognize excellence in teaching performance by faculty members in the undergraduate program.

Dr. Warren T. Morrill, professor of anthropology, will receive the second Raymond R. DiMeo Award for Instructional Improvement. This award, which consists of a certificate and \$500, is intended to recognize and encourage significant contributions by a faculty member for the improvement of undergraduate instruction over and above classroom teaching performance.

The AMOCO recipients, Provost Edward D. Eddy explains, are chosen from a group nominated by faculty members and students and recommended as finalists by a University Council committee of faculty members and students, chaired by Dr. Robert E. Dunham, vice president for undergraduate studies.

The Screening Committee for the DiMeo Award includes three faculty members designated by the Senate Committee on Undergraduate Instruction and two students. It is chaired by Dr. Eugene Melander, assistant vice president for undergraduate studies.

Dr. Mercado has taught biology up to his waist in mud, on the decks of a Windjammer schooner and at a nuclear power plant.

Students who see, feel and smell the environment, he believes, develop an attitude toward it that is not possible in textbook situations, and their learning is more permanent.

His creativity in combining principles and fieldwork to involve students who have never been particularly interested in science last year brought Dr. Mercado a Gustav Ohaus-National Science Teachers Association Award for Innovations in College Teaching.

Dr. Mercado's winning project, "Living in Our Environment — An Experiential Approach for Teaching

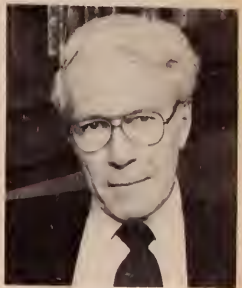

Hazleton students facing a Monday morning physics midterm always know where to turn for last-minute help. Professor Shaevel will be spending Sunday evening in the Campus library in order to be available for last minute questions.

"He has the longest office hours on campus," a student commented, "and he never makes you feel your questions are dumb."

Professor Shaevel is usually first in line when a student organization asks for faculty volunteers for committee work. He's turned up as a chef at a freshman chicken barbecue and as a croupier for a campus charity's Las Vegas night. When students put on such events as their annual spring concert, Professor Shaevel manages to make time to attend.

(Both stories continue on page 6)

University Park faculty members have a chance this afternoon (April 23) to experience directly Dr. Haas's involvement in the Teaching Information Processing System (2:20 p.m., Room 62 Willard).

TIPS is a computer-based program, first used in economics courses at the University of Wisconsin, which Dr. Haas has adapted for Chem 13. It enables an instructor to help each student identify his or her weakness — or mastery — of a unit of instruction. The student takes weekly ungraded quizzes carefully designed to sample the basic concepts in the unit under study. Promptly the next day, the student receives a personalized computer-produced report which gives remedial or advanced assignments for learning activities based on the student's performance on the "quiz." Student response has been overwhelmingly enthusiastic. In one class, 99 percent of the students responded with a "Yes" when asked if the CHEM TIPS program should be continued.

Dr. Haas has earned high praise from students at all levels. Year after year, a majority of the senior chemistry majors select Dr. Haas as the best teacher they have had at Penn State.

Dr. Haas is deeply involved in developing exciting lecture demonstrations for Chemistry 12 and 13. Students remark on his sense of humor; for example, one year on Halloween, he prepared an experimental solution that turned orange and black. Even in large classes of 400 students, he manages to evoke questions and class participation.

One of Dr. Haas's important responsibilities is the orientation of new teaching assistants for Chem 14 and 15 laboratories. He has instituted the practice of having each new TA prepare and present a "pre-lab" talk. The presentation is video-recorded and viewed by the TA and Dr. Haas.

Dr. Haas came to Penn State in 1951 after earning his master's and doctorate at the University of Chicago. (His B.S. was conferred by Virginia Polytechnic Institute.) He received his first teaching award in 1955 — The College of Chemistry and Physics Teacher of the Year. Last spring, he won the C.I. Noll Outstanding Undergraduate Teaching Award.

His contributions are recognized also by his peers. A senior chemistry faculty member, assigned to teach Chem 13 for the first time this spring, sat in on Dr. Haas's class as a model.

During the early seventies, Penn State's Anthropology I courses, by common agreement, were operating under several pedagogically undesirable conditions. Lecture sections were too large and impersonal; students' backgrounds and interests varied widely, and too much material had to be covered too rapidly. Dr. Morrill began working on a series of changes in 1973-74, and the structure of the new course was finalized in 1978.

Under the present format, students do not attend formal lectures, although occasionally outside speakers are asked to present special topics and students may attend voluntarily. In lieu of lectures,

(Continued on page 4)

Penn Staters

The Pennsylvania Art Education Association has selected Dr. Harlan E. Hoffa, professor of art education, as one of eight Outstanding Art Educators for 1980-81. Dr. Hoffa, who earned his doctorate at the University, returned to Penn State in 1970 to head the Department of Art Education, a post he had previously filled at Indiana University. He also headed Penn State's Division of Art and Music Education and was acting head of the School of Visual Arts.

A former president of the National Art Education Association, Dr. Hoffa received Wayne State University's Fine Arts Achievement Award in 1977 and a citation from the Pennsylvania Department of Education in 1972 for Distinguished Contributions to the Advancement of Education.

Dr. John E. Olson was an invited lecturer at a conference organized by the University of Arizona's Department of Mathematics in honor of the 75th birthday of the internationally known mathematician Henry B. Mann. Dr. Olson, an associate professor, spoke on "Some Open Combinatorial Problems on Finite Abelian Groups."

Provost Edward D. Eddy has been elected to the newly formed 13-member Corporate Board of Directors of Saint Vincent College and Seminary. This is the first time that persons outside of the Benedictine Community have been seated as members of the governing board. Dr. Eddy was named a trustee-director along with two other laymen, J. Wray Connelly, president of H.J. Heinz Co., and Gilbert McKenna, president of Kennametal Corp.

An article co-authored by Dr. John J. Horan, professor of education, has been honored as "the most outstanding piece of research published in the counseling literature during 1980" by the counseling and human development division of the American Educational Research Association. The article, "Stress Inoculation for Pain: What's Really Going On?," appeared in the *Journal of Counseling Psychology*. The second author is a former Penn State doctoral student. Dr. Gail Hackett, now at Ohio State.

The College and University Public Relations Association of Pennsylvania (CUPRAP) elected officers and directors recently at its annual meeting in Hershey. Arthur Cervo, director of public information and relations, was re-elected for a one-year term as president. Organized two years ago, CUPRAP is dedicated to the professional development of its members and to advancing the

interests of higher education in Pennsylvania. It includes 91 institutional and more than 250 individual members.

Dr. Torrence D. Parsons, associate professor of mathematics, recently returned from the University of South Carolina, where he presented a colloquium and seminar. His colloquium talk was entitled "More Results on the Pursuit-Evasion Problem" and his seminar topic was "Longest Cycles in r-Regular and r-Connected Graphs."

The University of South Carolina Press has issued a second and revised edition of Jan S. Prybyla's *The Chinese Economy*. The book was called "the quintessence of Western research on the economy of China" by Asian Thought and Society when it first appeared in 1978. The revised edition deals extensively with China's major post-Mao reforms. Dr. Prybyla is a professor of economics.

"Window Screen," a colored pencil drawing by assistant professor of architecture Richard Alden, has received the SAL (Springfield Art League) Award as the best graphic piece in the League's 62nd National Exhibition. The exhibition will be on display at the George Walter Vincent Smith Art Museum in Springfield, Mass., from April 26 through May 24.

Promotions

Faculty

Alfred J. Nanni to assistant professor of accounting in Business Administration.

Staff Exempt

Larry J. Jordan to coordinator, farm and greenhouse operations in Agriculture. Keith F. Stevens to executive producer in Agriculture.

Edward J. Todd to assistant financial officer in Controller's Office. Robert E. Wilson to program manager in Management Services.

Clerical

Karen L. Bowman to senior outpatient billing clerk at Hershey. Elizabeth N. Buchanan to clerk, accounting A in Agriculture.

Helen F. Clark to curriculum recorder in President's Office.

Sue Ellen Hampton to secretary A in Graduate School.

Deborah Snyder to secretary B in Liberal Arts.

Karen L. Sweeley to secretary B in Engineering.

Ann Eileen Wagner to secretary B at York. Linda M. Whitehill to conference secretary in Continuing Education.

Technical Service

Edward Behrer to laborer-helper utilities piping in Physical Plant.

From left: Dr. Pashek, Dr. Schrader, Dr. Williams.

25-year chairs

Three members of the College of Business Administration — Dr. Robert D. Pashek, associate dean and professor of business administration; Dr. William J. Schrader, head of the Department of Accounting and Management Information Systems and professor of accounting; and Dr. Arthur L. Williams, professor of insurance and head of the Department of Insurance and Real Estate — are receiving their 25-year chairs this spring.

Dr. Pashek, who is also acting director and one of the founders of the Pennsylvania Transportation Institute, assumed his present position in 1973. Previously, he was instrumental in developing for Penn State the first Department of Business Logistics in a major university, a department he headed from 1964 to 1972.

Currently on the board of directors of the Council of University Transportation Centers, Dr. Pashek is past president and former chairman of the board of the American Society of Traffic and Transportation and past president of the Transportation and Public Utilities Group of the American Economic Association. In 1965 he was named by Delta Nu Alpha as the National Transportation Man of the Year.

Dr. Pashek has served as a consultant on transportation matters for Pennsylvania and for various agencies of the federal government. He further has been involved in developing and conducting logistics programs in Peru with participants from the Andean Bloc countries. In addition, he has published numerous articles about transportation matters in professional journals.

Dr. Pashek received his A.B. degree from Central Washington College, his M.A. degree from the State University of Iowa and his Ph.D. from the University of Illinois.

Dr. Schrader, whose principal research is concerned with the formulation of theoretical models of financial accounting, assumed his present position as department head in 1976. Just prior to being named to the post, he was awarded a Fulbright lectureship in accounting at the University of Dar es Salaam, Tanzania, from 1973 to 1975.

He is the author of a number of professional articles and co-author of a book, *Financial Accounting: An Input/Output Approach*. In addition, he has served on the editorial board of *The Accounting Review* and on several committees of the American Accounting Association. His monograph explicating his concept of income measurement was published by Penn State's Center for Research.

Dr. Schrader, a certified public accountant, received his B.B.A. degree from Baylor University, his M.B.A. degree from Indiana University and his Ph.D. from the University of Washington.

Dr. Williams, who has served as head of his department since 1966, is currently conducting research on administrative costs in estates and writing a text,

Principles of Risk Insurance. He is the author of three previous books — *Relief of Charges in Unemployment Compensation*, *Introduction of Life Insurance* and *Essentials of Life Insurance* — and has contributed articles to numerous professional journals and various periodicals.

Dr. Williams — who received his B.A., M.A. and Ph.D. from Penn State — founded the Penn State Graduate Student Association in 1953, while earning his master's degree. After joining the faculty, he taught the first College of Business Administration course on open circuit television and in 1964 was the winner of the all-University "Professor Snarf" contest as Mr. Popular Professor. He also received the 1971 "Adviser of the Year" award from the College of Business Administration.

Currently chairman of the Pennsylvania Insurance Commissioner's All Industry Life and Health Insurance Advisory Committee on Licensing, Dr. Williams has served as a consultant and participant in a number of varied professional activities.

Obituary

Arthur D. Brickman, professor emeritus of mechanical engineering, died April 13 at the age of 60.

Dr. Brickman was a graduate of the University of Minnesota. He held a master's degree from Penn State and a doctorate from the University of Michigan. A member of the faculty from 1946 until his retirement last June, he received the 1967 Lindback Award for outstanding teaching.

Dr. Brickman pioneered the development of senior and graduate courses in automatic control; introduced scale-model equipment for studying shock and vibration effects in machinery; and was instrumental in the establishment of his department's Dynamic Simulation Laboratory. He was the author of a number of technical papers and co-author of a textbook, *Mechanical Measurements and Instrumentation*.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

University Park Calendar

April 23 —
May 3

Special Events

Thursday, April 23

Deadling to submit reserve reading lists for Summer Term, Reserve Reading Room, W11

Fates
Commons concert, Phi Mu Alpha Band, noon, Kern Lobby.

Labor Studies Club, Student/Trade Union Conference lecture, 1 p.m., Robeson Center. Stanley Wales, father of Polish Solidarity leader Lech Walesa, and Tom Kahn, asst. of AFL-CIO president Lane Kirkland, discuss the Polish Labor Movement. Workshops, 2:30 p.m., 3rd floor HUB.

Sports: baseball vs. Bucknell (DH), 1:30 p.m.; lacrosse (women) vs. Maryland, 3 p.m. Electrical Engineering Retrospective Seminar, 4 p.m., Room 329 EE East. John S. Nisbet, electrical engineering and dir., Ionosphere Research Lab, on "The Solar System 25 Years Later: Where We Have Gone, Where We Are Going."

Medieval Studies Week lecture, 4 p.m., Room 230 Visual Arts Bldg. Zehava Jacoby, Univ. of Haifa, on "Twelfth-Century Nazareth Rediscovered."

SO Clock Theatre, *Long Distance*, 5:30 p.m., The Pavilion Theatre.

Cinematheque, *The Returners*, 7 and 9 p.m., HUB Assembly Hall. Also April 24.

Archaeological Institute of America lecture, 8 p.m., Room 101 Kern. Dwight Wallace, SUNY/Albany, on "The Quiche Maya."

Naiads, synchronized swimming, "Waterworks," 8 p.m., McCoy Natatorium.

Friday, April 24

Sports: volleyball (men), ECVL Championships, through April 25.

Crit demonstration, Richard Rutowski, calligraphy, 11:30 a.m., Kern Lobby.

Music in Interesting Times lecture, 2:20 p.m., Music Bldg. Recital Hall. Hansa Bhaskar, Indian classical musician, on "Non-Western Music."

Medieval Studies Week lecture, 3 p.m., Room 230 Visual Arts Bldg. David Jacoby, Hebrew Univ., on "Acre: A City in the Crusader Levant."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Charles Ameringer, history, on "Costa Rican Democracy: Is There Trouble Ahead?"

SO Clock Theatre, *Long Distance*, 5:30 p.m., The Pavilion Theatre.

Commonplace Theatre, *King of Hearts*, 7 and 9 p.m., Room 112 Kern. Also April 26.

Shaver's Creek Nature Center, "Frogs, Toads and Salamanders," 7:30 p.m., Stone Valley. Naiads, "Waterworks," 8 p.m., McCoy Natatorium.

Artists Series, Bella Lewitzky Dance Company, 8:30 p.m., Eisenhower Auditorium.

Jazz Blue Band concert, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, April 25

Little International Livestock Show, 8 a.m.-3 p.m., University Bldg./Sheep Center.

Sports: golf (men), Nittany Lion Invitational, 8 a.m.; through April 26: softball (women) vs. Ohio State, 11 a.m.; lacrosse (men) vs. Hofstra, 2:15 p.m.

Shaver's Creek Nature Center, hike around lake, 9 a.m., Stone Valley.

Phi Psi 500.

France-Cinema, Rademakers, *Max Havelaar*, 7 and 9 p.m., Room 112 Kern. Also April 27.

Naiads, "Waterworks," 8 p.m., McCoy Natatorium.

Artists Series, Bella Lewitzky Dance Company, 8:30 p.m., Eisenhower Auditorium.

Sunday, April 26

Sports: softball (women) vs. Ohio State, 10:30 a.m. and Slippery Rock, 2:30 p.m.; baseball vs. Temple, 1 p.m.

University Chapel Service, 11 a.m., Eisenhower Chapel. Eston Williams, Program for Churches, Ideals, Inc. State College, speaker.

Artists Series, Bella Lewitzky Dance Company, *Tigra*, Game Plan, 2:30 p.m., Eisenhower Auditorium.

Phi Mu Alpha pledge recital, 9 p.m., Music Bldg. Recital Hall.

Monday, April 27

AAUW Used Book Sale, 9 a.m.-9 p.m., Wesley Foundation, Locust Lane and E. College Ave., through May 1.

A scene from the Crystal Palace, which will be discussed by Charles W. Mann, librarian, Special Collections, and professor of English, at 6 p.m. April 29 in Room 101 Kern. His talk, "The Great Exhibition of 1851," is the last in the 1981 History of Photography Events.

Commons film, "I, Leonardo DaVinci," noon, Room 112 Kern.
Shaver's Creek Nature Center, bird walk, 6:30 p.m., Toffrees.

Tuesday, April 28

Red Cross Bloodmobile, 10 a.m.-4 p.m., Walnut Bldg.

Comp. Lit. Luncheon, 12:15 p.m., Room 204 HUB. Margareta and David Bowen.

Georgetown Univ., on "Aspects of Simultaneous and Consecutive Translation."

Comp. Lit. Film Series, *The Pawnbroker*, 7 and 9 p.m., Room 112 Kern.

Shaver's Creek Nature Center, Armchair Naturalist, "Impact of Environmental Literature," 7:30 p.m., Room 273 Rec. Hall.

Wednesday, April 29

College of Business Administration, William Elliott Lecture, 9:45 a.m., Room 112 Kern. Elliott L. Richardson, former diplomat and cabinet officer on "Corporate Responsibility: To Whom and For What."

Red Cross Bloodmobile, 10 a.m.-4 p.m., Walnut Bldg.

Commons concert, Glenn Kiddier, noon, Kern Lobby.

Sports: baseball vs. Buffalo (DH), 1:30 p.m.; lacrosse (men) vs. Loyola, Md., 7:15 p.m.

Music in Interesting Times lecture, 2:20 p.m., Music Bldg. Recital Hall. Bert Fenner, music, on "Electronic Music."

Symposium on Ethics and Values, 4 p.m., Room 101 Kern. Eric J. Cassell, M.D., Cornell Univ. Medical College and Hastings Center, on "Suffering and Its Place in the Goals of Medicine." Respondent: Richard Zaner, Southern Methodist Univ.

Shaver's Creek Nature Center, bird walk, 6:30 p.m., Walnut Springs Park.

East Asian Studies lecture, 7:30 p.m., Room 305 HUB. Se Jin Kim, Korean Consul General, on "Korea and the U.S."

Colloquy lecture, 8 p.m., Eisenhower Auditorium. Isaac Asimov on "The Future of Man."

History of Photography/English Colloquium, 8 p.m., Room 101 Kern. Charles W. Mann, Jr., Pattee Library, on "The Great Exhibition of 1851."

Alard String Quartet, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, April 30

Commons concert, Phi Mu Alpha Band, noon, Kern Lobby.

College of Engineering, Honorary Engineering Lecture, 4 p.m., Room 115 EE West. Robert A. Froeh, president, American Association of Engineering Societies, on "Engineering and Public Policy."

Cinematheque, *Who'll Stop the Rain?* 7 and 9:15 p.m., HUB Assembly Hall. Also May 1.

Philosophy Dept., Dotter Lecture, 8 p.m., Room 101 Kern. Richard M. Zaner, SMU, on "The Other Descartes and Medicine."

URTC, Paul Giovanni, *The Crucifier of Blood*, 8 p.m., The Playhouse.

Friday, May 1

Football Reunion, through May 2.

Music in Interesting Times lecture, 2:20 p.m., Music Building Recital Hall. Becky McKee, State College Talent Education Program, on "Music and Children: Suzuki."

Sports: baseball vs. Lafayette, 3 p.m. Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Allan Rodgers, geography, on "Prospects for Economic Development in the Soviet Far East."

Commonplace Theatre, *Taxi Driver*, 7 and 9 p.m., Room 112 Kern. Also May 3.

URTC, *The Crucifier of Blood*, 8 p.m., The Playhouse.

Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, May 2

66th Annual Penn State Dairy Exposition. "Show Day," 8:30 a.m.-3 p.m., University Dairy Barns.

Hetzl Union Board, "Movin' On," all day. HUB lawn. Also May 3.

Sports: tennis (women) vs. Michigan, 10 a.m.; track (men), Nittany Lion Relays, 10 a.m.; baseball vs. West Virginia (DH), 1 p.m.; Blue/White football game, 2 p.m.

France-Cinema, Armstrong, *My Brilliant Career*, 7 and 9 p.m., Room 112 Kern.

URTC, *The Crucifier of Blood*, 8 p.m., The Playhouse.

University Choirs, 34th Annual Spring Concert, Handel, *Israel in Egypt*, 8:30 p.m., Eisenhower Auditorium.

A daily calendar of events is available around the clock at 863-1234. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Sunday, May 3

University Chapel Service, 11 a.m., Eisenhower Chapel. Thomas G. Poole, PSU Office of Religious Affairs, speaker.

Sports: baseball vs. Pittsburgh (DH), 1 p.m. Jeff Smith, piano, 3 p.m., Music Building Recital Hall.

Phi Kappa Phi initiation and banquet, 6 p.m., HUB Terrace Room.

Seminars

Thursday, April 23

Statistics, Marjorie G. Hahn, Tufts Univ., on "Multidimensional Central Limit Theorems — A Fresh Perspective," 4 p.m., Room 62 Willard (new listing).

Friday, April 24

Metallurgy, David Michel, Naval Research Lab, on "Fatigue and Fracture in Nuclear Materials," 11 a.m., Room 301 Steidle.

Physical Chemistry, A.W. Castleman, Univ. of Colorado, on "A Glimpse of the Condensed State through Van der Waals Molecules and Ion Clusters," 2:30 p.m., Room 333 Whitmore.

Tuesday, April 28

Applied Research Laboratory, Michael L. Billet, ARL, on "Optical Resolution of Micro-bubbles in the Boundary Layer," 10:45 a.m., Walker Conference Room, Applied Science Bldg.

MCB, Donald Coffey, Johns Hopkins Univ., on "Nuclear Matrix Structure and Function," 11 a.m., Room 101 Althouse.

Metallurgy, H. Wei, grad. asst., on "Preferential Removal of Co from a Co-Pt Alloy by HCl," 11 a.m., Room 301 Steidle.

Environmental Pollution Control, James Brennan, civil engineering, on "Safety Aspects of Hazardous Waste Monitoring," 2:20 p.m., Room 128 Sackett.

Chemical Engineering, Eli Ruckenstein, SUNY/Buffalo, on "Behavior of Supported Metal Catalysts in Various Chemical Atmospheres," 3:45 p.m., Room 140 Fenske.

Biology, Rudolph M. Schuster, Univ. of Massachusetts, on "The Origin of Genetic and Familial Endemism in the Convolvulaceae Bryophyte Flora," 3:55 p.m., Room 8 Mueller.

Plant Pathology, Richard Lotstein, grad. student, on "Cadmium Bioaccumulation: A Tale of Two Systems," 3:55 p.m., Room 213 Buckhout.

Engineering Science and Mechanics, Gerry Noel, Solar Energy Materials and Systems, Battelle Columbus Labs., on "Novel Solar Cell Materials and Devices," 4 p.m., Room 214 Hammond.

Philosophy, Tony O'Connor, University College, Cork, Ireland, on "Categorizing the Body," 4 p.m., Room 101 Kern.

Wednesday, April 29

Geosciences, Brian J. Skinner, Yale Univ., on "Styles and Frequency of Mineralization during the Proterozoic," 3:45 p.m., Room 26 Mineral Sciences Bldg.

Thursday, April 30

Ceramic Science and Engineering, Tapan K. Gupta, Westinghouse Electric Corp. R & D Center, on "Zinc Oxide Varistor Materials," 11 a.m., Room 301 Steidle.

Chemistry, Andrew Kende, Univ. of Rochester, on "New Topics in Asymmetric Synthesis," 12:45 p.m., Room 333 Whitmore.

Agronomy, Timothy Ravinsky, grad. student, on "Relationships Between Hydraulic Conductivity and Soil Percolation," 3:55 p.m., Room 111 Tyson.

Physics, Richard Wilson, Harvard Univ., on "Quark Spectroscopy and Colliding Beams," 3:55 p.m., Room 445 Davey.

Fuel Science, Alan Scaroni, fuel science, on "Carbonization of Anthracene Over Surfaces," 4 p.m., Room 301 Steidle.

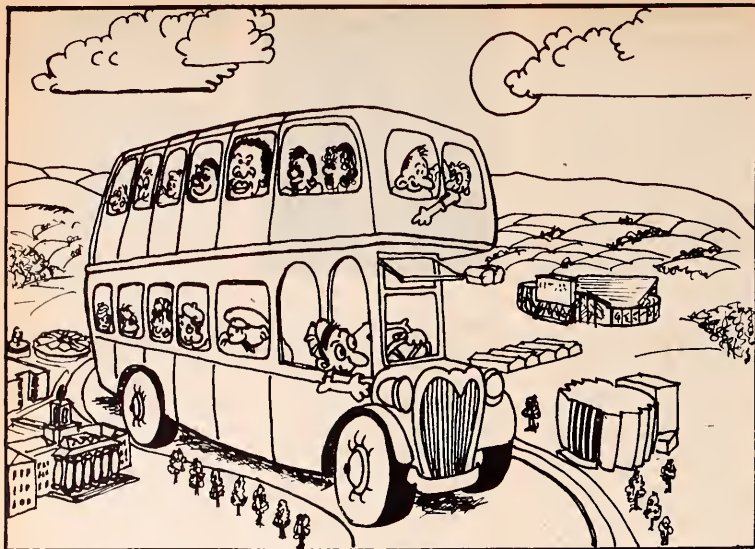

Friday, May 1

Analytical Chemistry, Fred Lytle, Purdue Univ., on "The Use of Lasers in Applied Spectroscopy," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Kenneth Johnson, mcb, on "Intermediate States in the Pathway of ATP Hydrolysis by Actomyosin," 2:30 p.m., Room 333 Whitmore.

Engineering Science and Mechanics, Kenneth Jones, Colorado State Univ., on "Morphological Defects in (0001) CdS and Their Effect on CuS/CdS Solar Cells," 4 p.m., Room 216 Hammond.

(Exhibitions are listed on page 4)

She just keeps rolling along

It doesn't go fast, and it doesn't go far, but Penn State's London Bus can always be counted on to make its appointed rounds. The 31-year-old rolling relic has earned the respect — even the affection — of the people who take care of it.

"I'm amazed at the darn thing," supervisor of Fleet Operations Samuel Blazer says. "It seems just to chug away all the time."

Every spring, summer and fall, the 1950 A.E.C. Regent London Transport bus rolls out of the Fleet Operations parking lot to provide guided campus tours to students, visitors and sightseers.

For any vehicle, 31 years is a long life, but the 7,720-pound double-decker bus has run with few major repairs since it came to the University from Europe in 1973.

The bus has to stay outside when not in use because at 13 feet, 3 inches high, it's too big for a garage. But even spending long winters outdoors doesn't seem to affect it.

"After that rough winter three years

ago, the engine kicked over the first time we tried to start it," Mr. Blazer recalls.

"The problems we've had with the bus so far have been slight," garage supervisor Donald Weaver says. "We've had no major engine trouble. At one point we had to locate a reconditioned transmission to keep the bus rolling, and we also converted from a 24-volt to a 12-volt electrical system."

Mr. Weaver notes that the bus receives a State inspection every six months and requires routine maintenance, but aside from the fact that it burns more oil than most vehicles, it's not much of a bother to the garage's 15 mechanics.

After the bus came over, it had to have an emergency brake system installed to pass State inspection, and it needed a new bumper, says David Schuckers, who made the arrangements to bring it to the University.

Mr. Schuckers, director of governmental relations and formerly director of University relations, said the bus was in good enough condition when it

came off the ship in Baltimore that Bellefonte towing service owner Skip Stewart was able to equip it with salvage license plates and drive at a steady 35 miles-per-hour, up and down hills, to State College. The regular four-hour trip took about eight hours, Mr. Stewart remembers.

Mr. Blazer says the biggest problems with the bus are keeping the paint and lettering bright and the intercom system operating.

The Penn State Alumni Association bought the bus in 1973 from London Transport for about \$1,600, Mr. Schuckers says, and paid about the same amount to ship it. It was the last bus available at its size; the others were a foot taller. Only 76 of the "lowbridge" buses were built, and none is used by London Transport today.

London Bus tours leave at 1:30 and 2:30 p.m. Monday through Friday from the HUB entrance. Private tours can be arranged by calling the Office of Campus Relations at 865-2501.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 473-1387). Applications for these staff vacancies will be accepted until 5 p.m., April 30, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

BOOKSTORE MANAGER, UNIVERSITY BOOKSTORE, MCKEESPORT CAMPUS Responsible to Director, Penn State Bookstore System, for purchasing, financial and retail operation of McKeesport Campus Bookstore.

Oversees quantity of each textbook, title, associated text material, supply items and equipment items for each registration period. Responsible for inventory. Approves all invoices for payment. Accountable for and controls cash, cash registers, and preparation of report of cash receipts. Studies new lines of merchandise and reactions to the new lines of merchandise. Supervises several full-time clerical employees and a varying number of part-time clerical employees. High school grade with three to four years effective retailing experience or associate degree in business or retailing and one year effective experience. Must have retail and/or bookstore experience.

ASSISTANT TO THE MANAGER, HETZEL UNION BUILDING, STUDENT AFFAIRS, UNIVERSITY PARK Responsible to the Manager, Hetzel Union Building, for the supervision and operation of the Hetzel Union Building physical facilities, equipment and programs during the evening and weekend hours of operation. Associate degree, plus one to two years of effective experience or equivalent are required. Must have demonstrated ability to supervise, train, and direct other employees and to serve politely, but firmly, the general public.

RESEARCH AIDE, COLLEGE OF AGRICULTURE, UNIVERSITY PARK Responsible Associate Professor for conducting research tasks and collecting experimental data for laboratory and field operations. Collect, organize and enter data for laboratory and field operations. Collect, organize and enter data on RIF terminal. Select package programs or write elementary programs to obtain summary statistics of the data. Supervise the work of part-time employees and assist graduate students in the laboratory and field. Oversees and participates in the planning, on-going maintenance and harvesting of experimental crops. Layout plots and insure that experimental design fits physical field dimensions. Responsible for the application of systematic insecticides as appropriate. Prep are reagents. Calibrate application equipment. Diagnose or equivalent in biology or related field, plus six to nine months of effective experience. Knowledge of basic programming and data processing routines.

ASSISTANT HOSPITAL DIRECTOR/DIRECTOR OF FINANCIAL AFFAIRS, COLLEGE OF MEDICINE, HERSHEY Responsible to the Hospital Director for the development, interpretation coordination and administration of the Hospital's policies on finance, accounting, insurance, admitting, internal controls, auditing and management of records and procedures. Bachelor's degree in accounting or business administration (master's preferred) or equivalency and significant experience in a hospital or consulting environment. Strong managerial and technical skills are required.

Exhibits

(Continued from page 3)

Chambers Gallery: Undergraduate Art Education Student Exhibit, through April 30.

HUB Galleries: Third Annual Slavic Folk Festival Exhibit, through April 30. Yachad Exhibit, opens May 1. Art Alley. Jim Weigle, landscapes of handmade paper through April 30. Browning Gallery. Benny Andrews, paintings, through April 30. The Gallery.

Kern Gallery: PSU Art Dept. Juried Photography Exhibit, through April 25. John Seitz, glass work, and Mary Wedner, drawings, through April 29. Robert Graves, prints, opens April 29. Martha Holt, clay and photographs, and Bill Rienser, leather, open May 1.

Museum of Art: Recent acquisitions to the Museum's collection, through April 26. Selected works from the collections of Mimi and Sanford Feld and Samuel Galla. Selections from the Museum's American collection. Watercolors from the permanent collection.

Pattet Library: Mary Barnes, drawings and paintings, through April 30. "Archaeology: Past, Present and Future," opens April 30. East Corridor Gallery. Frank Chetelat, "A Photographic Inquiry into European Architectural Motifs," Lending Services Lobby. Ukrainian Folk Art, Main Lobby. "Photography and Humor," through May 1. Rare Books Room. Frank Schraeder, paintings, through May 1. West Patter Lobby.

Morrill receives DiMeo Award

(Continued from page 1)

students must master a series of nine information units consisting of readings and audio-visual materials. They progress at their own speed, having access to tutoring by either undergraduate or graduate assistants whenever necessary. Students are tested on their knowledge of each unit and graded accordingly. If they perform poorly in a unit, they are given the opportunity to improve.

Anthropology I does not use a traditional text. Instead there are selections from the professional literature and a reading guide to place the papers in their historical and theoretical contexts. Extensive use is made of audio-visual materials, which are carefully integrated with the readings. A study guide is provided for each audio-visual unit.

Students spend most of their time not in class but in individual study and viewing of the audio-visual materials. This allows a greater scope for student self-pacing. Although some 450 students take the course each term, only 20 students are assigned to a tutor, with whom they meet individually.

Tutors are students who have taken the

course previously and performed well, and they are given systematic instruction in educational principles and techniques, specifically as applied to Anthropology I.

When the performances of students in the individualized course are compared with those taking Anthropology I under the regular lecture mode, the former regularly perform better on the same examinations and their course evaluations are higher. The revised course enrolls the maximum permissible number of students each time it is offered; standard lecture courses do not.

Change Magazine, in summarizing some of the most notable improvements in American undergraduate teaching during 1978, cited Dr. Morrill's innovations.

Dr. Morrill joined the Penn State faculty in 1970 as professor and head of anthropology; he resigned the headship last year to return to teaching and research. He earned his undergraduate degree at the University of Michigan and his M.A. and Ph.D. at the University of Chicago. Before coming to Penn State, he was a faculty member at Bucknell University.

Faculty/Staff Alerts

Health insurance reminder

Faculty and staff members with children are reminded that dependent children are covered under the University's health insurance programs until the age of 19, unless they are full-time students. Those who are full-time students continue to be covered until age 23. Therefore, it may be desirable to seek other health insurance coverage in advance for such individuals approaching age 19 or 23, as applicable.

The University's insurance carrier does offer a hospital/surgical/major medical plan to which the group insurance program may be converted. Information and application forms for this conversion coverage may be obtained from the Employee Benefits Division, Room 133 Willard Building (865-1473). Information about other independent coverage can be obtained from commercial agencies or salespersons.

AAES head will lecture

Dr. Robert A. Froesch, president of the American Association of Engineering Societies (AAES), is the 1981 Honorary Engineering Lecturer.

Dr. Froesch, until recently administrator of the National Aeronautics and Space Administration (NASA), will speak on "Engineering and Public Policy" on Thursday, April 30, at 4 p.m., in Room 115 Electrical Engineering West.

From 1975 to 1977, Dr. Froesch was associate director for applied oceanography at the Woods Hole Oceanographic Institution. Before that he was assistant executive director of the United Nations Environment Program, with the rank of U.N. assistant secretary general. He was also an assistant secretary of the Navy for research and development, and deputy director of the Defense Department's Advanced Research Projects Agency. After receiving three degrees from Columbia University in theoretical physics, Dr. Froesch joined Columbia's Hudson Laboratories and worked on naval research projects. From 1956 to 1963 he was director of the faculty.

Since 1969, he has been the Department of Defense member of the Committee for Policy Review of the National Council on Marine Resources and Engineering Development. In 1967 and 1970, he was chairman of the U.S. Delegation to the Intergovernmental Oceanographic Commission meetings at UNESCO in Paris.

The recipient of several awards, including the U.S. Navy Distinguished Public Service Award in 1969 and the Defense Meritorious Civilian Service Medal in 1973, Dr. Froesch is a member of Phi Beta Kappa and Sigma Xi.

Stanley Walesa to address conference

Stanley Walesa — father of Polish Solidarity leader Lech Walesa — will discuss the Polish labor movement today at 1 p.m. in the Paul Robeson Cultural Center. He will be joined by Tom Kahn, assistant to AFL-CIO President Lane Kellard.

Mr. Walesa and Mr. Kahn are the featured speakers of the 11th annual Student/Trade Union Conference, sponsored by the Penn State Labor Studies Club. Other of the day's activities include four informal workshops, set to begin at 2:30 p.m. on the third floor of the HUB. The workshops will focus on "The South African Labor Movement" (led by South African dissident Dennis Mumble), "The Labor Movement in Poland," "Plant Closures and Their Effects," and "OSHA's Future under President Reagan's Administration."

The Conference is open to the public.

Seminar set on test construction

The University Division of Instructional Services (UDIS) is sponsoring a two-part seminar entitled "Test Construction."

The first session will be conducted on Thursday, May 7, from 2 to 4 p.m., in Room 128 Mitchell Building and will be repeated on Friday, May 8, from 2 to 4 p.m. The second part will be scheduled for Tuesday, May 12, from 2 to 4 p.m., and repeated on Wednesday, May 13, from 2 to 4 p.m.

The seminar will be conducted by Dr. Maurice W. Villano and Barbara Wright, members of the Instructional Improvement Staff of UDIS.

Part I of the seminar will deal with the role of classroom testing in instruction, the use of learning objectives in designing tests and the relationship between instructional objectives and testing procedures.

Part II will address the functions of essay and objective type tests, their strengths and weaknesses, and methods for writing test items.

The seminar will emphasize test development as a part of the Instructional System Model. Some general principles of appraisal will be discussed in practical terms. Specific guides for planning tests, writing objectives and test items will be presented.

A question-and-answer discussion period will follow each presentation. Small group follow-up sessions will be arranged for participants interested in pursuing the topic in greater detail.

The seminar is limited to 35 participants on a first-come basis. For more information and to make reservations, call 863-0668.

Asimov to discuss science and space

Isaac Asimov — futurist, biochemist and author of more than 200 books — will present a Colloquy program on Wednesday, April 29, at 8 p.m. in Eisenhower Auditorium. In keeping with Colloquy's Spring Term theme of "Future Alternatives," Dr. Asimov will speak about science and space.

A writer whose work encompasses virtually every aspect of science and its implications for the future, Dr. Asimov holds B.A., M.A., and Ph.D. degrees from Columbia University. He is a professor of biochemistry at the Boston University School of Medicine, where he has served on the faculty since 1949. He has received numerous honors and awards, including the American Chemical Society's James T. Grady Award and the American Association for the Advancement of Science-Westinghouse science writing award.

A writer whose work encompasses virtually every aspect of science and its implications for the future, Dr. Asimov holds B.A., M.A., and Ph.D. degrees from Columbia University. He is a professor of biochemistry at the Boston University School of Medicine, where he has served on the faculty since 1949. He has received numerous honors and awards, including the American Chemical Society's James T. Grady Award and the American Association for the Advancement of Science-Westinghouse science writing award.

Korean Consul General to appear April 29

Dr. Se Jin Kim, Korean Consul General at New York, will deliver a public lecture, "Korea and the United States, on Wednesday, April 29, at 7:30 p.m. in Room 305 HUB.

Dr. Kim earned a Ph.D. from the University of Massachusetts in 1966 and was professor and chairman of the political science department at North Carolina Central University during the early seventies. He then returned to Korea to serve in various posts, including that of director of the Institute of Foreign Affairs and National Security. He came to New York as Korean Consul-General early this year.

Dr. Kim, a prolific writer, is the author of a book, *The Politics of Military Revolution in Korea*.

His talk is sponsored by the East Asian Studies Committee.

Mr. Book

Book to be Alumni Fellow

Edward R. Book, chairman of the board and chief executive officer of the Hershey Entertainment and Resort Company, will visit University Park April 27-29 as an Alumni Fellow of the College of Human Development.

After receiving his B.S. in hotel administration in 1954, Mr. Book, a native of Harrisburg, held a variety of posts, including serving as food and beverage manager and assistant manager of the Hotel Harrisburg, and as vice president and general manager of the Hospitality Motor Inn in Cleveland, Ohio.

He began his affiliation with Hershey in 1969 as general manager of the Hotel Hershey. In 1970, he was named managing director of the Hotel Hershey and Hershey Country Club. The following year, Mr. Book became director of the hospitality division of HERCO, Inc., and was named vice president in 1973. In February 1974, he assumed the position of executive vice president and assistant to the president and later that year was named chairman of the board and president. He assumed his current position in 1980.

A member of Penn State's Board of Trustees, Mr. Book is chairman of the Board's Milton S. Hershey Medical Center Advisory Committee. He further serves the University as a member of the Advisory Board of the Capital Campus.

Mr. Book, immediate past president of the Penn State Alumni Association, is a member of the Penn State Fund Council and a director of the Penn State Hotel and Restaurant Alumni Society.

Fulbright conference to be held May 3-6

Shahid Javed Burki, chief of the World Bank's Policy Planning Division, will deliver the keynote address at the Eastern Regional Conference for Fulbright-Hays Scholars to be held at the University May 3 to 6. Mr. Burki's topic, and the conference theme, will be "Global Interdependence: Changing Perspectives in International Policy in the '80s." He will speak at 9:15 a.m. on Monday, May 4, in Room 402 Keller Building.

A second major address will be delivered by A. Ralph Carnegie, professor of law at the University of the West Indies and a senior Fulbright scholar at Yale University. He will speak on "The Law of the Sea" at 10:45 a.m., also on May 4 in Room 402 Keller.

Sixty Fulbright scholars currently teaching and conducting research at U.S. colleges and universities have registered for the program, according to Noeleen Martin, planning committee chairman. Local Fulbright alumni are invited to participate; details are available from Mrs. Martin at Room 306 Willard Building (telephone 865-9549).

From the Press

Wilhelm Muller, The Poet of the Schubert Song Cycles: His Life and Works. By Cecilia C. Baumann. 191 pages, \$17.50.

In this comprehensive study of Johann Ludwig Wilhelm Muller (1794-1827), Dr. Baumann presents a lively and vivid profile of the poet, prose writer, translator, critic, editor, philhellene and traveler whose life reflects the landscape of literary concern from the Romantic movement to Junges Deutschland. In the words of one reader, the book should interest "any person with a general concern for the complex interrelationship of cultural and socio-political forces and the contact of key persons in German-speaking culture with one another during the late 18th and early 19th centuries . . . as a veritable 'window' into the period of Goethe."

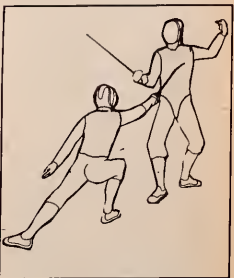

Considered a German Byron by his contemporaries, Muller is usually remembered today as the German Romantic poet whose lyrics Franz Schubert set to music in *Die schöne Müllerin* and *Die Winterreise*. Goethe very likely became acquainted with Muller's writing appearing in its native Germany. The book — part of the Penn State Series in German Literature (general editor, Joseph P. Streika) — includes several photographs and illustrations.

Dr. Baumann's text is in English, with Muller's writing appearing in its native German. The book — part of the Penn State Series in German Literature (general editor, Joseph P. Streika) — includes several photographs and illustrations.

Foil Fencing: Skills, Safety, Operations, and Responsibilities for the 1980s. By Maxwell R. Garret and Mary H. Poulson. 134 pages, \$9.75.

Described by Notre Dame Coach Michael DeCicco as "a bible for beginning fencers," this comprehensive instructional manual presents an overview of the sport from physical conditioning and basic skills to advanced skills and strategies. Beginning fencers and instructors in search of a basic textbook for fencing techniques and terminology, as well as intermediate and advanced fencers and instructors seeking a back-to-basics source book, will find helpful ideas and approaches in this easy-to-understand guide.

Mr. Garret, associate professor of recreation and parks and Nittany Lion men's fencing coach, has been the coach of several international fencing teams and in 1975 was inducted into the City College of New York Athletic Hall of Fame. A past president of the National Fencing Coaches Association of America, he is chairman of the Amateur Fencers League of America. Mrs. Poulson is associate professor of physical education and men's and women's fencing coach at Lawrence University. Mr. Garret and Mrs. Poulson previously co-authored the 1971 book, *Fencing*.

SMU professor will give Dotterer Lecture April 30 in Kern

The second of this year's Dotterer Lectures, part of the 12th Annual Dotterer Lecture, will be presented on Thursday, April 30, at 8 p.m. in Room 101 Kern.

Dr. Richard M. Zaner, Easterwood Professor of Philosophy at Southern Methodist University, will deliver the lecture, which is titled "The Other Descartes and Medicine." The public is invited to attend.

The author of numerous books and articles about the philosophical and ethical dimensions of medicine, Dr. Zaner's most recent book is *The Contest of Self: A Phenomenological Inquiry Using Medicine as a Clue*. He serves on the editorial boards of a number of professional journals, including the *Journal of Medicine and Philosophy*, which he helped to found. He also is publications committee chairman for the Society of Health and Human Values. Prior to joining the Southern Methodist faculty, Dr. Zaner was a professor and director of the division of social science and humanities at SUNY-Stony Brook. He has held several adjunct professorships and twice served as a visiting professor at the University of Missouri Health Services Center.

The Dotterer Lecture Series was established in the Department of Philosophy to honor the late Professor Ray Dotterer, who served as head of the Department from 1938 until his retirement in 1947.

(358-1) COUNCIL FOR INTERNATIONAL EXCHANGE OF SCHOLARS ANNOUNCES 1982-83 FULLBRIGHT OPPORTUNITIES FOR UNIVERSITY TEACHING AND ADVANCED RESEARCH ABROAD

More than 500 Fulbright awards in over 100 countries are now available for university teaching and post-doctoral research in 1982-83. The awards are usually for 4-6 months, with an increasing number of research openings in this award cycle. Many of the programs encourage applications in any of several fields. The regionally funded programs include Africa research, American Republics research, Indo-U.S. Subcontinent research, Islamic civilization research, Near East/South Asian short-term lectureships, and Spanish Treaty research. The country programs with research opportunities are as follows: Argentina, Austria, Belgium, Brazil, Denmark, Egypt, Finland, Germany, Greece, Iceland, India, Indonesia, Israel, Italy, Japan, Korea, Netherlands, Peru, Philippines, Romania, Singapore, Syria, Taiwan, Turkey, United Kingdom, and Yugoslavia. The country programs which offer university teaching are: Colombia, Malaysia, Mexico, Nigeria, Norway, Poland, Sudan, Venezuela and the U.S.S.R. To be eligible, an applicant must be a U.S. citizen and have appropriate academic and experience credentials. To qualify for lecturing, an applicant should have postdoctoral college or university teaching experience in the field of application. For research, interested applicants should possess doctoral degrees or comparable professional qualifications. Eligible scholars interested in a later possibility (after 1982-83) may receive major announcements for the next two years by completing registration forms. The deadline is June 1, 1981, for the American Republics, Australia and New Zealand, and July 1, 1981, for Africa, Asia, Europe and the Middle East. A booklet listing the various opportunities may be obtained from CIES and prospective applicants should indicate preferred openings when requesting application materials.

For further information, write Council for International Exchange of Scholars, Department N, Eleven Dupont Circle, N.W., Suite 300, Washington, D.C. 20036 (202-833-4950) and/or contact your Faculty Fulbright Advisor, Richard L. Grube, Associate Professor, Department of Architecture, 206 Engineering C (865-9335).

Dr. Zaner

Eric J. Cassell, M.D., F.A.C.P., will speak on "Suffering and Its Place in the Goals of Medicine" on Wednesday, April 29, at 4 p.m. in Room 101 Kern Building.

Responding to the paper will be Richard M. Zaner, the Philosophy Department's Dotterer Lecturer. Together, their talks will complete the second annual Symposium on Ethics and Values sponsored by the Center for Value Studies and Professional Ethics.

Dr. Cassell is clinical professor of public health at Cornell University Medical College, a diplomate of internal medicine in private practice, and a member of the Board of Directors of the Hastings Center (Institute of Society, Ethics and the Life Sciences).

His research and writing have focused on the underlying bases of medical practice and the relationship between doctors, patients and disease. He is the author of *The Healer's Art*.

AMOCO award to Shaevell

(Continued from page 1)

Recognizing the difficulty many undergraduates have with the subject matter in his courses, Professor Shaevell developed a unique one-semester, take-home exam — which is optional. Designed as a review mechanism, the exam incorporates into one problem most of the major concepts discussed during the first seven weeks of Physics 201.

He has also designed microcomputer programs to enhance classroom demonstrations in his physics courses; copies of these programs are now being used by science faculty members at other campuses. He also completed successfully a major revision of the 35 laboratory exercises used in undergraduate physics courses at Hazleton.

To avoid cramming on the part of his students, he tests them often — seven weekly quizzes, three full-period exams and a comprehensive final. In response, students have twice elected him Hazleton Teacher of the Year (1970 and 1977).

A member of the Campus's faculty since 1966 and the co-author of three text books, Professor Shaevell earned his B.S. and M.S. degrees at Lowell (Mass.) Technological Institute. In addition to his undergraduate teaching responsibilities, he helped develop a workshop for high school and college students on the theme, "Science and the Development of Reasoning." He created, co-authored and co-produced "Science Countdown," a television quiz series for high school seniors aired for four years over a regional public television outlet.

Reaching down into the Hazleton area elementary schools, he put together a program on "Color, Perception and Optical Illusions" for fifth-graders. Then he developed a second program, "The Physics Around Us," for sixth-graders.

Arts Roundup

Tickets on sale for Saturday dance program

The Bella Lewitzky Dance Company takes to the stage on Saturday, April 25, at 8:30 p.m. in Eisenhower Auditorium as a presentation of the Artists Series.

Founded in 1966 by Ms. Lewitzky, this California-based dance ensemble has toured extensively throughout the United States and abroad.

Clive Barnes of the New York *Post* has called Bella Lewitzky, "A remarkable dancer with a strong company... bursts and gusts of energy can be seen in all her choreography."

Ms. Lewitzky, artistic director and principal choreographer for the company, received her early training with Lester Horton; later as his colleague she co-founded the Dance Theatre in Los Angeles. She has received a John Simon Guggenheim Memorial Foundation Fellowship, the Annual Dance Magazine Award, and commissions from the National Endowment for the Arts. She has the distinction of being the only non-New York-based modern choreographer in the nation to receive a major grant for an artistic director's discretionary fund from the Andrew W. Mellon Foundation. Most recently, Ms. Lewitzky's Company was awarded a special project grant from CBS and a challenge grant from the National Endowment for the Arts.

The Friday performance is sold out by subscription. Tickets for the Saturday, April 25, program, featuring different numbers, are on sale at the Eisenhower Auditorium box office and the HUB booth from 9 a.m. to 4 p.m. Phone orders will be accepted on Master Card/Visa at 863-0255 days of sale.

Alard to perform Mozart, Brahms

The Alard String Quartet has selected four compositions for its Wednesday, April 29, concert at 8:30 p.m. in the Music Building Recital Hall.

The program will begin with Mozart's Quartet in F Major, K. 168. Soprano Suzanne Roy, an assistant professor of music, will assist the Alard in their second number, Chausson's "Chanson Perpetuelle." Also on the program are Nielsen's Quartet in G Minor, opus 13, and the Brahms Quintet in C Major, opus 111.

Other musicians joining the Alard Quartet for the concert will be violinist Rebecca McKee and pianist Timothy Shuey.

The Alard Quartet's April schedule has included performances in Erie, Lebanon and Bethlehem, Pa.; Wilmington, Ohio; Lexington, Ky.; and at Cornell University. Their recording of the Bartok Piano Quintet is due to be released this month by Leonarda Records.

Violinists Joanne Zagst Feldman and Donald Hopkins, violin Raymond Page and cellist Leonard Feldman comprise the Alard String Quartet. All are associate professors in the School of Music.

Choirs to present 'Israel in Egypt'

For its 34th annual spring concert, the University Choirs and the Nittany Valley Orchestra will present Handel's *Israel in Egypt* on Saturday, May 2, at 8:30 p.m. in Eisenhower Auditorium.

The Choirs are conducted by Raymond Brown, professor of music and Fellow of the Institute for the Arts and Humanities Studies.

Israel in Egypt is scored for double choirs, full orchestra and soloists. The text is taken from the book of Exodus and the Psalms. It depicts the Israelites' struggle to

be freed from their bondage in Egypt. Chorus tell of the plagues of frogs, lice, flies, locusts and hail stones and of the crossing of the Red Sea.

This is the second time the University Choirs have presented *Israel in Egypt* for their spring concert, the first being in 1968.

Soloists for the May 2 performance include three University students — Kim Kronenberg, soprano; Maureen Haley, soprano; and Lisa Stuckey, mezzo-soprano — and Tommie Irwin, tenor. Mr. Irwin is assistant director of choral music.

Weidner exhibit continues this week

An exhibition of paintings and drawings by Mary E. Weidner will continue through April 26 at the Kern Galleries.

Ms. Weidner, an assistant professor of drawing and painting at Carnegie-Mellon University, has a B.F.A. and M.F.A. from Washington University, St. Louis. She has received many honors and awards and has exhibited extensively in the East.

Jazz Blue Band concert tomorrow

Two original compositions by Jeff Kunkel, a junior music education major at the University, will be premiered in a concert by the Penn State Jazz Blue Band on Friday, April 24, at 8:30 p.m. in the Music Building Recital Hall.

Also included in the Jazz Blue Band's program will be music by Thad Jones, Maynard Ferguson, Henry Mancini, Les Elgart, Antonio Carlos Jobim, Phil Woods and Buddy Rich. The 19-piece band is directed by Larry Fisher.

Mercando wins AMOCO award

(Continued from page 1)

Science to the Non-Science Major," involves a total 24-hour immersion in science. He had tested it first with the Campus Ecology Club, which he organized and advises. Students participate in a variety of overnight camping field trips, preceded by lectures and laboratory classes to introduce them to the principles and techniques involved in conducting scientific investigations. They are encouraged to design and construct the sampling devices used on their trips.

Academic areas emphasized include ecology, geology, astronomy and meteorology. Students visit such diverse habitats as a salt marsh ecosystem, fossil beds, a deciduous forest and a pine barrens. They trade experiences at fireside get-togethers. To sensitize them to their own impact on the environment, Dr. Mercado takes them to family planning centers, nuclear power plants and waste treatment facilities.

Dr. Mercado has taught at Ogontz since 1976. He holds a B.S. from Bloomsburg State College, an M.S. from Penn State and a Ph.D. from North Carolina State University.

AAUW will hold book sale next week

The 20th annual AAUW Used Book Sale will be held April 27-May 1 at the Wesley Foundation, Locust Lane and East College Avenue, from 9 a.m. to 9 p.m. Thursday will be half-price day and Friday bag day — a bag of books for \$1.50.

Books, magazines, maps, LP records, sheet music and patterns will be available. Proceeds from the sale go to help local social agencies and national educational programs and fellowships.

Penn State Intercom

U.S. Circuit Judge is keynoter for Honors Convocation

Harry T. Edwards, Circuit Judge, U.S. Court of Appeals for the District of Columbia Circuit, will deliver the keynote address at the 1981 Honors Convocation, Sunday, May 10, at 2 p.m. in Eisenhower Auditorium.

During the Convocation, more than 300 undergraduate students and five faculty members representing all Penn State campuses will be cited for academic excellence.

All faculty are invited to participate in the Honors Convocation as members of the academic procession. Faculty in academic regalia should report to the Green Room of Eisenhower Auditorium by 1:30 p.m. Seating in the front rows of the auditorium will be reserved for those in the procession. After the recession, faculty are invited to visit with students in the college award distribution area and to attend the informal reception in front of the auditorium. Faculty and staff not wishing to be members of the procession are invited to attend the program in the audience.

Judge Edwards, whose wife Ila "Becky" (Hayes) is a 1962 Penn State graduate, has chosen the topic, "The Pursuit of Excellence."

Appointed to the D.C. Circuit in February 1980, Judge Edwards was a

(Continued on page 4)

Senate to vote on eight legislative items

Eight legislative reports will require Senate action at the May 5 meeting, scheduled to begin at 2:10 p.m. in Room 112 Kern Building.

In addition, a forensic session by Kenneth P. Mortimer, held over from the April meeting, will lead off the docket. Dr. Mortimer's topic is "Collective Bargaining: The National Scene."

President Oswald will comment on the new academic prospects opened up by conversion from a term to an early semester calendar. An informational report on fund raising will be presented by Charles Lupton, executive director of the Office of Gifts and Endowments; and the Curricular Affairs Committee has prepared an informational report on the use of University program titles and descriptions in external publications.

Nominations for Senate officers and University committees will also be presented. (See story at right.)

Legislative action items include:

- A report from the Subcommittee on the Role of the Adviser. This report is based on proposals which the Senate has already considered several times, beginning in 1978. It emphasizes the consultative nature of advising and specifies the functions of the adviser and the responsibilities of the advisee. The Subcommittee is recommending changes in a number of University forms and policy statements to remove the approval/disapproval function of the adviser and enhance the consultative role.

- An Academic and Physical Planning proposal on fiscal impact statements. The Committee suggests that when a Senate committee is considering new legislation, it should obtain estimates of what the legislation will cost. At present, the task of obtaining all such cost estimates falls on the Committee on Academic and Physical Planning.

- A change in the Standing Rules which returns to the Committee on Academic and Athletic Standards responsibility for certifying the academic eligibility of students for athletic grants-in-aid. In the 1975-76 Senate reorganization, this responsibility was given to the Committee on Student Affairs, Awards and Scholarships.

- A change in the membership of the Committee on Committees and Rules. The current roster includes 10 elected faculty

Senators and the previous year's Chairman, Chairman-Elect and Secretary. The current Senate Chairman is an ex officio member of all standing committees. Under the new proposal, the membership would include 10 elected faculty Senators voting, and the chairman-elect and the past-chairman of the Senate (non-voting).

- Procedures for adding and deleting courses in the BDR III breadth areas of health sciences/physical education and advanced learning skills. The latter include communication and quantification.
- Faculty Affairs proposals for

modifications to PS-23. The Committee has been studying a set of recommendations prepared by a joint Faculty/Administration Commission. The Committee accepts, with certain modifications, two of the joint Commission's recommendations dealing with (1) the responsibilities of review committees at various levels and (2) the general criteria for promotion and tenure. If the Committee's proposals are passed by the Senate, they will be recommended to the President.

- A report from the Committee on Libraries. The Committee is urging the Senate to approve a recommendation to the University administration asking that, whenever and wherever possible, appropriations for the Libraries be strengthened. The report notes that Penn State's library resources compare unfavorably with those of other major research universities.

A report from Senate Council offering procedures for establishing, reorganizing and discontinuing organizational units and areas that involve one or more of the functions of resident instruction, research or continuing education.

Nominations proposed

The Senate Nominating Committee will present its report at the May 5 meeting. Nominations will be accepted also from the floor for Senate officers and University committees.

The following nominations are proposed:

- Chairman of the Senate — Nancy M. Tischler, professor of English and humanities at Capitol Campus; M. Frank

(Continued on page 2)

Fulbright-Hays scholars to meet

President Oswald and Provost Eddy will lead a group of Penn Staters in hosting the Eastern Regional Conference for Fulbright-Hays Scholars to be held at the University May 3 to May 6.

President Oswald will deliver welcoming remarks at 9 a.m. on Monday, May 4, in Room 402 Keller Building. On Tuesday, May 5, also at 9 a.m., Provost Eddy will address the general session in Room 402 Keller Building. Dr. Eddy's topic will be "University Responsibilities in the '80s."

Additional Penn State speakers, all in Room 402 Keller, will be: Dr. William A. Vogeley, professor of mineral economics, on "Energy in the '80s," 10:45 a.m., May 4; Dr. Manfred Kroger, professor of food science, on "Food and Agriculture" and Dr. Peter D. Bennett, professor of marketing, on "Multinational Organizations," 2 p.m., May 4; Dr. John S. Nichols, assistant professor of journalism, on "The Role of the Press" and John Balaban, associate professor of

English, on "Translation and Intercultural Understanding," 3:30 p.m., May 5; and Dr. Robert S. Friedman, professor of political science (speaker) and Dr. Robert Hartkavy, associate professor of political science (reactor), on "An Overview of the First One Hundred Days of the Reagan Administration," 9 a.m., May 6.

The Conference's keynote address, "Global Interdependence: Changing Perspectives in International Policy in the '80s," will be delivered by Shahid Javed Burki of the World Bank at 9:15 a.m. on May 4. At 10:45 a.m. that day, Ralph Carnegie of the University of the West Indies will discuss "The Law of the Sea."

A number of faculty members and administrators will host tours for the Fulbright Scholars from 1 p.m. to 3 p.m. on May 5. Among areas to be visited are the Office for Remote Sensing of Earth Resources, the University Libraries, the Breazeale Nuclear Reactor and the Human Performance Research Laboratory.

The unruly creative process

Editor's note: This article is one in an ongoing series in which a faculty member describes work in progress.

by Paul West
Professor of English

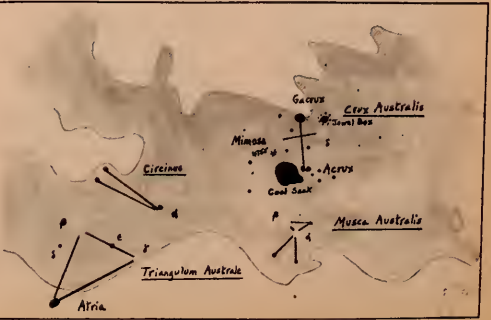

Once upon a time I thought I had my creative processes figured out, which is a dangerous thing for any writer to think. Every time I tried to write a short story, it turned into a novel, and every attempted novel became a story. So, for a while, I began second-guessing myself, corraling the margin of each story more characters than any story needed, and never bothering to equip the next novel with enough of them.

It didn't work. My unruly head doubled back on me. Some stories became stories only, and I had to trim them of characters, and some novels went on to become

novels, fattening out in spite of my most circumspect hunches. In the end, I began to fly by the seat of my pants, trusting to the notion that some concepts have long momentum while some don't.

A case in point is what happened last summer, when I got what I thought was a neat, compact idea about two Polish children saved from the Nazis by being buried under a pigsty. After a couple of weeks, the story took off and became a novella, and that I thought was that, but then it really took off and gave me three months' hard work, in the course of which one character bloomed out of all proportion and took what was now the novel with her. What I have on my hands now, waiting to be finished, is a six-hundred-page novel — about historical and ontological trauma — which I truly hope

(Continued on page 4)

Watercolor by Paul West, made while he was writing "Gala" (Harper & Row), is part of exhibit now in Rare Books Room in honor of his Governor's Award for Excellence in the Arts.

Penn Staters

Two University faculty members are among 40 outstanding young American professionals chosen for Class II of the W.K. Kellogg Foundation's National Fellowship Program. They are Dr. James Garbarino, associate professor of human development, and Dr. Dan E. Moore, associate professor of rural sociology and Extension specialist.

More than 300 applications were received for the three-year Fellowships, which are designed to increase individual leadership potential in order to deal more creatively and effectively with society's problems.

Dr. Garbarino, who joined the faculty last year, had been a Fellow with the Center for the Study of Youth Development, Boys Town, Neb. A Cornell Ph.D., he is the co-author of *Understanding Abusive Families* and has previously been a Herbert Lehman Fellow, a Woodrow Wilson Fellow and a Spencer Fellow.

Dr. Moore, who earned his doctorate at the University of Wisconsin-Madison, came to Penn State in 1977 from Cornell, where he was an associate professor. In 1979 he received the Award for Outstanding Research on the Consumer Problems of Families from the American Council on Consumer Interests.

Two drawings by Dr. Richard Hamwi, instructor in the School of Visual Arts, have been acquired by the Phillips Collection in Washington, D.C. Drawings and watercolors by Dr. Hamwi will be included in an exhibition at Albright College, May 17 through June 24. His work also will be included in an exhibition titled "The Art of Drawing," at the Staempfli Gallery in New York City during June.

Roy A. Olofson, professor of chemistry, presented talks in France in late March and in Puerto Rico the first week of April. Dr. Olofson was the main plenary lecturer at a conference held in Paris on the "Synthese et Applications des Chloroformates Vinyliques," an area in which he has pioneered, is a co-inventor on seven patents and in which two of his processes are now in commercial use in Europe. His lecture for the conference was entitled "Uses of Alkenyl Chloroformates in Synthesis: Taking Advantage of Structure-Reactivity Variations in Alkenyloxycarbonyl Derivatives." He discussed the same subject at colloquia held at the University of Puerto Rico at Rio Piedras and at Mayaguez.

Dr. Robert W. Naismith, associate professor of biology at Worthington-Scranton, has been appointed to the editorial board of the *Journal of Applied Toxicology*. He also has been elected to the board of directors of the Genetic Toxicology Association and has been invited to chair a session at the Gordon Conference on Genetic Toxicology.

Helmut Hager, professor and head of art history and a Fellow in the Institute for the Arts and Humanistic Studies, was an invited speaker at a colloquium on the 17th century Italian architect, sculptor and painter Bernini held April 11 and 12 at the Institute for Advanced Study in Princeton.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Second-class postage paid at State College, PA 16801

N.J. The topic of Dr. Hager's talk was "Balthasar Neumann's Schonbrunn-Chapel at Würzburg and Its Berninesque Prototype in Rome."

Assistant Provost Richard P. Chait is one of five new members named to the Mayville College Board of Directors by the General Assembly Council of the Synod of the South of the United Presbyterian Church, U.S.A.

Eugene N. Borza, associate professor of history, recently returned from the University of Utah, where he was the invited guest of the Departments of History and Language. On April 13 and 14, Dr. Borza gave two public lectures, "Sentimental Philhellenism" and "The Royal Tombs at Vergina."

Dr. Howard B. Palmer, professor of energy science and associate dean of the Graduate School, gave an invited colloquium on the topic, "The Chemistry of Flames," to the department of chemistry at Colgate University. He also recently presented a three-day series of invited lectures on combustion chemistry at the Exxon Corporation Laboratories, Linden, N.J.

Emily Toth, assistant professor of English, was taped for an appearance on ABC-TV's "20/20," for a segment on women writers and success. The program was aired on April 23.

Gary W. Petersen, professor of soil genesis and morphology and co-director, Office for Remote Sensing of Earth Resources, gave a series of invited lectures on remote sensing and soil interpretations at the University of Arizona. The lecture series was organized by the Office of Air Land Studies and the Department of Soils, Water and Engineering.

Promotions

Staff Exempt

Roy F. Harpster to supervisor, Mail and Processing Room in Agriculture.
Clifford R. Heckman to production supervisor in Business Services.
Charles J. Sena to manager, Medicine Ancillary Services at Hershey.
Jerry G. Stover to farm supervisor in Agriculture.

Clerical

Patricia J. Mrozowski to clerk A at Behrend.
Sharon M. Thomas to secretary B at Hershey.

Technical Service

George W. Brown to mailing room attendant/relief operator in Agriculture.
Terry E. Houser to Ice Pavilion attendant in HPER.
Elmer C. McClucas to maintenance mechanic at Capitol.
Yahya Abdur Rahman to maintenance mechanic B at Ogontz.
Sylvia Wellar to property protection guard in University Safety.

Obituaries

Dr. Alfonso A. Brielmair, professor emeritus of civil engineering, died April 8 in Macomb, Ill., at the age of 76.

A civil engineering graduate of Case Institute of Technology, Dr. Brielmair received his M.S. and Ph.D. in civil engineering from the University of Illinois and was a registered professional engineer in Pennsylvania, Illinois, Missouri and Texas.

He joined the Penn State faculty as an associate professor in 1944. In 1945 he became a U.S. Army Air Force consultant in Europe. From 1949 to 1963, he was a professor at Washington University in St. Louis, returning to Penn State in 1963. He retired in July 1970.

Edith Bishop, a waitress at the Nittany Lion Inn from 1958 to 1970, died April 21. She was 75.

C. Drew Stahl

Frederick L. Wernstedt

Dr. C. Drew Stahl, professor of petroleum and natural gas engineering, and Dr. Frederick L. Wernstedt, professor of geology, have received the 1981 Matthew J. and Anne C. Wilson Outstanding Teaching Awards of the College of Earth and Mineral Sciences.
Dr. Stahl received his B.S. in 1947 and his Ph.D. in 1953, both in petroleum and natural gas engineering at Penn State. He joined the faculty in 1947 as a research assistant, and, by 1962, had attained the rank of professor. He became head of the then Department of Petroleum and Natural Gas Engineering in 1960 and continued as chairman when the department became a section in the Department of Mineral Engineering in 1970.

He had developed a number of the current PNGE courses and has seen enrollment in many of them jump from an average of 10 to 12 students to classes of more than 100. In addition to extensive teaching at the undergraduate level, he has supervised the preparation of many M.S. and Ph.D. theses. For the past five years, he has been co-investigator on a million-dollar Department of Energy-sponsored project aimed at finding improved three-stage methods of recovering high-quality Pennsylvania grade crude oil from old wells that may still contain as much as half of the oil originally there.

Dr. Wernstedt received his B.S. and Ph.D. from the University of California and his M.A. at Syracuse University. He joined the Penn State faculty in 1952 and attained the rank of professor in 1967. He served as a visiting professor at the University of Malaysia in 1968 and the University of Science in Malaysia in 1977.

His main teaching interests are in southeast Asia geography, climatology, field methodology, and educational geography for primary and secondary teachers. He also teaches seminars at the graduate level. His research interests include population and economic development problems of southeast Asia, statistical climatology, climate and agriculture, and demography and migration.

He has done much work in the Philippines, serving as principal investigator for a Philippine shipping project sponsored by the Office of Naval Research in 1954-57, and for a Philippine migration project sponsored by the National Science Foundation in 1964-68. He is the author or co-author of many articles, books, and monographs including *World Climate Data*, *The Philippine Island World: A Physical, Cultural, and Regional Geography*, and *The Philippine Migration: The Settlement of the Digos-Padada Valley*.

Dancers to present Mother's Day show

Penn State Internationale Dancers, under the direction of Elizabeth A. Harley, instructor in physical education, will present its 13th annual Mother's Day performance on Sunday, May 10, at 3 p.m. in Room 332 White Building.

The students who comprise the dance group will offer a selection of dances from around the world, including a Bulgarian wedding scene and German, Russian and Serbian dance suites. Costumes typical of the clothing of the various countries from which the dances are taken will be worn, and a piano-violin-flute trio will play for the group's suite of Russian dances.

Tickets, which are \$2 for adults and \$1.50 for students and children, are available now in the White Building main office and will be sold at the door on the day of the performance.

Nominations

(Continued from page 1)

Mallette, professor of biochemistry.
Chairman-elect—Robert F. Schmalz, professor of geology; Joseph A. Dixon, professor and head of chemistry.

Secretary—Carol A. Cartwright, professor of education; Annette L. Caruso, assistant professor of health education at Ogontz.

Faculty Advisory Committee (2 to be elected)—Herbert Cole Jr., professor of plant pathology; Irwin Feller, professor of economics; Edward H. Klewans, associate dean for research, Engineering; Patricia M. Overdeer, professor of mathematics at Ogontz; Herbert M. Lundgren, professor of physical education.

Faculty Rights and Responsibilities (2 to be elected)—Geoffrey C. Godbey, professor of recreation and parks; Miles T. Pigott, professor of engineering research; Kathryn B. Moore, associate professor of education; Hugh B. Urban, professor of human development and psychology. Faculty other than University Park (3 to be elected)—Cara-Lynne Schengrund, associate professor of biochemistry at Hershey; P. Peter Rebane, assistant professor of history at Ogontz; T.D. Wilkinson, associate professor of engineering at Mont Alto; Michael A. Kernick, assistant professor of business administration at Delaware County; Mervin J. Hostelter, associate professor of engineering at Altoona; Stephen P. Lagoy, associate professor of community development at Delaware County; and Bernard L. Guss, associate professor of general engineering at New Kensington. Deans (3 to be elected)—Stuart Forth, Libraries; Evan G. Pattishall, Human Development; Stanley F. Paulson, Liberal Arts; Thomas Wartik, Science; Harry Prystowsky, Hershey; and John M. Lilley, Behrend.

University Promotion and Tenure Review Committee (3 to be elected)—Paul R. Shellenberger, professor of dairy science; Thomas E. Mauner, professor of art history; George L. Daubert, professor of chemical engineering; Howard E. Morgan, Evan Pugh professor of physiology at Hershey; George H. Grenier, division head and professor of engineering at Capitol; Charles G. Haas Jr., professor of chemistry; Michael P. Hottenstein, director of the MBA program; and Helen A. Guthrie, professor of nutrition.

Standing Joint Committee on Tenure (2 to be elected)—Robert Jennings Heinsch, professor of mechanical engineering; Manfred Kroger, professor of food science; Landon Burns, professor of English at Delaware County; and Joseph W. Michels, professor of anthropology.

Science Expo to offer demonstrations, tours

The 1981 version of Science Expo will be held Saturday, May 9. Sponsored by the College of Science's Student Council and Alumni Society, the open house will run from 10 a.m. to 5 p.m. in the science buildings at University Park.

Among the attractions this year will be beating rat heart cells, x-ray astronomy, telescope-making demonstrations and a salt-water aquarium. Chemistry and physics "magic" shows, popular at past expositions, will again be featured.

Visitors will also have the chance to play games with a computer, glimpse a single atom through the world-famous field emission microscope and take part in an astronomy skywatch in the evening, weather permitting. "Supertours" of the departments' most spectacular exhibits will be scheduled hourly throughout the day.

Each of the College's departments—Astronomy, Biology, Chemistry, Physics, Computer Science, Mathematics, Statistics and Microbiology and Cell Biology—Biochemistry and Biophysics—will participate, along with departmental clubs. Faculty members and students will be on hand to staff the presentations and answer questions. The main Expo information desk will be in Osmond's lobby.

University Park Calendar

April 30-May 10

Special Events

Thursday, April 30

Commons Concert, Phi Mu Alpha Band, noon, Kern Lobby.

College of Engineering, Honorary Engineering Lecture, 4 p.m., Room 115EE West. Robert A. Frosch, president, American Assn. of Engineering Societies, on "Engineering and Public Policy."

Cinemaheque, *Who'll Stop the Rain?* 7 and 9 p.m., HUB Assembly Hall. Also May 1. Philosophy, Dotterer Lecture, 8 p.m., Room 101 Kern. Richard M. Zaner, SMU, on "The Dider Descartes and Medicine."

URTC, Paul Giovanni, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Friday, May 1

Football Reunion, through May 2.

Music in Interesting Times lecture, 2:20 p.m., Music Bldg. Recital Hall. Becky McKee, State College Talent Education Program, on "Music and Children: Suzuki."

Sports: baseball vs. Lafayette, 3 p.m.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Allan Rodgers, geography, on "Prospects for Economic Development in the Soviet Far East."

Commonsplace Theatre, *Taxi Driver*, 7 and 9 p.m., Room 112 Kern. Also May 3.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Penn State Symphony Wind Ensemble, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, May 2

56th Annual Penn State Dairy Exposition, "Show Day," 8:30 a.m.-3 p.m., University Dairy Barns.

Sports: basketball vs. Michigan, 10 a.m.; track (men), Nittany Lion Relays, 10 a.m.; baseball vs. West Virginia (DH), 1 p.m.; Blue/White football game, 2 p.m.

ARHS, "Movin' On," music, noon, through May 3, HUB Lawn.

France-Cinema, *My Brilliant Career*, 7 and 9 p.m., Room 112 Kern. Also May 7.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

University Choirs, 34th Annual Spring Concert, Handel, *Israel in Egypt*, 8:30 p.m., Eisenhower Auditorium.

Sunday, May 3

University Chapel Service, 11 a.m., Eisenhower Chapel. Thomas C. Poole, Office of Religious Affairs, speaker.

Sports: baseball vs. Pittsburgh (DH), 1 p.m.

Jeff Smith, piano, 3 p.m., Music Bldg. Recital Hall.

Phi Kappa Phi Initiation and banquet, 6 p.m., HUB Terrace Room.

Monday, May 4

First day to sign Summer Term NDSL and University Long Term Loans, Room 108 Shields.

Commons Film, "Limits to Growth," noon, Room 112 Kern.

Music in Interesting Times lecture, 2:20 p.m., Music Bldg. Recital Hall. Suzanne Roy on "New Folk Music."

Interdisciplinary Symposium on Value, 7:30 p.m., Room 101 Kern. Larry Spence, political science, on "The Morality of Science and Technology."

Tuesday, May 5

Comp. Lit. Luncheon, 12:15 p.m., Room 204 HUB. Josephine Thornton, Mellon Bank and pres., American Translators Assn., on "Problems of Literate vs. Non-Literate Translation."

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Comp. Lit. Film Series, *Fats in the Pocket*, 7 and 9 p.m., Room 112 Kern. Also May 6.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Wednesday, May 6

Drop deadline.

Commons Concert, PSU Glee Club and Women's Ensemble, noon, Kern Lobby.

Sports: baseball vs. Cornell (DH), 1:30 p.m.; lacrosse (men) vs. Bucknell, 8 p.m.

Music in Interesting Times lecture, 2:20 p.m., Music Bldg. Recital Hall. Betsy Bowden, English, on "Words and Music by Bob Dylan."

Brotherhood Day, 7 p.m., Eisenhower Auditorium. Julian Bond, Georgia legislator, speaker. Athletic Director Paterno and Provost Eddy will also take part in the program.

Sherlock Holmes and Irene St. Clair are portrayed by MFA graduate students Charles S. Roney and Susan Chalmers in URTC's "The Crucifer of Blood," which opens tonight in The Playhouse.

English Colloquium, 8 p.m., Room 101 Kern. John K. Crane, English, reads from his novel in progress.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Penn State Chamber Choir, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, May 7

Spring festival, "Horizons," exhibits, film, music, through May 10, Kern Bldg., HUB.

MCAB/Hillel Foundation, Tay-Sachs testing, 2-6 p.m., HUB Ballroom.

Panel discussion on Managing the Public Record, 3 p.m., Assembly Room, Nittany Lion Inn. U.S. Archivist Robert M. Warner; Robert J. Maddox, history; Nancy Cline, Libraries.

Cinemaheque, *The Wild Bunch*, 7 and 9:30 p.m., Room 108 Forum. Also May 8.

E & MS Student Council Lecture, 7:30 p.m., Room 22 Deike. Alistair Fraser, meteorology, on "The Rainbow Connection."

Penn State Thespians, Mame, 8 p.m., Schwab Auditorium.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Friday, May 8

Last day to sign Spring Term NDSL and University Long Term Loans, Room 108 Shields.

Sports: track (women), EAIAW Championships, through May 9.

Music in Interesting Times lecture, 2:20 p.m., Music Bldg. Recital Hall. Rustical Quality String Band, "Folk Tradition Lives."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Roy Buck, sociology, on "Tourism and the Plain People of Lancaster County."

Commonsplace Theatre, *Malicious*, 7 and 9 p.m., Room 112 Kern. Also May 10.

Penn State Thespians, Mame, 8 p.m., Schwab Auditorium.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Saturday, May 9

Shaver's Creek Nature Center, pioneers crafts for children 7-14 (toy making). Registration weekdays, 8 a.m.-5 p.m., 865-1851.

College of Science, Science Expo '81, open house, 10 a.m.-5 p.m.

Penn State Thespians, Mame, 2 and 8 p.m., Schwab Auditorium.

France-Cinema, Renoir, *Grand Illusion*, 7 and 9 p.m., Room 112 Kern.

Sports: lacrosse (men) vs. Army, 8 p.m.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, May 10

University Chapel Service, 11 a.m., Eisenhower Chapel. Stanley Paulson, dean, College of the Liberal Arts, speaker.

Honors Convocation, 2 p.m., Eisenhower Auditorium.

Penn State Glee Club Concert, 3 p.m., Schwab Auditorium.

Penn State Internationale Dancers, Annual Mother's Day Performance, 3 p.m., Room 132 White Bldg.

Lawrence Rich, guitar recital, 7:30 p.m., Music Bldg. Recital Hall.

Seminars

Thursday, April 30

CFD/Mechanical Engineering, Esail Murman, MIT, on "Computation of Wind Tunnel Wall Interference at Transonic Speeds," 11 a.m., Room 103 Mechanical Engineering Bldg.

Statistics, Philip Byrne, grad. student, on "Repeated Measures Models for Time Series Data," 4 p.m., Room 62 Willard (new listing).

Friday, May 1

Analytical Chemistry, Fred Lytle, Purdue Univ., on "The Use of Lasers in Applied Spectroscopy," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Kenneth Johnson, MCAB, on "Intermediate States in the Pathway of ATP Hydrolysis by Actomyosin," 2:30 p.m., Room 333 Whitmore.

Engineering Science and Mechanics, Kenneth Jones, Colorado State Univ., on "Morphological Defects in (0001) CdS and Their Effect on CuS/CdS Solar Cells," 4 p.m., Room 216 Hammond.

Monday, May 4

MCAB, Johng K. Lim, Univ. of Wisconsin/Eau Claire, on "Genetics of a Site-Specific Instability in *Drosophila*," 4 p.m., Room 101 Althouse.

Organic Chemistry, Cynthia Maryanoff, McNeil Pharmaceutical, on "Development of Synthetic Methods in Heterocyclic Chemistry," 8 p.m., Room 333 Whitmore.

Tuesday, May 5

Metallurgy, U. Pal, grad. asst., on "Foaming Characteristics of Pb50/Sn," 11 a.m., Room 301 Steidle.

Environmental Pollution Control, Ralph Daley, grad. student, on "Trace Organic Emissions from Resource Energy Recovery Facilities," 2:20 p.m., Room 128 Sackett.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Community Systems Planning and Development, Malcolm Follower-Freeman, Guy's Hospital, London, on "The English Teaching Hospital in the Changing National Health Service Environment," 3:30 p.m., Room 5-136 Henderson.

Chemical Engineering, Vinayak N. Kabadi, grad. student, on "Statistical Thermodynamics of Fluids with Non-Spherical Molecules," 3:45 p.m., Room 140 Fenske.

Geosciences, Robert E. Sheridan, Univ. of Delaware, on "Application of Marine Geology and Geophysics to the Discovery and Environmental Studies of the U.S.S. Monitor Site," 3:45 p.m., Room 112 Walker.

Acoustics, Kenji Kido, Tohoku Univ., Sendai, Japan, on "The DFT of Band Limited Signals and Its Application to Acoustic Measurements," 4 p.m., Room 73 Willard.

Engineering Science and Mechanics, Leonard J. Brillson, Xerox Research Labs, on "Chemical Reaction and Diffusion at Metal-Semiconductor Interfaces," 4 p.m., Room 214 Hammond.

Microcomputer User's Group, 7:30 p.m., Room 189 MRL.

Organic Chemistry, Rodney Schnur, Central Research, Pfizer, on "Drug Discovery: Aldose Reductase Inhibitors," 8 p.m., Room 333 Whitmore.

Thursday, May 7

Chemistry, Victor Hubry, Univ. of Arizona, on "Conformations and Dynamics of Peptide Hormone Agonists and Antagonists: Implications for the Mechanism of Hormone Action," 12:45 p.m., Room 333 Whitmore.

UDIS, Maurice W. Villano and Barbara Wright, UDIS, on "Test Construction - Part I," 2 p.m., Room 128 Mitchell Bldg. Reservations, 863-0668.

History, Robert Weiner, Lafayette College, on "Paul Conban and the Dreyfus Affair: A Case Study," 3 p.m., Room 124 Sparks.

Agronomy, Lynn Soltenberger, grad. student, on "The Effect of Legume and Legume Seeding Rate in Yield, N Harvested, and Botanical Composition of Legume-Grass Mixtures," 3:55 p.m., Room 111 Tyson.

Physics, C. Kitcher, IBM, on "Josephson Junction Devices," 3:55 p.m., Room 445 Davey.

Fuel Science, Zifanli Mudamburi, grad. student, on "Compositional Dependence of Coal Liquids on the Nature of the Feed Coals," 4 p.m., Room 301 Steidle.

Mathematics, Morton Lowengrub, Indiana Univ., on "Mixed-Order Value Problems in Elasticity," 4 p.m., Room 102 McAllister.

Friday, May 8

Surface Science, Khalil Taub, Univ. of Missouri, on "Neutrons Scattering Studies of Physisorbed Molecular Films," 9:30 a.m., Room 339 Davey.

Analytical Chemistry, George Diefenau, grad. student, on "Liquid Chromatograph-Mass Spec Interfaces," 11:10 a.m., Room 333 Whitmore.

UDIS, "Test Construction - Part I," (repeat), 2 p.m., Room 128 Mitchell Bldg. Reservations, 863-0668.

Physical Chemistry, Gregory Alms, Polymer Product Dept., DuPont, on "Quasi-Elastic Light Scattering from Polymers," 2:30 p.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Alice Waagen, weavings and three-dimensional sculptures, opens May 4.

HUB Gallery: Yachad Exhibit, opens May 1, Art Alley.

Kern Gallery: Robert Graves, prints. Martha Holt, clay photographs, and Bill Rienser, leather, open May 1.

Museum of Art: Selected works from the collections of Mimi and Stanford Feld and Samuel Gallu. Selections from the Museum's American collection. Watercolors from the permanent collection.

Pattee Library: Prints by Mary K. Jex and Diane Ranker, through May 4, East Corridor Gallery. Frank Chetelat, "A Photographic Inquiry Into European Architectural Motifs," Lending Services Lobby, Ukrainian Folk Art, through May 11, Main Lobby.

Paul West: Governor's Award Exhibit, through May 6, Rare Books Room. Frank Schreider, paintings, through May 1, West Pattee Lobby.

Visual Arts Zoller Gallery: MFA Exhibitions, through May 5, Undergraduate Exhibition, opens May 8.

Paul West

(Continued from page 1)

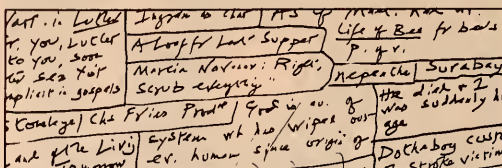

I won't, in the end, have to trim back to short-story length.

Things arrive, and you do your best to be hospitable to them, as I tried to be last fall to an idea that came up in conversation with my editor. Over a chunk of cold paté, I told her I'd finally learned to swim, after twenty years of trying, and she exclaimed that so had she! Had I thought of writing about it? No, I told her, but within a week the idea had taken root (fertilized no doubt by chlorine and salt), and I went off to Europe for a month with two bluebooks in which to make a start. In fact, that book tumbled out of my head on to the paper, not quite automatic but certainly almost out of control as if it had been waiting in there, coiled up: a bolus of joy, hedonism, and almost-mastered fear. I'm now combing through the third version of it, after having plumbed the whole experience by means of model pools made with glue and cardboard, pool collages dabbed with water colors and anything at hand (the red one is cough medicine, for instance). Once enough of it had been teased into the open, my whole view of water came into my conscious possession, to be written about and in some ways enjoyed. In much the same fashion, fifteen years ago, I'd written another book of autobiography, *I, said the Sparrow*, racing it with ballpoint

on to several writing pads in the course of a week — getting it down before it vanished beyond all power of mnemonic to retrieve, or will, or dream.

I make notes all the time, tiny scribbles on big sheets of paper that I eventually stick together to make a mural of trouvailles I pore over, waiting for something to click: several scribbles to combine. Then I ring what seem related ideas in colored pencil, usually running out of colors and sometimes forgetting what category a color represents, but in the end sending the mental backwash of half a year until something useful shows up. What's trivial, tiny, goes down next to what might be major and massive. I never know. Other ways won't seem to work: every year I buy little notebooks to carry in my pocket, so as never to lose an idea, but after a few pages I forget to use them, and back I go to the big, untidy sails of scribbles, vowing to be more systematic one of these years.

Visuals help. When I was researching

Fragment of Paul West's "mental backwash."

and writing my novel about Stauffenberg, I made at least a dozen water-colors of the man, to fix and focus him with his eyepatch, his lost hand, his big bulging yellow briefcase; I lived with his effigy for three years, starting at it until it seemed to move, and I saw him walking, heard his voice. Some of these have survived and will be in an exhibit of my recent manuscripts which Patten's Rare Books Room will put on in May. By-products, they sometimes appeal to me more than their book, which is miles and miles of uniform-looking print, whereas the effigies (or the model pools) have color, texture, another dimension, while print seems to homogenize.

But back to print I go, with two books to finish, the long-procrastinated collection of my short stories to be made final (for every new one I write, I throw one out), and what feels like a new book nibbling at me, this time about a lighthouse keeper, someone in our own galaxy at any rate, who decides to empty out his mind but can't ever catch

himself without an idea. Also, this coming summer, I am to be *Paris Reviewed*: an accolade, of course, but that very process will get me thinking about the creative process all over again, which gets me thinking: If I could explain it, it wouldn't work for me any more. It works for me because I never really know what's going on inside my head, except something tidal, imperious, trying to make itself beautiful.

About this time of year, early spring, the itch to get back to writing becomes almost unendurable; but, first, I have to rid myself of others' rhythms: those of my students, those of the authors we've been studying. I don't usually have so many projects on hand, either, and I'll have to choose which one — the novel about the two children, the book about late-learning to swim, the enigmatically-beckoning lighthouse which is the seed of a book-to-come — I'll tend to first.

It would help if those children, escaping from Hitler, were to learn to swim near a famous lighthouse, but each book must go its own way until it's hard and fast. Each has its own rhythm anyway, indistinguishable to anyone but me, I suppose. All I know is that the superfluous shading of each's cadences keeps the books separate even when I'm dreaming, and I don't think I've ever solved one book's problem with a solution that belonged to another book. To me, writing is problem-solving, with about three problems to each line of type, and my books, although seemingly as alike as different crossword puzzles, don't overlap. They're stepping stones to where I've never been.

Honors

(Continued from page 1)

professor of law at the University of Michigan Law School from 1970 to 1975 and from 1977 to 1980. He has been a member of the faculty at the Institute for Educational Management at Harvard University since 1976, teaching a course in Law and Higher Education. He further served as a professor of law at Harvard Law School from 1975 to 1977 and currently is a lecturer in law at Harvard.

Judge Edwards was appointed by Presidents Ford and Carter to serve on the International Women's Year Commission, chairing the Rules and Credentials Committees. In 1977, he was appointed by President Carter to serve on the board of directors of Amtrak, and in 1979 he was elected chairman of Amtrak's board, a position he held until resigning to take his position on the bench.

A 1962 graduate of Cornell University, Judge Edwards received his law degree with high distinction from the University of Michigan Law School in 1966. In 1978, Cornell awarded him the Judge William B. Groat Alumni Award given by the School of Industrial and Labor Relations.

Judge Edwards presently serves as a member of the National Advisory Council for the Institute for Educational Policy Studies at Harvard.

At the Convocation, 241 freshmen will receive the President's Freshman Award; 20 sophomores, the President Sparks Award; 26 juniors and 28 seniors, Evan Pugh Scholar Awards; and one senior, the John W. White Fellowship.

Four faculty members will be presented AMOCO Foundation Outstanding Teaching Awards. They are Dr. Arthur Goldschmidt Jr., associate professor of history; Dr. Charles G. Haas Jr., professor of chemistry; Dr. Ned Mercando, assistant professor of biology at Ogontz; and M. Leonard Shavel, associate professor of physics at Hazelton.

In addition, the Raymond R. DiMeo Award for Instructional Improvement will be presented to Dr. Warren T. Morrill, professor of anthropology.

President Oswald will offer welcoming comments and address visiting parents. Provost Eddy will introduce the platform party of deans and Campus directors. Dr. Eugene R. Melander, assistant vice president for undergraduate studies, will recognize honored students and present the DiMeo Award. Provost Eddy will present the AMOCO Awards, and Dr. Oswald the White Fellowship.

Faculty/Staff Alerts

Memorial Day holiday

The University will observe Memorial Day on Monday, May 25, 1981.

Brotherhood Day set

Julian Bond, nationally known black legislator from Atlanta and head of the national Klan Watch, will be the featured speaker for Penn State's first Brotherhood Day on Wednesday, May 6, at 7 p.m. in the Eisenhower Auditorium.

Athletic Director Joe Paterno and Provost Edward D. Eddy will also take part in the program, which is aimed at promoting greater inter-group harmony.

"The purpose of the program is to enhance awareness of the negative effects of racism and separatism, and the positive effects of unity," says Darnell Daisey, publicity chairman for the event.

The child murderers of Atlanta, and recent racist incidents against black and Jewish residents in State College, Mr. Daisey says, have had the positive effect of bringing several disparate groups in the community together.

"These acts of brotherhood and unity are great achievements, but must they always come as a result of tragedy?" he asks. "With Brotherhood Day, we hope to bring people of differing backgrounds together without a tragedy."

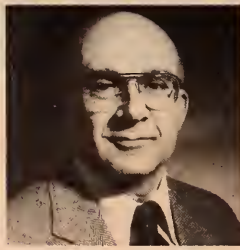

Choir debuts May 6

The first spring concert of the new University Chamber Choir will be presented Wednesday, May 6, at 8:30 p.m. in the Music Building Recital Hall.

Included in the Chamber Choir's program will be works by the Renaissance composers Josquin, Byrd and Tomkins; Hindemith's "Six Chansons"; Samuel Barber's "Three Reincarnations"; and Benjamin Britten's "Rejoice in the Lamb," all 20th century works, plus several other pieces from various periods.

Organist June Miller, an associate professor of music, will accompany the singers on several of the selections.

Formed in 1980, the Chamber Choir consists of 22 singers who perform primarily a cappella choral works from the Renaissance to the present. It is directed by Dr. Douglas Miller, associate professor of music.

Robert M. Warner

Archivist to visit

Dr. Robert M. Warner, archivist of the United States, will participate in a panel discussion on the problems of managing and preserving public records and documents.

The panel, which is open to the public, will be held Thursday, May 7, at 3 p.m. in the Assembly Room of the Nittany Lion Inn.

Joining Dr. Warner on the panel will be Dr. Robert J. Maddox, professor of American history at the University, and Nancy Cline, director of the bibliographic resources division of Pattee Library. College of the Liberal Arts Dean Stanley F. Paulson will preside at the program, which is sponsored by the Department of History.

Dr. Warner, who was appointed archivist in May 1980, had spent his professional career at the University of Michigan, where he was a professor of library science and director of the University's Historical Collection. He earned his M.A. and Ph.D. degrees at Michigan.

Named a Fellow of the Society of American Archivists in 1968, Dr. Warner served as president of the Society in 1976-77.

Dr. Maddox, the author of a number of articles and books, will comment on the problems of the burgeoning public record from the viewpoint of the historian. Ms. Cline will discuss the problems created for librarians. She is a former chairperson of the Government Documents Round Table of the American Library Association, and a member of the Advisory Council to the Public Printer and chairperson of the Council's Micrographic Committee.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff non-exempt have been listed with the University Employment Office for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Office, 865-1387 (network line 473-1387). Applications for these staff vacancies will be accepted until 5 p.m., May 7, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (FE-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, sex, or marital status (as provided by law), sex, or status as disabled or Vietnam era veteran.

COORDINATOR, EQUAL EMPLOYMENT OPPORTUNITY PROGRAM, COLLEGE OF AGRICULTURE, UNIVERSITY PARK. Responsible to the Manager of Personnel, College of Agriculture, for performing a wide range of duties related to personnel programs. Develop and direct equal opportunity, affirmative action and programs for the Cooperative Extension Service to comply with federal and state laws and regulations. Responsible for overall employment efforts in recruitment of county agents, extension economists, nutrition aides and staff support positions. Maintain a viable relationship with minority institutions. Land grant institutions, Urban League, NAACP and other minority groups to facilitate recruitment programs. Develop and conduct public relations programs to provide information to minorities concerning employment opportunities. Assist in liaison with federal and state agencies responsible for administering Title VII of the Civil Rights Act and appropriate Executive Order to direct commitment to Equal Employment Opportunity. Provide direction and training in the conduct of effective affirmative action programs and reviews. Bachelor's degree (or equivalent social science or related field) plus a minimum of two years of effective experience in equal employment opportunity and affirmative action programs.

ADMINISTRATIVE AIDE, APPLIED RESEARCH LABORATORY, UNIVERSITY PARK. Responsible to the Chairman of the Applied Research Laboratory administrative duties related to the program, including assisting students, organizing and setting up course offerings, etc., and for the coordination and liaison responsibilities involved with professional society meetings and standing committees. Bachelor's degree or equivalent, with one to two years of effective experience in administration, are required.

ASSISTANT INFORMATION PLANNING SPECIALIST, OFFICE OF PLANNING AND BUDGET, UNIVERSITY PARK. Responsible to the Associate Director and the Information Planning Specialist for the conduct of special data analyses and surveys to meet the needs of University planning, budgeting and external reporting responsibilities. Identify and collect data on faculty, student, and academic programs. Bachelor's degree (or equivalent) preferably in the social or physical sciences where quantitative analytical skills are developed, is necessary, plus two to three years of effective experience. A working knowledge of computer and data processing applications preferred. Knowledge of elementary statistics, effective writing skills, and knowledge of questionnaire development desirable.

Penn State Intercom

French Department - to offer intensive summer program

A new Intensive French Summer Program, designed to help students achieve proficiency in the language, will be inaugurated by the Department of French in June.

Designed primarily for graduate students in Business Administration, the program will be open also to graduate students enrolled in other professional programs at University Park and to faculty members if space is available.

Although intensive foreign language programs are not uncommon in American education, the two units which the French Department will offer are unique, according to Dr. Patricia A. Ward, acting head of the Department. The units utilize Foreign Service Institute methods.

Non-language majors will achieve the proficiency to speak French with sufficient accuracy and vocabulary to participate in most formal and informal conversations on practical, social and professional topics.

The Summer Program will be divided into two units. Unit I (six weeks, June 8 - July 17) will take students with little or no previous preparation in French through the equivalent of French I, 2 and 3 (9 credits).

Unit II (six weeks, July 20 - Aug. 28) will provide an intensive sequence of grammar, conversation and reading, with emphasis on the language of international business communication, including agribusiness and foreign affairs. Classes will meet daily, Monday through Friday, periods 1, 2, 3 (8 a.m. to 12:25 p.m.), with an optional lunch meeting from 12:45 to 1:45 p.m.

The program has been funded by the Department of French, the Colleges of the Liberal Arts and Business Administration, and by a grant by Provost Eddy from the Fund for Academic Excellence.

Graduate students or faculty members interested in registering for the program should contact: Prof. Jeannette Bragger, Director, Intensive French Summer Program, Room S-405 Burrows Building, 865-7101 or The Department of French, Room 316 Burrows Building, 865-1492.

President Oswald with Dr. Marlow and Trustee Marian U. Coppersmith, a donor of the Barash Award. Center, Dean Hosler. Right, Professor Mann. Awards will be presented at a special May 24 reception.

Three named to receive University awards

"I get much more out of my volunteer activities than I put into them," says Dr. H. LeRoy Marlow, the 1981 recipient of the Barash Award for Human Service.

The family of the late Sy Barash, a Penn State graduate and State College businessman until his death in 1975, created this \$1,000 award. It recognizes annually the full-time member of the faculty, staff or student body "who has contributed most, apart from regular duties, to human causes, public service activities and organizations or the welfare of other humans."

Dr. Marlow serves as assistant director of Continuing Education, as a professor of management development, head of Management Development Services and director of the Pennsylvania Technical Assistance Program (PENNTAP).

Despite this full workload, he manages a wide variety of church and community activities, including work with the Centre County Cancer Crusade, Lewisburg United Methodist Home, the Albright

Dr. Charles L. Hosler, a dean who views his role as that of "an enabler," is the recipient of the 1981 John E. Wilkinson Award for Administrative Excellence.

Established in 1970 by the friends of John E. Wilkinson, lifelong Centre County businessman, the award is given annually to a Penn State administrator whose performance methods and achievement exemplify administrative excellence. It carries a \$500 stipend.

Dean of the College of Earth and Mineral Sciences since 1965 and a professor of meteorology, Dr. Hosler believes that the faculty are the key to excellence in a college.

"The dean is just another member of the faculty with a little more administrative responsibility," he says. "Any time I'm here, faculty members can walk into my office; in the past 16 years, I've never turned anyone away."

"My job is to facilitate, not to constrain people with rules," he continues. "I try to

(All three of these awards stories continue on page 6)

Special collections librarian Charles W. Mann always makes a point of scanning listings of new appointments to Penn State's faculty.

"I like to see if they'll be able to make use of any of our materials," he explains. It is this kind of concern that has won Professor Mann the 1981 McKay Donkin Award, presented annually to the full-time member of the faculty or staff or to the retiree who has contributed most to the "economic, physical, mental or social welfare of the faculty."

The \$500 award is named for the late McKay Donkin, who served as vice president for finance and treasurer of the University from 1957 to 1968.

Professor Mann, who holds dual faculty appointments in the University Libraries and the English Department, has been keeping track "of where the threads go" ever since his appointment in 1954. "I try to be a catalyst," he says, "to provide a central place to bring together faculty members who may not be aware of others

Styles in automobiles may have changed, but this 1931 photo shows a still familiar building facade under construction. The Nittany Lion Inn celebrates its 50th birthday this month.

News in Brief

Penn State Scholars to visit in summer

Nearly 800 outstanding high school students have been nominated to visit the University Park Campus this summer as part of the Penn State Scholars Program.

One group will visit on June 29 and 30, and a second group on July 1 and 2.

The Scholars Program was initiated in 1975 to recognize and encourage excellent academic scholarship. It provides an opportunity for top students in and near Pennsylvania to meet with Penn State faculty members and students and to become acquainted with the campus and the academic programs offered.

Accompanied by their parents, students also learn about financial aid and career resources and opportunities, and get a taste of student life.

The students are nominated for this

program by their high school principals and guidance counselors in recognition of their achievements as the top academic students in the junior class of their respective schools.

During their visit, they are given the opportunity to compete for more than 30 Penn State four-year scholarships. Last year, about 100 students were offered full or partial tuition scholarships. Each year, approximately one-third of the 800 participants enroll at Penn State.

NEH grant to Press

Penn State Press has been awarded a grant by the National Endowment for the Humanities to aid publication of *Dance to the Fiddle - March to the Fife: Instrumental Folk Tunes in Pennsylvania*, collected by Samuel P. Bayard and associates.

These annotated transcriptions of 651 fiddle and fife tunes, collected in

(Continued on page 4)

Penn Staters

Dr. **Peirce Lewis**, professor of geography, has been elected a National Councilor for the Association of American Geographers by the membership at large. Dr. Lewis has also presented a number of seminars during the past several months. They include: Department of the History of Art, Yale University, on the use of topographic maps as evidence of changing vernacular cultures; Department of Geography, Florida State University, on the evolution of 19th century American vernacular house-types; College of Environmental Design Lecture, UC-Berkeley, on "Images of the American Landscape," and a Department of Geography seminar on "Reflections from the Landscape"; Department of Geography, Queen's University, Kingston, Ontario, on the changing morphology of the American city; The Ellen Churchill Semple annual lecture at the University of Kentucky, on "Images of the American Landscape," and a Geography seminar on changing urban morphology; and Department of Geography, State University College of New York at Oneonta, on American landscape art, and a second lecture on the interpretation of topographic maps.

Arthur V. Ciervo, director of Public Information and Relations, is the winner of the 1981 Alice Beeman Award, presented by the Council for the Advancement and Support of Education (CASE). The Beeman Award for Advancement Writing, CASE's most prestigious public relations award, is given for "significant editorial contribution to institutional advancement." It recognizes books, monographs and articles which contribute to greater professionalism in the educational field, and for CASE members. Mr. Ciervo has published extensively in professional journals, with a special interest in time management, public relations techniques and productivity for college operations. Among his more recent publications are "Ten Ways to Increase Your Productivity" (CASE Currents 1976), "The Six P's of PR Management" (Public Relations Journal), "Problem-Solving in University Relations" (CASE Currents, 1979), and "How to Cope with Stress in Public Relations" (CASE Currents, 1980). Mr. Ciervo has also contributed to the *Handbook of Institutional Advancement* and was editor of *Using the Mass Media*, both published by Jossey-Bass.

Robert Trehy, professor of music and a Fellow in the Institute for the Arts and Humanistic Studies, performed the part of Herr von Faninal in the Opera Company of Boston's production of Richard Strauss' *Der Rosenkavalier*. The opera was presented at The Opera House in Boston March 20 and 22 and April 2 and 5. On April 3, Mr. Trehy was featured in a luncheon recital for the Boston Opera Guild, performing works by Schubert and Richard Strauss.

Dr. Vladimir S. Stubican, professor of materials science and engineering, presented an invited keynote address entitled "New Developments in Ceramic Systems" at the 5th International Meeting on Technical Ceramics in Bologna, Italy. He also acted as the representative of the United States in the round table discussion on "New Trends in Technical Ceramic Materials."

Dr. James Garbarino, associate professor of human development, is the recipient of the 1980 Human Development Award in research presented by the Counseling and Human Development Division of the American Educational Research Association. The award was bestowed for an article Dr. Garbarino co-authored in *Child Development*. It was titled "High Risk Neighborhoods and High Risk Families: The Human Ecology of Child Maltreatment."

Diane Pepe, assistant professor of art, was visiting artist at Edinboro State College on April 30 and May 1. While on campus she

presented lectures and demonstrations on making handmade paper. Professor Pepe, who established the Penn State offerings in paper making, will serve on the faculty of the Arrowmont School of Arts and Crafts this summer.

Sigmond S. Birkenmayer, professor of Slavic languages, read a paper entitled "Polish Themes in Nekrasov's Poetry" at the Symposium on 19th and 20th Century Polish and Russian Literature in Honor of Professor Xenia Gasiorowska at the University of Wisconsin-Madison.

Bookshelf

The second volume of **Dr. Rio Preisner's** *Aspekte einer prokultivierten tschechischen Germanistik (Aspects of Protoactive Czech German Studies)* has just been published in the Federal Republic of Germany. Both volumes of this anthology of studies, essays, and papers by Dr. Preisner, a professor of German who was exiled from Czechoslovakia in 1968 during the short-lived "Prague Spring," are conceived as a structured unit.

The first volume, published in 1977, progresses from general hermeneutic theory to a direct interpretation of texts, especially of works by Franz Kafka. It then examines closely the historic relationships between German and Czech culture and outlines in detail a history of Czech German Studies from its beginnings until the liquidation of free humanistic research in Czechoslovakia following the Communist takeover in 1948.

The just published second volume continues the examination of the problem of the confrontation of two cultures in a study about the "Bohemian Syndrome" in René—later Rainer Maria Rilke. This study is followed by an essay about the fate of the poet and of poetry in our time, defined by Dr. Preisner with Holderlin's term as "scarce" (*dürrig*). From this position, Dr. Preisner moves in a number of studies and essays into the field of historical phenomenology, paying special attention to the "Post-February-Era" and the catastrophic cultural and social changes and systematically imposed following the introduction of the Communist system in Czechoslovakia in 1948. A long philosophical essay is devoted to the quarrel about the meaning of history against the background of the contrast between humanistic education (*Bildung*) and ideological indoctrination (*Schulung*). This topic is further examined in an essay about the "vases communicants" of avant-garde and ideology. The second volume concludes with an *Open Letter To Gunter Grass* in which Professor Preisner analyzes polemically the so-called "third way" of a synthesis of socialism and democracy.

Both volumes of Dr. Preisner's *Aspekte* appeared in the series *Colloquium slavicum*, vols. 8 and 12.

Dr. Preisner is the author also of a third book in German, published in 1968. The work deals with the 19th century Austrian dramatist and actor Johann N. Nestroy.

Dr. Kenneth A. Thigpen, associate professor of English, is the author of *Folklore and the Ethnicity Factor in the Lives of Romanian-Americans*, recently published by Arno Press, N.Y. The book, which is part of the World Folklore Series, is the first book published on Romanian-American folklore, and complements studies of other ethnic groups and their folk culture in America initiated at the Indiana University Folklore Institute.

Dr. Thigpen was recently re-elected to a second two-year term as president of the Pennsylvania Folklore Society, and he has been appointed to the Governor's Task Force on Folk Arts. This advisory group is being called together in a cooperative venture between the Pennsylvania Council on the Arts and the Pennsylvania Humanities Council (formerly the Public Committee for the Humanities in Pennsylvania).

Martha T. Halsey, professor of Spanish, is the co-editor of two recently published plays by Spanish dramatist, Jose Martin

Mr. Malloy

Mr. Kibelbek

Recuerda. Recuerda was in residence at Penn State for three weeks last spring when his drama, *The Immates of the Convent of Saint Mary Egyptian*, was performed.

In the introduction, Dr. Halsey analyzes the historical background and dramatic technique of *El engano*, a play which dramatizes the opposition of Juan de Dios, a popular saint of Granada, to Charles V's imperial politics and religious wars and his support for the common people who suffered the results of such policies. The drama thus portrays the "other face" of the Empire and constitutes an outcry against an abuse of power that continued during Franco Spain.

The second drama, *Caballos desbocados*, which also takes place in Andalusia, deals with the problems of Spain's transition to democracy and the current movement for autonomy.

The edition of these two plays form part of the series "Hispanic Letters" published by Ediciones Catedra de Madrid.

25-year chairs

Anthony Kibelbek Jr., manager of purchasing at the Applied Research Laboratory, is observing his 25th year as a University employee.

After earning a B.A. degree in liberal arts from Penn State in 1952, Mr. Kibelbek served as a communications officer in the U.S. Army, worked for radio station WCOJ in Coatsville, Pa., and was a management trainee for the Sealtel Company in Wilmington, Del. He started at the ARL on April 16, 1956, as an assistant purchasing agent and was promoted to purchasing agent before assuming his current position. His duties have included the purchase of a wide variety of equipment, materials and services required for the Laboratory's research and development work.

Mr. Kibelbek has served as a fraternity advisor and on township boards. One of his hobbies is collecting Indian artifacts.

Jack Malloy, building supervisor of the HUB in the Office of Student Affairs, received his 25-year chair from Penn State this month.

"The best way to describe this job is in one word—helic," says Mr. Malloy, whose duties in the heavily used HUB include overseeing all maintenance and housekeeping operations, as well as set-ups for the building's many meetings and special activities.

Mr. Malloy, who has served in his present position for the past six years, spent his first 19 years as a glassblower in the Chemistry Department, where he created special glassware for research. His father, too, was a glassblower in the Chemistry Department, and his mother worked as a technician for the College of Earth and Mineral Sciences.

Active with the Nittany Knights Chorus, Mr. Malloy sang for a number of years with the Knight Shadows, a quartet which is part of the chorus. Other of his interests include fishing with son Mark, attending Penn State football (he buys a season ticket every year) and driving through the mountains.

Mr. Malloy—who served in the Merchant Marines during World War II and in the Marine Corps during the Korean War—is a member of the VFW and the American Legion Posts in State College. He says he has seen most of the world, but would like to travel extensively around the United States.

"It's been a very interesting 25 years," he notes, "but I wonder where the time has gone. It's sure gone fast."

Promotions

Staff Exempt

J. Diane Beezer to admissions counselor II in Undergraduate Admissions.
Dorothy F. Mihelic to staff assistant/executive programs in Business Administration.

Clerical

Theresa Fisher to clerk A at Delaware County.
Linda K. Gummo to inventory clerk in Housing and Food Services.

Technical Service

Gregory A. Butts to dining hall worker A in Housing and Food Services.
Kenneth Mandel to stock delivery clerk in Business Services.
Lawrence J. Zimmerman to storeroom worker in Housing and Food Services.

Partings

Margaret B. Morrow, a residence hall worker in Housing and Food Services at the Beaver Campus, left the University on March 7. She had been employed since Aug. 12, 1970.

Bernadine K. Cox, a senior receiving clerk in the Libraries, retired May 1 after serving on the staff since Aug. 1, 1968.

Kathryn C. Doland, a secretary in the College of Agriculture since Nov. 1, 1964, retired May 1.

Pearle C. Barger, a drafting room clerk in the Office of Physical Plant, retired May 1 after serving with the University since Sept. 1, 1965.

Obituaries

Dr. William L. Henning Sr., Pennsylvania secretary of agriculture from 1955 to 1963 and professor emeritus of animal industry, died April 30 at the age of 81.
Dr. Henning joined the faculty in 1922, the same year he earned his M.S. at Penn State. His undergraduate degree was granted by Ohio State and his Ph.D. in genetics by the University of Wisconsin. He retired in 1965.

As secretary of agriculture, Dr. Henning stressed the importance of research to improve the quality of Pennsylvania farm products and worked to increase knowledge of the opportunities for the improvement and expansion of agriculture in the Commonwealth.

At the University, he was active in obtaining a \$100,000 grant for providing livestock improvement fund to purchase seed stock for Penn State herds and flocks. He was instrumental also in obtaining funding for Penn State's Animal Science Building and Barn, the Meat Evaluation Center, the Mushroom Research Center and the agricultural testing facility at Rock Springs.

Frank E. Reish, who retired in 1956 as a stock clerk in Science, died April 28 at the age of 86. He had begun his University service in 1931 as a janitor with Physical Plant.

Mary V. Bartley, a production helper with Housing and Food Services when she retired on disability in 1964, died April 27 at the age of 64. She joined the staff in 1961 as a cook.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule and bi-weekly during the summer Term for the faculty and staff of The Pennsylvania State University.

Special Events

Thursday, May 7

Spring festival, "Horizons," exhibits, films, music, through May 10.
MC3B/Hillel Foundation, Tay Sachs testing, 2-6 p.m., HUB Ballroom.
Dept. of History, "Problems of Managing and Preserving Public Records and Documents," 3 p.m., Nittany Lion Inn. Panels, Robert M. Warner, archivist of the U.S.; Robert J. Maddox, history; Nancy Cline, bibliographic resources, Pattee.

Cinemathèque, *The Wild Bunch*, 7 and 9:30 p.m., Room 108 Forum. Also May 8.
E&M Student Council lecture, 7:30 p.m., Room 22 Deike. Alistair Fraser, meteorology, on "The Rainbow Connection."

Penn State Thespians, *Mame*, 8 p.m., Schwab Auditorium.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Friday, May 8

Last day to sign Spring Term and NDSL University Long Term Loans, Room 108, Shields.

Sports: track (women), EAIAW Championships, through May 9.
Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. Rustical Quality String Band, "Folk Tradition Lives."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Roy Buck, sociology, on "Tourism and the Plain People of Lancaster County."

Commonplace Theatre, *Malicious*, 7 and 9 p.m., Room 112 Kern. Also May 10.
Penn State Thespians, *Mame*, 8 and 8 p.m., Schwab Auditorium.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Saturday, May 9

Shaver's Creek Nature Center, beekeeping program, 9 a.m.-3 p.m. By preregistration only. \$65-1851, 8 a.m.-3 p.m. weekdays.
College of Science, Science Open '81, open house of the College, 10 a.m.-5 p.m. Tours start in Osmond Hall.
Penn State Thespians, *Mame*, 2 and 8 p.m., Schwab Auditorium.

France-Cinema, Renoir, *Grand Illusion*, 7 and 9 p.m., Room 112 Kern. Also May 11.

Sports: lacrosse (men) vs. Army, 8 p.m.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, May 10

University Chapel Service, 11 a.m., Eisenhower Chapel. Stanley Paulson, dean, College of the Liberal Arts, speaker.

Children's Theatre Ensemble, "World Winds," 1 p.m., The Pavilion Theatre.
Honors Convocation, 2 p.m., Eisenhower Auditorium.

Penn State Glee Club Concert, 3 p.m., Schwab Auditorium.

Penn State Internationale Dancers, Annual Mother's Day Performance, 3 p.m., Room 132 White Bldg.

Lawrence Rich and Julian Gray, guitarists, and Jeanne Swack, flutist, 7:30 p.m., Music Bldg. Recital Hall.

HPER Colloquy, 8:30 p.m., Room 101 Kern.

Curtis S. Wilbur, Johnson & Johnson, on industrial fitness programs.

Monday, May 11

Fixed date for meetings involving Commonwealth Campus Faculty. Also May 12.

Compos Film, "Flatland and Why Man Creates," noon, Room 112 Kern.

Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. William C. Miller on "Old New Music: A Baroque Retrospective."

Brazilian Film Fest, *Bye Bye Brazil*, 3 p.m., Eisenhower Auditorium.

Dept. of Chemistry, Whitmore Lecture Series, 8 p.m., Room 333 Whitmore. Allen J. Bard, Univ. of Texas, on "Photoelectrochemistry: Electrochemical Systems and Light."

through May 14, see "Seminars" for details.
Michael Telp, piano, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, May 12

Comp. Lit. Luncheon, 12:15 p.m., Room 204

Scene from "Tent of Miracles" to be shown May 12.

HUB, R. Thomas Berner, journalism, on "Newspaper Writing as Literary Art."
Brazilian Film Fest: colloquium with Luiz Felipe Seixas Correa, cultural affairs officer, Brazilian Embassy, 2:30 p.m., HUB Gallery Lounge; film, *Tent of Miracles*, 8 p.m., Eisenhower Auditorium.

Comp. Lit. Film Series, *I Love You, Alice B. Toklas*, 7 and 9 p.m., Room 112 Kern.

Archaeological Institute, illustrated poetry readings, 8 p.m., Room 101 Kern. Robert Lima, Spanish and comp lit, on "The Rites of Stone."

German Dept. lecture, 8 p.m., Room 167 "Willard, Ulrich Matthee, Univ. of Kiel, on "Aktuelle Probleme deutscher Politik."

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Wednesday, May 13

Commons concert, Allegheny String Band, noon, Kern Lobby.

Sigma Delta Epsilon, brown bag luncheon and lecture, noon, Room 101 Kern. Robert B. Beelman, food science, on "Wine-Making - An Art or Science?"

Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. Bill Foltz on "Music Everywhere: Muzak."

Nittany Lion Band Concert, 6:30 p.m., Fisher Plaza.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Penn State Symphonic Wind Ensemble, chamber music, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, May 14

Sports: lacrosse (women), AIAW National Championships, through May 16.

HUB Craft Center, exhibition and sale, 11 a.m.-6 p.m., Kern Lobby. Also May 15.

STS/TCID, luncheon, noon; talk, 12:30 p.m., Room 101 Kern. Philip Klais, English, on "Literature and Technology."

Cinemathèque, *The Touchables*, 7 p.m.; *God Told Me To*, 9 p.m., HUB Assembly Hall. Also May 15.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Friday, May 15

Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. Douglas Miller, music, on "Who Says We Can't? PSU Students and New Music."

Dept. of Philosophy, Annual Heidegger Conference, 3 p.m., Room 402 Keller Bldg. Also May 16 & 17.

Sports: track (men), Penn State Open, 3 p.m. Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Kari Humphrey, sociology and American studies, on "The

Promotion of Growth and Its Impact on the Pennsylvania Small Town."

Commonplace Theatre, *Hair*, 7 and 9 p.m., Room 112 Kern. Also May 17.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

Bob Hutsko, trumpet recital, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, May 16

Sports: track (women), Penn State Open; golf (men) Alumni Tournament, 10 a.m.; tennis (men) vs. Mercyhurst, 1 p.m.

France-Cinema, Bunuel, *Diary of a Chambermaid*, 7 and 9 p.m., Room 112 Kern.

URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.

School of Music Alumni Recital, 8:30 p.m., Music Bldg. Recital Hall.

Sunday, May 17

Dept. of Philosophy, "Tribute to the Philosophy of John M. Anderson. Evan

Pugh Professor Emeritus of Philosophy." Sessions at 2:30 and 7:30 p.m., Room 124 Sparks.

Seminars

Thursday, May 7

Statistics, Carol Redmond, Univ. of Pittsburgh, on "Statistical Analysis of Clinical Trials," 4 p.m., Room 62 Willard (new listing).

Friday, May 8

Surface Science, Haskell Taub, Univ. of Missouri, on "Neutrons Scattering Studies of Physicized Molecular Films," 9:30 a.m., Room 339 Davey.

Analytical Chemistry, George DeStefano, grad. student, on "Liquid Chromatograph-Mass Spec Interfaces," 11:10 a.m., Room 333 Whitmore.

UDIS, "Test Construction - Part I," 2 p.m., Room 128 Mitchell Bldg. Reservations, 863-0668.

Physical Chemistry, Gregory Alms, Polymer Product Dept., DuPont, on "Quasi-Elastic Light Scattering from Polymers," 2:30 p.m., Room 333 Whitmore.

Monday, May 11

Nutrition, Stephen Pohl, internal medicine, Univ. of Virginia, on "Mechanisms for the Development of Insulin Resistance," 3:35 p.m., Room 223 Henderson.

Chemistry, Whitmore Lecture Series, Allen J. Bard, Univ. of Texas, on "Semiconductor Electrodes and Photovoltaic Cells," 8 p.m., Room 333 Whitmore.

Tuesday, May 12

Metallurgy, S. Kaja, grad. student, on

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

"Diffusion Barriers in Electroplated Electrical Contacts," 11 a.m., Room 301 Steidle.
UDIS, "Test Construction - Part II," 2 p.m., Room 128 Mitchell. Reservations, 863-0668.
Biology/Plant Pathology, M.C. Nish, biology, Temple Univ., on "Effects of the Transfer Messenger RNA from One Organism to Another," 2:20 p.m., Room 8 Mueller.
Environmental Pollution Control, Ramond W. Regan, civil engineering, on "An Update on Resource Recovery in Centre County," 2:20 p.m., Room 128 Sackett.
Acoustics, Glyn Adams, B&W Loudspeakers, Ltd., Worthing, England, on "The Measurement of Loudspeaker Diaphragm Motion by Laser Interferometry," 2:30 p.m., Room 73 Willard.
Chemical Engineering, Robert Prud'homme, Princeton Univ., on "Interactions of Surfactants and Polymers in Aqueous Solutions," 3:45 p.m., Room 140 Enke.
Geosciences, Bryan L. Isaacs, Cornell Univ., on "Contrasting Styles of Subduction in the New Hebrides Island Arc and South America," 3:45 p.m., Room 112 Walker.
Plant Pathology, Robert Theberge, grad. student, on "Spore Wars: The Role of Plant Pathology in Bio-Warfare," 3:55 p.m., Room 213 Buckhout.
Chemistry, Whitmore Lecture Series, Allen J. Bard, Univ. of Texas, on "Semiconductor Electrodes and Photovoltaic Cells," 8 p.m., Room 333 Whitmore.

Wednesday, May 13

UDIS, "Test Construction - Part II" (repeat), 2 p.m., Room 128 Mitchell. Reservations, 863-0668.

Aerospace Engineering Department, Dr. Robert P. Dring, United Technologies Research Center (East Hartford, Conn.), on "An Investigation of Axial Compressor Rotor Aerodynamics," 4 p.m., Room 232 Hammond.

Chemistry, Whitmore Lecture Series, Allen J. Bard, Univ. of Texas, on "Photoelectrochemistry and Heterogeneous Photocatalysis," 8 p.m., Room 333 Whitmore.

Thursday, May 14

Chemistry, Whitmore Lecture Series, Allen J. Bard, Univ. of Texas, on "Polymer Modified Electrodes," 9:30 a.m., Room 333 Whitmore.

Ceramic Science and Engineering, James S. Reed, Alfred Univ., on "Plasticity and Extrusion," 11 a.m., Room 301 Steidle.

Chemistry, Bruce Betts, Columbia Univ. speaker, 12:45 p.m., Room 333 Whitmore.

Agromony, Barry Liebowitz, grad. student, on "An Evaluation of Some Permitted Sewage Sludge Application Sites in Pennsylvania," 3:55 p.m., Room 111 Tyson.

Physics, P.R. Bunkley, National Research Council of Canada, on "A New Approach to Molecular Symmetry."

Fuel Science, Peter Gawn, fuel science, on "History of Coal Utilization," 4 p.m., Room 301 Steidle.

Mathematics, Robert Chen, Univ. of Miami, on "Uniform Distribution of Generalized Kakutani Interval Splitting Processes," 4 p.m., Room 102 McAllister.

Friday, May 15

Mathematics, Gian-Carlo Roita, MIT, on "Classical Variational Theory Today," 2:20 p.m., Room 367 Willard.

Exhibits

Kern Gallery: Robert Gray, prints. Martha Holt, ceramics and photographs. Bill Rienser, leather.

Museum of Art: Selected works from the collections of the Ford and Sanford Ford and Samuel Gallo. Selections from the Museum's American collection. Watercolors from the permanent collection, through May 17.

Pattee Library: "Archaeology: Past, Present and Future," through May 14; "Igitt's House: An Architectural Study," opens May 14; East Corridor Gallery, Frank Chetelat, "A Photographic Inquiry into European Architectural Motifs," through May 14; Karen Simonitis, recent paintings, opens May 14; Lending Services Lobby, Ukrainian Folk Art, through May 11; Becky Matrazzi, glass, opens May 11. Main Lobby, Martha Carothers, "The Design and Production of Children's Story Books," opens May 11. Rare Books Room.

News in brief

(Continued from page 1)

southwestern Pennsylvania and northern West Virginia between 1928 and 1963, comprise the largest corpus of Anglo-Celtic-American instrumental folk music. The new book complements *Hill Country Tunes*, a definitive work issued in 1944 by Mr. Bayard, who is professor emeritus of English and comparative literature.

Texas chemist to give Whitmore talks

Allen J. Bard, Josey Professor of Chemistry at the University of Texas at Austin, will present the 1981 Whitmore Lectures on May 11, 12, 13 and 14.

Dr. Bard's topic will be "Photoelectrochemistry: Electrochemical Systems and Light." His talks are entitled "Electrogenenerated Chemiluminescence," "Semiconductor Electrodes and Photovoltaic Cells," "Photoelectrosynthesis and Heterogeneous Photocatalysis" and "Polymer Modified Electrodes." The first three talks are scheduled for 8 p.m. in Room 333 Whitmore, and the final lecture will be given at 9:30 a.m. in 333 Whitmore.

A Harvard Ph.D., Dr. Bard has published about 260 papers in his research area, and is the author of the textbook *Chemical Equilibrium* and co-author of *Electrochemical Methods*. He was the editor of the 11-volume *Electroanalytical Chemistry* and the 13-volume *Encyclopedia of the Electrochemistry of the Elements*.

The Whitmore Lecture Series was established in 1976 to honor the late Frank C. Whitmore, a member of the National Academy of Sciences who was dean of the School of Chemistry and Physics, which preceded the College of Science at the University.

Lima to read poems

Dr. Robert Lima, professor of Spanish and comparative literature, will present an illustrated poetry reading Tuesday, May 12, at 8 p.m. in Room 101 Kern Building.

His talk is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Dr. Lima will be reading from his manuscript, *The Rites of Stone*, a collection of poems on the archaeology and myths of Peru and Bolivia, which was written while he was a Senior Fulbright-Hays Fellow during 1976-77. The poems will be illustrated by slides of the various archaeological sites and artifacts which inspired them.

Tay-Sachs testing available today (May 7)

In an effort to reduce the incidence of an incurable disease, the University will hold a Tay-Sachs Testing Day, Thursday, May 7, from 2 to 6 p.m. in the HUB Ballroom.

Testing will be administered by medical personnel from the Tay-Sachs Prevention Program of the Thomas Jefferson University and the Delaware Valley Chapter of the National Tay-Sachs and Allied Diseases Association.

"Tay-Sachs disease is caused by the absence of a vital enzyme, causing the deterioration of a child's nervous system," says Dr. Ron Yasin, assistant professor of microbiology.

"Death usually occurs by the age of 5 or 6."

Because Tay-Sachs can only occur when two carriers reproduce, the disease is preventable through the testing of potential carriers.

"Although carriers can never develop the disease themselves, it is important that they know their status in the event they marry another carrier," Dr. Yasin says. "One of every 300 Americans is a carrier of the Tay-Sachs gene, and among Jewish Americans the incidence — one of every 25 — is substantially higher."

Philosophy hosts Heidegger Conference and tribute to Emeritus Professor John Anderson

Dr. Joseph J. Kockelmans, professor of philosophy, will be one of seven speakers participating in the 15th Annual Heidegger Conference, to be hosted by the University May 15 through 17.

Other speakers are David Kolb, Bates College; Wilhelm Wurzler and Andre Schuwer, Duquesne University; John D. Caputo, Villanova University; Michael Zimmerman, Tulane University; and Samuel Ijsseling, University of Louvain and director of the Husserl Archives.

Additional information may be obtained from the Department of Philosophy by telephoning 865-6397.

The Department of Philosophy is sponsoring "A Tribute to the Philosophy of John M. Anderson" on Sunday, May 17, beginning at 2:30 p.m. in Room 124 Sparks Building.

A dinner will be held at 6 p.m., followed by a second session at 7:30 p.m.

Dr. Anderson, who is Evan Pugh Professor Emeritus of Philosophy and a

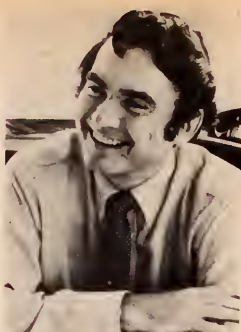

former head of the Department of Philosophy, retired in 1980 after 34 years at the University.

Among his writings are three books, *The Truth of Freedom*, *The Realm of Art* and *The Individual and the New World*. He also co-authored *Natural Deduction: The Logic of Axiom Systems*.

Participants in the first session of the Tribute include Cyril Welch of Mt. Allison University; John Bailiff of the University of Wisconsin-Stevens Point; Barbara Anderson; and Michael Heim of Missouri Western State College.

Henry Johnstone Jr., professor of philosophy at the University, will make a dinner speech. At the 7:30 p.m. session, discussants include Webster Hood of Central Washington University; John Muriungi of Towson State University; Orville Clark of the University of Wisconsin-Green Bay; and Steven Gans of the University of Maryland.

Dr. Anderson will offer responses at both sessions, which follow the May 15-17 Heidegger Conference.

Dr. Gallagher

Education Alumni Fellow to visit May 12-15

Dr. James J. Gallagher, director of the Frank Porter Graham Child Development Center and Kenan Professor of Education at the University of North Carolina, will return to University Park May 12-15 as an Alumni Fellow.

Dr. Gallagher, who received his M.S. (1950) and Ph.D. (1951) from the University, will be a guest of the College of Education under a program sponsored by the Penn State Alumni Association.

Named to his present positions in 1970, Dr. Gallagher previously served as deputy assistant secretary for planning, research and evaluation in the U.S. Office of Education in Washington, D.C. Earlier he was an associate commissioner and chief of the Bureau of Education for the Handicapped with the Office of Education.

His academic experience has included a professorship at the University of Illinois, where he was also associate director for the Institute for Research on Exceptional Children. He was a visiting adjunct professor at Duke University.

A former president of the Council for Exceptional Children, Dr. Gallagher has written many articles for the professional journals. Among his published books is *Teaching the Gifted Child*.

Admission guidelines approved for major

New guidelines for admission to the undergraduate advising major in the College of the Liberal Arts have been approved.

"Effective immediately, applicants will have to have achieved six term standing with a minimum cumulative grade point average of 3.0," Dr. Robert E. Dunham, vice president for undergraduate studies, reports.

Applicants also will have to have completed Economics 2, a course in methods of economic analysis, and English 20 (or 30), composition and rhetoric, with grades of C or higher. In addition, they will have to have attained the 12-credit proficiency level in a foreign language.

In the past, requirements for admission to the major were a minimum cumulative GPA of 2.0, completion of at least the first term of a foreign language with a grade of C or higher, and a grade of C or higher in any advertising course already taken. Generally, liberal arts students request to be admitted to a specific major any time between their third and seventh terms of study.

According to Dr. Dunham and Liberal Arts Dean Stanley Paulson, the new policy is being implemented because of over-enrollment in the major. It will apply to all freshmen admitted to the University during the 1980 Fall Term or later.

Liberal Arts and Division of Undergraduate Studies students admitted before that time who have declared their intention to major in advertising but not yet enrolled in a major may enter the major if they comply with the original requirements.

College holding regional spring meetings

The College of Human Development is reaching out again this spring to establish closer ties with its faculty members, administrators and constituents throughout the Penn State system.

Four regional meetings are being held to help the College work more effectively in delivering its programs of instruction, research and service at Penn State's various campuses.

A team of College administrators travels to the meetings, which are being hosted by the Altoona, Berks, McKeesport and Worthington Scranton Campuses. Attending are Campus administrators, faculty members from both the Resident Instruction and Continuing Education programs, students and alumni.

William Parsonage, faculty associate to the Dean, explains that the meetings are designed to:

- update those present on the current programs and future directions of the College;
- provide an opportunity for input and exchange with Campus representatives;

— offer a faculty development program. Dr. Helen Snyder, associate professor of educational psychology, leads a discussion of such topics as techniques for handling difficult classroom situations, effective evaluation modes, and special issues in teaching adult students.

The campaign is an outgrowth of a "Human Development — Action '80" program held at University Park last fall.

In addition to Professor Parsonage, College administrators attending the meetings include Margaret S. Bastuscheck and Martha L. Starling. Dean Evan G. Pattishall Jr., Associate Dean Edward V. Ellis and selected program heads from the College are also attending some of the meetings, along with Continuing Education representatives and J. Thomas Kidd of the Alumni Association.

The program, which was held for the first time last year, is a cooperative venture of the Commonwealth Education System, the College of Human Development, and the Human Development Alumni Society.

Time management seminar to be held May 13

The concept of time management and its relationship to increased profits and productivity is the subject of a Penn State seminar scheduled for Wednesday, May 13, from 8:30 a.m. to 4:30 p.m. at the J. Orvis Keller Conference Center.

"Time Management for Managers and Supervisors" is a program for persons who want to learn effective methods of analyzing and budgeting for time needs.

The instructor, John W. Hamilton, assistant professor of management development at Behrend College, was formerly the assistant secretary and

director of industrial relations with the Manufacturers Association of Erie. In this capacity, he counseled and advised the top management of 115 diversified manufacturing firms and 30 commercial businesses in all aspects of labor management relations.

Persons wishing to preregister or receive further information about the program, which is being offered as a cooperative continuing education service of the Colleges of Business Administration, Engineering and the Liberal Arts, should call Continuing Education (814) 865-3443.

Hotel safety advice offered for travelers

In the aftermath of deadly hotel fires — such as the one that struck the MGM Grand in Las Vegas late last year — considerable attention has been focused on sprinkler and alarm systems and other structural safety features.

But according to University fire prevention specialist Tom Hand, travelers should also be prepared to look out for themselves, for even the best fire alarm and safety equipment cannot negate a frequent killer: panic.

"Surviving a hotel fire requires that people keep cool by being prepared to escape," says Mr. Hand.

"As soon as they put down their suitcases, travelers should take a few minutes to become aware of their surroundings and the fire safety equipment which could save their lives," he advises.

Procedures to follow include:

- locating two ways out of the building which are as remote from each other as possible;
 - locating the nearest fire extinguisher and determining whether it is fully operational;
 - locating the nearest in-house fire hoses;
 - locating the nearest fire alarm pull station and determining how to activate it;
 - counting the number of doorways between one's room and the means of escape, information which could save the life of a traveler forced to exit in heavy smoke;
 - checking the room telephone or directory for emergency numbers;
 - determining how windows open and planning an escape route through them.
- "If all of these checks sound like a lot of work," Mr. Hand concludes, "travelers should realize that they could save a life."

Arts Roundup

Two Brazilian films to be shown in Eisenhower

The opportunity to see Brazil as Brazilians see it will be offered at the first formal program of the Telecommunications Project for the Americas, a new activity of the University's Division of Media and Learning Resources in Continuing Education.

The program, "A Brazilian Film Fest," begins Monday, May 11, at 8 p.m., with the showing of *Bye Bye Brazil*, a film widely acclaimed following its release in this country last year, and continues the next evening at the same time with the presentation of *Tent of Miracles*. Both films will be shown in Eisenhower Auditorium.

Bye Bye Brazil follows a tatty caravan of entertainers searching the Brazilian back country for audiences. Writer-director Carlow Diegues moves his oddball troupe through a native rite with wild contrasts and cultural contradictions.

Tent of Miracles portrays the role of black culture in the New World. Based on the Jorge Amado novel of the same name, the film offers a carnivalesque panorama of life in Bahia, the area of Brazil most imbued with the spirit of African culture.

A colloquium will be held in conjunction with the film fest on May 12 at 2:30 p.m. in the HUB Gallery Lounge. The Brazilian Embassy's cultural affairs officer, Luiz Felipe Seixas Correa, will join faculty members and students in a discussion of political and historical influences on the arts in Brazil.

Admission is free, and the public is invited to both the film showings and the colloquium, which are being sponsored by the Division of Media and Learning Resources, the Latin American Studies Program, the Black Studies Program, and the International Student Affairs Office.

The Telecommunications Project for the Americas was created to enhance mutual understanding between North and South America through the use of telecommunications to increase the flow of cultural, technical, and educational information and programs.

Orchestra to play May 9

A program of 19th century works has been planned for the Penn State Symphony Orchestra's final concert of the season Saturday, May 9, at 8:30 p.m., in Eisenhower Auditorium.

The symphony will open the concert with Beethoven's "Egmont Overture," followed by Schubert's Symphony No. 8 in B Minor, commonly called the "Unfinished Symphony."

To close the program, the Symphony will perform the overture to Wagner's *Die Meistersinger* and Brahms's "Academic Festival Overture."

Dr. D. Douglas Miller, associate professor of music, directs the Symphony.

Glee Club, Women's Chorus offer Mother's Day concert

The Penn State Glee Club and the Penn State Women's Chorus will be assisted by baritone Robert Trehy, professor of music and a Fellow in the Institute for the Arts and Humanities Studies, for the annual Mother's Day Concert. The concert is scheduled May 10 at 3 p.m. in Schwab Auditorium.

Among the selections to be performed by the Women's Chorus are Poulenc's "Ave Verum"; Elgar's "The Snow," opus 26, No. 1, with violinists Margaret Lecrone and Barbara Hess and pianist Brenda Harsch; and two mountain ballads arranged by Ron Nelson, "He's Gone Away" and "Barbara Allen."

Gustav Holst's score for the Walt Whitman poem, "Dirge for Two Veterans," and Janacek's "Veni Sancte Spiritus" will be sung in the Glee Club's portion of the

program. The Hi-Los will perform Marshall Barnes' "The Bat," set to a poem by Conrad Aiken, with piano accompaniment by Patrick Finley. William Appling's arrangement of "We Shall Walk Through the Valley in Peace" and William Smith's arrangement of "Ride the Chariot."

Selections from Kurt Weill's *Lost in the Stars*, based on Alan Paton's novel *Cry, The Beloved Country* with lyrics by Maxwell Anderson, comprise the third and final portion of the program, in which Professor Trehy will be featured. This portion of the concert is dedicated to the memory of the Atlanta children.

The Penn State Glee Club and the Women's Chorus are directed by Bruce Trinkle, associate professor of music. Mr. Finley is assistant director of the Glee Club and Ms. Harsch assists with the Women's Chorus.

Bach works to be played at guitar, flute recital

Guitarist Lawrence Rich and flutist Jeanne Swack, both instructors in the School of Music, will be joined by guitarist Julian Gray, chairman of the guitar program at Essex Community College in Baltimore County, Md., for a Sunday, May 10, concert at 7:30 p.m. in the Music Building Recital Hall.

Mr. Gray and Mr. Rich will begin the program with performances of John Dowland's "My Lord Willoughby His Welcome Home" and two anonymous selections, "La Rossignol" and "Drewrie's Accordes." Mr. Gray will then play Bach's Prelude in D Minor and Fugue in A Minor, and Mr. Rich and Ms. Swack will close the first part of the concert with the four-movement Sonata, opus 85 by Mauro Giuliani.

The two guitarists will perform Bach's Prelude in E Major and invention in A Minor to open the second portion of the concert. Mr. Gray will be featured on the Prelude No. 5, Etude No. 8 and Etude No. 12 by Hector Villa-Lobos, and both guitarists will join to perform the final numbers on the program, Giovanni Battista Marella's Menuet I and II and Ferdinando Carulli's Duo, opus 34.

Chamber concert May 13

The Penn State Symphonic Wind Ensemble, conducted by Smith Toulson, will present a chamber music concert on Wednesday, May 13, at 8:30 p.m. in the Music Building Recital Hall.

The group has selected a piece by Paul ensemble, the fanfare to "La Peri" by Brax Dukas, to open its program. Three brass quintets will perform Gabriel's "Canzon quarti Toni" for the concert's second number. Gabriel, who lived in the late 16th and 17th centuries, was the composer for St. Mark's Cathedral in Venice. The numerous choir lofts which had been built into the cathedral influenced the composer to write highly polyphonic works.

Following several selections by the Penn State Percussion Ensemble, members of the Symphonic Wind Ensemble and several guests will perform Dvorak's Serenade in D Minor for Woodwinds, Horns, Cello and Bass to close the concert.

Children's Ensemble to appear in Pavilion

The Penn State Children's Theatre Ensemble will stage a special presentation of "World Winds" on Mother's Day, Sunday, May 10, Set for 1 p.m. in the Pavilion Theatre, the show is open to the public.

"World Winds" has been touring the elementary schools of central Pennsylvania throughout the winter and spring terms. Based on stories set in by school children, the play was worked into final form by the members of the Ensemble through improvisation. It is about two children who travel to six countries around the world in one night.

Stephen Porter, associate professor of art, loads one of his sculptures for a trip to Washington, D.C., where he is currently having a one-man show at the Diane Brown Gallery. Earlier, his work was shown in solo exhibits at the Betty Parsons Gallery in New York City and at the Huntington (W. Va.) Galleries.

Faculty/Staff Alerts

Employment of minors

This is the time of year when those who do hiring should keep in mind State and federal regulations and University policy on the employment of minors.

The law defines a minor, for employment purposes, as anyone under age 18 who has not been graduated from high school. (There is an exception to this. If the chief administrator of the school district determines that an individual under age 18 has attained his or her academic potential and declares that a high school graduation is not required, that person no longer is considered a minor for purposes of employment.)

By University policy, P-5, Employment of Minors, a person under 16 years of age is not permitted to work for the University under any circumstances. In addition, by law, no minor age 16 or 17 for one hour, unless he or she obtains and submits a certificate of employment (commonly called "working papers").

The certificate of employment is issued by the public school authority in which the minor resides. (Certain special arrangements for obtaining certificates can be made for minors who attended school a long distance from the area in which they are being employed.) The employment certificate must be on file in the University's Employment Office (or appropriate business or personnel office at facilities away from University Park) before a minor begins to work. The certificate is issued for a specific job, and a minor cannot be transferred from one job to another unless a new certificate is obtained for the new job. Also, the Employment Division (or business or personnel office) must be notified when the minor terminates so that the certificate can be returned to the issuing school district.

Where there is any doubt about the age of an applicant for a position, the applicant

must submit a proof of age card. This card also is issued by the minor's school district. A birth certificate should not be required.

Please refer to policy P-5-2 if you are contemplating employing a minor. Any questions concerning the policy or the employment certificate procedure should be directed to the Employment Division 865-1387 (Network number 475-1387).

Benefits available between Fixed-Term I appointments

Faculty or staff members on Fixed-Term I appointments may continue certain University benefit programs for the period between appointments, provided they have a firm commitment of re-employment on a Fixed-Term or Standing Appointment basis to begin within no more than three months of the end of the last appointment.

A faculty or staff member may continue the benefit coverage by paying the full rates including the University and the faculty or staff member's share of the cost of the group life insurance and hospital/surgical/major medical, dental and vision coverage, and, if applicable, the voluntary accidental death and dismemberment insurance. However, after three years of continuous Fixed-Term I service (of nine months or more each year), and a commitment of re-employment for the next academic year, the benefits are provided at the regular rates (the amount that is normally deducted from the faculty or staff member's salary).

Any Fixed-Term I faculty or staff member interested in continuing benefit coverage (including dependent coverage) should contact his or her Personnel Representative or Business Manager to complete the necessary form for coverage. This must be completed prior to the expiration of the current Fixed-Term I appointment.

Questions regarding this program should be directed to the Employee Benefits Division (865-1473 or Network 475-1473).

Awards

(Continued from page 1)

Dean Hosler

provide faculty members with maximum independence to pursue their interests and to be productive."

In keeping with his conception of his role, Dean Hosler tries to teach undergraduate courses regularly and to remain active professionally.

"The faculty should feel you can compete in their arena as a researcher and teacher," Dean Hosler says, adding that he believes this activity is essential to his understanding of the faculty's efforts.

Dean Hosler also runs an open office from the standpoint of the students in his College. Once a week, the Dean's Office sponsors a Tuesday afternoon "social" for undergraduate and graduate students, supplying ice cream or punch and cookies.

Student appreciation is expressed in the form of checks — sent in by College alumni to help pay for the continuance of the program.

A native of Honey Brook, Pa., Dr. Hosler received his bachelor's degree in meteorology at Penn State following Naval service in the Asian Theater in World War II. He also earned master's and doctoral degrees in meteorology at the University.

He joined the faculty in 1948 and headed the Department of Meteorology from 1961-65.

A pioneer in weather modification research, he recently received the 1981 Charles Franklin Brooks Award for Outstanding Service to the American Meteorological Society, of which he is a fellow and former president.

A member of the National Academy of Engineering, Dr. Hosler is chairman of the National Academy of Sciences/National Academy of Engineering Stormfury Advisory Panel, as well as the Weather Modification Advisory Panel of the Office of Science and Technology Policy. He has served as a consultant to numerous private corporations and government agencies, including U.S. Senate and House committees.

"I never thought of becoming a dean,"

he says. "As a student, I always thought of a dean as someone with a black suit and gold-rimmed glasses."

"I've been fortunate to have worked with a great many fine department heads and administrators in my College, all of whom manage to keep active in their fields. As a faculty, we have tried to operate pretty much by consensus."

Dr. Marlow

College Board of Trustees, the Centre County Vo-Tech School General Advisory Committee and the Faith United Methodist Church in Bellefonte.

"We all have the same number of hours," Dr. Marlow says, "and we do what we want to do. I'm the kind of person who just can't sit still and do nothing."

He admits that he may have a slight advantage over the average volunteer worker since he teaches time management! If his activities often take him away from his family, at least in one case they brought him closer to them. That was in 1979-80 when, with his wife Mildred, he chaired the Centre County Cancer Crusade in the organization's most successful drive to that point.

Dr. Marlow's face lights up when he talks about the four levels of care available at the United Methodist Home, for whom he has worked for more than 23 years. He is president of the Board of Directors, the first layman to hold that post.

He is also proud of the plaque on his office wall heralding his selection as "Boss of the Year" in 1980 by the Centre County Chapter of the National Secretaries Association.

As head of Management Development Services, Dr. Marlow is responsible for more than 100 full-time and part-time faculty members who conduct conferences, courses and workshops throughout the State.

As director of PENNTAP, he coordinates the statewide technical information network which disseminates information to business, industry, health organizations and government.

He received his bachelor's and master's degrees from the University of Maryland and the doctor of education degree from

the New York State School of Industrial and Labor Relations at Cornell University. He came to Penn State in 1962.

Professor Mann

who are working in their fields."

In contrast to many rare books librarians, who strive to keep the public out of their domains, Professor Mann believes in sharing the special ambience of Pattee's Rare Books Room for appropriate functions. He has hosted many receptions there, not only for visitors to the Libraries but also on such occasions as the opening of the History of Photography spring lecture series and Black History Week. He also arranges regular exhibits — to complement conferences held on campus, to honor retirees or to mark a faculty member's contribution. The current exhibit of Paul West memorabilia, for example, is being held in conjunction with Professor West's Governor's Award for Excellence in the Arts.

A faculty member who Professor Mann knows collects books is apt to find catalogs of materials in his subject field appearing in his mail, and Professor Mann willingly make time to appraise books acquired by faculty members.

A native of Altoona, Professor Mann received his bachelor and master of science degrees at Penn State and his master of library science degree at Rutgers University.

His fields of research specialization include bibliography, literature of the British Commonwealth, Ernest Hemingway, art history, emblem literature and rare books. He recently was named a Fellow of the University's Institute for the Arts and Humanistic Studies.

Professor Mann is co-author of *The Hemingway Manuscripts*, and has written extensively in professional and scholarly publications.

Previously, he was cited by the College of the Liberal Arts for "contributions to scholarship and research and for his assistance to faculty members and visiting professors."

In 1974, he received the first award for Outstanding Contributions to The Pennsylvania State University Libraries.

was one of the new breed of upwardly mobile political figures, quick to profit from the expanding economy of the post-Revolutionary and early national years, yet caught up in the challenges of state and nation-building."

A ten-aged indentured servant from Ireland in 1764, Lyon at the end of the Revolution was a militia colonel, a developer of an iron manufacturing town, and a founder of the new state of Vermont. Elected to the House of Representatives in 1796, Lyon in 1801 transplanted his family to the Kentucky frontier, founded a mercantile town and was again elected to Congress.

In concluding her biography, Dr. Austin confronts the contradictory elements in Lyon's personality and behavior, particularly the ambivalence between his opportunism and his dedication to the principles of the American Revolution. She further suggests that there is an ambivalence in the American Revolutionary tradition which Lyon embodies. In essence, this "new man" combined the pursuit of happiness for public well-being with the pursuit of property for private advancement.

Milton and Augustine: Patterns of Augustinian Thought in Milton's *Paradise Lost*. By Peter A. Fiore. 144 pages. \$14.50.

The first complete study of the influence of Augustine on Milton's epic of the Fall of Man, this book presents a detailed investigation of the principal dogmatic concepts in *Paradise Lost*, studied against the background of Augustinian theology. Dr. Fiore shows how Milton — unlike most other Puritans, but like Augustine — always emphasized hope in "God's infinite mercy."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all university employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (ext. 1000) (TS-1387). Applications for these staff vacancies will be accepted until 3 p.m., May 14, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

APPLICATIONS PROGRAMMER/ANALYST, OFFICE OF PLANNING AND BUDGET, University Park. Together with the Lead Applications Analyst/Programmer, conduct analyses of data processing and customer data problems and needs. Determine detailed requirements for solving problems and prepare computer programs and systems to achieve desired end results. Baccalaureate degree or equivalent experience in computer science and two to three years of effective experience in computer programming and analysis required. Knowledge of RULI and/or Cobol programming languages and structured programming techniques helpful.

ASSISTANT FOOD SUPERVISOR, HOUSING AND FOOD SERVICES, University Park. Responsible for assisting in the supervision of dining hall operations, to include implementation of University and departmental procedures and policies. Bachelor's degree in hotel and restaurant management, institutional management, food and nutrition, or equivalent.

CURATOR, PIANOS AND ORGANS, COLLEGE OF ARTS AND ARCHITECTURE, University Park. Responsible to Director of the School of Music and the Director of University Arts Services for procurement, artistic performance and maintenance of University owned pianos and organs and other stringed instruments. Duties include tuning, restoration of pianos and organs, conducting lectures on piano technology, coordinating purchase of new instruments, and overall responsibility for the School of Music's and University Arts Services pianos and organs. Formal piano technician training or equivalent in conservation of musical instruments and two to four years effective experience. Membership in the Piano Technician's Guild is required.

SUPERVISOR OF ADMISSIONS OPERATIONS, UNDERGRADUATE ADMISSIONS, University Park. Responsible to the Director of Undergraduate Admissions for managing all support functions to insure the effective operation of the office. Serve as a coordinator between the staff and clerical employees carrying out approved policies and procedures for the office. Coordinate with Management Services, Bursar, and other offices on admission matters. Bachelor's degree (or equivalent) plus one to two years of effective experience in office supervision.

ADMISSIONS COUNSEL I, UNDERGRADUATE ADMISSIONS, University Park. Responsible to the Assistant Director of Admissions for general assistance in handling of the more routine admissions matters in an assigned regional area. Participate in and administer admissions activities for freshmen, advanced standing, transfer, postgraduate, and graduate students who are baccalaureate or associate degree candidates for University Park Campus and for assigned Commonwealth Campuses and Behrend College. Bachelor's degree (or equivalent), plus 6 to 9 months of effective experience in educational administration. A record of participation in and contribution to extracurricular or avocational or civic activity desirable.

GRANTS & CONTRACTS OFFICER, COLLEGE OF MEDICINE, Hershey. Responsible to the Director of Grants and Contracts for meeting the requirements of the various federal agencies with respect to the negotiation of contracts, subcontracts and grants, and to assist with proposals, analyses, reviews and recommendations as to acceptance of contracts and grants with the various federal agencies and non-federal organizations. A bachelor's degree with some accounting training, four to five years of related effective experience. Familiarity with University and governmental accounting procedures and policies desirable but not required.

In this study, Dr. Fiore concentrates mainly on Augustine's and Milton's teaching on the Fall of the Angels, preternatural Adam and Eve, Original Sin, the Incarnation, Christology, and Redemption. The author concludes that Milton, like many humanists, Christian philosophers, Reformers and theologians of every variety in the early 17th century, drew widely from Augustine. Furthermore, such indebtedness gave a richer and fuller theological dimension to Milton's epic of lost paradise and enhanced the meaning of the poem.

July 31 deadline set for activities, publications data

Members of the faculty and staff who wish their publications and professional activities listed in the University's annual bibliographies should send this information to their department heads, research deans or intercollegiate research unit directors.

Detailed instructions for the submission of these listings are given in a May 1 memo from Dr. R.G. Cunningham, vice president for research and graduate studies. Copies of this memo are available from department heads or research deans.

Commonwealth Campus faculty members should send their listings to the respective department head at University Park, with an informational copy to their Campus director and Commonwealth Campus dean.

Submissions should be in the department head's hands in sufficient time to reach the Office of the Vice President for Research and Graduate Studies by July 31.

The bibliography is printed in two publications: "Research Publications and Professional Activities" and "University Publications, Reports to Agencies, and Reviews." To be included are books, research papers and articles, substantive and/or final reports sent to State and federal agencies, informational material (articles and reports) printed in non-standard journals, and novels, short stories, musical compositions, exhibits of fine arts, reviews, inventions, patents and any other activity that meets recognized standards of excellence in its field.

From the Press

Senior Adult Theatre: The American Theatre Association Handbook. Roger Cornish and C. Robert Kase, Editors. 96 pages. \$8.95, cloth; \$5.95, paperback.

Concrete suggestions for starting and developing theatre experiences for all types of senior adults are presented in this volume by Dr. Roger Cornish, associate professor of theatre arts at Penn State, and co-editor C. Robert Kase. This handbook is designed to help three groups: professional theatre people who may become involved in projects for older persons; professional workers with the elderly who may want to recruit or work with theatre people; and senior adults who may want to encourage and enjoy a theatre project. In another sense, it is a descriptive catalog of ways to enrich life in retirement centers, nursing homes, and other settings for the elderly.

Dr. Cornish, also an associate of the University's Gerontology Institute, is the author of *Short Plays for the Long Living*. Support for his current book was provided by the American Theatre Association.

Matthew Lyon: "New Man" of the Democratic Revolution, 1749-1822. By Aline Austin. Foreword by Richard B. Morris. 208 pages. \$16.50.

Richard B. Morris, a professor at Columbia University, describes Dr. Austin's book in his foreword as a "fascinating" and "splendidly researched biography."

"As Dr. Austin persuasively portrays him," Professor Morris continues, "Lyon

Penn State Intercom

Senate passes recommendations on PS-23, University Libraries

Role of adviser, Council procedures spelled out

With the end of the academic year fast approaching, the University Faculty Senate took up eight legislative reports at its May 5 meeting and passed seven.

The lone item to meet defeat sought to shift responsibility for preparing fiscal impact statements on proposed legislation from the Committee on Academic and Physical Planning to the committees actually preparing legislation. A number of senators protested that valuable legislation might never leave committee if senators were inhibited by concerns about roasting.

Passed by the Senate were:

- A proposal from the Committee on Libraries recommending that the University Administration "give the University Libraries a higher priority in financial support in the coming years than has been the case during the decade just past."

- Five changes in academic policies and procedures in respect to advising. The role of the academic adviser is defined as "consultative in nature," and the responsibility for deciding on course scheduling and program planning is placed with the student.

- A recommendation that responsibility for certifying the academic eligibility of students for athletic grants-in-aid revert to the Committee on Academic and Athletic Standards.

- An alteration of the membership of the Committee on Committees and Rules to include 10 elected faculty senators (voting) and the chairman-elect and past-chairman of the Senate (non-voting). Previously, the secretary of the Senate had

(Both these stories continue on page 3.)

Calendar change offers chance for broad review

Speaking to the Senate on the topic of calendar conversion, President Oswald offered his " fervent hope " that the change will be viewed as a major opportunity for academic renewal.

Rather than being a merely mechanical shake-up of time periods and schedules, Penn State's colleges and academic departments have a chance " for broad review," Dr. Oswald said.

As curricula and courses come under scrutiny, faculty members can consider such matters as course prerequisites, the total units required for graduation, baccalaureate degree requirements, possible combinations of courses, removal of courses that may seem unnecessary, and the addition of courses where deemed appropriate.

Dr. Oswald also voiced his hope that the eight-week summer session would be organized to serve all segments of the public.

"I hope it can be set up," the President added, "so that its fees are independent of other fees in the institution and so that it can function as nearly as possible as a self-supporting activity."

The President concluded his remarks with a statement emphasizing to the colleges and academic departments at University Park "that it is absolutely critically important that the Commonwealth Campus faculty members participate fully from the outset in the calendar review process and ultimately in the converted calendar."

Dr. Oswald referred also to a letter which he had sent to Senate Chairman George Franz and which Dr. Franz had

At left, President Oswald and Dr. Flay. Right, Dr. Lewis.

Philosopher and geographer will receive Lindback awards May 30

Dr. Peirce F. Lewis, professor of geography, and Dr. Joseph C. Flay, associate professor of philosophy, will receive the 1981 Christian R. and Mary F. Lindback Awards for Distinguished Teaching.

President Oswald will present the awards, each of which includes a \$1,000 check and a plaque, at Spring Term commencement exercises on Saturday, May 30.

Words such as "enthusiasm," "imagination" and "verve" tend to be used repeatedly when Peirce Lewis's teaching is described by others. His zest for geography is apparent in all his writings — as witness this section from a laboratory instructor's manual he prepared for Geography 2.

"It is a law of nature that people like to do things that they do well, and if you can get your students to learn to read topographic maps easily, you may discover them falling in love with the things. If that happens, your labs will be an unalloyed pleasure — both for you and the students. It has been said that 'learning can be fun.' I would amend the statement; learning *must* be fun, or not much learning will occur."

A member of the faculty since 1958, Dr. Lewis consistently receives the highest possible student teaching evaluations. A colleague noted, "One of his biggest problems is shaking loose from the young people clustering around him after class."

Dr. Lewis's insistence on getting students to reason for themselves and his emphasis on written work are reflected in his course, *The American Scene, Geography 102*. The overriding goal of the course is to help students comprehend the landscape around them. To accomplish this, Dr. Lewis takes his classes on a field trip to Bellefonte and describes what he sees there. The students are then turned loose on a prescribed route through State College and required to write about what they have seen.

When it comes to writing up field reports, Dr. Lewis makes his expectations clear in his handouts:

"Content: High marks will go to papers which derive intelligent generalizations from accurate and appropriate factual information. Note the combination. Description by itself is usually quite dull. Generalizations without supporting evidence are just so much hot air. The combination of fact and generalization is

Many teachers are popular with their classes, but the real test of teaching excellence comes after students have been away from campus for a time and can better assess the value of their training.

Joseph Flay's former students are unstinting in their praise. One of them recalls:

"Joe Flay worked relentlessly in his own studies and on his class presentations. Class lectures appeared to his students to be chapters in a finished book — they were even footnoted. Serious questions in class brought forth thoughtful answers and, many times, a written response at a later class. He always respected questions or disagreements. He would get excited by well thought-out disagreements from students and encourage us to pursue our ideas further."

Dr. Flay's regard for students has been apparent ever since he joined the faculty as an instructor in 1963. Another former student, who is now a professor of philosophy himself, wrote:

"Professor Flay is a teacher. My criteria: He cares. Such care was amply demonstrated in the amount of time he spent discussing with us outside his classes. I first met Professor Flay in an 'outcasts' seminar on Hegel's *Philosophy of Right*, conducted in a student apartment. We had many such seminars. We sat in his lecture courses and learned, yes, for they were intense and demanding. But we spent hours talking with him outside those courses."

Active in the University Faculty Senate's revision of Baccalaureate Degree Requirements at Penn State, Dr. Flay has introduced new courses to the University's Liberal Arts offerings, among them a popular course in business ethics for students planning to pursue business careers.

He also played a key role in the redesign of the Department of Philosophy's undergraduate major, wrote a

Predicting toxic potential

Editor's Note: This article, in which a faculty member describes his on-going research, is one in a new series which INTERCOM will publish from time to time.

By Peter C. Jurs
Professor of Chemistry

While many chemicals are known to induce cancer in test animals and in man, slight variations in the exact chemical constitution of a compound can create large changes in its carcinogenic potential. We know, for example, that polycyclic aromatic hydrocarbons (PAH) found in

soot and tar are the active cancer-causing agents leading to chimney-sweepers' cancer — a form described as far back as 1775 by Sir Percival Pott. But not all polycyclic aromatic hydrocarbons induce cancer. The underlying mechanisms of cancer induction are extremely complex, and the study of relationships between the structures of compounds and their biological activity is a research area currently attracting widespread interest.

The members of my research group are pursuing a series of research projects focused on this area of structure-activity relations. As a part of our effort, we have developed a computer software system that provides us with all the tools needed to perform structure-activity relationship (SAR) studies. The types of problems we attack are usually posed as follows: Given a large set of compounds of known chemical structure which have previously been tested for carcinogenic activity, can we find a mathematical relationship based on their structures that separates the carcinogenic compounds from the non-carcinogenic compounds? In one typical study, we are working with a set of 300 polycyclic aromatic hydrocarbons (192 active carcinogens and 108 non-carcinogens) taken from the literature.

Penn Staters

Don N. Page, assistant professor of physics, was an invited speaker May 4 at a colloquium held at the Joint Center for Astrophysics in Harvard University's Physics Department. The colloquium was entitled "The Future of the Universe." Dr. Page's contribution to the colloquium, a review of research on the possible long-term future of the universe, consisted of two papers prepared by him and M. Randall McKee, a graduate student in the Department of Astronomy at the University. The papers were titled "Matter Annihilation in the Late Universe" and "Eternity Matters."

Dr. Deborah F. Hunter, assistant professor of speech communication at Delaware County, has been selected as a participant in the World Congress on Black Communication to be held this summer at the University of Nairobi, Kenya. She will present a paper, "A Critical Evaluation of Afrocentricity: from *Hama* ('moving from' in Swahili) to *Hamia* ('moving to')." She was invited to the conference, sponsored by Howard University and the University of Nairobi, on the basis of a competitive paper selection.

Roy C. Buck, professor of sociology and social science, presented a paper at the University of Edinburgh in connection with an international symposium on tourism research and development. "Explorations in Socio-Cultural Bifurcation: The Ecology of a Tourist Habitat" was the title of the paper, which drew on data from a Lancaster County tourism study carried out by Professor Buck.

Associate professor of mathematics Torrence D. Parsons conducted a combinatorics seminar in the mathematics department at the Massachusetts Institute of Technology April 21. Dr. Parsons' lecture for the seminar was entitled "Longest Cycles in r -Regular n -Connected Graphs."

Patricia A. Ward, associate professor of French and comparative literature, was recently named Humanities Editor of *The Christian Scholar's Review*. Now in its 11th year of publication, *CSR* is an interdisciplinary journal giving a theological perspective on the sciences and humanities.

Dr. Robert Ginsberg, professor of philosophy at Delaware County, has been named to the editorial board of the *Journal of Social Philosophy*.

Two University faculty members, Dr. Della M. Roy, professor of materials science, and Dr. Richard E. Tressler, associate professor and chairman of the Ceramic Science and Engineering Program, were among 20 new Fellows of the American Ceramic Society honored at the Society's 83rd annual meeting in Washington, D.C., this week.

William Bradley, associate professor of art, recently presented two research papers in Halifax, Nova Scotia. His lecture titles were: "Long Action as Gestural Integrity" and "Events and Works." Professor Bradley was invited to speak by the Nova Scotia College of Art and Design.

Dr. Joseph Jordan, professor of chemistry, was an invited speaker May 6 at the University of Delaware where he presented a talk entitled "Electrochemical Modeling of Biological Systems."

Bookshelf

Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, is co-editor of a new book, *Heartbreak House: A Facsimile of the Revised Typescript*, published by Garland Publishing Company of New York.

With Dr. Anne Wright, head of humanities at the Hatfield Polytechnic (the

college geographically closest to Shaw's home at Ayot St. Lawrence in Hertfordshire), Dr. Weintraub has published for the first time the much revised typescript of Shaw's *Heartbreak House*. It was the play Shaw considered his best, but the manuscript is presumed destroyed; and the revised text itself was turned lost after Shaw's death until it came up among his solicitor's papers in 1977 and was eventually purchased for the nation at auction.

Dr. Weintraub was asked by the Shaw Estate to put it into shape for publication, and write an introduction to the manuscript. He enlisted Dr. Wright, an English Shaw scholar, as co-editor, and she utilized infra-red and ultra-violet examination of the paste-overs to determine what appeared underneath.

The volume is first in what will be a series of facsimile publications of surviving Shaw play manuscripts.

Partings

Prof. Bartlett

Mr. Packer

Howard D. Bartlett, a member of the faculty since 1956, retired May 1 as professor emeritus of agricultural engineering.

Professor Bartlett, who taught courses dealing with farm building construction and environmental control, supervised 48 graduate students. His primary research interests were related to poultry house ventilation, mechanical feeding of sows and grain, liquid manure injection into soil, and energy recovery from animal wastes. Within the past five years, Professor Bartlett chaired program review committees in the Colleges of Agriculture and Engineering. He was acting head of his department during 1975-76.

Before coming to Penn State in 1956, Professor Bartlett served at the University of Maine as a research project leader. He holds three degrees from the University of Maine — undergraduate degrees in both agricultural engineering and civil engineering, and a master's degree in agricultural engineering.

There are 295 washing machines and 261 dryers on campus, and W. Clark Packer is acquainted with all of them.

Mr. Packer, maintenance supervisor in Housing and Food Services, retired May 1 after working for the University since 1946. For the better part of his tenure, he was in charge of overseeing maintenance of the University's washers, dryers and the some 18 ticket machines that turn coins into the tickets needed to operate the laundry equipment.

He began his University employment as an oil burner mechanic in the Wincrest Trailer Camp (housing for married GIs located near land occupied today by Pollock Dining Hall). He assumed his last position in 1951.

Mr. Packer's wife, Inez, is a chef at Phi Delta Theta fraternity house, and four of the couple's six children have Penn State affiliations: James R. is a junior at University Park; William C. Jr. attended the University; and Mary Jane Park (a teacher at Snowshoe Elementary School) and Jo Ellen (in the nursing profession in Pittsburgh) are graduates. Beryl Jean, meanwhile, is completing her Ph.D. at Ohio State and Dolly Bassett has finished law school in Atlanta. In addition, Mr. Packer's sister-in-law, Arlene Packer, is a secretary in the College of Human Development.

Blaine L. Johnson, building inspector in the Office of Physical Plant, retired May 1 after working for the University for almost 35 years.

Mr. Johnson, whose duties had included serving as an electrical building inspector for new construction and renovations, began his Penn State tenure in 1946 as an electrician. After serving in that capacity for nearly 17 years, he was a draftsman for an additional 10 years before becoming an inspector.

In retirement, he plans to continue to do work in the electrical field. He also plans to attend more auctions and local sales, at which he searches for antiques that he repairs and refinishes at his Boalsburg residence.

Although Mr. Johnson's wife, Wanda, does not happen to have a direct affiliation with the University (she works at Sears), all three of the couple's children are Penn Staters. Rene Libera is a 1973 graduate working at the Centre Daily Times in computer systems; oldest son Lee is a 1980 graduate working for Union Carbide in New York State, and Chester is a junior at University Park.

Frances S. Wilkins, food preparer in Housing and Food Services, retired April 28 after being employed by the University since 1956.

"Some of my most vivid memories are of being caught short of cooks because of heavy snows," Mrs. Wilkins recalls, adding that those days "could be really hectic." She observes that during the past 10 years, however, "hctic" days became less so because more food is centrally prepared, relieving food preparers in the individual dining halls of such routine tasks as cleaning vegetables.

Mrs. Wilkins began her Penn State tenure as a counterwoman, being promoted to a food preparer in the early 1960s. She has worked in several University dining halls, most recently in Waring.

Her son, Steve, is employed by the University as a food production worker in the Nittany Lion Inn, where Mrs. Wilkins says he is busy with the spring banquet schedule.

Of her retirement plans, Mrs. Wilkins says she is looking forward to a trip to California and to working in her garden.

John C. Simpson, supervisor of the Centralized Copy Centers for the Office of Business Services, left the University on March 18. He was employed at Penn State in 1968-69 and again from March 26, 1970, until his departure.

Obituaries

Francis Janney Doan, professor emeritus of dairy science, died May 8. He was 84.

Professor Doan, who received his bachelor's and master's degrees from Penn State, was a member of the University faculty from 1925 until his retirement in 1962.

During his 37-year tenure, Professor Doan focused his research on various phases of milk and dairy processing, including analysis, nutritive value and keeping quality. He authored or co-authored some 65 research bulletins and scientific papers and for six years was a member of the committee on milk of the National Research Council.

Professor Doan also served 12 years on the editorial board of the *Journal of Dairy Science*, three years as a board member of the American Dairy Association's executive board and three years as a member of its journal management committee. In 1949, he received the Borden Award for research in dairy manufacturing.

J. Ralph Beard, associate extension agent at the Luzerne County Agricultural Extension Office, died May 4. A University employee for more than 23 years, he was 57 years old.

Clarence E. Auman, a residence hall maintenance worker with Housing and Food Services from 1951 to 1976, died May 3 at the age of 67.

Calendar report

Editor's note: This is the first article of a regular series in which the *Calendar Conversion Council* will report on its activities to the University community.

The Calendar Conversion Council met three times in April. The membership of the Council has changed somewhat in that Duane Smith, associate provost and dean, Capital Campus, and Dick Sheeder, Office of Planning and Budget, have been added to the Council membership. Chris Hopwood, new president, Undergraduate Academic Assembly, has replaced outgoing president Ted Szklenski.

An early discussion item with the Council was the need to keep the University community informed of what the Council is doing. The Council will keep in communication with the University community by regular publication of information in *INTERCOM*, by regular discussion with Daily Collegian reporters, and, as necessary, by direct communication with the University community through inter-departmental mail. In addition, Council members are willing to discuss the calendar conversion on request with Colleges or Campuses.

The Council has issued two mailings. One explained that the standard instructional day will include eight 55-minute periods with a 15-minute interval at University Park and whatever is necessary at other Campuses. That memorandum also emphasized the importance of careful review and revision of academic programs and called particular attention to the need to involve the Commonwealth Campus faculty in that review as well as recognizing the interlocking of academic programs. The other communication advised the University that Calendar Council headquarters have been established in Room 304 Old Main (telephone 865-0491).

The Council has reviewed a preliminary report from its summer session committee but has not yet agreed on any recommendations to send forward. The Council has also considered options on a class schedule for University Park and has deferred that question to further study by a subcommittee including representatives from the Scheduling Office. There has been some discussion of needed analytical studies in such areas as room use, instructional load, summer enrollment patterns and the like. A very preliminary schedule of the variety of actions which must occur before August 1983 has been reviewed and is currently being revised in greater detail.

The Council has recently launched a preliminary effort at program review and revision at the departmental level. The details of the process have been communicated via a mailing to the academic officers at all levels of the University, and the necessary forms are available at the Colleges and other appropriate locations.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University. USPS 351-170

Calendar

May 14-23

Special Events

Thursday, May 14
 Sports: lacrosse (women), AIAW National Championships, through May 16.
 HUB Craft Center, exhibition and sale, 11 a.m.-4 p.m., Kern Lobby. Also May 15.
 STS/TCO luncheon, noon, talk, 12:30 p.m., Room 101 Kern, Philip Klass, English, on "Literature and Technology."
 Interdisciplinary public lectures: Thomas F. Pettigrew, Univ. of California/Santa Cruz, on "Sociology and Social Policy: Science vs. Reform," 3:30 p.m., Room 124 Sparks; and on "New Patterns of Racism," 8 p.m., HUB North Lounge.
 Cinemascope, *The Touchables*, 7 p.m.; *God Told Me To*, 9 p.m., HUB Assembly Hall.
 Also May 16.
 URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.
Friday, May 15
 Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. Douglas Miller, music, on "Who Says We Can't?" FSU Students and New Music."
 Dept. of Philosophy, Annual Heidegger Conference, 9 p.m., Room 402 Keller Bldg. Information, 865-6397. Also May 16 & 17.
 Sports: track (men), Penn State Open, 3 p.m., Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Craig Humphrey, sociology and American studies, on "The Promotion of Growth and Its Impact on the Pennsylvania Small Town."
 Commonsplace Theatre, *Har,* and 9 p.m., Room 112 Kern. Also May 17.
 URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.
 Bob Hutsko, trumpet, and Trina Baker, bassoon, 8:30 p.m., Music Bldg. Recital Hall.
Saturday, May 16
 Sports: track (women), Penn State Open; golf (men), Alumni Tournament, 10 a.m.
 France-Cinema, Bunuel, *Diary of a Chambermaid*, 7 and 9 p.m., Room 112 Kern. Also May 18.
 URTC, *The Crucifer of Blood*, 8 p.m., The Playhouse.
 School of Music, Alumnae Recital, 8:30 p.m., Music Bldg. Recital Hall.
Sunday, May 17
 Dept. of Philosophy, "Tribute to the Philosophy of John M. Anderson, Evan Pugh Professor Emeritus of Philosophy," Sessions at 2:30 and 7:30 p.m., Room 124 Sparks.
Monday, May 18
 Commons place, "Sounds of Silence," noon, Room 112 Kern.
 Music in Interesting Times, 2:20 p.m., Music Bldg. Recital Hall. The Nova Consort, "Very Old Music in Interesting Times."
 Penn State Rain White Band, 7 p.m., Fisher Plaza, Room May 19.

The women's lacrosse team begins defense of its national title here today.

Color Slide Club meeting, 7:30 p.m., Room 189 MKL.
 Karen Scott, soprano, and Philip Dettra, piano, 8:30 p.m., Music Bldg. Recital Hall.
Tuesday, May 19
 Early registration for Summer Term, 8:30 a.m.-4:30 p.m., Room 112 Shields, through May 22. Also May 25.
Wednesday, May 20
 Last day to sign Spring Term Emergency Loans, Room 108 Shields.
 Commons Concert, Nova Consort, noon, Kern Lobby.
 Campus Colleagues, social, 4-6 p.m., Fireside Lounge, Nittany Lion Inn.
 Student Consultants' Concert, 8:30 p.m., Music Bldg. Recital Hall.
 Spring Term classes end, 9:55 a.m.
Thursday, May 21
 Final examinations. Also May 22, 23 & 25.
Saturday, May 23
 Shaver's Creek Nature Center, Paul Risk on "Folklore and Uses of Medicinal and Edible Wild Plants," 2 p.m., Stone Valley.

Seminars

Thursday, May 14
 Chemistry, Bruce Berne, Columbia Univ., on "Solvent Effects on Dynamics of Molecular Isomerization," 12:45 p.m., Room 333 Whitmore.
 Bioengineering, K. Kirk Shung, bioengineering, on "Ultrasonic Absorption Properties of Deer Blood," 4 p.m., Room 210 Hammond (new listing).

He has presented numerous invited lectures and seminars in his area of specialization — the American landscape, its origins, morphology and symbolism.

Dr. Play

(Continued from page 1)
 correspondence study guide and has been cited on many occasions for his service as an adviser to undergraduate students. He teaches special honors course sections for academically gifted students in the Penn State Scholars Program. Dr. Play also has been active in the University's Educational Opportunity Program.
 Through his involvement in the Department of Labor Studies' summer Steelworkers Institute, he has designed courses for and taught members of labor unions. He was a recipient of the Class of 1933 Award for Excellence in the Humanities at Penn State.
 Following a brief career as a violinist and service in the Air Force, Dr. Play came to Penn State as a 25-year-old freshman in the 1950s. He earned a B.A. in philosophy and later went on to the University of Southern California, where he earned his Ph.D. in philosophy.

Dr. Lewis

(Continued from page 1)
 essential to most good non-fiction writing — and to the good thing that I will ask you to do...
 "English: I am passionately in love with our mother tongue, and I have no patience with those who abuse it. Be warned. Careful attention to formal English will pay handsome dividends. Bad or careless writing will be heavily penalized."
 Professor Lewis earned his B.A. at Albion College and his M.A. and Ph.D. at the University of Michigan. Recently elected a National Councilor of the Association of American Geographers, he received that organization's national honors awards in 1977 "for truly perceptive and eloquent studies of the evolving human scene in North America, for creative scholarship, advocacy and teaching that have so greatly increased our sensitivity to the ways in which habitat, history, society and culture have interacted to make the fascinating ever-changing landscape."
 Dr. Lewis has been a visiting professor at the University of California at Berkeley and at Concordia University in Montreal.

Friday, May 15
 Mathematics, Gian Carlo Roto, MIT, on "Classical Invariant Theory Today," 2:20 p.m., Room 349 Villard.
 MC3B, Prasad Sunkara, Merrell-Dow Pharmaceutical, on "Characterization of Chromosome Condensation Factors of Mammalian Cells," 2:30 p.m., Room 101 Althouse.
Monday, May 18
 Nutrition, Gerald McClearn, assoc. dean for research and graduate studies, College of Human Development, on "Genetics as a Tool in Nutrition Research," 3:35 p.m., Room 223 Henderson.
 MC3B J. David Puett, Vanderbilt Univ., on "Gonadotropins: Considerations of Structure and Mechanism," 4 p.m., Room 101 Althouse.
Tuesday, May 19
 MC3B J. David Puett, Vanderbilt Univ., on "Interaction of Opiate Peptides with Membranes and Cells," 11 a.m., Room 101 Althouse.
 Metallurgy, V. Vittek, Univ. of Pennsylvania, on "Grain Boundaries," 11 a.m., Room 301 Steidle.
 Physics, special colloquium in honor of Ernst Bleuler, Ferdinand G. Brückwiede, Evan Pugh research professor emeritus, on "Reminiscences on the 50th Anniversary of the Discovery of Deuterium," 2:20 p.m., Room 117 Osmond.
 Chemical Engineering, William N. Gill, Iowa State Univ., on "Rapid Solidification of Metals," 3:45 p.m., Room 140 Fenske.
 Plant Pathology, Ted Kaufman, grad. student, on "An Incredible Edible from the Orient: Shitake," 3:55 p.m., Room 213 Buckhout.
 Ag. Economics and Rural Sociology/Sociology/Community Development, Robin M. Williams, Jr., Cornell Univ., on "The American People in the 1980s," 8 p.m., Room 112 Kern.

Exhibits

Chambers Gallery: Alice Waagen, weavings and three-dimensional structures, through May 20.
HUB Gallery: Yachad Exhibit, through May 20, Ari Alley.
Kern Gallery: Martha Hall, ceramics and photographs, through May 22. Bill Riesser, leather, through May 23. Robert Graves, prints.
Museum of Art: Selected works from the collections of Mimi and Sanford Feld and Samuel Gailu, through May 24. Selections from the Museum's American collection. Photographs from the Museum's collection. Twentieth century works from the Museum's collection, opens May 23.
Pattee Library: "Igittur's House: An Architectural Study," End Corridor Gallery. Karen Simonatic, recent paintings. Lending Services Lobby, Becky Mataraz, glass, Main Lobby, Martha Carothers, "The Design and Production of Children's Novelty Books," Rare Books Room.
Visual Arts Zoller Gallery: Undergraduate Exhibition, through May 22.

Senate

(Continued from page 1)
 served on the committee instead of the past chairman.
 — An agreement that the BDR III Standing Subcommittee have the authority to add and delete courses on the BDR III lists in the advanced learning skills and health sciences/physical education areas.
 — Procedures for Senate Council to follow in making recommendations to the Provost on the establishment, reorganization and discontinuation of organizational units and areas.
 — Modifications to two areas of PS-23, as proposed by the Committee on Faculty Affairs. Senate action will be recommended to the President.
 The first recommendation is intended to make clear that the college and University promotion and tenure review committees should make both substantive and procedural reviews in considering cases.
 The second action recommends the addition of a statement establishing "a mission framework for the fundamental tenure criteria." This statement says: "The raison d'être of the University is the discovery, synthesis, transmission and application of knowledge. In light of these several goals, research, teaching, scholarship and service are the central criteria for the evaluation of faculty."

Calendar

(Continued from page 3)
 read to the Senate earlier. In discussing the newly created Calendar Conversion Council, Dr. Oswald wrote:
 "I wish to be clearly understood, however, that the appointment of the Calendar Conversion Council is not intended to vest in that Council the responsibility for academic matters as now vested in the Faculty Senate. It is clear that the Calendar Conversion Council must work closely with the Senate and its committees in seeking modifications to Senate policy as a result of the calendar change. The Calendar Conversion Council includes a current Senate officer, two current Chairmen of major Senate committees, and the most immediate past Chairman of still another major Senate committee. This representation was planned to assure that the academic perspective of the University Faculty Senate was brought to bear to the fullest extent possible in the Calendar Conversion Council."
 Senators heard also from Dr. Kenneth P. Mortimer, director of the Center for the Study of Higher Education, who presented a forensic session on "Collective Bargaining: The National Scene."
 Dr. Mortimer noted that while the number of faculty unions had increased significantly during the past decade, none of the major research universities belonging to the Association of American Universities (AAU) had yet elected a faculty union.
 He pointed out that this situation could change when and if Berkeley and UCLA next hold elections. The vote last year against establishing bargaining units at Berkeley (53 percent) and UCLA (51 percent) was so close that the union is expected to try again in 1982.
 Dr. Mortimer also described the impact in the private sector of the decision last year that established the role of faculty at Yeshiva University as managerial. Based on this decision, more than 25 institutions are now refusing to bargain or have slowed down negotiations with their faculties.
 He also described a decision at the University of Minnesota, excluding the Duluth Campus from the system-wide Senate after Duluth accepted a union. Minnesota administrators held that they could not deal with more than one agent of the faculty at a time.
 The last speaker to address the Senate, Charles Lupton, executive director of the Office of Gifts and Endowments, described Penn State's fund raising efforts.

Information deadline set for Summer Term calendar

Information to be listed in the Summer Term calendar, which will appear in the June 11 issue of INTERCOM, should be in the hands of the calendar editor by May 20. Material can be sent to Room 312 Old Main, 865-2501.

Phi Beta Kappa initiation tonight

University Provost Edward D. Eddy will deliver this year's Phi Beta Kappa address at the annual Lambda Chapter banquet and initiation ceremony tonight (Thursday) at the Penn State Sheraton. Dr. Eddy's topic will be "The Necessities of an Academic Community." Philip A. Klein, president of Lambda Chapter, will preside.
 Officers recently elected for the 1981-82 academic year are Alfred Triolo, president; Martha Koln and Roland Goad, co-secretaries; M.T. Pigott, treasurer; Catherine Carter, historian; and Donald Dickason and William Riesser, executive committee members-at-large.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff non-exempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 863-1367 (work line 475-1367). Applications for these staff vacancies will be accepted until 5 p.m., May 21, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

BUSINESS MANAGER, MONT ALTO CAMPUS. Responsible to the Campus Director for the control and supervision of business services and operations at Mont Alto Campus, including the maintenance of buildings and grounds, coordinating of Personnel Administration matters and programs. Physical Plant activities and housing and food service needs, operation of certain auxiliary enterprises, safety and security, student accounts and accounts receivables; operation of the Word Processing Center, parking program, Campus mail and telephone services. Bachelor's degree (or equivalent) in business administration or equivalent organized study or training, plus four to five years of effective experience in buildings and grounds maintenance, purchasing, personnel, etc., with a supervisory background.

SCANNING ELECTRON MICROSCOPY TECHNICIAN, COLLEGE OF AGRICULTURE, University Park. Responsible to the Head, Department of Food Science, and to the Electron Microscope for operation of and preparation of samples for scanning electron microscope, and for other related laboratory activities. Prepare specimens of biological material for scanning electron microscopy, including critical point drying and sputter coating. Perform minor maintenance on scanning electron microscope and support equipment. Take pictures of images with camera, assist with other photographic work related to microscopy. Assist with the operation of and preparation of samples for transmission electron microscope and light microscopes. Bachelor's degree or equivalent in one of the life sciences and from six to twelve months of effective experience. Electron microscopy course work or experience desirable.

NON-BOOK AND PROMOTIONS SPECIALIST, PENN STATE BOOKSTORE, University Park. Supervise the non-book staff supply assistants at University Park, monitor and evaluate purchasing methods. Seek new product lines, develop sales of these products and assign product inventory responsibility to assistants. Develop and manage new non-book departments, as they are created. Schedule, supervise and train clerical staff personnel in new non-book areas in product knowledge and customer relations. Be responsible for the display and merchandising aspects of non-book merchandise. Bachelor's degree (or equivalent) in marketing, plus one to two years of effective experience in marketing or retailing and supervisory experience required. Understanding of photography sales preferred.

CHEMICAL SPECTROSCOPY AIDE, COLLEGE OF SCIENCE, University Park. Position involves the operation of mass spectrometers and associated equipment (gas chromatographs and minicomputers) of the Chemistry Department's mass spectrometry facility under the direction of the facility director. The major responsibility will be the operation of mass spectrometers and organic and organometallic compounds submitted to the facility. The job also involves assistance in repairing, maintaining or improving existing equipment and interaction with faculty members and graduate students concerning scheduling, training, procedures, and data interpretation. Should have bachelor's degree (or equivalent) in chemistry or related field, plus six to nine months of effective experience, or equivalent's degree (or equivalent) in chemistry or related field, plus one to two years of effective experience. An aptitude for maintenance of mechanical devices and a knowledge of basic computer systems is highly desirable.

SENIOR STAFF TECHNOLOGIST, COLLEGE OF MEDICINE, HERSHEY. Responsible to Chief Technologist, Medical Director, and/or Manager, Clinical Laboratories for the supervision and operation of a designated section. Maintain availability of patient support services. Assist in determining which procedures are most scientifically accurate and feasible in time, cost, and quality. Responsible for writing laboratory manuals, test operating procedures, and internal section administrative operating procedures. Insure that work is done in accordance with established methods and procedures and quality control. Perform the more difficult and complex procedures requiring extensive technical training and assist routine work as required. Bachelor's degree in Medical Technology MT (ASCP) or equivalency, plus a minimum of three to four years' effective experience.

ASSISTANT ACCOUNTANT, CONTROLLER'S OFFICE, University Park. Responsible to the Director of Accounting Operations for the processing of a wide variety of duties, working toward the overall goal of obtaining well rounded accounting experience in all areas within the Office of the Controller. Bachelor's degree or equivalent, preferably in accounting or related field, and nine to twelve months of effective experience.

Computer requests require planning

Editor's note: The University Computer and Information Systems Planning Committee has prepared the following release to assist persons wishing to lease or purchase computational equipment.

As the end of the fiscal year approaches, requests for purchases or lease of computational equipment increase. To avoid delays in review of such requests, follow the AD-4 policy entitled "Planning, Coordination, and Acquisition of Information and Computation Systems."

Approved January 1981, the revised policy sets forth the review process required for "planning and coordinating the acquisition of equipment vital to the growth of the University's information processing capabilities." Included in these information systems are: "academic computing, administrative data processing, data administration, library computing, distributed data processing, data communications and word processing. Word processing systems include magnetic card typewriters and computer-based text handling equipment, but exclude dictation equipment, conventional typewriters, and office copiers."

Recent experience reveals two main problems, of which one is review time. Allow three to five weeks for review of major equipment requests, in addition to time taken by the Department of Purchases.

The second problem is lack of full information accompanying review requests. Please supply it through Information and Computation Equipment

Request (Form G22.3) and send it to Accounting Operations with a completed Purchase Order form signed by the budget administrator and budget executive.

AD-4 implements a stratified review process, according to Charles Blunt, coordinator of Information and Administrative Services. This unit, together with the Subcommittee on Academic Computing (part of the University Computer and Information Systems Planning Committee [UCISP]) reviews technically all major requests for expanding or upgrading the University's information and computation systems.

Major requests are those in which equipment costs more than \$20,000 or leases annually for more than \$5,000. The Subcommittee on Academic Computing will review these and send a recommendation to the UCISP committee. The President's approval may be required.

Acquisitions that cost between \$500 and \$20,000 (leasing between \$500 and \$5,000) will be approved or disapproved by the Subcommittee on Academic Computing. Equipment that costs or leases for less may be approved by Purchasing without review.

"The intent of AD-4 is not to limit or restrain computing," says Mr. Blunt, "but to avoid unnecessary duplication, guarantee compatibility wherever possible, and help us plan for orderly growth in both academic computing and administrative data processing." Mr. Blunt maintains a Penn State equipment inventory and subscribes to *Datapro* reports on minicomputers and word

processing equipment. Also available is the 1980-81 *International Directory of Software*, from which users can determine if software can be purchased or leased more reasonably than developed in-house. "We welcome use of these resources," says Mr. Blunt. "It's difficult to choose from so many sources in such a rapidly changing field."

Other AD-4 policies state that: — University approval for equipment purchased with external funds must be obtained before contracts can be negotiated by the University.

— Computer equipment integral with scanning electron microscopes and other such equipment need not be reviewed by the Subcommittee on Academic Computing. But stand-alone equipment is reviewed.

— Expendable items such as floppy discs and magnetic tapes and equipment under \$500 in price are excluded from this policy. — AD-4 policies do not supplant review requirements of the requesting department's administrative unit or those of the Department of Purchasing Services.

The review process is intended to ensure that the proposed needs will be met, that unnecessary duplication is avoided, that required software will be available, that compatibility between appropriate systems is considered, and that maintenance, telecommunications, and operating costs have been estimated.

"The latter costs can be considerable," reminds Mr. Blunt, "and should be estimated together with first-year expenses of installation and personnel training."

Computation Center to offer three workshops

Registrations for three workshops to be offered by the Computation Center during the Spring/Summer term break are being accepted by Darlene Rhoads in Room 229 Computer Building. A charge of \$5 (cash, check, or inter-departmental transfer) is payable at registration.

All sessions will be held in Room 108 Forum Building. Morning lectures will begin at 9 a.m. and afternoon sessions at 1:30 p.m. The workshops are:

1) INTERACT Techniques

These sessions will be presented on the mornings of May 26-28. This is not an introductory workshop, but rather is designed to illustrate some advanced techniques on the assumption attendees have had some prior experience with INTERACT fundamentals. Topics will include data sets and job control, EXEC files, and multiple active files.

2) SCRIPT

The sessions on "SCRIPT: A Text Formatter" will be presented on the

afternoons of May 26-28. This workshop will cover briefly fundamentals of the SCRIPT language and then illustrate effective methods to solve common problems encountered during the publication process. Although prior knowledge of an on-line editor such as RJE or INTERACT would be helpful, it is not required for this workshop.

3) Introduction to APL

These sessions will be held on the morning of Monday through Friday, June 1-5.

The computer language APL is quite different than traditional computer languages such as FORTRAN, COBOL, etc. At least partly for that reason, opinions about it within the computer industry are often polarized, i.e., people tend to like it very much or they dislike it very much.

APL is a highly interactive language

and can be used only from a typewriter terminal. Many claims have been made that it greatly increases programming productivity. For example, APL programs usually have only about 1/10 (or fewer) as many statements as an equivalent program in another language. On the other hand, it uses a different character set which employs special symbols, and there are those who feel an APL program is more difficult to read than one written in a traditional language.

Learning APL requires no previous computer experience. Furthermore, as with natural languages, a large arsenal of idioms has been developed which can be used with only a little knowledge and experience.

Prospective attendees should have the use of a research or course preparation account, together with INTERACT and/or APL user identification (may be obtained in Room 229 Computer Building).

'Structure-activity' link studied in cancer probe

(Continued from page 1)

In order to work on this type of structure-activity problem, we have had to develop a set of suitable methods. First, we enter the structures, one at a time, into our computer system by sketching them on a computer graphics screen, thereby developing a realistic three-dimensional model for each compound. Then, each of the compounds is represented by a set of molecular structure descriptors, whose values we calculate directly from the computer-stored representations of the structures. Finally, we analyze the set of compounds — each represented by a set of descriptors — to determine whether sufficient information is embodied in the descriptors to separate the carcinogens from the non-carcinogens. While we use some statistical approaches for the analysis phase, we more often employ pattern recognition techniques, which are related to artificial intelligence methods used

widely in many scientific areas.

Because of the enormous quantities of information that must be handled and the complexity of the mathematical computations, all of these studies are made using computer software. We have developed a large set of programs to allow us to accomplish these tasks conveniently.

In addition to our work on the polycyclic aromatic compounds (occurring, for example, in polluted air and engine exhausts), the graduate students and postdoctoral students in my research group are studying N-nitroso compounds (found in bacon and other food containing preservatives). Aromatic amines are also being investigated; these compounds occur in pigments and various industrial environments. In each study, our goal is to develop a set of molecular structure descriptors powerful and complete enough to allow us to generate a method to separate carcinogenic compounds from

the non-carcinogenic ones.

The potential significance of this research lies in the ability to achieve predictive ability; that is, we would like to develop methods that could be used to predict the toxic potential of compounds in advance of or in addition to testing. The ability to predict toxicity of compounds could streamline toxicology in chemical and pharmaceutical companies, leading to increased efficiency and lower costs.

We already have published a number of studies reporting successes in test cases, where we have been able to develop methods for the separation of carcinogens from non-carcinogens and show that the predictive ability would be high. The current emphasis of our research is on the development of ever better molecular structure descriptors and the application of the computer software system to an expanding number of interesting structure-activity problems.

'It's almost like graduating all over again,' Palladino says

Dean Palladino

Last March, Engineering Dean Nunzio J. Palladino was reading one of the nuclear industry trade papers and came upon an article speculating on whom the Reagan administration would choose to head the Nuclear Regulatory Commission.

"The article said," Dean Palladino recalls, "that anyone who hadn't been called by now shouldn't wait by the telephone because all the people being considered seriously had been contacted."

Dean Palladino had actually been contacted on Jan. 9, but he had heard nothing since. "That night I told my wife this was probably the end of the matter," he says. "The very next morning I received a call asking me to come down to Washington on March 20."

He had made a total of five trips before being called on Friday, May 15, and

officially offered the job -- contingent upon his confirmation by the United States Senate.

"It's strange how the excitement builds up," Dean Palladino notes. "I think the biggest decision was whether or not I should let my name be considered. After my first trip to Washington in March, I tried to be very quiet about the possibility since other people were being considered. Then one of our nuclear engineering students went out to the West Coast for a job interview, and the people out there asked him if he knew me and told him I was going to become head of NRC."

Currently surrounded by packing cases as he reads his office for his successor, Dr. Wilbur Meier Jr., Dean Palladino had already planned to step down as dean on July 1 and become a University Professor.

Now, if he is confirmed, he will retire officially.

"It's almost like graduating all over again and starting a new job," he says, adding that he and his wife, Virginia, will keep their home in State College and probably rent an apartment in Washington.

Since he must still be confirmed by the Senate, Dean Palladino is not ready to discuss any policies he might implement as NRC chairman, but based on his many years of experience in the field of nuclear energy, he identifies two problems as needing prompt attention: 1) implementing the licensing process and 2) reaching decisions about what the safety requirements for the industry should be.

About 11 plants are approaching

Penn State Intercom

Mel Tillis and Joffrey II dancers are part of Nittany Mountain Summer

Theatre, dance, country-western music offered by Summer Festival

What do country-western music, classical ballet, haute couture, musical comedy and juggling and strumming have in common? They're all part of this year's Nittany Mountain Summer Festival, an annual Penn State program that combines theatre, music and visual arts offerings in a wide array of public events.

The Summer Festival, in its 24th consecutive season of professional theatre, will offer four productions this summer. The season opens in the Pavilion Theatre on June 25 with *Born Yesterday*, the Garson Kanin comedy that spoofs big time politics and corruption in Washington.

The musical comedy, *Once Upon a Mattress*, an alternative view of the fairy tale of the princess and the pea, opens July 10 in the Playhouse Theatre. On *Golden Road*, a recent Broadway comedy, comes to the Pavilion on July 23. *Grease*, the musical parody of high school life in the 1950s, completes the season, opening July 26 in the Playhouse.

Musical comedy is also the theme of "A Party with Betty Comden and Adolph Green," the first of the special events in the Eisenhower Auditorium for Nittany Mountain Summer Festival. Miss Comden and Mr. Green are the creators of many Broadway and motion

picture successes, including *Wonderful Town*, *Singin' in the Rain*, and *On the 20th Century*. Their performance is scheduled for June 27.

Other Eisenhower events are performances by bluegrass singer, instrumentalist and composer John Hartford on July 10; The New American Ragtime Ensemble July 11; the Joffrey II Dancers, a classical ballet company, on July 17 and 18; and country-western star Mel Tillis on July 25.

Haute couture comes to the Museum of Art in celebration of Nittany Mountain Summer in a show entitled "Hemline, Neckline, Streamline: Women's Fashions 1890-1940 from the Collection of Beverly Birks." Dates are June 28-Sept. 13.

The Central Pennsylvania Festival of the Arts Juried Crafts Show will open at the Museum on July 5 and continue through Aug. 16. Also on exhibition for the Festival will be drawings, prints, 20th century works and African sculpture from the Museum's permanent collection.

Mail orders are now being taken for both Festival Theatre and Eisenhower Auditorium events. Information and tickets may be obtained by phoning the Theatre at 865-1884 or the Auditorium at 863-0255.

Paul Berg will give commencement address May 30 at Beaver Stadium

Faculty members at University Park are invited to participate in the Saturday, May 30, Spring Commencement exercises, at which Dr. Paul Berg will deliver an address.

Dr. Berg, who shared the 1980 Nobel Prize in chemistry, is a 1948 graduate of Penn State. Willson professor of biochemistry at Stanford University's Medical School, he was honored for his research which opened up the field of genetic engineering.

Faculty members should assemble in academic regalia at 10:15 a.m. in the Home Team Locker Room area at Beaver Stadium for the formal academic procession. Reserved seating will be provided on the field.

The ceremony, at which more than 4,000 graduates are expected to receive their degrees, will begin at 10:30 a.m.

In case of rain, three commencement exercises will be held in the morning at 10:30, and two ceremonies in the afternoon at 2.

In the morning, the Colleges of Arts and Architecture, Earth and Mineral Sciences, Education, Human Development and Science will attend ceremonies in Recreation Building. Eisenhower Auditorium will house the College of Engineering and Schwab Auditorium, the Graduate School.

In the afternoon, students from Agriculture, Business Administration, and Health, Physical Education and Recreation will graduate in Recreation Building. Those from Liberal Arts, Bachelor of Philosophy candidates, and students earning associate degrees from all colleges will go to Eisenhower Auditorium.

A total of 20 commencement exercises are being held this spring at Penn State campuses. The schedule follows:

Altoona, May 30, 10 a.m., Adler Physical Education Complex. Speaker: William W. Scranton III, Pennsylvania's lieutenant governor.

Beaver, May 29, 7 p.m., Broadhead Cultural Center.

Behrend College, May 30, 10 a.m., Erie Hall. Speaker: Douglas Edwards, CBS News correspondent.

Berks, May 30, 10:30 a.m., Community Center. Speaker: Karen Miller, mayor of Reading, Pa.

Dr. Berg

Capitol, June 13, 11 a.m., Founder's Hall in Hershey. Speaker: Provost Edward D. Eddy.

Delaware County, May 28, 7 p.m., Library Learning Center. Speaker: Dr. Robert E. Dunham, vice president for undergraduate studies.

DuBois, May 29, 2 p.m., Multi-Purpose Building. Speaker: Dr. James M. Beattie, dean of the College of Agriculture.

Fayette, May 30, 10:30 a.m., Study Learning Center. Speaker: Mary Murphey, Fayette student.

Hazleton, May 28, 7 p.m., outside of Administration Building (train site). Physical Education Building. Speaker: John Y. Yamulla, president Hazleton's Advisory Board.

Milton S. Hershey College of Medicine, May 23, 10 a.m., Founder's Hall. Speaker: Dr. Mary Ellen Avery, Thomas Morgan Roth Professor of Pediatrics at Harvard University Medical School and physician-in-chief of Children's Hospital Medical Center in Boston.

McKeesport, May 30, 10 a.m., Buck Union Building. Speaker: Cynthia Baldwin, attorney for McKeesport Legal Services.

Mont Alto, May 30, 11 a.m., outside on campus. Speaker: Gordon Bowker.

(Continued on page 7)

Penn Staters

Richard G. Swails, director of the Career Development and Placement Center, has been invited to serve as a consultant to one of the interdisciplinary working groups at the International Consultation, an annual conference sponsored by the International Round-Table for the Advancement of Counseling. The 1981 meeting will be held during December in Cambridge, England.

Two Commonwealth Campus faculty members, Martha E. Hadsel, assistant professor of English at Wilkes-Barre, and Carol F. Kessler, assistant professor of English and American studies at Mont Alto, have received National Endowment for the Humanities fellowships for 1981-82. Dr. Hadsel will be in residence at the University of Nebraska studying the history of the English language, and Dr. Kessler will continue her work on women's utopian fiction at the University of Maryland. Only 65 such year-long fellowships were awarded in all fields for the coming year.

Four other English faculty members have been awarded summer study fellowships from NEH. They are Elizabeth M. Buckmaster, assistant professor, Delaware County; Margaret M. Cote, assistant professor, Hazleton; Leo M.J. Manglaviti, assistant professor, Worthington Scranton; and Carole L. Weisz, assistant professor, Wilkes-Barre. Dr. Buckmaster will work on medieval fiction at Stanford University. Dr. Cote on American culture at the University of California-Berkeley. Dr. Manglaviti on James Joyce at Johns Hopkins University, and Dr. Weisz on cinema at New York University.

Frank E. Cable, lecturer in computer science, was one of 15 computer professionals worldwide to be honored at a dinner commemorating the 30th anniversary of the installation of serial number 001 Univac I—the first manufactured computer in history. The dinner, sponsored by Sperry Univac and the Museum of Science and Industry in Chicago, was held May 6 at the Museum.

Mr. Cable and his colleagues, designated "pioneers" in the computing profession, were involved in the systems development, programming or actual installation of any of the Univac I's from the first manufacturing run. Serial 001 was installed in 1951 at the Sperry Univac plant in Philadelphia and was used for processing data from the 1950 census.

Citing his "many contributions to the betterment of landscape architectural education at Penn State," the Pennsylvania-Delaware Chapter of the American Society of Landscape Architects has conferred on Dean Walter H. Walters of the College of Arts and Architecture the status of "honorary member."

Terry Dunkle, a lecturer in the English Department's writing program, has been appointed a contributing editor of *Science 81*, fastest-growing of the five popular science magazines launched nationally in recent years. The magazine, published by the American Association for the Advancement of Science, began newsstand sales last month, after signing half-a-million subscribers in less than two years. Besides writing for the magazine, Mr. Dunkle will recommend article subjects and give general editorial counsel. His latest article, about the science of ice cream, is largely a profile of Dr. Philip G. Keeney, acting head of the Food Science Department, who is known internationally for his research in dessert flavors.

The Rev. Dr. Derald W. Stump, associate in religious affairs and Episcopal chaplain, has been appointed to the board of consultants to the research project on Faith Development in the Adult Life Cycle, a three-year study sponsored by the Religious Education Association of the United States and Canada.

Sara Lou Whildin, head librarian at the Delaware County Campus, has been named the 1981 recipient of the Award for Outstanding Contribution to the University Libraries.

Miss Whildin came to Penn State in 1970 from the library staff at Cedar Crest College. She served on the faculty at University Park before being appointed head librarian at Delaware County in 1976.

A graduate of Cedar Crest College with a B.A. in English, she also holds a master's degree in library science from the University of Pittsburgh.

Miss Whildin has served on several State and national professional organization committees. She was recently elected to the board of directors of the Association of College and Research Libraries.

Currently, she is a member of the advisory board of the Continuing Library Education Network and Exchange and was honored last year by being chosen in a national competition to participate in the Association of Research Libraries Consultants Training Program.

A member of the University Faculty Senate, she chaired the Continuing Education Committee last year.

Dr. Joseph V. Alessandro, professor of education, presented a speech, "Distance Education: The Implications for the Educational Planner," at the Latin American Conference on Distance Education, co-sponsored by The Organization of American States, West German Government, Venezuelan Open University, and The Open University in San Jose, Costa Rica. Some 250 representatives were present at the March meeting, which was held at the Open University in Costa Rica. Dr. Alessandro also participated in a series of lectures held in connection with the opening of a new doctoral program in education at the Simon Rodriguez University in Caracas, Venezuela.

Dr. Richard Chait, assistant provost, will be the keynote speaker at a College Administrators Development Workshop sponsored by the State University of New York on May 29. His topic will be "Managing Tenure Today and Tomorrow." Dr. Chait also delivered the keynote address at a conference on Sexual Harassment, sponsored by the Institute for Higher Education Management last month at the University of Texas. He discussed "Overregulation by Government or Overreaction by Education."

Dr. Ralph T. Heimer, professor of education, has returned from a two-week consulting trip to Egypt, where he lectured on computer-based instruction and demonstrated educational uses of microcomputers. His work took him to the colleges of education at the University of Alexandria at Alexandria and at Damanhour, and to the University of Tanta.

Jan P. Holland, senior research associate in the Acoustics Department at the Applied Research Laboratory, has been elected a Senior Member of the Institute of Electrical and Electronics Engineers (IEEE). Senior Member, the highest professional grade for which application may be made, is granted to only 12 percent of IEEE's 213,000 members.

Dr. Roy A. Olofson, professor of chemistry, has received the 1981 C.I. Noll Teaching Award, which is presented annually by the College of Science Student Council.

A member of the faculty since 1965, Dr. Olofson came to Penn State from Harvard University, where he had earned his doctorate and served as an assistant professor of chemistry. Both his B.S. and M.S. degrees were granted by the University of Chicago.

Dr. Olofson has consistently received high teaching evaluations from the students in his organic chemistry classes. Typical comments have been: "Considering I'm not that interested in organic chemistry, he's done an incredible job of motivating me," or "an outstanding professor who does an excellent job of making a very difficult subject understandable and interesting."

Dr. Olofson has been invited to serve next fall as one of the nine Plenary Session Chairmen at the Organic Division Program of the 1981 American Chemical Society Meeting dedicated to the memory of R. B. Woodward. Dr. Olofson's research interests are primarily in the invention of new synthetic reagents and preparative methods.

From left: Dr. C. Wayne Burnham, Dean Charles L. Hosler, Dr. Eugene G. Williams and Dr. Howard B. Palmer.

25-year chairs

Three College of Earth and Mineral Sciences faculty members are celebrating 25 years of service to the University this spring. They are C. Wayne Burnham, professor of geochemistry and head of the Department of Geosciences; Howard B. Palmer, professor of energy science and associate dean of the Graduate School; and Eugene G. Williams, professor of geology. Dr. Burnham holds a B.A. from Pomona College and M.S. and Ph.D. degrees from the California Institute of Technology. The author of numerous professional publications, he was invited to Sweden to participate in the 1979 Nobel Symposium on Chemistry and Geochemistry of Solution at High Temperature and Pressure.

Dr. Burnham has served as president of the Geochemical Society and is a Fellow of the Geological Society of America, the

Mineralogical Society of America and the American Geophysical Union. He was a special guest of the U.S.S.R. Academy of Sciences in 1973 and again in 1978, has been an invited session chairman at a Gordon Research Conference, and has served since 1976 on the advisory committee of the National Science Foundation's Earth Sciences Division.

Dr. Palmer's research interests include flames and combustion processes, kinetics of fast gaseous reactions, carbon formation and carbon vaporization, mechanisms and yields in chemiluminescent gaseous reactions and solar gas turbines for power production. The author of well over 100 papers or book chapters, he has edited and co-authored a volume on modern developments in combustion technology and is U.S. editor of *Combustion and Flame* journal.

Dr. Palmer graduated from the Carnegie Institute of Technology and was awarded

his Ph.D. by the University of Wisconsin. He served as head of the Department of Fuel Technology from 1959-65 and from 1969-76 was chairman of the Fuel Science Section of the Department of Material Sciences. He is a Senior Fellow of the Institute of Fuel and a Fellow of the American Physical Society. He is a member of the board of directors of the Combustion Institute.

Dr. Williams received his doctorate in geology from Penn State in 1957 after earning a B.A. at Lehigh University and his M.S. at the University of Illinois.

His research interests include the environment of deposition of clastic sediments and paleozoic stratigraphy and correlation. His teaching responsibilities encompass stratigraphy, sedimentology, world sediments and sedimentary petrology, and the history and foundations of science.

Appointments

Thomas C.N. Chiang as assistant professor of economics at Delaware County. B.A., National Chung-Hsing U.; M.A., U. of Hawaii; Ph.D., PSU. Mitchell W. Hall Jr. as assistant professor of engineering at Capital Campus. B.S., Virginia Polytechnic Institute; M.S., Ph.D., North Carolina State U. Formerly director of technical services and quality assurance, Dentsply International.

David L. Quesada as assistant professor of engineering and mechanics. B.S., PSU; M.S., Ph.D., Rutgers U. Melvin J. Baughman as forest resources extension specialist. B.S., M.S., Michigan State U.; Ph.D. in progress, U. of Minnesota.

Mark E. Geskieske as research assistant at ARL. B.S., PSU; M.S. in progress, PSU. Gregory D. Henderson as research assistant at ARL. B.S., PSU; M.A. in progress, PSU.

Ralph S. Moyer as research assistant at ARL. B.A., Millersville State College; M.S. in progress, PSU. Richard L. Tutwiler as research assistant at ARL. B.S.E.E., U. of Pittsburgh; M.S.E.E. in progress, PSU. Formerly electrical engineer, Motorola, Inc. William C. Zierke as research assistant at ARL. B.S., Iowa State U.; Ph.D. in progress, PSU.

Promotions

Staff Exempt

Ronald W. Brown to greenhouse supervisor in Agriculture. Paul C. McGhee to financial analyst in Controller's Office. John E. Miller to assistant housekeeping supervisor in Housing and Food Services.

Staff Non-Exempt

Gwendlyn Strader to nutrition aide supervisor in Agriculture.

Clerical

Margaret J. Ambacher to clerk, typist A in Agriculture. Janet L. Confer to secretary B in Business Administration. Sherry D. Ellenberger to purchasing clerk in Business Services. Mary J. Grove to secretary B in Agriculture. Bonnie G. Hand to records clerk in Human Development. Carol B. Jackson to secretary at Hershey. Mark J. Kessler to secretary B at Hershey. Margaret Krumrine to correspondence secretary B in Health, Physical Education and Recreation. Pamela Thal to clerk, receptionist A in Education. Barbara J. Witherite to secretary C in Agriculture. Patricia A. Witmer to clerk, records A in Liberal Arts.

Technical Service

Richard N. Bayliss to sign painter B, apprentice in Physical Plant. Vincent M. Burns to maintenance mechanic B at Ogontz.

Edward J. Cartwright to community service officer at McKeesport. Peter J. DeHart to instructional services scheduler/dispatcher at Capitol. Wilbur W. Haupt to lead carpenter (shop) in Physical Plant. Mark D. McKeown to maintenance worker (general) at Ogontz. Edward A. Muffling to catering helper in Housing and Food Services. Samuel Phillips to dining hall worker A in Housing and Food Services. Stephen Sampsd to senior operating mechanic in Physical Plant. John F. Weis to utility maintenance worker at Ogontz.

Staff development

Thirty-eight clerical employees of the University have completed the six-week Clerical Enrichment program.

Participating were:

Bobbi Amacher, clerk typist A, Agriculture; Sandra Andrews, clerk typist A, Agriculture; Cynthia Ault, clerk typist A, Gifts and Endowments; Lisa Auman, clerk typist B, Agriculture; Cindy Barger, secretary C, Engineering; Sandy Butts, clerk typist B, Libraries; Linda Elliott, clerk A, service desk, Physical Plant; Kathy Evey, clerk typist A, Agriculture; Judy Fetterolf, clerk, registration B, Registrar's; Sandra Fetzer, clerk, accounting B, Agriculture; Cheryl Fitzgerald, clerk typist B, Libraries;

Jane Gearhart, clerk B, cashier, Engineering; Mary Jane Gilmore, secretary C, Agriculture; Nancy Hatch, secretary C, Libraries; Margaret Holderman, clerk typist A, Engineering; Irene Illingworth, clerk A, lending services, Libraries; Jeni Ingram, clerk typist B, Engineering; Sheila Isler, clerk typist B, Engineering; Darlene Keller, clerk typist B, Housing and Food Services; Vivian Kovacic, technical secretary B, Science; Janice Lovette, clerk typist B, Continuing Education;

Nancy Markle, clerk A, Physical Plant; Sandra Martz, secretary C, Intercollege Research Programs; Karin Miller, clerk typist A, Engineering; Loida Muniz, clerk, publications B, Education; Linda Padron, clerk B, Physical Plant; Nancy Royer, secretary C, Liberal Arts; Tammy Settle, clerk typist A, Engineering; Debra Sipe, clerk typist A, Earth and Mineral Sciences;

Audrey Smith, statistical clerk A, Intercollege Research Programs; Delphine Smith, secretary B, Continuing Education; Lisa Smith, clerk, medical records B, University Health Services; Yvonne Stover, secretary C, Liberal Arts; Kathy Tressler, secretary C, Admissions; Suanne Warner, stenographer A, Education; Sheila Winfree, clerk B, Personnel Administration; Tammy Yarnell, clerk typist B, Engineering; Cindy Zeleznick, clerk typist B, Continuing Education.

Partings

Francis E. Kaprocki, research associate in ARL, retired May 1 after a total of 27 years of University service. He first worked at ARL from 1952 to 1965, returning in 1967 and continuing there until his retirement.

Mr. Kaprocki, whose area of research has been in electro-acoustic instrumentation primarily for underwater sound applications, received his B.S. degree in 1951 from the American Television Institute of Technology. In 1956, he became a registered professional electrical engineer in Pennsylvania.

Following his retirement, Mr. Kaprocki will reside in De Bary, Fla.

Mildred A. Conklin, mail sorter and relief clerk in the Office of Business Services, retired March 21 after working for the University since 1960.

Mrs. Conklin began her Penn State employment as a maid in Housing and Food Services, working primarily in Atherton Hall. She assumed her present position about eight years ago.

"The people I worked with were really

close," says Mrs. Conklin. "and I enjoyed our Christmas parties, birthday celebrations and other group activities."

Noting that she has daughters living in Florida, Indiana and Southeastern Pennsylvania, Mrs. Conklin says her retirement plans include traveling to visit each of them. She also intends to make a trip to Arizona to renew acquaintances with old friends.

Whether she's on the road or in her home area of Howard, she plans to pursue one of her favorite activities, round dancing, and hopes to join a dance club.

Mrs. Conklin's sister, Elizabeth Young, is employed by Housing and Food Services in McElwain Dining Hall.

The Ogontz Campus Solarium may never be the same after Rita E. Burch's May 1 retirement. During her 20 years as a clerk in the Maintenance and Operations Office at Ogontz, Mrs. Burch has left her green-thumb print on the foliage in and around Sutherland Building.

Mrs. Burch, who came to Ogontz in April 1961, has been secretary to "at least five" heads of Maintenance and Operations.

Besides caring for the many plants that decorate the lovely Victorian solarium, she has assumed responsibility for several fund-raising projects at the Campus. She has arranged plant sales during Christmas, Easter and Thanksgiving seasons for the benefit of the Campus's spring arts festival and for the Holiday Bazaar Scholarship Committee.

Mrs. Burch says she has enjoyed her time at Ogontz and will miss it, but looks forward to a change of pace. She plans to pay more attention to her enclosed porch "greenhouse" at home; and when her husband retires, the Burches intend to travel and camp throughout the continental United States.

The Burches have one daughter, Deborah, a Penn State graduate who teaches science in the Upper Dublin School District.

Donald J. Gannon, an engineering aide in the Applied Research Laboratory since Jan. 1, 1966, left the University on April 1.

Richard G. Glasgow, a dining hall worker with Housing and Food Services, retired April 26 after working at the University since Sept. 16, 1964.

Thomas R. Pryde, an engineering aide in the Applied Research Laboratory, left the University May 1. He had been a staff member since March 8, 1957.

Augustus M. Clouser, patrol officer at the Hershey Medical Center since Feb. 2, 1968, retired May 1.

Charles H. Edwards, grants and contracts officer at the Hershey Medical Center since April 1, 1966, retired May 1.

M. Louise Guyer, a domestic worker with the Office of Physical Plant since April 26, 1971, retired May 2.

Muriel E. Benton, a residence hall worker with Housing and Food Services since Sept. 22, 1966, left the University on May 1.

John Anuskiewicz, a maintenance mechanic at New Kensington since May 24, 1971, will retire May 30.

John D. Bassett, a research associate at the Applied Research Laboratory, retires June 1. He has been at the University since June 1, 1965.

William L. Emkey, associate professor of physics, will leave the Allentown Campus on June 1 after serving there since Sept. 21, 1970.

Janet R. Forsht, a secretary in the College of Education, will retire June 30 after having been employed since Jan. 1, 1968.

Martha S. Stover, a secretary in the College of Health, Physical Education and Recreation, is retiring June 30. She came to Penn State on June 10, 1968.

Charles W. Bush, instructor in engineering at Berks, will retire June 30 after serving since Jan. 1, 1969.

Calendar report

Discussion of the publication schedule for the University catalog and related materials occupied much of the Calendar Conversion Council's May 7 meeting.

Members were generally agreed that an earlier edition of the catalog or a catalog equivalent would be desirable. The Council also agreed to investigate the need for special guidance to the 1982 freshman class, both at the time of admission and when program planning begins.

Other discussion topics included:

— The question of class schedule at University Park. Council was advised that a committee looking into that issue had reviewed certain principles which a new class schedule should follow and is in the process of developing the specifics of a recommended schedule.

— The material circulated to the Colleges that week. Council reaffirmed the need for this review and revision procedure.

The Council officially changed from a weekly to a bi-weekly meeting schedule, with the next meeting to be held May 21.

Gamma Sigma Delta, the honor society of agriculture, recently cited for accomplishment (from left) Sidney E. Barnard, professor of food science extension; Dr. John W. White, professor of floriculture; and Dr. Gary W. Petersen, professor of soil genesis and morphology. Far right, Dr. Samuel H. Smith, vice president of the society. Mr. Barnard was honored for accomplishments in extension, Dr. White for research achievements, and Dr. Petersen for excellence in teaching.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

News in Brief

Some space available on Shakespeare Festival trip

Some spaces are still available for the English Department's annual excursion to the Stratford (Ontario) Shakespeare Festival from July 25 to 27.

The \$99 per person package includes tickets to three plays, lodging for three nights in Stratford rooming houses, and round trip transportation in University vans.

The Shakespeare plays on view July 25 and 26 are *Taming of the Shrew* and *Coriolanus*, and a production of *H.M.S. Pinafore* is scheduled on July 24. Those who wish may purchase tickets to a Saturday matinee performance of *The Misanthrope* for an additional \$17.50.

The trip is annual summer attraction for students in English 548. Reservations will be accepted by Judd Arnold of the Department of English mornings before 11 a.m. or evenings after 7:30 p.m. at 238-2062.

U.S.-Italian geographers hold Penn State meeting

Twenty-five geographers, 11 from Italy and 14 from the United States, participated in a U.S.-Italy Cooperative Science Exchange in Geography conference held May 6-9 at the University.

Dr. Allan Rodgers, professor of geography, arranged the conference, which, he explains, was intended to promote collaborative research between the Italians and the Americans.

All of the participants were specialists in urban and regional development, and their discussions centered on problems, policies and practices in this area.

The meeting was sponsored by the National Council of Research in Rome and the Association of American Geographers.

Indian education gets \$231,909 grant

Penn State's Native American Leadership Training Program, which focuses on "Education for Indians by Indians," has received a continuation grant of \$231,909 from the U.S. Department of Education.

The grant, which brings to approximately \$1.4 million awarded the program since 1974, is dependent upon an annual review of the program to assure that goals are met.

Now in its 11th year, the program prepares Native Americans for educational administrative and policy-making positions in schools, colleges and universities, tribal organizations and government.

Penn State's program, the longest continuously operating one of its kind, is one of some 21 programs training Native Americans for teaching or administrative positions at colleges and universities around the nation.

The program's director is Dr. Grayson B. Noley.

Alard players record Bartok Quintet

Bartok's Quintet for Piano and Strings, recorded by the Alard Quartet and pianist Sylvia Glickman, has just been released by Leonard.

Alard Quartet members are Joanne Zagst Feldman and Donald Hopkins, violins; Raymond Page, viola; and Leonard Feldman, cello. They are associate professors of music at the University.

Ms. Glickman is pianist-in-residence and an associate professor of music at Haverford College.

Quinn to be academic affairs vice president at RIT

Dr. Robert G. Quinn has been appointed vice president for academic affairs at Rochester (N.Y.) Institute of Technology (RIT). Dr. Quinn replaces retiring Vice President Dr. Roy I. Satre.

Dr. Quinn, 45, has been serving as special assistant to President Oswald in developing plans for a comprehensive, integrated management information system at Penn State.

"Dr. Quinn's extensive knowledge and experience in pragmatic educational programs as well as computer systems will advance the Institute in the decade ahead," RIT President M. Richard Rose said.

"I was attracted to RIT by its quality career programs and diversity," Dr. Quinn added. "The career nature of RIT is a major factor that keeps it at the forefront of higher education."

Dr. Quinn also cited the distinctiveness of Eisenhower College and the National Technical Institute for

Dr. Quinn

the deaf, two of RIT's 10 colleges.

Among Dr. Quinn's initial responsibilities will be evaluation of the

effectiveness of current academic programs and the utilization of computers on campus.

Dr. Quinn earned his B.S. in electrical engineering from Drexel Institute of Technology in 1959. Catholic University of America granted him M.S. and Ph.D. degrees in physics in 1961 and 1962, respectively.

His teaching experience includes Drexel, Princeton and Catholic University. In 1970 as professor of engineering, he became faculty assistant to President Oswald, and in 1971 the dean of academic instruction for Commonwealth Campuses.

He is the author of numerous articles in the fields of physics, space science, engineering and administration. He has served as a consultant to industry, government and higher education, including such national programs as Goddard Space Flight Center of NASA and the National Bureau of Standards.

New service will access University research

Dr. John W. White, professor of floriculture, and Dr. John W. Davis, a research associate in the Center for Air Environment Studies, have been named associate directors of Industrial Research and Innovation.

Dr. White is a well known researcher in greenhouse energy conservation and has contributed to the concept of movable thermal blankets. He directs research in solar methods of heating greenhouses, heat storage in eutectic salts and water, and heat-conserving properties of alternative greenhouse structures.

Industrial Research and Innovation is an adaptation of the present Small Industries Research (SIR) program directed by James W. Lundy. Where SIR operates mainly with small Pennsylvania industries, Industrial Research will work with small or large companies interested in access to University research talents.

"Industrial Research has been planned as a service function," says Dr. Lundy. "We'll try to develop faculty opportunities by matching industrial needs in research, seminars and cooperative sabbaticals, for example, with interests and capabilities of faculty members."

Benefits to the University are the opening of new sources of research support, exchange of ideas and knowledge between Penn State faculty members and industry, the creation of good will for the University, and enhancement of employment opportunities in industry for students participating in research.

Steam line repair to shut off Green D area

The Green D parking area will be closed from May 27 through June 5 while University workmen repair an underground steam line in the vicinity.

Faculty and staff who normally park in the lot must use a designated open parking lot on campus while the repairs are in progress.

Modified traffic plan set for Commencement

The following modified traffic plan will be used to accommodate crowds attending Spring Commencement exercises Saturday, May 30, at Beaver Stadium.

— Park Avenue will be one-way east from North Atherton Street to the Stadium from 9 a.m. to 10:45 a.m. It will reverse after Commencement until 1 p.m.

— Park Road will be one-way east from Bigler Road to the baseball field from 9 a.m. to 10:45 a.m. It will reverse after

Commencement until 1 p.m.

— University Drive will be one-way north from the College Avenue overpass to the Stadium from 9 a.m. to 10:45 a.m. It will reverse after Commencement until 1 p.m.

— Curtin Road will be closed to all traffic from Shortlidge Road to University Drive from 9 a.m. to 10:45 a.m. and will be closed from University Drive to Porter Road from 9 a.m. to 1 p.m.

— Porter Road will be open for two-way traffic.

The traffic pattern will not be used if rain forces the Commencement program to alternate sites.

Fraser Road traffic to be interrupted

Traffic will be interrupted at varying intervals from June 1 through June 5 on Fraser Road near Hilsing Cottage while University workmen repair an underground line.

Channel 3 receives highway safety award

Penn State's Channel 3 Educational Station WPSX-TV has been selected by the Governor's Traffic Safety Council as one of the recipients of the 1980 Governor's Highway Safety Awards.

The station was recognized for its annual alcohol highway safety campaign and public service announcements program during the 1980 December holiday season.

HUB will not serve dinner meals over summer

Some curtailment in food services provided by the HUB will be made this summer since kitchen equipment from the Terrace Room cafeteria must be moved as part of the HUB food service renovation. The following schedule has been announced:

Terrace Room Cafeteria: Breakfast, lunch and dinner will be served through Friday, May 22. The Terrace Room will be closed from May 23 through Sunday, June 7, reopening June 8. During Summer Term, service will be limited to continental-style breakfasts from 7 a.m. to 10:30 a.m. and to lunch from 11:30 a.m. to 1:15 p.m. No dinner meal service will be available.

HUB Ballroom Snack Bar: This facility will close permanently on May 22.

Kern Cafeteria: Service will be available Mondays through Fridays from 7 a.m. to 6 p.m. during Summer Term. The grill will close daily at 2 p.m.

Editor's note: The following remarks are taken from a talk delivered by Provost Edward D. Eddy May 14 at the Phi Beta Kappa banquet.

... As a sometime student of history, I once wrote a volume on this nation's land-grant colleges and universities. In preparation, I was forced to read thousands of presidential and provostial addresses.

I am happy to report that only one such address remains responsive to my recall button. Perhaps seventy years ago, President Woodrow Wilson of Princeton University delivered the Phi Beta Kappa address on a Princeton occasion, similar to this. He spoke eloquently when he said:

"My plea is this, that we now deliberately set ourselves to make a home for the spirit of learning; that we reorganize our colleges on the lines of this simple conception, that a college is not only a body of studies but a mode of association. . . . must become a community of scholars and pupils — a free community but a very real one, in which democracy may work its reasonable triumphs of accommodation, its vital processes of union."

Each of us has his or her own idea about why we are at Penn State, and we need to be articulate about those ideas.

William Faulkner wrote that he had "found that the greatest help in meeting any problem with decency and self-respect and whatever courage is demanded, is to know where you yourself stand. That is, to have in words what you believe and are acting from."

May I be presumptuous enough to share with you tonight some of my own credo on the foundations of an academic community? To my mind, two words describe best the enterprise of higher learning. I borrow these words from my own alma mater and from the splendid writings of the historian Carl Becker.

He spoke of the truly great university as one which is characterized by the delightful quality of "impudent freedom."

At its best, Penn State is a condition of impudent freedom — the freedom to delve, to explore, to be righteously right one moment and gloriously wrong the next. But, above all, to be concerned with ideas and their consequence.

What are the necessities of an academic community in order to achieve the statutory conditions conducive to impudent freedom? Let me leave any impression that university administrators escape responsibility. Let me begin with my breed.

Surely, intellectual leadership is a prime necessity in an academic community. Surely the presidents, the provosts and the deans of the world bear heavy responsibility for the spark of new ideas, for the encouragement of new approaches, for maintaining the mystique of impudent freedom. Indeed, they are the ones, above all, who should be expected to "put it all together."

Unfortunately, given the current conditions of higher education, our intellectual leadership is much too prone to concern itself almost exclusively with the frailties and finalities of finances: "the bottom line."

Preserving the essence of a great university

Indeed, we become so results-oriented, as they say in the trade, that many among us rise only to a 4th quarter mentality. We can talk about budgets and faculty productivity and student credit hours and deficiency appropriations — but we have few, if any, ideas about the individual student and what should be happening to him or her in a classroom. We forsake long-term planning for short-term gains. It's easier to cope with in-baskets than to realize dreams.

Intellectual leadership at its highest and best is nothing more nor less than the maintenance of a condition of creativity. A community of scholars is a collection of individual thinkers maintaining their own identities but sharing the common goals of impudent freedom. Furthermore, a great university is a nucleus of superbly creative people surrounded by others wanting to sharpen and perfect their own creativity. The pedant, the apathetic, the conformist, therefore, find no berth here.

In the current search for new deans at Penn State, as Provost of the University, I have found that it is both necessary and highly desirable to define what I, at least, seek in an academic leader. My thinking has evolved into three basic qualities.

The first is COURAGE. The ability to make, and then to live with, hard choices. We can't expect courage in others if we don't demand it of ourselves. For the academic administrator, the step after self-identification of strong intellectual leadership in others — and then the willingness to support those others. You can judge a leader by the choices he or she makes in people and the authority he or she delegates, often also with courage. All of us are vulnerable to mistakes, of course, and so we must be judged by the record of the years, not of the moment.

Take, for example, the matter of department chairmen and heads. Few genuinely responsible officers in all higher education are so taken for granted, both in the process of appointment and in continuing support. The effectiveness of a dean might well be measured by that one yardstick. The matter of choice reveals also the degree of courage. It includes not just the initial choice but the choice to continue. It includes the courage to make difficult decisions in tenure, in promotion, in the granting of sabbaticals, and in such deceptively mundane matters as merit.

The second quality of the intellectual leader is CLARITY. Does he or she know what he or she believes — and can one be articulate about it?

How does it help an institution to foster impudent freedom if we, ourselves, are not willing to speak freely about our own convictions? The true intellectual leader is quick to affirm, "Here I stand — but I am ready to listen."

The third quality is one which is sometimes regarded as loathsome to the content community of scholars. Simply

stated, it is COMPETITION. The leader welcomes and seeks competition — give and take. If you prefer — in the struggle for both ideas and priorities. He is kept on his mettle by colleagues who are after both his ideas and his resources — and so he must prove the validity of both.

Measure, then, the true intellectual leader by his or her courage in choice, clarity in conviction, and enjoyment of competition.

Or, in the words of East European author Stanislaw Lec: "Even in labyrinths there are signs now: NO VAGRANTS OR LOITERERS."

Allow me, if you will, to broaden this point. Allow me to return to that tantalizing phrase of Carl Becker: "impudent freedom." In essence, in a university setting, what is it? In my credo, impudent freedom means keeping sacred the opportunity for open disagreement without rancor or retribution.

Disagreement is not, *per se*, adversarial — and it all behoves us in a university setting if we view it as such. Disagreement and debate are our basic methods for the expansion of knowledge — and yet, perhaps especially at Penn State, we view them as attack. We find great difficulty in separating the criticism from the critic.

Penn State values competition on the gridiron and fears it in the classroom and the meeting room.

One of the necessities of an academic community is that it welcomes competition in ideas. Tonight is a victory party for Penn State — because it has occasion to honor those of you who do not fear competition and do strive for the best.

We hope you have learned a vitally important lesson on this campus: that a mark of the educated person is that he or she is capable of distinguishing between the idea and the person espousing the idea. He or she may or may not agree with the idea but both the person and his espousal deserve our respect. Only in this way will we be free to attack the idea cleanly and with vigor.

Harold Dodds has pointed out that a good university administrator "will do what he can to prevent normal and desirable tension from degenerating into strained personal relations which wind up in rancorous and damaging strife, but he will also do everything he can to avoid 'peace at any price' and the sterility of one big, dull, happy family."

Does Happy Valley provide too much shelter for the happy family?

Thus we come to face another necessity of the academic community: the resolution of the tension between unity and diversity.

We face a danger here, especially in these times and in this place. The national emphasis is on unity — unity in changing priorities and in keeping ourselves afloat and together. Across the nation, the emphasis within education, similarly, is on unity.

For my part, I am deeply worried lest we take the next step of implying that unity is synonymous with conformity. An acceptance of such a point of view in a university would turn us into a sand castle subject only to the waves of the sea of conformity.

Lec observes: "Here we all think alike; therefore, none of us thinks very much." No unity is worth that price.

A university should be distinguished by its diversity — or, as we have attempted to say, by the rough and tumble of conflicting ideas. This isn't comfortable; it isn't meant to be. One doesn't come to a university to be comforted. One comes because he or she enjoys, even relishes, ambiguity. Nothing is certain.

I happen to believe deeply in the necessity also of institutional diversity. I believe that we need both public and private institutions of higher learning, large and small, coed and single sex, four-year and life-long.

Recently I was issued — and readily accepted — an invitation to serve as the first non-Catholic member of a newly reconstituted Board of Directors of a Roman Catholic college, seminary, and, in effect, monastery. I believe we need monasteries in this world — places of quiet study and reflection. And I believe we need great teaching enterprises such as Penn State where someone is awake and at work every hour of every day.

But after visiting "my" seminary and monastery with its almost overpowering pressure toward unity with conformity, I return to this university to observe and wonder about its own almost smothering peer pressure — among students, among faculty members, among administrators.

In reality, we do not enjoy ambiguity and diversity on this campus. We resist them. We prefer that each make his contribution to the preservation of the Penn State image of itself. And yet a great university should be proud because it cannot be said that "here we all think alike." A great university challenges each person to think differently — and to be quick in the defense of his neighbor's equal rights.

There is a place for everything — and everything is in its place. Coach Paterno, for instance, would be the first to raise his voice in defense of that diversity. We need balance — undergraduate, graduate; professional, liberal; academic, athletic. To achieve that balance, we should be engaged in an unending debate.

Let us resolve to argue, to challenge, to dissent, to speak up and out on every issue of consequence. Only in this way will we preserve the essence of a true university. Penn State is not a collection of buildings and people: It is a collection of ideas; it is an endless argument; it is unity around the theme of diversity.

Phi Beta Kappa students, as articulate intellectuals, should be at the forefront of these debates. The bright must not shrink before the brash.

We hope and pray that Penn State never thinks that it has all the answers. It depends upon each succeeding generation to raise impudent questions and to provide outrageous answers. . . .

University to host three international conferences on ceramics, glass

Three international conferences on technical ceramics and glass will bring scientists from all over the world to the University this summer.

An International Symposium on the Fracture Mechanics of Glass is scheduled for July 15-17; the sixth in a series of conferences on glass science, entitled "Glass Microstructure: Surface and Bulk," will be held July 29-31; and the Fifth International Meeting on Ferroelectricity will run from Aug. 17 to 22.

The fracture mechanics meeting will include six half-day sessions with the

tentative titles of: toughening processes in ceramics; slow crack growth; experimental techniques; surface phenomena and effects; engineering design, reliability, and application; and elevated-temperature fracture. Dr. Richard C. Bradt, professor and head of the Department of Materials Science and Engineering, is local coordinator for this conference.

The glass science conference is one of a series being held every two years on a rotational basis among the University of Missouri at Rolla, Alfred University, Rensselaer Polytechnic Institute, and Penn State. It will be devoted to glass

microstructure and includes these topics: concepts of glass structure; microstructure formation; characterization of microstructure; surfaces and interfaces; and relationship of microstructure to properties. A short course on "Surface Analysis of Glass and Ceramics" on July 27-28 will precede the conference. The Penn State organizing committee consists of Dr. Carlo G. Pantano, assistant professor, and Dr. Guy E. Rindone, professor emeritus, both of ceramic science and engineering; and Dr. William B. White, professor of geochemistry.

The ferroelectricity meeting is sponsored

by the International Union of Pure and Applied Physics and the American Ceramic Society in cooperation with the Institute of Electrical and Electronics Engineers. The program will cover all aspects of the study of ferroelectricity which has applications in capacitors and other electronics components. It will follow the format of the four earlier conferences which were held in Prague, Kyoto, Edinburgh and Leningrad. Dr. L. E. Cross, associate director of the Materials Research Laboratory, is local organization chairman. Dr. Robert Newnham, professor of solid state science, is organizing secretary.

IAHS sets itself task of enlivening intellectual climate

When Stanley Weintraub became director of the Institute for the Arts and Humanistic Studies in 1971, he told an interviewer that while he didn't expect to make waves, he did hope to cause a few ripples.

Since then, from his office in Ithaca College, Dr. Weintraub, a research professor of English, has managed consistently to ruffle the calm of the backwaters surrounding "Happy Valley."

Beginning with Brazilian novelist Jorge Amado, a constant stream of distinguished Visiting Fellows has been brought to University Park with Institute support. Some are well known to the general public — among them, Nobel laureate Isaac Bashevis Singer, Peruvian President Fernando Belaunde-Terry, novelist C.P. Snow and portrait painter Alice Neel. Others have established reputations within a scholarly discipline — Austrian linguist Wolfgang Dressler and Belgian historian Raoul van Caeneghe, for example.

"We're always looking for new ways to stretch faculty and enliven the intellectual climate," Dr. Weintraub reports. "Because of Penn State's physical and cultural isolation, our artists and scholars need the stimulation of talking and working with visiting fellows, and these contacts also help the faculty establish valuable research connections."

Visitors sometimes make their own connections. Dr. Weintraub points to John Dixon Hunt, an English scholar interested in the relationships among garden-planning, art and literature in the 18th and 19th centuries. When Professor Hunt visited the Institute in 1977, he met Fellow Heinz Henisch, editor of the journal, *History of Photography*. Subsequently, when Dr. Henisch learned that his publishers were seeking someone to edit their new *Journal of Garden History*, he recommended Dr. Hunt, who is now the editor.

Dr. Weintraub recalls two other incidents:

Dr. Weintraub

"When biographer Leon Edel was here, just before he finished his *Henry James*, he discovered a diary by a Jamesian friend in our Rare Book Room. He hadn't known of it. Now there's a reference to it in the biography. And when Bernard Shaw biographer Michael Holroyd was here, he was able to add to his documentation from our resources. The intellectual currents flow both ways."

In addition to assisting departments in attracting visiting luminaries, the Institute provides "seed money" to support research and artistic activity at all Penn State campuses. A seven-member advisory committee confers with Dr. Weintraub and assistant Institute director William H. Allison in determining grants. Major funding for the Institute's programs is provided by the Office of the Vice President for Research and Graduate Studies.

"Because we are an independent Institute and our grants are competitive awards, the recipient of one of our research fellowships has a head start in approaching a federal granting agency such as NEH," Dr. Weintraub says. "I estimate that for every \$10 the Institute

gives out, faculty members secure \$25 to \$30 from another granting agency to continue their work. That's what I mean by 'seed money.' We do not look on ourselves as a small grants office doling out funding as each faculty member's turn comes up. We try to be highly selective about the researchers in whom we invest."

Dr. Weintraub is particularly proud of the "Society of Fellows" created by the Institute. There are now 13. Weintraub himself, Kenneth R. Beitler, Gerard J. Brault, Raymond Brown, Stuart Frost, Helmut Hager, Warren W. Hassler Jr., Heinz Henisch, Charles W. Mann Jr., Robert K. Murray, Stanley Rosen, Robert F. Trehy and Paul West.

"All of our Fellows have national or international recognition in their fields," Dr. Weintraub says, "and we believe that they serve as symbols of excellence for the faculty."

Still another function of the Institute has been to act as impresario. It has arranged the American premieres of three plays, most recently Jose Martin Recurda's *The Innates of the Convent of Saint Mary Egypt*. It has also commissioned a number of musical works, not always to critical acclaim, although *The New York Times* wrote that John La Montaine's *Be Glad Then America* had "won the Bicentennial sweepstakes."

"It's a chance one takes," Dr. Weintraub says. "We try to go to composers who have received such major recognition as a Pulitzer Prize. You have to start somewhere, and the Pulitzer committees in music are very selective. For the past two years, for example, no prize was awarded."

Institute funding has also inspired and supported a variety of special programs, among them the 1200th Anniversary Symposium on *The Song of Roland*, the appearance of the Grimephoto Colliery Band of Yorkshire, the publication of a Bicentennial history, *Pennsylvania 1776*, and an exhibit in the State Museum of

Harrisburg of the "button hole" photograph of camera pioneer Horace England.

"We have been wary of commissioning works of art," Dr. Weintraub notes. "With music, you must promise at least one performance, but that's quite different from committing our Museum of Art to display permanently a work it has never seen."

During the past decade, a number of undergraduate courses have been developed with Institute support.

"I think that too often we teach in a vacuum without showing interrelationships," Dr. Weintraub says. "Art happens because a person lives in a social and historical context."

Among the interdisciplinary experimental courses which have grown out of this philosophy are "Women and Creativity" (offered three times) and "The Culture of the American 1960s," which was so successful that it will be scheduled again next year.

Although the Institute has compiled an impressive record under his tenure, Dr. Weintraub has no intention of resting on his oars. He is concerned, however, about the effects of reduced federal funding and Penn State's calendar conversion on Institute fellowships.

"Research fellowships involve released time," he explains, "so it will cost significantly more to support a faculty member for a semester as opposed to a term. And of course the reorganization of federal funding is going to affect our 'seed money' philosophy."

The accomplishments of Penn State's whose work has had an Institute connection is obvious to a visitor. One large wall in the Cottage is covered with thumbtacked book jackets, concert programs, exhibition catalogs and other evidence of continuing faculty achievement. "We keep running out of display space," Dr. Weintraub says. "It's a good feeling."

Dean Palladino chosen to head NRC

(Continued from page 1)

completion and are ready for operating licenses," he says. "A decision is going to have to be made on whether it is a go or no-go situation. You can have all the debates you want, but you can't go on dilly dallying for months and years."

"I think there need to be better communication systems among plants and between NRC and the plant operators so information about anything that becomes

— formed to offer guidance to General Public Utilities to keep the accident from becoming worse. The group advised on various modes in which the plant was to be maintained at various stages of the post-accident period.

He was a member of the Advisory Committee on Reactor Safeguards for 10 years — with one year out while he served as president of the American Nuclear Society. The committee was a statutory body established by Congress to review commercial nuclear power plants proposed for construction or operation in the United States.

This is not the first time his name has surfaced in connection with the NRC. Dean Palladino was one of three candidates proposed to President Carter for the Commission by the National Academy of Engineering and the Engineers Joint Council.

He has been dean of the College of Engineering since November 1966 and for seven years prior to that was department head of nuclear engineering. A Lehigh University alumnus, he worked for Westinghouse for 20 years before coming to Penn State.

"I've certainly enjoyed being dean," he says. "It was an interesting period, with many challenges. We lived through the drop-off in enrollments during the late '60s and early '70s and then the sudden turn-around, with enrollments rising faster than we anticipated. I've had a good faculty, and I've enjoyed my years in the Senate."

"I've been telling well-wishers, 'As long as you don't see me on TV, I'm not in trouble.'"

President Oswald issued the following statement on hearing of Dean Palladino's appointment:

"It is indeed a great honor for Penn State to have one of its administrators appointed to such a crucial government position. As one of the nation's foremost experts on nuclear power — and especially nuclear safety — Dr. Palladino is an excellent choice, and I congratulate him."

"In his 15 years as Dean, Dr. Palladino has been most instrumental in developing the College of Engineering into an excellent academic unit of our University. I am very happy that he has been given this opportunity to serve his country."

a problem at one plant can be transmitted to the others. If that had happened at Three Mile Island Unit 2, the situation might have been less severe."

Dean Palladino for 10 days was part of the technical task force — an ad hoc group

Faculty/Staff Alerts

Errors in phone book should be corrected

The updating of listings for the next edition of the Faculty/Staff Telephone Directory will start early next month.

Faculty and staff members who have noted errors in the directory listings should act immediately to correct their entries in the upcoming directory.

Information for the directory was taken from payroll files last summer. Following is a list of common errors and the procedures for getting the correct information into the proper files.

In correcting the forms, it is important to fill in all the information. Missing elements may cause errors or rejection of the correction by the computer file.

Directory listing carrying old or incorrect title:

Must be corrected on Payroll Change Form submitted by your Department Head, through the Office of Personnel Administration.

Listing showing old or incorrect address: Home address — changed by submitting new W-4.

Campus address — changed by submitting Office Address Telephone Information form. Both forms are available from your Personnel Representative.

Name omitted from Directory: Submit O.A.T.I. form to Payroll. Form is available from your Personnel Representative.

Unlisted number appearing in Directory: This can be corrected in two ways. Submit

new O.A.T.I. form with a Code 2 in the publish box, or fill out a new W-4 form and omit your unlisted number from the form. Both forms are available from your Personnel Representative.

Employment files need to be kept up-to-date

University employees often acquire additional skills or knowledge through course work, training programs, and individual study that they didn't have when they initially joined the University. In addition, an employee may gain experience in another field through outside activities.

The University's Employment Division says it is very important to know about all such skills or knowledge when an employee applies for promotion to another job. Unless the employee provides this information, his or her file may contain only information on education, training or other experience provided either at the time the person joined the University or last had contact with the Employment Division.

Therefore, the Employment Division urges every employee to consider whether he or she can add to the information currently on file and to remember also that such information should be updated when appropriate. If additional information is to be added, a Personal Data Update sheet should be requested from the Employment Division, 117 Willard Building, 865-1387 (Network 475-1387). Then, if an employee later calls to apply for an announced job vacancy, the additional information already will be on file.

Calendar

May 21-June 10

Special Events

Thursday, May 21
Final examinations. Also May 22, 23 and 25.

Saturday, May 23
Shaver's Creek Nature Center, Paul Risk on "Folklore and Uses of Medicinal and Edible Wild Plants," 2 p.m., Stone Valley.

Monday, May 25
Holiday. Memorial Day observed. University offices closed.

Sports: golf (women) vs. Alumnae, 9 a.m.
Shaver's Creek Nature Center, Memorial Day picnic, hike, 2 p.m., Stone Valley.

Tuesday, May 26
Computation Center Workshops, "INTERACT Techniques," mornings only, 9 a.m., Room 108 Forum, through May 28; "SCRIPT: A Text Formatter," afternoons only, 1:30 p.m., Room 108 Forum, through May 28.

Registration, Room 229 Computer Bldg. Residence Halls close for Spring Term, 3 p.m.

Wednesday, May 27
Sports: track (women), Penn State Open, through May 30.
Political Science lecture, Jose Antonio Gil, Venezuelan professor, on "Political Bargaining and Policy Making in the Third World: Effective or Limited Pluralism," 8 p.m., Room 112 Walker.

Thursday, May 28
Board of Trustees meeting, Keller Bldg.

Friday, May 29
Board of Trustees meeting, Keller Bldg.
Shaver's Creek Nature Center, "Ecoventures," 5th and 6th graders, through May 31.
Information, weekdays, 8 a.m.-5 p.m., 865-1851.

Saturday, May 30
Spring Term Commencement, 10:30 a.m., Beaver Stadium.

Monday, June 1
Distribution of faculty spaces for Summer Term, 7:15 a.m., Room C106 Pattee.
Computer Center Workshop, "Introduction to APL," mornings only, 9 a.m., Room 108 Forum, through June 5. Registration, Room 229 Computer Center.

Tuesday, June 2
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Thursday, June 4
Alumni Assn., Alumni Reunion Weekend, through June 6.

Friday, June 5
Plant Pathology/Veterinary Science Special Seminar, 2:20 p.m., Room 111 Animal Industries. J.A.W. Coetzer, Veterinary Research Institute, South Africa, on "The Role of Myxomatosis and Plants in Photosensitizing Diseases of Animals."

Saturday, June 6
Alumni Assn., All Class Luncheon, 12:30 p.m., Rec. Hall.

Sunday, June 7
Student arrival date for 10 week Summer Term. Residence Halls open, 8 a.m.
Alumni Chapel Service, 9:30 a.m., Eisenhower Chapel. Dr. Doris Seward, exec. asst. to the President, speaker.

Tuesday, June 9
Registration for 10 week Summer Term, 8 a.m.-5 p.m., IM Bldg.

Wednesday, June 10
Add deadline, through June 19.

Drop deadline, through June 30.
Summer Term classes begin, 8 a.m.

Exhibits

Kern Gallery: Martha Holt, ceramics and photographs, through May 22. Bill Rensner, leather, through May 23. Robert Graves, prints, through May 29.

Museum of Art: Selected works from the collections of Mimi and Sanford Feld and Samuel Gallu, through May 24. Selections from the Museum's American collection, through May 31. Photographs from the Museum's collection. Twentieth-century works from the Museum's collection, opens May 23. Drawings and prints from the Museum's collection, opens May 31.

Pattee Library: "Igitor's House: An Architectural Study," through June 10, East Corridor Gallery. Karen Simonaitis, recent paintings, through June 7, Lending Services Lobby. Becky Matarazzi, glass, through June 10, Main Lobby. Martha Carothers, "The Design and Production of Children's Novelty Books," Rare Books Room.

Visual Arts Zoller Gallery: Undergraduate Exhibition, through May 22.

Funding Sources

For further information,
call 865-1372

(359-1) The National Endowment for the Humanities Summer Seminars for College Teachers for Summer 1982 is seeking scholars to direct these seminars in undergraduate teaching. Outstanding scholars who have access to libraries suitable for advanced study and research are urged to apply. Each seminar is to provide 12 college teachers with an opportunity for eight weeks of uninterrupted study, research and discussion with the seminar director and colleagues of similar professional background and interests. Seminar directors have a wide latitude of design seminars in their areas of interest. The seminars to be offered in 1982 will be announced in December. The deadline for submitting proposals to direct 1982 Summer seminars is July 1, 1981. The NEH contact is Mrs. Dorothy Wartenberg at 202-724-0376. (Ref. NEH Announcement)

(360-2) The National Endowment for the Humanities has set a June 1, 1981, deadline date for two fellowship programs, Fellowships for College Teachers and Fellowships for Independent Study and Research. For detailed information and application material contact Karen Fuglie for the first program and David Coder for the second, both at 202-724-0333. (Ref. NEH Announcement & OFP)

(360-1) International Travel Grants are available through the National Science Foundation to enable U.S. scientists to participate in international scientific meetings held abroad for the purposes of obtaining and exchanging science information and/or professional development. Individual travel grants are available, but the program's emphasis will be upon support of professional groups or non-profit organization's activities. Deadline July 1, 1981. For information contact Mildred Boslavec at NSF (202-357-9505). (Ref. OFP July Deadlines)

Where else would you study for finals on a nice day?

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Commission for filling. This announcement is made to that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., May 28, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

COUNSELOR, CAREER DEVELOPMENT AND PLACEMENT CENTER, University Park. Responsible to the Assistant Director for Career Counseling and Planning for providing career development and placement services at the University Park Campus. Master's degree (or equivalent) in clinical or counseling psychology, counselor education, student personnel administration, or related area, plus one to two years of effective experience required. This is a Fixed Term Appointment - Ten-month position beginning Aug. 15, 1981.

SENIOR MEDICAL TECHNOLOGIST, UNIVERSITY HEALTH SERVICES, University Park. Responsible for operation of laboratory and performance of a variety of standardized and specialized laboratory tests and procedures. Supervise and coordinate the performance of laboratory tests

Bachelor's degree and A.S.C.P. certification needed, plus two years of effective experience.

RESEARCH AIDE, COLLEGE OF AGRICULTURE, University Park. Responsible to research assistant and professor of dairy science for chemical analyses using recording spectrophotometer, enzyme assay, atomic absorption spectrophotometer, amino acid analyzer, electrophoresis and liquid gas and thin layer chromatography. Prepare, identify and count types of micromorphisms. Collect and prepare tissue samples for analyses. Assist in collection of data on experimental animals. Manage flow of samples through laboratories. Circulate results of experiments and summarize data. Prepare data for computer analyses. Operate and maintain laboratory equipment. Prepare charts and visual aids. Supervise and train technicians and graduate students. College-level courses in analytical, organic and inorganic chemistry, biological sciences, mathematics required, plus one to two years of effective laboratory experience with demonstrated ability to conduct independent research.

LIBRARY ASSISTANT, WORTHINGTON SCRANTON CAMPUS. Responsible to Campus Librarian for assistance in all phases of library operations. Supervise part-time personnel. Oversee circulation. Operate CRT for catalogue maintenance and editing, reserve, inter/intrabrary loan and book order procedures. Assist students and faculty with reference needs. Process library skills work books. Maintain specific collections. Prepare reports. Operate library in absence of librarian. Associate degree or equivalent, plus up to one year of effective experience required.

WRITER/EDITOR, PUBLIC INFORMATION AND RELATIONS, University Park. Responsible to the Manager of the News Bureau for developing subject ideas for news releases and for providing public information support to the News Bureau. Bachelor's degree in journalism or liberal arts and one to two years of effective experience.

CHIEF RADIOLOGIC TECHNOLOGIST, COLLEGE OF MEDICINE, HERSHEY. Responsible to the Administrative Manager, Department of Radiology, for administrative, staff advisory, and professional duties in supervising and directing the work of staff radiologic technicians and related supportive and auxiliary personnel in assigned area(s). A bachelor of science degree or equivalent education such as two to three years of college with courses principally in physics, chemistry or mathematics and an additional year of formal radiologic technology training in a school approved by the Council on Medical Education plus an additional two to four years of effective experience as a staff radiologic technician.

SUPERVISOR, STUDENT TRANSCRIPTS, OFFICE OF THE UNIVERSITY REGISTRAR, UNIVERSITY PARK. Responsible to the Director of Records for supervision and coordination of transcript production: student record actions (hold); transcript fee collection, accounting operation and deposit of fees; responses to legitimate requests for certification of attendance, class rank, and other related information from educational, industrial, domestic and foreign government sources. Prepare statistical and financial reports that can be used for planning and production control. Hire and train new employees. Associate degree in business administration or its equivalent, plus one to two years of related effective experience with student records and supervisory experience are required.

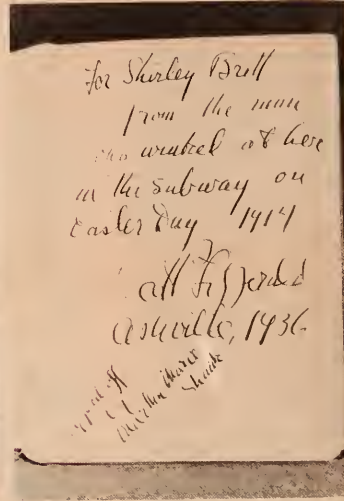

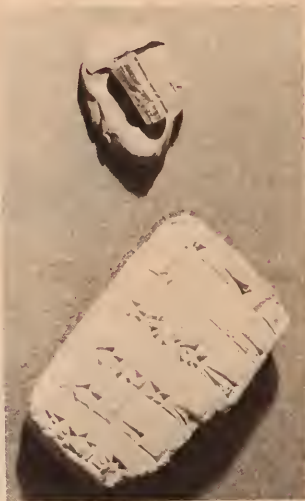

Commencement

professor of general engineering, who is retiring.
New Kensington, May 28, 7 p.m.,
Forum Theatre. Speaker: Dr. Stuart Forth, dean of Libraries.
Ogontz, May 29, 8 p.m., Physical Education Building. Speaker: Dr. Jeanne L. Smith, professor of psychology, who is retiring.
Schuylkill, May 30, 2 p.m., Multi-Purpose Building. Speaker: Joseph H. Jones, attorney with Williamson, Friedberg and Jones of Pottsville.
Worthington Scranton, May 29, 7 p.m., Multi-Purpose Building. Speaker: Dr. John C. Villanue, associate professor of business, who is retiring.
Shenango Valley, May 31, 2 p.m., Campus Auditorium.
Wilkes-Barre, May 30, 2 p.m., outside on campus (rainsite). George Bierly Auditorium. Speaker: Clayton A. Richmond Jr., member of Wilkes-Barre Campus Advisory Board and general manager of Hawk Oil Company.
York, May 28, 8 p.m., Student Community Center. Speaker: William W. Scranton III, Pennsylvania's lieutenant governor.

Treasures from Pattee

A Pattee potpourri — proving that a library is more than the sum of its books. Housed in the Rare Books Room are: Top row — The original typescript of the novel critics consider John O'Hara's best, "Appointment in Samara"; a set of Victorian blocks, a child's toy dating from about 1874. Second row — A medal commemorating Robert Falcon Scott's doomed polar expedition of 1912; a cuneiform tablet and seal; an inscription penned by F. Scott Fitzgerald on a copy of his novel, "Tender is the Night." And — One of a series of Japanese prints of the Ukiyoe genre, this one by Utagawa Kunisada (1786-1864); Ch'ing Dynasty coins from the early 19th century; a "book" containing a set of 381 poems by a Dutchman, Gerhart Tersteegen, published in Germantown, Pa., in 1743.

Penn State Intercom

New Senate officers from left: Chairman-elect Joseph Dixon, Chairman Nancy Tischler, Secretary Carol Cartwright.

Senate installs 1981-82 officers, passes three legislative reports

Curriculum, Capitol subjects of legislation

With mingled feelings of "exhaustion" and "satisfaction," Senate Chairman George Franz turned over his gavel to his elected successor, Dr. Nancy M. Tischler, professor of English and humanities at Capitol Campus.

In his brief farewell remarks at the Senate's June 2 meeting, Dr. Franz, an assistant professor of history at Delaware County, noted his belief that the Senate had made progress this year in effectively exercising its advisory and consultative responsibilities.

"We must insist that academic quality be maintained and strengthened throughout the University and that decisions not be solely budget driven," he said.

Adding that he also felt some frustration, Dr. Franz expressed disappointment that revisions to PS-23 had not been completed and that the Senate had not begun discussing the question of effective evaluation of instruction.

Turning to the future, he said: "I think we have a great deal to be proud of at Penn State... we are really in much better

(Continued on page 3)

Names of faculty elected to committees reported

Nancy M. Tischler, professor of English and humanities at Capitol Campus, has been elected chairman of the Senate for the 1981-82 academic year.

Other faculty members elected by the Senate membership include:

Chairman-elect: Joseph A. Dixon, professor of education and acting associate

dean for academic affairs in the Commonwealth Educational System (see story on page 2).

Faculty Advisory Committee to the President: Irwin Feller, professor of economics; Patricia M. Overdeer, professor of mathematics at Ogontz.

Faculty Rights and Responsibilities: University Park, Miles T. Pigott, professor

(Continued on page 8)

Plant Pathology head to be new dean of Agriculture

Dr. Samuel H. Smith, professor and head of Plant Pathology, will become dean of the College of Agriculture on July 1.

Dr. Smith, who succeeds retiring Dean James M. Beattie, also will be director of Penn State's Agricultural Experiment Station and director of the Cooperative Extension Service.

"I am extremely pleased that Dr. Smith has agreed to accept this crucial and challenging position," President Oswald told the Board of Trustees, which approved the appointment at its May 29 meeting.

"The new dean has proven himself an important scholar, as well as a bright and able administrator," Dr. Oswald said. "His demonstrated concern for quality in research, education and the various service functions of his college will allow him to continue Penn State's long tradition of advancing the cause of agriculture in the State and nation."

Commenting on his appointment, Dr. Smith said: "I see this as a great opportunity to work with an extremely fine college and with an excellent faculty and staff. I intend for the college to continue its agricultural leadership in the nation through its programs in teaching, research and extension."

A native of Salinas, Cal., Dr. Smith, 41, earned a bachelor's degree in plant pathology from the University of California at Berkeley in 1961. He received a doctorate in plant pathology from Berkeley in 1964 and studied as a North Atlantic Treaty Organization post-doctoral fellow at Glasshouse Crops Research Institute in Sussex, England.

After four years on the Berkeley faculty,

Samuel Smith

Dr. Smith joined Penn State in 1969 as associate professor of plant pathology in the Fruit Research Laboratory at Ardenstville, Pa. He came to University Park in 1971 and was promoted to full professor in 1974.

Since 1976, he has been head of the Department of Plant Pathology, and since 1978, he also has served as a U.S. Department of Agriculture plant pathologist.

Dr. Smith's research has centered on various aspects of plant virology, including location of sites of nucleic acid synthesis in virus-infected plant cells, physiology of resistance to plant viruses and virus-induced susceptibility to fungus infection.

He has published more than 100

(Continued on page 6)

James Ryan

David Otto

Two campus directors named; Otto to head Beaver and Ryan to take Wilkes-Barre post

Dr. James H. Ryan, director of the Division of Continuing Studies and associate professor of continuing studies and public and environmental affairs at Indiana University at South Bend, has been named director of the Wilkes-Barre Campus. He will succeed Dr. Nils Parr who has been acting director at Wilkes-Barre since George Bierly's retirement in October.

Dr. Parr will resume his regular responsibilities as associate director for academic affairs when Dr. Ryan arrives in August.

"I am extremely pleased that Dr. Ryan

(Both these stories continue on page 8)

David B. Otto of Beaver has been named director of the Beaver Campus, effective immediately. President Oswald also announced that he has authorized an immediate search for an associate director for academic affairs for the Campus.

Concerning Mr. Otto's selection from among more than a hundred applicants, Dr. Oswald said: "His truly outstanding performance as interim and acting director of the Campus made him an obvious choice for the position."

"Under his direction, the Campus has improved in many areas. This has been a broad and balanced development, ranging

Penn Staters

Dr. John F. Brugel, director of Student Aid, has been named to the Committee on Student Financial Assistance of the National Association of State Universities and Land-Grant Colleges. The group, which includes five university presidents, will analyze various federal proposals on student assistance in terms of their impact on land-grant institutions and attempt to initiate positions to assist such institutions in meeting the economic challenges ahead. Dr. Brugel was also elected president this spring of the Pennsylvania Association of Student Financial Aid Administrators.

Dr. Warren C. Robinson, professor of economics and director of Penn State's Population Issues Research Center, has been invited to give a series of lectures on population and development planning at Fudan University in Shanghai this summer. His lectures are part of a series sponsored by the United Nations Department of Technical Cooperation and the Chinese Ministry of Education.

Nicholas Gavrilis, assistant professor of philosophy at McKeesport, has been awarded a summer research grant by the National Endowment for the Humanities. He will attend a summer seminar at Brown University on "The Origins of the Concept of Freedom in the Ancient World." This is the second NEH award granted to Professor Gavrilis, who also worked in the philosophy department of Boston University in 1978 on "The Concept of Virtue in 4th Century Athens and 18th Century Scotland."

Dr. Troy Thomas, assistant professor of humanities and art at the Capitol Campus, has been awarded a summer study fellowship from the National Endowment for the Humanities to study the art of the Counter Reformation at Columbia University.

Dr. Thomas A. Hale, associate professor of French and comparative literature, has been elected president of the African Literature Association (ALA). One of the founders of ALA, he previously served the 500-member international organization as secretary-treasurer.

Dr. Jan S. Prybyla, professor of economics, has been named to the executive advisory board of the *International Trade Law Journal* published by the University of Maryland School of Law.

Henry W. McCoullum, an instructor and director of Project Upward Bound in the College of Human Development, was inaugurated as president of The Mid-Eastern Association of Educational Opportunity Program Personnel (MEAEOPP) at their Fifth Annual Conference in Williamsburg, Va.

Dr. Mary L. Willard, professor emerita of chemistry, received the 1981 Lion's Paw Medal Award last weekend at the alumni reunion All-Class Luncheon. Honored for her service to the University, Dr. Willard was a faculty member from 1927 to 1964. Born on campus, she is the daughter of the late Joseph Willard, who served as head of the math department. She earned her B.S. and M.S. degrees at Penn State and her Ph.D. at Cornell. In 1965, she was named a Distinguished Alumna of Penn State for her activities as a chemical microscopist and forensic scientist.

Dr. Joseph J. Eisenhuth, associate professor of aerospace engineering, was honored as outstanding faculty adviser in the College of Engineering at the College's annual honors day luncheon.

Dr. Frank F. Aplan, professor of mineral processing, recently participated in the First Australian Coal Preparation Congress at Newcastle, New South Wales, presenting an invited paper, "Depression of Coal by Starches and Starch Derivatives

during Coal Flotation." He also lectured on "The Response of Coal, Mineral Matter and Locked Particles in a Coal Flotation System" to the staff of the division of mineral engineering of the Commonwealth Scientific and Industrial Research Organization in Melbourne.

Appointments

Dr. Phillip Cartwright, professor of special education, has been named head of the Division of Special Education and Communication Disorders in the College of Education.

A Penn State faculty member since 1967, Dr. Cartwright was professor in charge of the program in special education from 1975 to 1980 and served as acting head of the Division during the past academic year, as well as from 1976 to 1978.

In 1970, he collaborated with his wife—Dr. Carol A. Cartwright, a professor of education in the Division of Curriculum and Instruction—to develop and produce the first full-length college or university extension course taught entirely by computer. Dubbed CARE (for Computer-Assisted Remedial Education) and funded by a \$379,000 federal grant, the computer-based courses were developed to help teachers identify and work with mildly handicapped children.

The Cartwrights have co-authored four textbooks; the most recent is *Educating Special Learners*, issued in March by Wadsworth Publishing Company. Accompanying the text is a 250-page teacher's manual, *Activities, Guidelines and Resources for Teachers of Special Learners*, the first special education resource book to appear.

Dr. Cartwright received his B.S. in psychology and his M.S. in special education, both from the University of Illinois. His Ph.D. in special education was granted by the University of Pittsburgh.

Dr. Carol A. Cartwright, professor of education, was named acting associate dean for academic affairs in the Commonwealth Educational System, effective June 1.

Dr. Cartwright, also professor in charge of graduate programs in the Division of Curriculum and Instruction, succeeds Dr. Clays L. Ritchie, who resigned to take a position with a management firm.

Dr. Cartwright will serve as a liaison between System faculty members in all disciplines and at all locations and their academic departments at University Park. In addition, she will rely on her wide-ranging experience in teaching methods to further utilization of instructional systems such as computers and television throughout the System.

A member of the faculty since 1967, Dr. Cartwright has served in numerous University leadership positions, including being chairperson of the Task Force on Faculty and Staff for the *Perspective on the '80s*. A member of the Calendar Conversion Council, she was elected secretary of the University Faculty Senate for the 1981-82 academic year. In 1978, Dr. Cartwright received a Provost's Fellowship for the Summer Institute for Women in Higher Education Administration at Bryn Mawr College.

Her B.Ed. in early childhood education was granted by the University of

Wisconsin-Whitewater and her M.Ed. and Ph.D., both in special education, by the University of Pittsburgh.

Dr. Rodney A. Erickson, associate professor of geography, has been appointed director of the Pennsylvania Economic Analysis Program in the Center for Research of the College of Business Administration.

"The post is a new one," according to Dr. Paul H. Rigby, director of the Center for Research. "It was created to recognize the expanding importance of regional economic analysis in Pennsylvania." The Pennsylvania Economic Analysis Program publishes the monthly "Pennsylvania Business Survey," which is edited by Alice Warne.

Dr. Erickson will serve half-time, beginning July 1, and will retain his affiliation with the Department of Geography. In addition, he will be affiliated academically with the Departments of Marketing and of Business Logistics in the College of Business Administration.

Dr. Robert E. Shute, assistant professor of health education, has been named director of the Office for the Protection of Human Subjects, effective June 1.

Dr. Shute, who was appointed to the half-time position by Dr. R. C. Cunningham, vice president for research and graduate studies, will assist faculty and student investigators, as well as review committee members, to expedite necessary reviews and work to achieve a high level of protection for human subjects. He will be responsible also for maintaining close contacts with DHHS officials in following the development of regulations covering the protection of human subjects.

All activities calling for the use of people as subjects in University research, continuing education or instructional projects, whether sponsored or unsponsored, must be reviewed by either the Biomedical or the Behavioral and Social Sciences Review Committees. These committees are comprised of senior faculty and staff, plus non-University members.

Guidelines for the preparation of review materials are given in "Human Subjects, Policy and Procedures," a manual available from the Human Subjects Office, Room 312 Willard Building. The office telephone number is 865-1775.

Partings

Ferdinand J. Buechele, audio visual technician in Continuing Education, retired May 30. He had served in that position since being employed by the University in 1953.

Noting that his retirement plans are "indefinite but include a lot of relaxing," Mr. Buechele is moving from his Petersburg residence to an area near the Shavers Creek Dam at the Stone Valley Recreation Area.

Mr. Buechele is a veteran of World War II and the Korean War and has been active with both the American Legion and the Veterans of Foreign Wars.

George M. McConnell, a maintenance worker at Ogonet, retired May 2 after serving at the Campus since April 28, 1971.

Patricia J. Geist, a secretary in Business Administration, left the University May 16. She was employed between 1964 and 1970 and again from 1976 until her leaving.

Promotions

Staff Exempt

Dean D. Amick to manager, Central Milk Testing Laboratory, in Agriculture.

Cheryl A. Dively to supervisor, liaison service, Outpatient Lab and Student Labs at Hershey.

Arnun R. Eichelberger to assistant manager, student loans and scholarships, in Controller's Office.

Jacqueline M. Francis to manager, Admissions Department, at Hershey. Denise D. Gibson to certified pediatric nurse practitioner at Hershey. George E. Olson to manager, payroll, in Controller's Office. James D. Stever to accountant in Controller's Office.

Staff Non-Exempt

Rebecca Falk to senior staff nurse at Hershey. Daniel J. McBride, Jr. to senior research technician at Hershey.

Clerical

Carol Amman to secretary C in Earth and Mineral Sciences. Deborah A. Brooks to correspondence typist A in Health, Physical Education and Recreation.

Melinda B. Comfort to clerk typist A in Personnel Administration.

Cynthia S. Dunmire to secretary C in Continuing Education.

Catherine L. Guyer to secretary B in Human Development.

Lou Hall to clerk-expeditor at Hershey. Pamela D. Hillard to secretary B in Business Administration.

Mary D. Hunt to secretary in Student Administrative Services. Sherry Lightner to clerk, typist A in Agriculture.

Judy A. Marconi to secretary A in Continuing Education.

Nancy McGinnis to secretary C in Intercollege Research Programs.

Patricia A. Pontowski to senior clerk at Ogonet.

Jeannette J. Willower to clerk A at Applied Research Laboratory.

Technical Service

Arthur J. Coble to stores clerk at Hershey. Gary Green to locksmith hardware maintenance worker apprentice in Physical Plant.

John M. Jones to audio visual technician in Continuing Education.

Ralph Leach to operating mechanic in Physical Plant.

Lynford T. Reichert to laboratory technician A at Hershey.

Terry L. Rogers to mail clerk security guard at Applied Research Laboratory.

Bruce W. Tindal to agronomy technician (small grains) in Agriculture.

Obituaries

Dean E. McFarland, a staff pilot with Business Services, died May 29. Mr. McFarland, an Altoona native, was 56. He had been flying for the University since 1966.

Ruth V. Shirey, a secretary in the College of Agriculture from 1937 until her retirement in 1958, died March 20. She was 88.

George H. Gearhart, a heating and ventilating technician with the Office of Physical Plant when he retired in 1975, died May 22. He was 67. Mr. Gearhart worked with Physical Plant during his entire University career, which began in 1946 when he was hired as a power plant operator.

Senate

(Continued from page 1)

shape than we give ourselves credit for. . . .

"Moreover, I believe our system of shared governance works and works effectively. As I have served in various capacities in the Senate, I have been struck with the very high degree of cooperation that exists between the instrumentalities of the Senate and the various administrative offices. I do not think faculty realize how their role in the governance of this University has been enhanced during the last 10 years."

After accepting the gavel, Dr. Tischler offered her first remarks as chairman of the Senate, focusing on the significant role the Senate plays in the academic life of the University.

"I see the faculty as the heart of the University, and because I see the Senate as the guardian of the rights of the faculty, I am especially proud to be the representative of these 3,300 remarkable and diverse people," she said.

Observing that she is "impressed by the very real power of this body," Dr. Tischler said the Senate constitution provides it "with the central role in the University community—the control of the curriculum."

But to exercise this power fully and effectively, Dr. Tischler called upon the Senate to recognize, in addition to its diversity, a University-wide sense of "solid community."

"Our challenge," she explained, "is to build a community that is inclusive of all of us. . . . Let's look at one another's needs and respond to one another's concerns; and let's share."

In looking to the year, Dr. Tischler emphasized her intention to involve as many Senators as possible in active Senate participation. She added she is seeking to meet with as many Senators as she can over the summer and in the fall will present an agenda culled from ideas expressed at these meetings.

Before the installation of new officers, the Senate conducted its final session of the current academic year, passing three legislative reports and hearing a number of informational reports. President Oswald, in his comments, told the Senate that the University would present its budget proposal to the Board of Trustees during the Board's July 11-12 meeting at the O'Keefe Campus.

Provost Eddy also addressed the Senate, outlining the University's implementation thus far of its *Perspective on the '80s* (see story on page 1).

In legislative action, the Senate approved two proposals from the Committee on Curricular Affairs, to become effective when the early semester calendar is adopted. The first establishes a new set of baccalaureate program categories and definitions; the second sets common course codes for special types of instruction.

The new structure of program definitions allows for minors as a supplement to major programs of study. It also describes majors as being the most basic program of concentration within a baccalaureate degree program; options may be designated within majors.

Additionally, for purposes of clarifying baccalaureate programs of study, the listing identifies the current categories of multiple majors and simultaneous degree programs that students may elect.

In the second proposal, the Senate adopted three categories of common course codes:

— "294, 494 Research Projects (1-12). Supervised student activities on research projects identified on an individual or small group basis. A specific title may be used in each instance and will be entered on the student's transcript."

— "199, 399, 499. Foreign Studies (1-12). Courses offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student's transcript."

— Individualized Instruction. Courses that are to be offered in an individualized instruction mode will be identified with the suffix "J" in the body of the catalog.

In addition, the Undergraduate Catalog shall not include any courses specifically titled as thesis courses, since these are not required by undergraduate degree programs.

"In cases where students are expected to undertake a thesis project or write a thesis paper, the student can be registered in an Independent Study (296 or 496) or a Research Project (294 or 494) course. In either case, a specific title using the term *thesis* can be used for individual students and can be entered on the student's transcript."

The Curricular Affairs Committee also presented an informational report on "Course Credits and Loads Under the

Proposed Semester System," which provides an example of how the University's present system might be arithmetically translated into the semester system. For example, a semester hour of credit would require approximately three 55-minute periods per week of an average student's time under the proposed 14-week semester system. The distribution of that time between class activities and outside preparation would vary from course to course; however, according to Senate Policy 42-23, for the average student, a total of at least 40 hours of work planned and arranged by the University faculty is required to gain one credit.

In other legislative action, the Senate adopted a proposal from the Senate Council to modify the Bylaws dealing with the Delegation of Authority and Responsibility to the Capitol Campus. The Senate professed itself satisfied that Capitol Campus is operating well, that its programs and rules are appropriate, and that a specified review by the Senate is not necessary.

In its last informational report, the Intra-University Relations Committee (which will cease by Senate action at the close of the year), noted several problem areas regarding faculty participation in department, college and campus governance. The Committee reiterated its position that policy making, the establishment of priorities, academic personnel decisions, and program development and review take place at all organizational levels within the University, and should substantially involve the faculty, including specifically their participation in the establishment of general priorities that underlie these activities.

In addition, the Committee reminded senators of the following avenues to remedy problems of governance:

"We are a collegial faculty and each one of us should feel free to communicate with anyone else within the university system.

If faculty members feel that there is a problem with the consultative process within their department, they should communicate that to their dean. If it is a college problem, they can communicate to the Vice President for the Commonwealth Educational System or the Provost. Obviously, they should encourage their colleagues to do the same so they are not 'one voice in the wilderness.' In addition there is another procedure in place that can be used when the complaint is relative to

consultation on courses or programs. The Senate Curricular Affairs Committee Blue Sheet procedure gives each and every one of us the capability of placing HOLDS on courses or programs. If you have not been consulted about a program or course which impacts on you and your location, you are free to place a hold and make known your difficulties relative to the program or course. The Committee cautions, however, that one must be sure to differentiate between having been consulted and differing with the final action."

In one of three oral informational reports, Dr. Ernest Bergman, chairman of the External Affairs Committee, described the Committee's meetings with State legislators and said such meetings are productive and should be continued. The Committee further recommended that all University campuses should foster closer contacts with their legislators. University staff responsible for legislative relations were complimented on their work.

The second oral informational report was presented by Dr. Philip A. Klein, chairman of the Faculty Rights and Responsibilities Committee. Summing up his experiences during the past year, Dr. Klein noted that only a small number of cases had reached the Committee. Based on this sampling, he advocated a "no surprises doctrine." This means, he explained, that everyone who contributes to PS-23 dossiers should try to be as accurate and forthcoming as possible during the entire review process.

One of the main concerns voiced to the Committee, he said, was by candidates who had received no complaints about their work during their first two reviews and were thus completely surprised by a final negative decision. Dr. Klein also pointed to another problem, that of changing expectations between the time a candidate is hired and a tenure decision is made.

The third oral report was given by Dr. Robert Friedman, a member of the Provost's Advisory Committee on Planning and Budget. He stressed the extent of faculty participation in the budget and planning process.

In addition, the Senate heard informational reports from the Student Affairs, Awards and Scholarships Committee, which reported that \$76,400 has been awarded students for 1981-82; and on the Undergraduate Instruction Center, reporting on nonclassroom testing.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling employment with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

DIRECTOR OF DEVELOPMENT—STATE 4-H PROGRAM, COLLEGE OF AGRICULTURE. University Park. Responsible to the State 4-H Program Director and Board of Directors of Pennsylvania Friends of 4-H for private fund-raising programs and activities for the 4-H Programs throughout the Commonwealth. Develop and establish a staff and plans to include annual giving, estate planning, special and major gifts, and deferred gift programs. Coordinate and work closely with the Office of Gifts and Endowments. Provide a resource for college volunteers and staff in the planning and implementation of local fund-raising projects and training workshops. Serve as secretary/treasurer of the Pennsylvania Friends of 4-H. Act as liaison between the Pennsylvania Friends of 4-H and the College of Agriculture. Bachelor's degree (or equivalent) with four to seven years' effective experience in fund raising and public relations and related areas; interest in community relations; experience in public speaking and preparing written and visual promotional material.

CONTRACTS AND PROPOSALS SPECIALIST, PRESIDENT'S OFFICE. University Park. Responsible to Associate Director for meeting

requirements of the University and various Federal agencies with respect to negotiation of contracts, sub-contracts and grants, and to assist with proposals, agreements, review, and recommendations to acceptance of contracts and grants. Negotiate prime contracts, agreements, sub-contracts, and grants involving research, instruction, continuing education programs with the federal and state government, and others. Assist with preparation of proposals, analyze and review them with the faculty in the colleges and departments for conformity with University policies and proposal requirements of prospective sponsors. Bachelor's degree or equivalent in business, with some accounting training, plus four to seven years of effective experience required. Familiarity with University and governmental accounting procedures and policies and use of computers as related to functions described.

STAFF PILOT, OFFICE OF BUSINESS SERVICES. University Park. Staff pilot on University-owned medium twin engine conventional aircraft. Responsible to Chief Staff Pilot for scheduling and performance of twin engine conventional aircraft in transporting University personnel on authorized business flights. Adhere to Transport Pilot Certificate and experience in multi-engine aircraft required.

HEALTH EDUCATOR, UNIVERSITY HEALTH SERVICES. University Park. Responsible to Director, Riemann Health Center, for developing and administering a program of Health Education for the University community which will bring specific and pre-determined influences on individual and groups within the community which will favorably influence the habits, attitudes and knowledge relative to personal and community health, a bachelor's degree (or equivalent) in health education, health services, health and safety or a similar health-related field, plus a minimum of three years of effective experience necessary.

GRAPHIC ARTIST, COLLEGE OF MEDICINE. Hershey. Responsible to the Department Head of Medical Illustration for the design and production of graphics as requested by clients. Create designs and layouts for books, manuals, brochures, flyers,

pamphlets, cover designs, forms, etc. Design minor arts, forms, symbols, logos, and other simple artistic designs. Prepare the final production of the designs described above, prepare materials for printers and mock-ups for exhibit construction. Operate various equipment in the production of graphic art services, such as headline, letter lining, varigraph, artograph, photoalt, plate burner, plate processing, transfer lettering, etc. Equivalent to an associate degree from an art or drafting trade school and one to two years of related experience.

COUNSELOR, CAREER DEVELOPMENT AND PLACEMENT, UNIVERSITY PARK. Responsible to the Assistant Director for Career Counseling and Planning for providing career development and placement services at the University Park Campus. Master's degree in clinical or counseling psychology, counselor education, student personnel administration, or related area, plus one to two years of effective experience are required.

PROGRAMMER/DOCUMENTOR, COLLEGE OF ENGINEERING, UNIVERSITY PARK. Write scientific and engineering applications software for courses and specific research projects, using on-line terminals and editors. Modify existing programs and files. Document existing and new programs, software packages, and computer laboratory facilities. Develop standardized documentation formats and procedures. Associate degree (or equivalent) in computer science or a related field, plus one year and up to and including two years of effective experience with programming are required, with course work in calculus and science or engineering preferred.

COORDINATOR OF SERVICES FOR DISABLED, STUDENT AFFAIRS, UNIVERSITY PARK. Responsible for development and implementation of programs and services for handicapped students, faculty and staff. Serve as advisor to disabled student organizations, clubs or groups. Provide leadership to increase awareness and skill of students, staff and faculty to deal effectively with the needs of students with physical disabilities. Be aware of state and federal policies and regulations regarding disabled individuals and inform personnel, committees, etc. of changes in

regulations. Master's degree (or equivalent) in rehabilitation counseling or related field with two to three years of effective experience.

ADMINISTRATIVE ASSISTANT FOR ACADEMIC AFFAIRS, COMMONWEALTH EDUCATIONAL SYSTEM, HAZLETON CAMPUS. Responsible for conducting undergraduate enrollment, academic advising, educational counseling and career and personal counseling. Develop schedule of classes, including course, faculty and room assignments. Supervise maintenance of student academic records. Master's degree in counseling, or equivalent, plus two to four years of effective experience in college level advising and counseling.

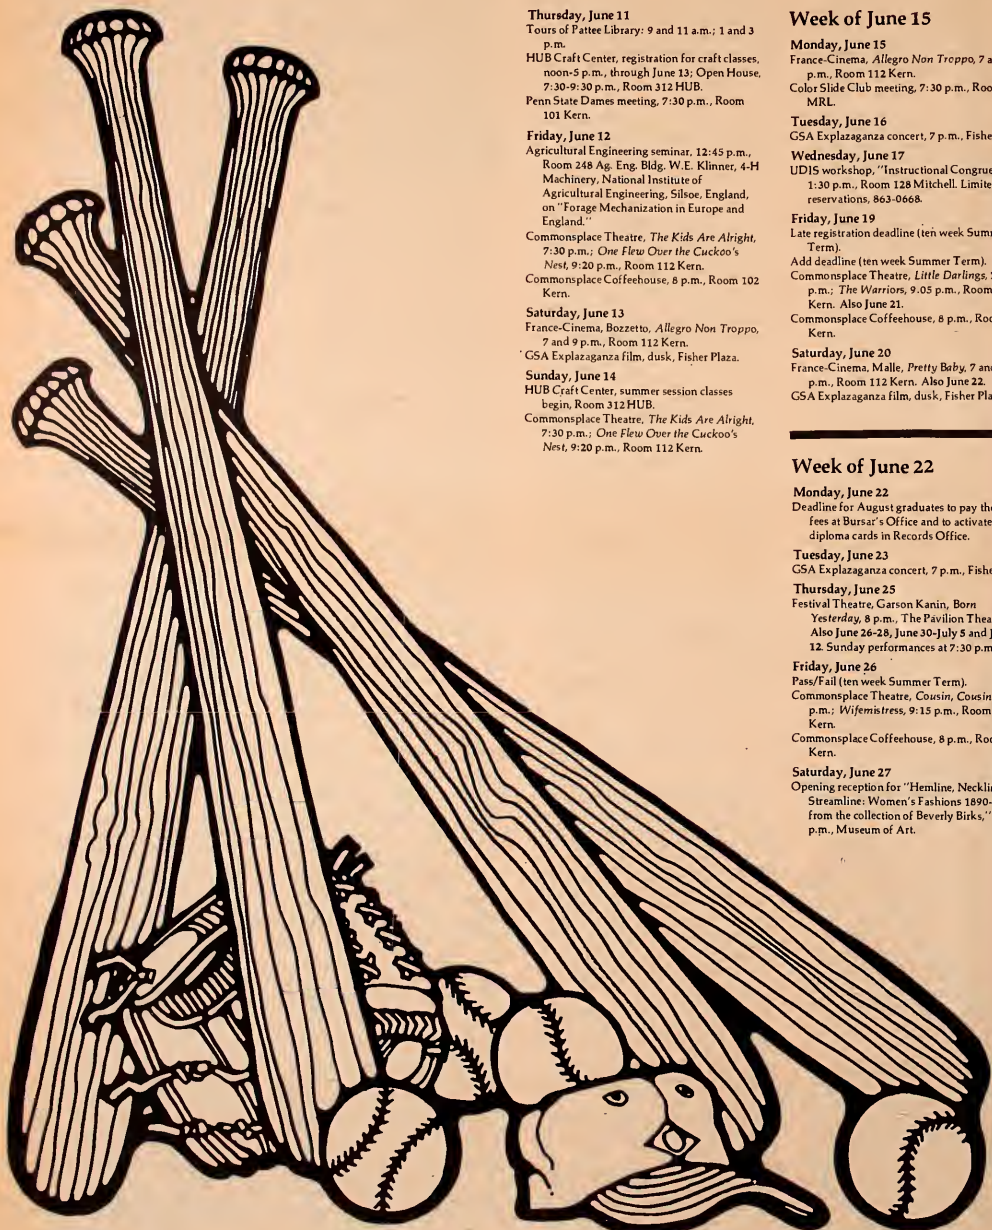

GRADUATE ASSISTANTS COUNSELOR/RECRUITER, CAPITAL CAMPUS. Responsible to Associate Dean for Graduate Studies for the graduate admissions process, which includes counseling and interviewing prospective graduate students, making admission decisions, developing and implementing strategies for recruitment of graduates from four-year institutions, devising media presentations, coordinating with graduate program faculty, monitoring specific recruitment efforts directed at minority students and supervising full-time and casual employees. Master's degree, or its equivalent, in counseling, psychology or a closely related field, plus one year and up to two years of effective experience in higher education and community liaison work are required. Supervisory experience is desirable.

Student Aid will accept work study job proposals

Members of the University community who have never participated but are interested in employing students through the College Work Study Program for the 1981-82 academic year should contact the Office of Student Aid (863-0336).

University Park Calendar

Summer Term 1981

Thursday, June 11

Tours of Pattee Library: 9 and 11 a.m.; 1 and 3 p.m.

HUB Craft Center, registration for craft classes, noon-5 p.m., through June 13; Open House, 7:30-9:30 p.m., Room 312 HUB.

Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Friday, June 12

Agricultural Engineering seminar, 12:45 p.m., Room 248 Ag. Eng. Bldg. W.E. Klinger, 4-H Machinery, National Institute of Agricultural Engineering, Silsoe, England, on "Forage Mechanization in Europe and England."

Commonsplace Theatre, *The Kids Are Alright*, 7:30 p.m.; *One Flew Over the Cuckoo's Nest*, 9:20 p.m., Room 112 Kern.

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, June 13

France-Cinema, Bozzetto, *Allegro Non Troppo*, 7 and 9 p.m., Room 112 Kern.

GSA Explazaganza film, dusk, Fisher Plaza.

Sunday, June 14

HUB Craft Center, summer session classes begin, Room 312 HUB.

Commonsplace Theatre, *The Kids Are Alright*, 7:30 p.m.; *One Flew Over the Cuckoo's Nest*, 9:20 p.m., Room 112 Kern.

Week of June 15

Monday, June 15

France-Cinema, *Allegro Non Troppo*, 7 and 9 p.m., Room 112 Kern.
Color Slide Club meeting, 7:30 p.m., Room 189 MRL.

Tuesday, June 16

GSA Explazaganza concert, 7 p.m., Fisher Plaza.

Wednesday, June 17

UD15 workshop, "Instructional Congruency," 1:30 p.m., Room 128 Mitchell. Limited reservations, 863-0668.

Friday, June 19

Late registration deadline (ten week Summer Term).

Add deadline (ten week Summer Term).

Commonsplace Theatre, *Little Darlings*, 7:30 p.m.; *The Warriors*, 9:05 p.m., Room 112 Kern. Also June 21.

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, June 20

France-Cinema, Malle, *Pretty Baby*, 7 and 9 p.m., Room 112 Kern. Also June 22.

GSA Explazaganza film, dusk, Fisher Plaza.

Week of June 22

Monday, June 22

Deadline for August graduates to pay these fees at Bursar's Office and to activate diploma cards in Records Office.

Tuesday, June 23

GSA Explazaganza concert, 7 p.m., Fisher Plaza.

Thursday, June 25

Festival Theatre, Carson Kanin, *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Also June 26-28, June 30-July 5 and July 7-12. Sunday performances at 7:30 p.m.

Friday, June 26

Pass/Fail (ten week Summer Term).

Commonsplace Theatre, *Cousin, Cousine*, 7:30 p.m.; *Wifemistress*, 9:15 p.m., Room 112 Kern.

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, June 27

Opening reception for "Hemline, Neckline, Streamline: Women's Fashions 1890-1940 from the collection of Beverly Birks," 3-5 p.m., Museum of Art.

ance-Cinema, Cousin, Cousine, 7:30 p.m.; French Postcards, 9:15 p.m., Room 112 Kern.

Nittany Mountain Summer Festival, "A Party with Betty Comden and Adolph Green," 8 p.m., Eisenhower Auditorium.

SA Explazaganza film, dusk, Fisher Plaza.

Monday, June 28
Commonsplace Theatre/France-Cinema, French Postcards, 7:30 p.m.; Wife/mistress, 9:15 p.m., Room 112 Kern.

Week of June 29

Monday, June 29
Penn State Scholars Program, through July 2, 8 a.m.-5 p.m. (ten week Summer Term).
Registration for eight, six and three week Summer Terms, 1-4:30 p.m., Activities Room, IM Bldg.
Commonsplace Theatre/France-Cinema, Cousin, Cousine, 7:30 p.m.; Wife/mistress, 9:15 p.m., Room 112 Kern.

Tuesday, June 30
Eight week Summer Term classes begin, 8 a.m.-drop deadline (ten week Summer Term).
Pass/Fail (ten week Summer Term).
Course repeat deadline (ten week Summer Term).
SA Explazaganza concert, 7 p.m., Fisher Plaza.

Wednesday, July 1
Commonsplace Theatre, *The Hobbit*, 7:30 and 9 p.m., Room 112 Kern. Also July 2.

Thursday, July 2
Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse. Also July 3-5, 7-12 and 14-16. Sunday performances at 7:30 p.m.

Friday, July 4
Independence Day.

Saturday, July 5
Alumni Assn., Vacation College, "Shaping the 80's," through July 11. Information: 865-6516.
Evening reception for CPFA, Festival Gala, 7-9 p.m., Museum of Art.

Week of July 6

Monday, July 6
Deadline for August graduates to deliver doctoral theses to Committee.
France-Cinema, Renoir, *Rules of the Game*, 7 and 9 p.m., Room 112 Kern.
Interdisciplinary Symposium on Value, 7:30 p.m., Room 101 Kern. Chris Johnstone, speech, Delaware Campus, on "Ethics, Communication and the Pursuit of Wisdom: Creating Humane Knowledge."

Tuesday, July 7
Registration deadline (eight week Summer Term).
Drop deadline (eight week Summer Term).
Registration deadline for Fall Term 1981.
Phi Delta Kappa Summer Seminar Series, 2:20 p.m., Room 101 Kern. Don Smitley, community liaison, International Year of the Disabled Person, speaker.
GSA Explazaganza concert, 7 p.m., Fisher Plaza.
Annual Central Pennsylvania Festival of the Arts (CPFA), opening ceremonies and street dancing, evening, downtown.

Wednesday, July 8
CPFA, Children's Day, 10 a.m.-10 p.m.

Thursday, July 9
CPFA, sidewalk sales and exhibitions, noon-midnight, campus and downtown.
Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Friday, July 10
Board of Trustees meeting, Ogontz Campus.
CPFA, sidewalk sales and exhibitions, 9 a.m.-midnight, campus and downtown.
Commonsplace Theatre, *Being There*, 7 p.m.; 10-9:15 p.m., Room 112 Kern. Also July 12.
Nittany Mountain Summer Festival, John Hartford, bluegrass music, 7 and 9 p.m., Eisenhower Auditorium.

Saturday, July 11
Board of Trustees meeting, Ogontz Campus.
Deadline for August graduates to deliver master's theses or papers to adviser.
CPFA, sidewalk sales and exhibitions, 9 a.m.-midnight, campus and downtown.
France-Cinema, Bruni, *Bread and Chocolate*, 7 and 9 p.m., Room 112 Kern. Also July 13.
Nittany Mountain Summer Festival, New American Ragtime Ensemble, 8 p.m., Eisenhower Auditorium.
GSA Explazaganza film, dusk, Fisher Plaza.
Sunday, July 12
CPFA, sidewalk sales and exhibitions, noon-midnight, campus and downtown.

Week of July 13

Monday, July 13
Deadline for August graduates to take final oral doctoral examinations and to submit camera-ready thesis manuscripts to Thesis Office.

Tuesday, July 14
Pass/Fail (eight week Summer Term).
Phi Delta Kappa Summer Seminar Series, 2:20 p.m., Room 101 Kern. George Bonham, Council on Learning and Change magazine, speaker.
GSA Explazaganza concert, 7 p.m., Fisher Plaza.

Wednesday, July 15
Pass/Fail (eight week Summer Term).

Thursday, July 16
Drop deadline (eight week Summer Term).
Pass/Fail (eight week Summer Term).
Course repeat deadline (eight week Summer Term).

HUB Craft Center, Open House, 7:30-9:30 p.m., Room 312 HUB.
Fred Waring Summer Youth Concert, 8 p.m., Schwab.

Friday, July 17
Commonsplace Theatre, "Richard Pryor Live in Concert," 7:30 p.m.; *Roadie*, 9 p.m., Room 112 Kern. Also July 19.
Fred Waring Summer Youth Concert, 8 p.m., Schwab.
Nittany Mountain Summer Festival, Joffrey II Dancers, 8 p.m., Eisenhower Auditorium.

Saturday, July 18
Deadline to register for second session classes.
HUB Craft Center, Room 312 HUB.
France-Cinema, Truffaut, *Small Change*, 7 and 9 p.m., Room 112 Kern. Also July 20.
Nittany Mountain Summer Festival, Joffrey II Dancers (new program), 8 p.m., Eisenhower Auditorium.
GSA Explazaganza film, dusk, Fisher Plaza.

Sunday, July 19
Alumni Assn., Vacation College, "Swamping the Senses," through July 25. Information: 865-6516.
HUB Craft Center, second session classes begin.

Week of July 20

Monday, July 20
Color Slide Club meeting, 7:30 p.m., Room 189 MRL.

Tuesday, July 21
Deferred grade deadline.
Phi Delta Kappa Summer Seminar Series, 2:20 p.m., Room 101 Kern. J. Robbins Kidd, International Council of Adult Education, Toronto, on "The Affirmers: First Person Reports of Learning and Implications for Research and Practice."
GSA Explazaganza concert, 7 p.m., Fisher Plaza.

Thursday, July 23
Festival Theatre, Ernest Thompson, On Golden Pond, 8 p.m., The Pavilion Theatre. Also July 24-26, 27-28-August 2, August 4-9. Sunday performances at 7:30 p.m.

Friday, July 24
Commonsplace Theatre, *Foxes*, 7:30 p.m.; *The Rose*, 9:20 p.m., Room 112 Kern. Also July 26.

Saturday, July 25
France-Cinema, *Wet, Picnic at Hanging Rock*, 7 and 9 p.m., Room 112 Kern. Also July 27.
Nittany Mountain Summer Festival, Mel Tillis, 7:15 and 9:30 p.m., Eisenhower Auditorium.
GSA Explazaganza film, dusk, Fisher Plaza.

Week of July 27

Monday, July 27
Deadline for August graduates to deliver theses to Graduate School and for departments to certify to Graduate School completion of required papers for August graduates.

Tuesday, July 28
First day to sign Fall Term ND5L and University Long Term Loans, Room 108 Shields.
GSA Explazaganza concert, 7 p.m., Fisher Plaza.

Thursday, July 30
Festival Theatre, Jacobs/Casey, *Grease*, 8 p.m., The Playhouse. Also July 31-August 2, August 4-9 and August 11-16. Sunday performances at 7:30 p.m.

Friday, July 31
Commonsplace Theatre, *Take the Money and Run*, 7:30 p.m.; *Network*, 9 p.m., Room 112 Kern.

Saturday, August 1
France-Cinema, Bertolucci, *Two Tango in Paris*, 7 and 9 p.m., Room 112 Kern. Also August 3.
GSA Explazaganza film, dusk, Fisher Plaza.

Week of August 3

Tuesday, August 4
Late drop deadline (ten week Summer Term).
Red Cross Bloodmobile, 10 a.m.-4 p.m., Walnut Bldg.
Phi Delta Kappa Summer Seminar Series, 2:20 p.m., Room 101 Kern. Robert Shell, international education, Pa. Dept. of Ed., on "International Education."
GSA Explazaganza concert, 7 p.m., Fisher Plaza.

Wednesday, August 5
Last day to sign Summer Term ND5L and University Long Term Loans, Room 108 Shields.

Friday, August 7
Commonsplace Theatre, *Kentucky Fried Movie*, 7:30 p.m.; *All That Jazz*, 9:15 p.m., Room 112 Kern. Also August 9.

Saturday, August 8
France-Cinema, Fellini, *Amarcord*, 7 and 9 p.m., Room 112 Kern. Also August 10.
GSA Explazaganza film, dusk, Fisher Plaza.

Week of August 10

Monday, August 10
Late drop deadline (eight week Summer Term).
GSA Explazaganza concert, 7 p.m., Fisher Plaza.

Thursday, August 13
Penn State Dames meeting, 7:30 p.m., Room 101 Kern.
Fred Waring Summer Youth Concert, 8 p.m., Schwab.

Friday, August 14
Deadline to submit petitions to Records Office to graduate in absentia in August.
Commonsplace Theatre, *Everything You Always Wanted to Know About Sex*, 7:30 p.m.; *American Greffiti*, 9 p.m., Room 112 Kern. Also August 16.
Fred Waring Summer Youth Concert, 8 p.m., Schwab.

Saturday, August 15
France-Cinema, Werthmüller, *Seven Beauties*, 7 and 9 p.m., Room 112 Kern. Also August 17.
GSA Explazaganza film, dusk, Fisher Plaza.

Week of August 17

Monday, August 17
Color Slide Club meeting, 7:30 p.m., Room 189 MRL.

Tuesday, August 18
GSA Explazaganza concert, 7 p.m., Fisher Plaza.
Ten week Summer Term classes end, 9:55 p.m.

Wednesday, August 19
Last day to sign Summer Term Emergency Loans, Room 108 Shields.
Eight week Summer Term classes end, 9:55 p.m.

Thursday, August 20
Final examinations, through Saturday, August 22.

Sunday, August 23
Residence Halls close for Summer Term, 3 p.m.

Week of August 24

Saturday, August 29
Summer Term Commencement, 10:30 a.m., Rec. Hall.

Exhibits

Chambers Gallery
Gallery hours: Monday through Friday, 8 a.m.-5 p.m.

Michael Starnier, pottery, and Kayed Amr, paintings, June 15-July 1.
CPFA child art exhibit, July 6-22.
Mark Ruyak, drawings and weavings, July 27-August 19.

Kern Gallery
Gallery hours: Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon-11 p.m.
Ed Leos, photography, through June 25.
Ben Ruyase, prints and paintings, through June 26.

CPFA juried photography exhibition, July 5-24.
CPFA glass invitational, July 5-30.
Frances Venard, retrospective exhibition, July 28-August 18.

Museum of Art
Museum hours: 11 a.m.-4:30 p.m. Closed Mondays, Tours, Sundays, 1:30 p.m.
Special hours during CPFA, July 9-11, 11 a.m.-8 p.m.
Photographs from the Museum's collection, through June 21.
Twentieth-century works from the Museum's collection, through July 26.
Drawings and prints from the Museum's collection, through Sept. 27.
Hemline, Neckline, Streamline: Women's Fashions 1890-1940 from the collection of Beverly Birks, June 28-Sept. 13.
CPFA juried crafts, July 5-August 16.
African sculpture from the Museum's collection, August 1-Sept. 20.

Pattee Library
East Corridor Lobby:
Susan Nusbäum, paintings, June 11-July 1.
Paul Matthews, paintings, July 1-29.
Diane Ansell, recent work, August 1-22.
Robert Cridell, paintings and drawings, August 23-Sept. 10.
Lending Services Lobby:
Dave Hamilton, photographs, "Volunteers," June 11-July 1.
Beverly Laverdiere, paintings, July 1-29.
Michael Lucas, drawings, July 29-August 20.
Naomi Gallagher, paintings, August 21-Sept. 18.

Main Lobby
Dave Hamilton, photographs, June 11-July 1.
Carol Treat, ceramics, July 1-27.
Bonnie Deutsch, Helen Newhard and Elaine Stone, jewelry, July 27-August 20.
Mary Ann Martin, functional ceramics, August 20-Sept. 11.
Rare Books Room:
Martha Canollers, "The Design and Production of Children's Novelty Books," through August 28.

Visual Arts Zoller Gallery
Gallery hours: 11 a.m.-4:30 p.m. Closed Mondays. Special hours July 9-11, 11 a.m.-8 p.m.
Lannie Sommesse, posters, July 1-August 1.

From the Trustee Docket

Trustees elect two new members, return five incumbents

Two new members have joined five re-elected incumbents on the Board of Trustees. All were elected to three-year terms.

The new members are Joel N. Myers of State College, president of Accu-Weather, Inc., and Charles E. Wismer of Trappe, mayor of the Borough of Trappe and Master of the Pennsylvania State Grange. Dr. Myers was elected by Penn State alumni, Mr. Wismer by county agricultural society delegates.

University alumni re-elected incumbents H. Jesse Arnelle, a trial attorney in the San Francisco firm of Arnelle & Aldredge, and Helen D. Wise of Dover, Del., executive director of the Delaware State Education Association.

Trustees re-elected by industrial society delegates were Howard O. Beaver Jr., of Reading, chairman of the board of Carpenter Technology Corp., and Samuel A. Breene of Oil City, chairman of the board and chief executive officer of Brookville Glove Manufacturing Co. Inc.

Another incumbent, Burton L. Hetherington, a partner in H-4 Farms, Ringtown, was re-elected by delegates of agricultural societies.

Dr. Myers founded Accu-Weather with a small group of Penn State graduates. It is currently the nation's largest private weather forecasting service, and has provided weather forecasts for presidential inaugurations, NASA and the 1980 Winter Olympics.

Dr. Myers holds B.S., M.S. and Ph.D. degrees from Penn State, and as a student was the recipient of the American Meteorological Society's Father Nacelwayne Award and a National Science Foundation Fellowship.

He served on the Penn State faculty from 1964 to 1974 and currently teaches a course each year for upper-level meteorology students.

Mr. Wismer, a dairy farmer, is a member of the executive committee of the College of Agriculture's Advisory Council and the executive committee of the Pennsylvania Council of Farm Organizations.

He serves also as vice chairman of the Department of Environmental Resources' Agriculture Advisory Committee and recently was appointed to the Department's Oil and Gas Environmental Advisory Committee.

He has been active as a committeeman for the Agricultural Stabilization and Conservation Service and for Agway Cooperative. For seven years, he was president of the Trappe Historical Society.

Mr. Arnelle previously served as a federal public defender in the United States District Courts. A 1955 Penn State graduate, he is a member of the board of directors of the National Foundation for the Improvement of Education.

Dr. Wise is a past president of the National Education Association. A former State Representative in Pennsylvania, she holds B.A., M.A. and D.Ed. degrees from Penn State.

Mr. Beaver, a metallurgist, was a 1981 recipient of the Horatio Alger Award, which honors Americans whose lives exemplify the ideals of the free enterprise system. He is a 1948 graduate of Penn State.

Mr. Breene, an attorney, is active in many business interests and maintains a law practice in Oil City. He is a director of the Northwest Pennsylvania Bank and Trust Company.

Mr. Hetherington is a member of the executive committee of the Pennsylvania State Council of Farm Organizations and also has served as president, secretary and treasurer of that group. He is active in many other agricultural societies.

Political science Ph.D. to be offered at Capitol

The Division of Public Affairs at Capitol Campus and the Department of Political Science at University Park have joined forces to offer the Ph.D. program in political science to residents of southcentral Pennsylvania.

Dr. Theodore L. Gross, Capitol's provost and dean, said the program is scheduled tentatively to begin in the fall of 1981. About half of the coursework will be offered at Capitol Campus and the other half at University Park.

"This is not a new program, so it won't require any additional expenditures of University funds," Dr. Gross said. "Rather, it's a partial geographic extension of the existing Ph.D. program in political science. It's specifically designed to enable professionals employed in government and public agencies in the greater Harrisburg area to pursue the degree more easily."

"This joint program represents the first time in Penn State's history that doctoral work will be offered at a campus other than University Park and the College of Medicine at Hershey," he added.

The coursework at Capitol Campus will be offered in the evenings for the convenience of employed students. Some of the courses at Capitol Campus will be taught by graduate faculty members from University Park. Most, however, will be taught by graduate faculty members in the Campus's Division of Public Affairs — who are graduate faculty members in the University's Graduate School.

The coursework at University Park will be offered in late afternoons, and will be taught by graduate faculty members. Degree granting authority will rest with the Department of Political Science, not the Capitol Campus.

"The importance of the joint program is that it now reaches an area where government activity abounds," Dr. Gross said.

"For example, the Division of Public Affairs offers students excellent access to government agencies for data collection, for research, and for the study of public policy and administration. Capitol Campus's Institute for State and Regional Affairs, which maintains contacts with state, local and regional agencies throughout the Harrisburg area, offers students opportunities for developing research proposals."

The Ph.D. program in political science offers five fields of study: American government and politics; comparative politics; international politics; organization and law; political theory and methodology; and public administration.

To complete the degree, students must pass comprehensive examinations in three of the five fields, or in two of them and a field outside political science.

"We expect that most of the students in the joint program will pursue the public administration field," Dr. Gross noted.

"The graduate program in urban and regional planning provides one outside field for those interested in taking as much work as possible at Capitol Campus."

Students in the joint program will have a faculty adviser at each campus. The time required to complete the doctoral program on a part-time basis would be five to seven years, depending upon the student's background and abilities.

Graduate degrees will be offered in adult education

The College of Education will offer programs leading to the master of education and doctor of education degrees in the field of adult education beginning Fall Term, 1981.

"Demand for graduate programs in adult education is increasing," Provost Eddy explained. "The University has a long history of successful continuing

education and cooperative extension activities, as well as a number of strong programs in areas that can contribute to the education of persons wishing to deal with adult education. These will be increasingly important as the population ages."

The degree programs in adult education will be similar in structure to many graduate programs already operating within the University and within the College of Education. They will call upon supporting fields for courses and minors — among them, anthropology, American studies, individual and family studies, political science, journalism, rural sociology, psychology, sociology and speech communication.

Faculty members have indicated their willingness to be responsible for program policy and planning, as well as questions of admissions and examinations. Dr. Eddy said. Library holdings are considered sufficient to accommodate the programs.

No new University funds will be required to implement the degree programs.

Hazleton adds program in physical therapy

An associate degree program in Physical Therapy Assistance has been established at the Hazleton Campus in response to the increasing demands for physical therapy programs and a current shortage of personnel in this field in Pennsylvania.

Graduates of the program, which will begin operating this summer, will be qualified to work under the direct supervision of a licensed physical therapist.

Provost Eddy explained that the program will provide students with knowledge and skills in the principles of physical therapy treatment, as well as the basic diagnostic approaches necessary for planning rehabilitation programs.

Sponsored by the Health Education Department of the College of Health, Physical Education and Recreation, the seven-term, 67-credit program includes 33 credits of general education requirements and 34 credits required for the major. It combines basic science and non-science coursework with appropriate clinical experience. Ten required credits are earned during a seventh-term practicum experience.

This is the first such program at Penn State and only the second in Pennsylvania. The other is at Lehigh County Community College.

Option added to art education major

The major in art education has been revised to include two options: art education for schools and art education for cultural and social agencies.

"With the decline of art in the public school curriculum and the emphasis of visual arts education in museums, galleries, art centers and social agencies, a need exists for competent art educators in a variety of institutions in society," Provost Eddy told the Board.

Central to both options are basic art studio preparation, an art emphasis, a variety of observational and participatory experiences in art learning environments and an extensive, pre-practice internship. No additional University funds are involved in the change.

Interim budget approved

An interim maintenance and operating budget for the fiscal year beginning July 1 was approved by the Trustees.

"It is necessary to have an approved fiscal operating plan by July 1," President Oswald explained. "Because the State appropriation is still pending, it is recommended that no action be taken at this time on changes in tuition, salaries and wages, staff benefits or other necessary expense increases."

"A final budget will be submitted when the State appropriation is clarified."

The interim budget was approved at the level of the 1980-81 budget — \$449.8 million for all divisions of the University, including the Milton S. Eshersley Medical Center and all auxiliary enterprises.

Responsibility transferred

Responsibility for administering advanced degree programs in extension education will be transferred from the Department of Agricultural Economics and Rural Sociology to the Department of Agricultural Education, effective July 1.

To reflect accurately its expanded responsibilities, the name of the Department of Agricultural Education will be changed to the Department of Agricultural and Extension Education. The breadth of the department will be expanded to include three sections or divisions: Agricultural Education, Extension Education and Home Economics Extension.

University Council alters membership requirement

The Trustees approved a change in membership requirements for the University Council, an advisory group of administrators, faculty members and students.

The Council includes one undergraduate student member to represent students at the Penn State campuses other than University Park. Under the revised requirements, that member must be a student at University Park (having formerly been enrolled at one of the other campuses), the Behrend College or the Capitol Campus.

According to President Oswald, the change is being made to ensure that the interests of non-University Park students are represented adequately. In the past, student representatives from other campuses have had problems arranging transportation to the meetings, which are held at University Park.

Construction projects approved by Board

Sketch plans for improvements to 32 buildings at University Park to make the structures more accessible to the handicapped were approved by the Trustees.

Among the planned improvements are adding ramps, easing access to doors and modifying toilet facilities, Ralph E. Zilly, vice president for business, said.

Funds for the project, \$666,000, are provided by the Commonwealth as Penn State's portion of a handicapped accessibility funding package, which includes state colleges and state-related universities. The improvements are to buildings which were built by the Commonwealth.

In other action related to the University's physical plant, the Trustees approved final plans for construction of an emissions control system for the University's main boiler plant.

A fabric filter system to remove particles emitted at the West Campus Heating and Power Plant is expected to be completed by March 1984. Construction will begin this spring. The project will cost approximately \$6.7 million.

The State's Department of General Services is carrying out the project, which is funded by an appropriation passed by the legislature and signed by the governor.

Final plans for renovations and additions to the East Area Locker Room, used by the varsity football team, also were approved by the Trustees.

A 4,400-square-foot addition will be used primarily as a weight training area. Robert A. Patterson, senior vice president for finance and operations, said.

The estimated project cost is \$400,000, with the money to come from Department of Intercollegiate Athletics' funds.

(Continued on page 7)

Provost says University meeting "Perspective's" goals

Speaking to the University Faculty Senate at its June 2 meeting, Provost Eddy hailed the vigor of the academic enterprise at Penn State.

Dr. Eddy pointed to a report prepared by the University Council describing progress to date on implementing the recommendations contained in *A Perspective on the '80s*, the University's action agenda for the decade.

The Council's report, which was presented to the Board of Trustees on May 26, offered, Dr. Eddy said, "a good test not just of the *Perspective* but of the institution itself: Was it capable of moving toward those three goals of quality, flexibility and selectivity? Could we initiate some momentum which would provide a healthy climate in a time of perhaps painful retrenchment?"

"The University's Council's review of the first 18 months seems to indicate that we can make some sweeping and challenging changes."

The following sections are from the Council's report. Each item includes a reference to the specific recommendation in *A Perspective* which it implements.

1. **The Five-Year Planning and Budget Process** (recommendation 43b): The 1980-81 cycle of the five-year planning and budget process has focused part of its attention on affirmative action progress, personnel resource planning, and professional development. The process continues to redirect resources to areas of pressing demand in both instruction and research, while being careful not to dismantle arbitrarily programs of historic strength for Penn State. Faculty and student committee members continue as active participants in the discussions and formulation of policy and resource allocation decisions.

2. **Integration of the Commonwealth Campus System and Continuing Education** (recommendation 69): Almost concurrent with the adoption of the *Perspective*, the Board of Trustees authorized the administrative integration of the Commonwealth Campus System and Continuing Education. In May 1980 the Board appointed a Vice President and Dean to guide the formulation of the combined system, subsequently designated the Commonwealth Educational System. The new Vice President assumed direct administrative responsibility in January 1981.

3. **Reassessment of Fund-Raising Activities** (recommendation 98): A second action of the Board of Trustees was the creation of the position of Vice President for Development and the reorganization of the Penn State Fund Council. These represent important steps in addressing the recommendation in the *Perspective* to reassess the University's overall fund-raising program. In addition, a Coordinator of Major Giving has been appointed in the Office of Gifts and Endowments. Under the supervision of the coordinator, major fund drives are being planned for the Colleges of Engineering and of Earth and Mineral Sciences.

4. **Review of the term system and of alternative academic calendars** (recommendation 76): Following several months of University-wide discussion and debate of the advantages and disadvantages of the term and semester academic calendars, the President announced his decision on March 12 to convert to the early semester system effective September 1983. A Calendar Conversion Council has been appointed to guide the transition to the new system. The conversion provides a special opportunity for the University to address those recommendations in the *Perspective* dealing with course and program reviews, faculty teaching and research interrelationships, and changing student needs.

5. **Reexamination of summer term operations, organizational structure, and funding** (recommendation 75): This reexamination has been completed by the Office of Planning and Budget, with the assistance of an advisory group comprised of representatives from the Office of the Vice President for Undergraduate Studies, the Graduate Council, and Senate Committees on Undergraduate Instruction and Academic and Physical Planning, and a report presented to the Provost and President. In his announcement regarding the University's academic calendar, the President also indicated that an eight-week summer session with shorter-term program options would be developed. The summer term program has been made available to the chairman of the Calendar Conversion Council in order to facilitate summer session plans corresponding with the calendar conversion.

6. **Assure that resources are allocated according to program priorities based on criteria of quality, need and cost** (recommendations 44 and 65): Priorities among programs in undergraduate and graduate instruction, research, and public service must be guided by three criteria: the ability of a program to achieve quality; evidence of the need for a program; and the relationship of both to program costs. The evaluation of University programs according to the criteria of quality, need, and cost is critical to establishing priorities. In March 1981, H. Thomas Holloway Jr., a member of the Penn State Board of Trustees, contributed \$100,000 to the University to encourage external program review and evaluation. His contribution was matched by the Fund for Academic Excellence through the Richard King Mellon Charitable Trusts Grant. The Mathematics Department successfully completed such an external review last year when several representatives from other universities and industry provided the department with suggestions for improvement. Similar reviews have been conducted or initiated for the Departments of Physics, Biology, and Theatre and Film.

7. **Enhance the quality of leadership and decision making** (recommendation 2): A Senate Committee on Research, established in January 1978, identified the academic department head as the "single individual within an academic unit most influential in creating and maintaining an atmosphere conducive to research and other forms of scholarly activity." In his preliminary progress report to the Board of Trustees in November 1980, the Provost identified academic leadership as an issue being explored. Since then, a prospectus has been prepared for conducting an orientation workshop for recently appointed department heads. The first programs are scheduled to be offered in August 1981. Opportunities may develop for expanding this type of program to other administrators both in the colleges and on the campuses.

8. **Rewarding faculty excellence** (recommendation 13): In August 1980 President Oswald approved a new research recognition award, the Faculty Scholar Medal for Outstanding Achievement. At the Winter 1981 Commencement exercises in March, four faculty members from the arts and humanities, life and health sciences, physical sciences and engineering, and social and behavioral sciences each received the initial awards, a specially designed medal and a check for \$1,000.

9. **Allocate institutional resources to renovate research facilities** (recommendation 33f): The Provost's Matching Funds program for equipment, announced November 20, 1980, has been of significant assistance to colleges and Intercollege Research Program units in acquiring major items of equipment. To date requests for matching funds — usually related to equipment purchases in federal agencies — have received awards totaling close to \$1,000,000.

10. **Expand Research Initiation Grants** (recommendation 33b): The Research Initiation Grant Program for 1980-81 and beyond is now funded at \$107,000 plus \$26,000 for graduate fellowships. In prior years the program had operated at approximately this level but was based largely on temporary funds. In May 1980 President Oswald authorized additional permanent funding.

11. **Evaluate existing information systems and develop interactive computing capability** (recommendations 77 and 78): Concern with the development of University-wide data bases and information systems and conceptual hardware was addressed with the appointment in February 1980 of the University Computer and Information Systems Planning Committee (UCISPC) and the appointment for the year 1981 of a special assistant to the President, who serves as chairman of the UCISPC, to work on the development of basic long-term goals for computational and information systems and methods to achieve them. Interactive editing capability has been enhanced with the addition of an IBM 4341 processor and peripheral equipment in the Computer Center, servicing more than 100 terminals across the University, including many on the Commonwealth Campuses. In addition, four VAX computers with interactive capabilities have been added in the Colleges of Engineering, Science, and Medicine.

12. **Examination of prospective early retirement programs** (recommendation 92): The *Perspective* recommended consideration of

alternative strategies for dealing with personnel resource reallocation. A comprehensive analysis of the University's retirement programs and prospective retirement trends has been completed by the Office of Planning and Budget and distributed to administrative and faculty committees for information and deliberation. The findings of the report have been discussed with the President's Faculty Advisory Committee and the Council of Academic Deans.

13. **Increase efforts to recruit highly qualified high school graduates, within and outside Pennsylvania**, and encourage enrollment of minorities (recommendations 23 and 24): In the Fall of 1980 the Office of Admissions implemented a new tracking system — the Candidate Information Management System (CIMS) — which provides the University with the ability to track a high school student through the several stages of selecting a college. From the time his or her SAT test scores are submitted until the student is admitted to Penn State. The system also allows the Office of Admissions the opportunity to differentiate among students of varying academic abilities and target its recruitment efforts to selected student markets. Many academic units within the University have used the CIMS file to facilitate recruitment of high achievers.

The overall effort of the Office of Admissions in the area of recruitment has been greatly intensified in 1980. For example, the number of pieces of mailed recruitment literature increased from 70,000 in 1979 to 120,000 in 1980. The attendance by Penn State recruiters at both in- and out-of-state college fairs increased by approximately 30 percent. The number of minorities in Penn State's prospect pool increased from 4,000 in 1979 to 10,000 in 1980, due largely to broader staff involvement in recruiting out-of-state minority students. An Alumni Admissions Advisory Committee was organized with the goal of increasing the participation of alumni clubs in the recruitment of highly qualified students. These efforts contributed to an increase between Fall Terms 1979 and 1980 of 18 percent in the enrollment of out-of-state students at Penn State and of 12 percent in the number of minorities admitted. Total applications for 1981 are up 14 percent over 1980; out-of-state applications are up 20 percent and black applications have increased by 38 percent.

14. **Explore ways to improve retention** (recommendation 25): Development of programs aimed at improving retention of students in the Penn State system depends initially upon a better understanding of the factors affecting retention. Important studies on student progress at Penn State have been conducted by the Office of Residential Life in the Division of Student Affairs, the Office of Planning and Budget, and the Delaware County Campus, and the results reported to appropriate faculty and administrative committees. Important workshops dealing with retention were conducted by the Office of the Vice President for Undergraduate Studies in March 1979 and 1980. Also in March 1980, the Provost and the Chairman of the University Faculty Senate jointly initiated a study of the Freshman Experience, with a report from the Committee due within the current academic year. As a result of all these analyses, renewed attention is being given to the importance of academic advising, the procedures for withdrawing from Penn State, the relationship of part-time employment to retention, the structure of academic programs in the freshman year, and programmatic approaches for retaining highly qualified students.

15. **Increase efforts to provide handicapped students full participation in University life** (recommendation 38): In order to comply with Section 504 of the Rehabilitation Act of 1973, the Office of Handicapped Student Services investigated sources of funding for architectural barrier removal and for provisions of services for handicapped students. Five projects were funded in 1980, including wheelchair access to the Carnegie and Recreation Buildings at University Park. Similar efforts were undertaken at Delaware County and York Campuses. A guide to physically handicapped students in the classroom was developed and published for Penn State faculty in Fall 1980. The Kurzweil Reading Machine, an instrument which reads aloud printed material for visually impaired students, was installed in the Pattee Library in March 1981.

16. **Monitor progress of Behrend College** (recommendations 56 and 57): A comprehensive

analysis was prepared by the Office of Planning and Budget in Fall 1980 of Behrend's enrollment trends and projections, personnel resources, and facilities needs. A subsequent proposal was developed and presented by the new dean to the President and Provost in December 1980, specifying a plan of program direction for Behrend College and identifying corresponding resource needs. These documents are serving as important references in the continuing assessment of Behrend's future direction and resource needs as part of the planning and budget process.

17. **Establishment of the "Connect" Advisory Committee** (recommendations 10a and 38a): "Connect" is a recently developed program to benefit women in non-traditional majors, i.e., agriculture, engineering, business administration, and the sciences, by encouraging peer and faculty support, providing role models and teaching skills to come successfully in traditionally male-dominated environments. In August 1980 the Provost and Senior Vice President for Administration appointed an advisory committee to the "Connect" program for the purpose of identifying problems which women in traditionally male programs may encounter during their academic life or after they leave the University. The initiative of the committee is upon the recruitment, retention, and adjustment of women in these fields at Penn State.

The University Council, which is responsible for overall implementation of the *Perspective's* recommendations, has recommended that during the next 12 to 18 months special attention be given to a number of projects, among them:

- review of basic educational philosophy;
- study of a recent decline in the number of applications for sabbatical leaves;
- preparation of a report to be presented to the Trustees early next spring describing federal student loan policies passed by the 1981 Congress and how they will affect Penn State students; and
- a review of the University's undergraduate advising program.

The University Council recommended also that a reappraisal be undertaken of University policies affecting assignment and funding of graduate assistantships and fellowships. The review is to be completed in December.

Construction projects

(Continued from page 6)

produced by revenues from varsity football. Construction should be completed by March 1982.

An addition to the University's laundry building was approved by the Trustees. The 1,600-square-foot addition will serve as a shipping, receiving and storage room. The project will cost approximately \$70,000 and will be funded from laundry operation income.

Also approved was construction of a 3,100-square-foot pesticide storage and handling building at the Rock Springs Agricultural Research Center. The pole-barn structure will be built on the Agronomy Research Farm and is designed for safe storage and handling of pesticides. Federal funds, in the amount of \$45,000, will pay for the construction, which is expected to be completed this summer.

Trustees okayed final plans for a 775-square-foot addition to the Applied Research Laboratory's Test Labs. All funds for design and construction are being provided by the U.S. Navy. The cost is expected to be \$45,000.

The Hazleton Campus will get 50 additional parking spaces by Fall Term as Trustees authorized that construction. The project cost is \$40,000.

Also approved were final plans to build a memorial garden at the Altoona Campus near the Edith Davis Eve Chapel. It will be called the E. Robert Titelman Memorial Garden in memory of the former treasurer of Puritan Sportswear and Altoona resident.

The Altoona Campus Advisory Board, meeting in February, approved \$41,000 from funds contributed by James W. Titelman and other donors for construction of the garden.

Comedy to open Festival season

Festival Theatre opens its 1981 season on June 25 with *Born Yesterday*, a comedy boasting one of the longest runs in Broadway history. Equity cast members include David Wurst, Susan Borneman, and Tony Hoty.

Mr. Wurst is no stranger to Festival audiences. He appeared as Rufe Phelps in *The Last Meeting of the Knights of the White Magnolia* and the companion play, *LuAnn Hampton Laverdy Overlander*, and as Ben Silverman in *The Sunshine Boys*. In *Born Yesterday* he portrays Paul Verrall, the idealistic magazine writer.

Ms. Borneman and Mr. Hoty are Festival newcomers, but they have earned

numerous credits in comic and dramatic roles around the country. Each is also a member of a working comedy team — Borneman and Greenhouse, Hoty and Kaptur. In *Born Yesterday*, Mr. Hoty plays Harry Brock, the rich but vulgar wheeler-dealer. Ms. Borneman is Billie Dawn, his charming but dumb girlfriend. *Born Yesterday* runs June 25 through July 12 in the Pavilion Theatre. The rest of the Festival Theatre 1981 season includes *Once Upon a Mattress*, *On Golden Pond*, and *Grease*. Season subscriptions are still available as are single tickets. For information call the Festival Box Office (865-1844).

URTC launches 'Angels program'

Penn State's University Resident Theatre Company (URTC) has successfully launched a program designed to attract private support for its productions.

"A significant portion" of the costs of producing the four plays of URTC's 1981 summer Festival Theatre has been provided by contributions from area residents, according to Dr. Walter H. Walters, dean of the College of Arts and Architecture and director of University Arts Services.

URTC has named the fund raising effort its "Angels Program." The term "angels," Dean Walters explains, in theatre parlance has come to mean backers who offer financial and other kinds of support for productions.

The Festival Theatre "angels" and the shows with which they will be associated are: Barbara and Jay Claster, *Born Yesterday*; G. M. McCrossin, *Once Upon a Mattress*; Jane and E. F. "Pat" Houser, *On Golden Pond*; and Barbara and James Palmer, *Grease*.

Mr. and Mrs. Houser are Bellefonte

residents. The other "angels" make their homes in State College. All are prominent in central Pennsylvania business.

This is the first time in the history of Penn State theatre that private support has been sought to allay production costs.

"These costs have risen dramatically in recent years," Dean Walters observes. "University support of the theatre has been steady, but we can't expect major increases in its support in these financially difficult times."

"If we are to pass along all our increased costs through ticket prices, we would soon price theatre beyond the reach of many of our patrons, especially students and people on fixed incomes."

"We must not let this happen. Theatre is a public art and we are committed to keeping it accessible to the widest possible public."

Dean Walters adds that in the future URTC hopes to expand the Angels Program to include more contributors and to take in the fall, winter and spring academic seasons.

Otto

(Continued from page 1)

from the introduction of an innovative budget reporting system for Campus administrators to an expanded educational program for the gifted children of the community.

"I am very pleased that the Beaver Campus will remain under his leadership."

Concerning the position of associate director for academic affairs, Dr. Oswald indicated that examination of the programs of the Campus led to the conclusion that the reorganization was appropriate. The associate director, when selected, will be delegated responsibility for faculty and academic affairs at the Campus. This pattern of organization, introduced in the mid-1970s, is now in effect at over half of the University's 17 Commonwealth Campuses.

Mr. Otto was named acting director of the campus in 1979 when Dr. Joseph Gustin resigned to become chancellor of the Indiana-Purdue University campus at Fort Wayne, Ind. In May 1980, Mr. Otto became interim director.

Prior to becoming acting director of the campus, Mr. Otto was assistant director for continuing education at Beaver from 1968 to 1979.

From 1966-68, he was assistant district administrator for continuing education at Penn State's Behrend College. He had joined the University system in 1964 as a part-time administrator for continuing education in New Castle, where he had held a variety of positions in the public

Mr. Otto, 42, graduated cum laude from Slippery Rock State College in 1961. He received a master's degree in education from Westminster College in 1964, and the following year studied mathematics at Kent State University under a National Science Foundation grant.

Mr. Otto has been very active in civic and professional organizations at all levels.

Instructional Services to offer June workshop

"Instructional Congruency" will be the subject of a two-hour workshop to be conducted by George Bencoset, a member of the instructional improvement team at the University Division of Instructional Services (UDIS). The presentation, to be offered Wednesday, June 17, at 1:30 p.m. in Room 128 Mitchell Building, is a repeat of the workshop which was given in January.

The workshop is limited to 35 participants on a first-come, first-serve basis. Reservations and additional information may be obtained by calling 863-0668.

Smith

(Continued from page 1)

research articles in scholarly and professional journals and has been an invited guest lecturer for numerous institutions and associations, including Cornell. The Phytotaxological Society and North Carolina State.

On the international level, he has taught at the Instituto Venezolano de Investigaciones Cientificas in Caracas, Venezuela, and has lectured in England, Scotland, the Netherlands, France, West Germany, Belgium, Italy, Switzerland and Mexico.

Dr. Smith also has been involved in extensive service activities both nationally and statewide.

Ryan

(Continued from page 1)

will be joining the Penn State system," Dr. Oswald said in announcing the appointment. "In the nationwide search to fill this position, his credentials as a leader and innovator truly stood out."

"In less than five years, he built the Division of Continuing Studies at Indiana-South Bend from a small office into a major academic unit serving more than 8,000 students a year."

A native of Philadelphia, Dr. Ryan grew up in Danville, Pa., and was educated at the State University of New York at Buffalo, where he received a B.Ed. in 1964, an M.Ed. in 1967 and the Ph.D. in 1972.

He also began his professional career at SUNY-Buffalo. He was associate director of alumni affairs in 1965 and 1966 and director of the office of off-campus housing from 1966 until 1970. In the latter capacity, he developed a new student personnel service area for off-campus housing and worked with local housing developers to provide privately operated dormitories off-campus.

In 1970, Dr. Ryan was named associate director of the Council on Urban Affairs and coordinator of the Urban Studies Major at SUNY-Buffalo. He designed, developed and coordinated the urban studies major and initiated and published a university-wide "Inventory of Faculty Resources — Teaching, Research and Technical Assistance Related to Urban and Regional Affairs."

He joined Indiana-South Bend in 1974 in his present capacity. Besides overseeing the growth of the operation, he began an interdisciplinary external degree program which has attracted more than 3000 students in the last five years.

An authority on leadership and management, Dr. Ryan has conducted seminars for administrators throughout the United States. He also has published numerous articles and research papers.

Senate elects officers, fills committees

(Continued from page 1)

of engineering research, member; Kathryn B. Moore, associate professor of education, alternate. Other than University Park, Cara-Lynne Schengrund, associate professor of biochemistry at Hershey, member; P. Peter Rebane, associate professor of history at Ogonitz, member; Bernard L. Guss, associate professor of general engineering at New Kensington, alternate. Deans, Evan G. Pattishall, Human Development, member; Stanley F. Paulson, Liberal Arts, member; Stuart Forth, Libraries, alternate.

University Promotion and Tenure Review Committee: Paul R. Shellenberger, professor of dairy science; Thomas E. Daubert, professor of chemical engineering; Michael P. Hottenstein, director of the MBA program; Charles A. Cole, professor of engineering at Capital Campus.

Standing Joint Committee on Tenure: Manfred Kroger, professor of food science, member; Robert Jennings Heinsohn, professor of mechanical engineering, alternate.

Dr. Tischler jokingly refers to herself as "the mother of Capitol Campus," whose faculty she joined in 1966, the year the Campus was established. Her Senate tenure began in 1976, and she was elected secretary last year, becoming chairman-elect when Dr. Edward H. Klevans relinquished the post.

A member of the Faculty Advisory

Committee, Dr. Tischler served on the committee which drafted the original constitution for the Faculty Organization at Capitol. She was a member also of the Task Force on Mission for *A Perspective on the '80s* and acted as editor for the Capitol Campus Plan for the '80s.

Prior to joining the University faculty, Dr. Tischler taught at Susquehanna and George Washington Universities. A graduate of Wilson Teachers College, she earned her M.A. and Ph.D. in English at the University of Arkansas. A former Fulbright Scholar and Danforth Associate, she is the author of several books, including *Dorothy L. Sayers: A Pilgrim Soul*, *Legacy of Eve: Images of Women in the Bible*, *Black Masks: Negro Characters in Modern Southern Fiction*, and *Tennessee Williams: Rebellious Puritan*.

Dr. Dixon joined the faculty in 1947 after earning B.S., M.S. and Ph.D. degrees at Penn State. From 1955 to 1964, he was director of an American Petroleum Institute research project at the University. Named head of the Department of Chemistry in 1971, he has served two years in the Senate.

Active in the American Chemical Society, Dr. Dixon is chairman of its Budget and Finance Committee's subcommittee on budgets and programs. He also chaired the Society's MARM (Middle Atlantic Region Meeting) Committee last year.

Calendar Conversion Council offers report

Among other topics, the Calendar Conversion Council's May 21 agenda included a discussion of a Council meeting with deans of the Colleges and directors and assistant directors of the Commonwealth Campuses.

It was reported that the Commonwealth Campuses have appointed local calendar committees, which are to serve as liaisons between the Campuses and the Council. In discussing the Campus calendar committees, the Council stressed the need for input from faculty members at all University locations.

The Council also discussed how the Summer Term will take shape under the semester system and appointed a standing committee to make an in-depth study of the matter. Henry J. Hermanowicz is chairman of the committee.

In other matters, the Council:

— Heard an oral report from the Class Schedule Committee, which emphasized

the necessity of even distribution of classes across eight periods per day, five days per week in order to accommodate the instruction program.

— Scheduled a meeting to discuss concerns voiced by the Administrative Council on Undergraduate Instruction about the overall calendar conversion timetable and the common forms for the final revisions of academic programs being used by the Council and the Senate Committee on Curricular Affairs.

— Recommended to Richard E. Grubb, senior vice president for administration, a revised series of publication dates for the Associate Degree, Baccalaureate Degree and Graduate catalogs.

— Discussed a variety of questions regarding sabbatical leaves and appointed a committee to recommend a revised PS-17, the policy which governs sabbatical leaves. Wendell V. Harris was named to chair the committee.

Penn State Intercom

University announces academic promotions as of July 1

The following promotions are effective as of July 1:

TO PROFESSOR

Gert Aron, Civil Engineering
 Philip H. Baldi, Linguistics
 Eugene N. Borza, History
 Peter R. Cavanagh, Biomechanics
 Milton W. Cole, Physics
 Richard Craig, Plant Breeding
 Donald D. Davis, Plant Pathology
 Donald J. Epp, Agricultural Economics
 Daniel D. Fritton, Soil Physics
 Anthony V. Galanti, Engineering,
 Hazleton Campus
 John K. Gamble, Jr., Political Science,
 Behrend College
 Sheldon R. Gelman, Social Welfare
 Ernest A. Harrison, Jr., Chemistry, York
 Campus
 Kathryn L. Harry, Physiology, Hershey
 Charles W. Hill, Biological Chemistry,
 Hershey
 John H. Hoke, Metallurgy
 James P. Ignizio, Industrial Engineering
 Kenneth K. Kuo, Mechanical Engineering
 Richard M. Lerner, Child Development
 Raymond E. Lombra, Economics
 David R. MacKenzie, Plant Pathology
 Alan A. MacNab, Plant Pathology
 Extension
 Richard C. Rose, Physiology and Surgery,
 Hershey
 Richard W. Scholz, Veterinary Science
 Henry P. Sims, Jr., Organizational
 Behavior
 Lanny B. Somme, Art
 Graham B. Spanier, Human Development
 and Sociology
 Richard E. Tressler, Ceramic Science and
 Engineering
 James S. Ultman, Chemical Engineering
 Richard F. Unz, Environmental
 Microbiology
 Joseph J. Villafranca, Chemistry
 James C. Wambold, Mechanical
 Engineering
 Thomas L. Watschke, Turfgrass Science

Ralph L. Webb, Mechanical Engineering
 Walter B. Welmer, Psychology
 Boris Weisfeiler, Mathematics
 Jack H. Willenbrock, Civil Engineering
 Francis H. Witham, Horticulture and Plant
 Physiology

TO ASSOCIATE PROFESSOR

Robert C. Aber, Medicine, Hershey
 Wesley F. Alles, Health Education
 Michael L. Barton, Social Science and
 American Studies, Capitol Campus
 Milton J. Bergstein, Marketing
 Rita G. Blatt, Chemistry, Capitol Campus
 Todd W. Bowersox, Silviculture
 Joseph L. Cavinato, Business Logistics
 Rupert F. Chisholm, Jr., Management,
 Capitol Campus
 Clifford C. Clogg, Sociology and Statistics
 John W. Dawson, Jr., Mathematics, York
 Campus
 Donald E. Fahnline, Physics, Altoona
 Campus
 Diana H. George, English, Behrend
 College
 Frederick A. Hussey, Administration of
 Justice
 Harriet C. Isom, Microbiology, Hershey
 Michael A. Kersnick, Business
 Administration, Delaware County
 Campus
 Jeffrey S. Lannin, Physics
 Donald P. Lookingbill, Medicine, Hershey
 Joan D. Mandie, Sociology, Delaware
 County Campus
 Emilia E. Martinez-Brawley, Social
 Welfare
 James H. Miller, Business Logistics
 Kenneth L. Miller, Radiology, Hershey
 Richard A. Mollo, Electrical Engineering
 William A. Nahhas, Obstetrics and
 Gynecology, Hershey
 Stephen H. Nellis, Medicine, Hershey
 Leonard R. Riforgiato, History, Shenango
 Valley Campus
 Robert E. Shute, Health Education
 Janos Simon, Computer Science
 Stanley P. Stephenson, Jr., Economics

S. Edward Stevens, Jr., Microbiology and
 Cell Biology
 Richard B. Tenser, Medicine and
 Microbiology, Hershey
 H. Randolph Thomas, Civil Engineering
 John E. Tyworth, Business Logistics
 Edward J. Walsh, Sociology
 Michael J. Waslenko, Economics
 Jeffrey S. Wicken, Biochemistry and
 Natural Science, Behrend College
 Thomas G. Winter, Physics, Wilkes-Barre
 Campus

TO ASSOCIATE LIBRARIAN

Jack E. Pontius
 Sara Lou Whildin, Delaware County
 Campus

TO ASSISTANT PROFESSOR

Pier L. Bandini, Architecture
 James Cauraugh, Physical Education,
 McKeesport Campus
 Kathryn Flaim, Physiology, Hershey
 Kathryn Kearns, Physical Education,
 Ogontz Campus
 Donna M. Laws, Family and Community
 Medicine, Hershey
 Tony M. Lentz, Speech Communication
 Stephen R. Mahaney, Computer Science
 Richard W. Sloan, Family and Community
 Medicine, Hershey
 Robert Walker, Health Education
 Charles W. Whitney, Obstetrics and
 Gynecology, Hershey
 Thomas Willson, Recreation and Parks
 Janet Woodcock, Medicine, Hershey
 Douglas C. Woolley, Family and
 Community Medicine, Hershey
TO RESEARCH ASSOCIATE
 John H. Beebe, ARL
 Anke Mans, Anesthesia, Hershey
 Louis A. Rubano, ARL
 Allen L. Treaster, ARL
TO RESEARCH ASSISTANT
 Doyle Grenoble, Horticulture

TO ADJUNCT PROFESSOR

Clifton A. Baile, Animal Nutrition
 Kenneth T. Leath, Plant Pathology

TO ADJUNCT ASSOCIATE PROFESSOR

Alfred G. Wheeler, Jr., Entomology

TO SENIOR EXTENSION AGENT

Robert C. Antram, Somerset Co.
 Urania B. Linn, Venango Co.
 Jacob E. Guffey, Bradford Co.
 Philip L. Sellers, Allegheny Co.
 Alfred T. Skala, Luzerne Co.
 Bernard L. Wingert, Warren Co.

TO EXTENSION AGENT

David L. Dunbar, Lehigh Co.
 Jack E. Erway, McKean Co.
 Roland P. Freund, Cumberland Co.
 Kathryn J. Hostetter, Cambria Co.
 Justine L. Olive, Philadelphia
 Charles G. Replögge, Allegheny
 Paul L. Stephenson, Philadelphia
 Bette D. Walters, Forest
 Gordon D. Walker, Mifflin
 George C. Wilcox, Erie

TO ASSOCIATE EXTENSION AGENT

Mary Jo Cook, Jefferson Co.
 David M. Cox, McKean Co.
 Michael P. Fournier, Bucks Co.
 Nancy M. Kadwill, Montgomery Co.
 Robert E. Leiby, Lehigh Co.
 Mary C. Lehman, S.W. Region
 Dawn M. Olson, Monroe Co.
 Rhonda M. Schember, Erie Co.
 William C. Shuffstall, N.C. Region
 Richard S. Smith, Tioga
 Roger W. Smith, Greene
 Thomas E. Walker, Washington
 Andrea V.J. Wise, Clearfield
 Kathleen A. Worthington, Sullivan

Faculty/Staff Alerts

Major Medical maximum increased

President Oswald is pleased to announce that effective July 1, 1981, the University will increase the maximum lifetime major medical benefit for each covered faculty and staff member from \$150,000 to \$200,000. In order to insure an adequate maximum level of protection for faculty and staff members and their dependents, the lifetime maximum will be increased by \$50,000.

The University's hospital/surgical/major medical program is a comprehensive plan designed to provide reimbursement of certain basic medical expenses at 100 percent and then reimbursement under the major medical provision at 80 percent for all other covered charges after a \$100 deductible has been satisfied. When \$5,000 of covered charges have accrued in a calendar year, the stop-loss provision becomes effective. This provision provides that all future covered charges incurred in that calendar year and during the next

calendar year are covered at 100 percent. Also, the deductible need not be satisfied in the second year.

This improvement in the health insurance coverage applies to regular full-time faculty and staff members, their covered dependents, as well as University retirees who were eligible to continue insurance into retirement and their covered dependents.

July 4 holiday

When an official University holiday falls on an employee's regularly scheduled day -
 (Continued on page 8)

Legislators approve budget

When INTERCOM went to press at noon on Tuesday, Penn State's budget bill had been approved by the House and the Senate in Harrisburg. The bill was awaiting signature by Governor Thornburgh.

Provost Eddy, expressing pleasure at the legislature's action in approving the \$133.8 million appropriation, said that the University will begin to implement its 1981-82 operating budget as soon as the Governor signs the bill.

Senior academic officers attending a two-day development workshop

A two-day development workshop is being held this week (June 25-26) for the University's senior academic officers under the sponsorship of the Office of the Provost.

Four speakers will address the workshop, according to Assistant Provost Richard P. Chait, who has organized the program.

Charles Lupton, executive director of the University's Office of Gifts and Endowments, will be the first speaker, providing a status report on OGE's existing services and discussing future directions for Penn State's fund-raising efforts.

A successful fund-raising campaign at another institution will be described by the next speaker, Charles Neel, dean of the College of Business at the University of Tennessee. Tennessee recently completed a two-year drive in which its announced goal of \$40 million was topped by some \$15 million. Dr. Neel has been asked to discuss his participation in this drive. Dr. Chait notes, because his college was the most successful in attracting gifts.

Operational strategies will be the topic of Chase Peterson, a physician who is currently vice president for health services at the University of Utah. Dr. Peterson came to Utah from Harvard University, where he was vice president in charge of development activities.

His comments will be directed toward the specific actions deans and senior academic officers can take to raise funds. These include preparing case statements, identifying and approaching donors, attracting deferred gifts and involving faculty members in fund-raising activities.

How a university as an entity determines priorities and develops a fund-raising strategy will be the subjects of the final speaker, Thomas Graves, president of William and Mary College and a former associate dean of the Harvard Business School.

The workshop will conclude with five "clinics." Participants were asked to identify areas of particular interest. Dr. Chait explains, and the clinics have been organized around these issues. Each group

(Continued on page 7)

Penn Staters

The United States Senate by a unanimous voice vote confirmed Nunzio J. Palladino, dean of the College of Engineering, to head the Nuclear Regulatory Commission. Dean Palladino's nomination was supported by a vote of 12-0 by the Senate Committee on Environmental Relations.

The world premiere of "Piano Fantasy" by John Beall was given recently by pianist Steven Smith, associate professor in the School of Music, at the Sorbonne in Paris. Professor Smith's performance was part of his second concert tour of France, Spain and Gabon. During the tour, he also presented broadcast recital programs for French and Spanish National Radios.

In other activities during the 1980-81 season, Professor Smith made a recording with the Claremont Quintet of chamber music for piano and winds. It was released by Crystal Records.

Dr. Edward Sichi, assistant professor of English at McKeessport, has been invited to the International Milton Symposium to be conducted July 7, 8 and 9 in London and at Milton's Cottage, Chalfont St. Giles. Dr. Sichi's paper, entitled "Milton, Mayhew and Thoreau: In Search of a Heritage," will contribute to the symposium theme, "Milton and His England," and will also mark the 300th birthday of William Penn, which is being jointly celebrated.

Dr. Nathan N. Aronson Jr., associate professor of biochemistry, was an invited speaker at the Fourth Symposium on Intracellular Protein Catabolism held recently in Reinhardtsbrunn, German Democratic Republic. He discussed inhibitors of protein degradation in liver. Dr. Aronson also presented seminars at the International Institute of Cellular and Molecular Pathology in Brussels, and at the biochemistry department of the University of Bern.

Eugene N. Borza, associate professor of history, served as general chairman of a symposium on Alexander the Great, held at the Art Institute of Chicago on June 5 and 6. The symposium was held in conjunction with "The Search for Alexander" exhibition, now at the Art Institute. Dr. Borza also presented a paper on "The Natural Resources of Ancient Macedonia" and chaired the special session on "History and the Vergina Excavations."

William R. Schmalstieg, professor and head of the Department of Slavic Languages, presented a paper on Baltic linguistics in Stockholm at the Sixth Conference on Baltic Studies in Scandinavia during the early part of June. During his stay in Europe, Professor Schmalstieg also gave two invited lectures at the University of Kiel and an invited seminar on certain problems of Indo-European linguistics at the University of Freiburg in Germany.

Dr. R.E. Tressler, chairman of the Ceramic Science and Engineering Program, presented an invited lecture at Cornell University. He summarized recent work at Penn State on the effect of high-temperature oxidation on the failure with time of high-performance silicon carbide ceramics. These ceramics are being tested in prototype advanced gas turbine engines for vehicular use, and in high-temperature heat exchangers for use with solar collecting towers, various industrial furnaces, and gas turbine engines.

Two new sculptures by Zeljko Kujundzic, professor of art at Fayette, are included in the Seattle 12-Person International Sculpture Invitational. The show, organized jointly by the Sculpture Society of British Columbia and the Seattle Artists Cooperative Association, is being held through June at Seattle's recently reconstructed Pioneer Square.

Dr. Robert W. Carrubba, professor of classics, has been named associate dean of the Graduate School. He has also been appointed assistant to the Vice President for Research and Graduate Studies. Both appointments will become effective in 1982.

"I'm extremely pleased that Dr. Carrubba has accepted this challenge," said Dr. James B. Bartoo, dean of the Graduate School. "As a scholar, he's had a long and productive association with the Graduate School. That and his experience in directing graduate research make him an excellent choice for this key position."

According to Dr. Richard G. Cunningham, vice president for research and graduate studies, Dr. Carrubba will devote much of his time in that office to

coordinating programs and services with those of the Graduate School. He will also serve as assistant director of the University's Intercollege Research Programs.

As associate dean, Dr. Carrubba will be the Graduate School's academic officer in charge of student programs.

He will be responsible for academic involvement of graduate students from admission to graduation, including registration, readmission, maintenance of records, appointment of graduate committees for doctoral students, scheduling of doctoral comprehensives, approval of students for graduation and handling of student academic problems.

"Dr. Carrubba will also continue his scholarly involvement in the College of the Liberal Arts," Dean Bartoo said.

In April, Dr. Carrubba was named one of 35 American Council on Education Fellows in Academic Administration for 1981-82. The fellowship, to be served at University Park under the direction of the Provost, is designed to prepare the recipient for key administrative positions.

A Penn State faculty member since 1969, Dr. Carrubba previously was on the faculties of Columbia University and St. John's University (Minn.).

He graduated egregia cum laude in 1956 from Fordham University, where he won the Xavier Scholarship and was a member of the honors program. He received the master's degree from Fordham in 1957 and a second master's from Princeton University. In 1964, he earned the Ph.D.

Cecile M. Springer, of Pittsburgh, has been appointed by Governor Dick Thornburgh to a three-year term on the University's Board of Trustees. Ms. Springer is director of contributions and community affairs for Westinghouse Electric Corporation.

She was formerly administrative assistant to the vice president and general manager of Westinghouse's Water Reactor Divisions. From 1974 to 1976, she was manager of product development for the company's Advanced Energy Systems Division.

From 1970 to 1974, Ms. Springer was principal planner on the Southwestern Pennsylvania Regional Planning Commission, coordinating planning in such areas as land use, services for the elderly and subsidized housing.

While in that position, she wrote a number of reports and brochures, among

them one entitled "Poverty in Southwestern Pennsylvania" and another, "A Time for Concern - Status of Elderly and Handicapped in Southwestern Pennsylvania."

Trained as a chemist, Ms. Springer worked as a research chemist at Bristol Myers Laboratories and Schering Pharmaceutical Laboratory, both in New Jersey, and in the Graduate Department of Biochemistry and Nutrition at the University of Pittsburgh.

Her bachelor's degree in chemistry is from Manhattanville College in New York. She holds two master's degrees, one in chemistry from Wellesley College and one in urban and regional planning from the University of Pittsburgh.

In recent years, Ms. Springer has served on a number of advisory and governing boards, among them the National

from Princeton where he was a Robbins Fellow and Danforth Teaching Fellow.

His numerous postdoctoral awards have included the American Council of Learned Societies Grant (1975-76) and Josiah Macy Jr. Foundation Research Grants (1966-73).

Dr. Carrubba's book publications include authorship of *The Epodes of Horace: A Study in Poetic Arrangement* and co-editorship of *Directory of College and University Classicists in the United States and Canada and Classics and the Classic Tradition*.

He edited three volumes of the *Journal of the Classic World* and three volumes of the *Proceedings of the American Philological Association*. He has written more than 50 articles, reviews and translations.

Dr. Carrubba was 1981 author of the National Classic League Latin Grammar Examination. He has served as chairman of the Committee on Awards for Excellence in the Teaching of the Classics.

He also is secretary-treasurer of the Central Pennsylvania Chapter of the Archaeological Institute of America and has been president of the Classical Association of the Atlantic States and chairman of the Selection Committee on Travel Grants in Classics of the American Council of Learned Societies.

From 1973 until 1976, Dr. Carrubba was executive director of the American Philological Society.

At Penn State, he is chairman of the University Faculty Senate Committee on Curricular Affairs.

Advisory Committee on Black Higher Education and Black Colleges and Universities; Appellate Court Nominating Commission of Pennsylvania; Honorary Advisory Committee, Pennsylvania Academy of Science; Pittsburgh Allegheny County Cultural Alliance; and Pittsburgh Regional Engineering Program.

She co-chairs the Executive Women's Council of Pittsburgh and is a member of the National Program Committee of the Council on Foundations.

Ms. Springer has been active in the Allegheny County Board of Assistance, the United Way of Allegheny County, the Energy Advisory Committee of the Governor's Energy Council and the League of Women Voters. She has been a trustee of Carlow College, Slippery Rock State College and the Winchester-Thurston School.

Dr. Richard L. McCarl, professor of biochemistry, has returned from two weeks in the state of Qatar (on the Arabian Gulf) as a visiting biochemist at the University of Qatar in Doha. During his stay, Dr. McCarl presented a formal public lecture, reviewed the chemistry department's program and interacted with department faculty. His visit was sponsored by the University of Qatar with the cooperation of the Consortium for International Cooperation in Higher Education. Penn State is a sponsoring institution of the Consortium through its membership in the National Association of State Universities and Land-Grant Colleges and the American Association of Colleges for Teacher Education.

Dr. Thomas A. Ryan Jr., associate professor of statistics, has been elected a Fellow of the American Statistical Association in recognition of his contributions to the profession.

Howard D. Bartlett, professor of agricultural engineering, has been elected a Fellow by the American Society of Agricultural Engineers (ASAE). Fellows are elected annually by ASAE's board of directors.

Dr. Thomas B. King, associate dean for Extension, was re-elected vice chairman of the board of trustees of National 4-H Council at the organization's recent annual meeting in Chicago.

Dr. Ben W. Twight, associate professor of forest resources, has been appointed to the editorial board of the *Journal of Forestry*.

Dr. E. Willard Miller, professor emeritus of geography and associate dean of resident instruction emeritus, was recently appointed to a three-year term as media materials editor of the *Journal of Geography*.

Dr. J. Conell Hatch, professor of agricultural communications, has been appointed to the board of directors of the *Journal of Extension* for a three-year term as a representative of Agricultural Communicators in Education.

Dr. Kenneth R. Graham has been appointed acting assistant dean for Continuing Education and director of Executive Programs in the College of Business Administration.

Dr. Graham currently serves as Assistant Director of Executive Programs. He assumes his new position on July 1, replacing Dr. James Ray Watson, who becomes assistant dean for executive education at the Fuqua Graduate School of Business at Duke University.

Sculpture by three artists currently or formerly connected with the University - Stephen Porter, Kevin O'Toole and Joe Mooney - is included in an exhibition being held at the Gross McClellan Gallery in Philadelphia through June 26. Mr. Porter is an associate professor of art at the University and works mainly with stainless steel and wood. Mr. O'Toole, a 1978 M.F.A. graduate of the University and currently preparator at the Museum of Art, works in wood and cast resin; and Mr. Mooney, a 1978 B.F.A. graduate, makes sculptures of welded steel.

Kathleen Burns Easler was honored recently as a distinguished alumna of Duquesne University. Mrs. Easler, who earned her B.A. in journalism from Duquesne in 1954, is public relations officer at the McKeessport Campus. She has been active in various community programs, including the McKeessport Advisory Council to the Pennsylvania Human Relations Commission and the Governor's Civil Tension Task Force.

Herbert Fogelman has been certified by the National Phlebotomy Association, the first member of the Hershey Medical Center phlebotomy team to do so. Mr. Fogelman has been employed in the Clinical Laboratories as a blood collector for more than 10 years.

(Continued on page 3)

Richard Morgan (right) and Charles Mann examine copy of "The Warkis of Sir David Lyndsay."

An extremely rare book, *The Warkis of Sir David Lyndsay*, printed in Edinburgh in 1568, has been given to the University Libraries by Dr. Richard Morgan, associate professor of biophysics at Penn State.

Dr. Morgan presented the book in memory of his grandfather, Lowell Mason Palmer, who bought it around the turn of the century. The book, which was handsomely bound in gold-tooled brown morocco by the famous firm of Riviere & Son, is known by only four other copies,

according to Rare Books Librarian Charles Mann.

The book is of scholarly importance because its author was one of the important transitional poets of Scotland during the Renaissance. Dr. Morgan's copy is the first edition of Lyndsay's collected poems, Professor Mann notes, and the only one to retain his original Scots spelling, giving some indication of how Lyndsay's word sounded to his contemporaries.

The Pennsylvania Research Corporation has approved 10 research grants totaling \$92,000 to University scientists and engineers whose proposals include potential inventions. The grants ranged from \$9,000 to \$12,000.

Royalties from three patented inventions already licensed to industry supplied the grant funds. The inventions are the ammonia Cold-Flo® equipment sold by U.S. Steel's Agri-Chemicals Division, the heart pacemaker telemetry advances licensed to Intermedics, Inc., and a delayed release mushroom nutrient marketed by Spawmte, Inc.

Separate royalty checks went to agricultural engineers William L. Kjelgaard and Paul E. Anderson for Cold-Flo®. For the pacemaker inventions, the Pennsylvania Research Corporation distributed checks to Dr. G.F.O. Tyers, a former Hershey heart surgeon, to Robert L. Brownlee, a former Penn State electrical engineer now employed in industry, and to the heirs of Dr. Carl Volz, a former Penn State electrical engineer.

Dr. Lee C. Schisler, professor of plant pathology, and former graduate student A. David Carroll Jr., now working in his family's Berks County mushroom business, received royalty checks for the mushroom nutrient.

The researchers who won PRC grants are: Dr. Edwin V. Gaffney, associate

professor of microbiology and cell biology (an assay for breast cancer); Dr. Howard C. Hughes, associate professor of comparative medicine, and Dr. Stephen H. Nellis, assistant professor of medicine (diagnosing and treating cardiac tachyarrhythmias via a microprocessor); Dr. Barnes W. McCormick, professor of aerospace engineering (preventing accidental spinning of aircraft); and Gerson Rosenberg, research associate in surgery, (an electric drive system for an implantable heart).

Dr. John H. Pazur, professor of biochemistry, will test the idea of modifying starch with enzymes, primarily for food stabilization and other industrial uses. Four projects dealing with mushrooms by Dr. Daniel J. Roysse, assistant professor of plant pathology; Mildred H. Jodon, research assistant in plant pathology; Dr. Lee C. Schisler, and H.R. Muthersbaugh, manager of the Mushroom Research Center; and one by Dr. Ayusman Sen, assistant professor of chemistry, on metal catalysis of carbon monoxide and olefins, complete the PRC supported grants.

Royalties were paid to the Pennsylvania Research Corporation by the Research Corporation, New York, which evaluates University inventions, patents those chosen, and searches for a licensee.

of agricultural economics at University Park. B.S., U. of Guelph; M.S., Ph.D., Purdue U.

Jeffrey K. Harris as assistant professor of surgery at Hershey. A.B., Colgate U.; M.D., U. of Colorado. Ophthalmology resident, U. of Minnesota.

Callan T. Lum as assistant professor of surgery at Hershey. M.D., Tufts U.; Ph.D. in progress, U. of Minnesota. Resident, transplant fellow, U. of Minnesota.

Robert F. Wideman Jr. as assistant professor of poultry science at University Park. B.A., U. of Delaware; M.S., Ph.D., U. of Connecticut. Post-doctoral research associate, U. of Arizona College of Medicine.

Nancy J. Green as research assistant in plant pathology. B.S., M.S. in progress, PSU.

David P. Robb as research assistant at Applied Research Laboratory. B.S., M.S. in progress, PSU.

Bookshelf

Geoffrey C. Godbey, professor of recreation and parks, has written a new textbook, designed to be an introduction to leisure behavior. It is entitled *Leisure in Your Life*, and was published by Saunders College Publishing.

The book includes a series of exercises designed to help the student better understand his or her own leisure behavior. Much of the writing reflects the content of the Leisure and Human Experience course that Dr. Godbey has taught to more than 1,000 Penn State students.

Though in the past social scientists have not taken the study of leisure behavior seriously, today there is increasing recognition that how one spends free time may be as important as, or more important than, one's formal employment, in terms of life satisfaction.

Dr. Godbey is currently on the International Sociological Association's Committee for Leisure and Popular Cultures. He is the author of two previous textbooks concerning recreation and leisure.

Dr. Roger Ladda, associate professor of pediatrics and chief of genetics at Hershey, has co-authored a two-volume publication, *Clinical Gendodermatology*, with Dr. Thomas Butterworth, retired professor of dermatology from the University of Pennsylvania and a Reading practitioner. This is a completely re-written and expanded edition of a publication originally prepared by Dr. Butterworth in 1969 and deals with heritable diseases that relate to the skin.

Dr. Michael A. Barendse is the author of a monograph published recently by the Penn State Press. The work, *Social Expectations and Perception: The Case of the Slavic Anthracite Workers*, is Number 47 in The Pennsylvania State University Studies. The 72-page study is priced at \$3.50.

The observations reported in this monograph by Dr. Barendse, an assistant professor of sociology and American studies at the Worthington Scranton Campus, present a new view of the Slavic impact on Pennsylvania's anthracite fields. This study, in fact, was prompted by his observation of a sharp dichotomy in interpretations written before and after the mid-1960s, but relying on the same data, of the impact of the Slavic immigrants.

Investigations dated between 1902 and 1964 blamed the Slavic immigrants for the exploitation of anthracite mines, the initial failures of unionization and the relative social backwardness of Northeastern Pennsylvania. The old view led to the "split labor market" theory, which holds that immigrants tend to divide the labor market by their willingness to work for lower wages than those demanded by the established work force.

In this volume, however, Dr. Barendse notes that since 1964 historians such as Victor Greene and Harold Aurand have shown that Slavic immigrants in the anthracite fields were in fact a progressive social influence, even spearheading United Mine Workers organizing strikes.

The monograph also includes a brief history of the anthracite industry from 1740 to 1890 (when the Slavs arrived), a survey of immigration history, and an epilogue on the assimilation of Slavic-Americans into American society down to the present.

Promotions

Staff Exempt

Elizabeth M. Cooke to bookstore manager at Delaware County.

Terry L. Corl to service advisor in Business Services.

Edward C. DeBrasky to assistant scheduler/senior customer service representative in Physical Plant.

Kathleen J. Ebersole to supervisor, Renal Unit at Hershey.

John D.C. Heckman, supervisor of maintenance, housing, in Housing and Food Services.

Barbara Hoffmann to administrative assistant at Hershey.

Donald E. Leitelt to coordinator, grants and contracts, in Liberal Arts.

Ruby F. Noll to administrative services coordinator in Intercollege Research Programs.

William Piekielek to senior research aide in Agriculture.

Clerical

Cynthia Barger to secretary Bin Engineering.

Norma L. Beck to clerk A, loans and grants, in Student Administrative Services.

Nancy E. Crowder to secretary Bin Education.

Jayne Kelter to secretary B at Capitol.

Anthony J. Petro to senior accounting clerk in Arts and Architecture.

Mary Beth Schraf to secretary C in Engineering.

Virginia L. Wheeler to senior serials clerk at Hershey.

Technical Service

Shirley L. Houser to senior milk testing machine operator in Agriculture.

Stephen E. Sellers to audio visual driver dispatcher in Continuing Education.

Kenneth H. Shope to guard at Applied Research Laboratory.

Louella Strouse to salesroom attendant in Agriculture.

Carpoolers

Doris Centzel is seeking a ride to and from Spring Mills. She works 8 a.m. to 5 p.m. in Shields Building (865-6357). Her home phone is 422-8127.

Obituaries

Dr. Francis H. Fenlon, associate professor of engineering science, died June 18 at the age of 41.

A graduate of University College in his native Dublin, Ireland, Dr. Fenlon earned his doctorate in electrical engineering at the University of Liverpool. He joined Penn State's Applied Research Laboratory in 1975 as a senior research associate and was named an associate professor four years later.

Prior to joining the University, he was employed in industry. His research interests were in nonlinear acoustics, nonlinear signal processing, turbulence-induced noise and acoustical diffraction theory.

Samuel I. Auker, retired department head for business and personnel services in the College of Agriculture, died June 12. He was 72. Mr. Auker, a 1931 graduate in commerce and finance from Penn State, was employed at the University from 1930 until 1961.

Curtis L. Corl, a truck driver with the Office of Physical Plant, died June 9 at the age of 81. He was employed by the University from 1930 until 1961.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University. USPS 351-170

Appointments

Dr. Michael T. Snider as associate professor of anesthesiology at Hershey. M.S., Ph.D. in physiology; M.D., all from Emory U. Resident, staff anesthesiologist, Massachusetts General Hospital, Harvard, MIT.

Elizabeth R. Baker as assistant professor of obstetrics and gynecology at Hershey. M.B., M.D., Duke U. Resident, Duke Med. Center; instructor/fellow, Med. Univ. of Cal.

Daniel F. Dedrick as assistant professor of physiology at Hershey. S.B., MIT; M.D., Yale U. Resident, staff anesthesiologist, Harvard, Mass. General Hospital, Harvard.

James W. Griffith as assistant professor of comparative medicine at Hershey. B.S., M.D., U. of Missouri. Private practice; path. resident, U. of Pennsylvania.

Samuel F. Harling as assistant professor,

Partings

Yoshio Fukuyama, professor and head of the Department of Religious Studies, will retire June 30 with emeritus rank. He will become professor and academic dean at the Chicago Theological Seminary, a graduate theological school related to the United Church of Christ. The Seminary has also been affiliated with the University of Chicago, where Dr. Fukuyama earned B.D. and Ph.D. degrees.

Dr. Fukuyama joined the Penn State faculty in 1967 and became department head in 1975. Prior to that time, he had taught at the American School in Talas-Kayseri, Turkey, and Union Theological Seminary in New York City.

He is the author of *The Ministry in Transition: A Case Study of Theological Education*, published by Penn State's Press, and co-author of *The Fragmented Layman: An Empirical Study of Lay Attitudes*.

During a 1974 sabbatical, Dr. Fukuyama was a visiting professor at the Doshisha University and a visiting research scholar at the Center for the Study of Japanese Religions in Kyoto, Japan. That trip was the beginning of research he hopes to continue while at Chicago on Japan's underground Christian movement of the 18th and 19th centuries.

Last spring, he was awarded an honorary D.D. degree from the Seminary in connection with its 125th anniversary convocation. He also received a similar honorary degree from Doane College, where he did his undergraduate study.

Vincent L. Pass, associate professor of architectural engineering, will retire on June 30. He has been a member of the faculty since 1955.

During WWII he served with the U.S. Naval Air Force, mostly in the South Pacific. He completed his B.S. in architectural engineering at Penn State in 1948 and then became an instructor at the University of Texas. While there, he completed an M.S. in architectural engineering in 1951. Before returning to Penn State he was a senior structural engineer with the General Motors Corporation.

His main emphasis has been undergraduate teaching and student affairs. Primarily he was involved in teaching courses in analysis and design of building structures. He is particularly proud of the consistently high teaching ratings he has received over many years. These ratings resulted in his receiving the Lindback Award for superior teaching in 1969. Later in 1972 he received a similar award for excellence in instruction of engineering students from the American Society for Engineering Education.

Professor Pass's research efforts concern solar heat gain through different combinations of glass types and shading devices.

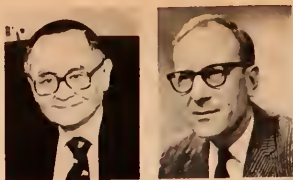

He is a registered professional engineer and after retiring expects to devote some time to consulting in his field and to enjoying operating his small farm.

Dexter N. Putnam, professor of dairy science Extension, will retire June 29 with almost 25 years of service.

Since 1956 Mr. Putnam has been responsible for the development and continued operation of electronic data processing of dairy production records through the Pennsylvania Dairy Herd Improvement Association (DHIA). Penn State is one of 10 centers throughout the United States that annually processes DHIA production records for more than 3.9 million cows in some 58,000 herds.

The author of "How Production is Recorded," a section of a college text, *Dairy Cattle Breeding*, Mr. Putnam earned his B.S. at the University of New Hampshire and his M.S. at West Virginia University, both in dairy husbandry.

In 1973, he was recipient of the Pennsylvania Dairyman's Association Extension Award and in 1978 of the Pennsylvania Jersey Cattle Club Award.

Prof. Fukuyama

Prof. Pass

Prof. Putnam

Coach Medlar

Mr. Searly

Charles "Chuck" E. Medlar, Nittany Lion baseball coach and assistant professor in the College of Health, Physical Education and Recreation, will retire June 30.

The "dean" of the Nittany Lion coaches, Mr. Medlar has served 35 years on the athletic staff and the last 19 years as the head baseball coach, during which he compiled a career record of 312 wins, 141 losses and six ties for a 68.9 winning percentage.

Nine of Mr. Medlar's teams reached the National Collegiate Athletic Association playoffs; his teams also won District 2 playoffs in 1963 and 1973, with a fifth-place finish in the 1963 College World Series. In addition, his 1963 and 1973 teams earned Mr. Medlar District Coach-of-the-Year honors.

A 1946 Penn State graduate, Mr. Medlar served as head trainer for the 1968 Olympic Games in Mexico City and on the training staff for the 1964 Olympic Games in Tokyo. He is a member of the National Athletic Trainers Association Hall of Fame and of the American Association of Collegiate Baseball Coaches Hall of Fame.

"I couldn't have had a better, more rewarding job than this one. I've worked in every area except the Design Room, and there never has been any aspect of my Penn State career that has been distasteful."

So remarks Ralph F. Searly, director of the Physical Plant and Maintenance and Operations, who is retiring June 30 after a University tenure spanning 34 years.

Noting that he sometimes is asked why he is retiring now — at age 53 — Mr. Searly says: "I'm an active guy with many varied interests. It's a case of my wanting to do some things I've always wanted to do, such as setting up my own carpentry shop and seeing more of America."

Active for some 25 years in the fraternal order of Free and Accepted Masons, Mr. Searly is the fraternal head of the order's Tall Cedars of Lebanon. As such, his retirement plans include broader responsibilities with both the Tall Cedars and the Masons.

Mr. Searly began his University employment in 1947 on the G.I. Bill as an apprentice cabinet maker. He subsequently worked on the carpentry crew, as a job coordinator, and as head of the production division before assuming his present position in late 1968.

Meanwhile, he took University courses and earned his B.S. degree in business administration in 1969, just one year before son Ralph L. earned his bachelor's degree in industrial arts education.

In addition to visiting daughter Lou Ann in Europe, Mr. Searly and his wife, Ella Mae, plan to use some of their free time to see more of their other three children: Ralph in Owingsburg, Pa.; Edward in Seattle, Wash.; and Margaret in Millifont, Pa.

Mary R. Ferry, associate librarian at the Hazleton Campus, retired May 30 after working at the Campus since 1956.

Of her 25 years as the librarian at Hazleton, Mrs. Ferry recalls 1972 as the most exciting because that was the year when the new library was constructed.

"The library has moved three times while I've been here," she says, adding that she helped plan the present one and was responsible for selecting all its furnishings and equipment.

Included in her retirement plans are

playing golf and traveling with her husband, Paul, to visit her son, Philip, in Arizona and her daughter, Suzanne, in the Poconos. Suzanne is a 1973 Penn State graduate and Philip attended the University.

Mrs. Ferry, who observes that "working in a University environment with all the students has kept me young," says she will miss her professional relationship with both students and faculty.

Dr. Ray Watson, assistant dean for continuing education and director of Executive Management Programs in the College of Business Administration, is retiring June 30. Dr. Watson joined the Penn State faculty in 1971 after a 23-year affiliation with Hallmark Cards.

He holds Ph.D. and M.S. degrees from the University of Illinois and a B.S. from Northwestern University.

Dr. Watson has accepted a position as assistant dean of the Fugua School of Business at Duke University, which he will assume July 1.

Dr. Hugo A. Meier, associate professor of American history, will retire June 30. A member of the faculty since 1963, Dr. Meier earned his Ph.D. at the University of Wisconsin. His area of specialization is technology and society.

John C. Villaume, associate professor of business administration at Worthington Scranton, will retire June 30. A faculty member since 1970, he served as acting director of the Campus in 1978.

A former president of International Correspondence Schools, he holds an A.B. from Gettysburg College and an M.A. from Duke University. The University of Scranton awarded him an honorary doctor of laws degree in 1965.

Joseph G. Foster, assistant professor of Romance languages at the McKeesport Campus, will retire June 30 after being a member of the Penn State faculty since 1959.

Professor Foster, who will reside in Millifont after his retirement, received his A.B. in 1949 from the University of Chicago and his M.A. in 1954 from Penn State, both in French.

John P. Deraux, a member of the faculty since 1950, will retire June 30. An assistant professor of business administration, he earned his B.S. from Rutgers University and his M.A. at Columbia, both in education.

William J. Gentzel, senior teller in the Office of the Controller, is retiring June 30 after working for the University since 1952.

Mr. Gentzel began his University tenure as a group leader in Janitorial Service in Willard Building. He also served with the Campus Patrol before joining the Bursar's Office as a teller in 1964.

"It's been a good way to serve the public and to generate good will for the University," he says of his Penn State service. "I especially have enjoyed working with the students, which, in one way or another, I've been doing during my entire career."

Included in his retirement plans are spending time outdoors — where he likes to fish and cut wood — and working around his Spring Mills residence with his wife Cathrine, a part-time employee in the Office of the University Registrar.

Mr. Gentzel is a charter member of the

Spring Mills Fire Company and a member of the Millheim Fire Company. He also is a member of a team in the Nittany Mountain Bowling League.

Elmer E. Grenoble, shop painter in the Office of Physical Plant, will retire June 30 after working for the University since Aug. 15, 1949.

Mr. Grenoble began his Penn State career with Janitorial Service in Potter Hall. He also worked in Sparks Building and as a group leader for wall washers before assuming his most recent position about 16 years ago.

Noting that he enjoys the outdoors, Mr. Grenoble says he will be doing a lot of hunting, fishing and gardening in his retirement.

June 30 is the retirement date for the following members of the University's faculty and staff:

William Nydegger, an assistant professor of anthropology since 1963; Denton A. Steffy, assistant professor of engineering at Berks since 1962;

Sybil B. Coble, Fulton County Extension home economist since 1963; Jorge A. Pena, research air pollution meteorologist in the College of Earth and Mineral Sciences since 1967;

Merle Fox, senior assistant librarian at DuBois since 1969;

Henry P. Cowen, a financial officer in the Office of the Controller since 1962; James L. DeLong, a contract and proposal specialist in the President's Office since 1968;

John D. Mason, administrative assistant in speech communication since 1966;

Charlotte M. Wentz, resident assistant housekeeping supervisor with Housing and Food Services since 1970;

Aileen G. McKeone, an accounting clerk at Schuylkill since 1967;

Helen L. Ginchir, records clerk in the President's Office since 1965;

David L. Porter, a structural maintenance inspector with the Office of Physical Plant since 1964.

Roy A. Rossman, maintenance worker in the Office of Physical Plant since May 25, 1970, retired May 30.

P. Richard McMullen, a utility worker at Hershey since Dec. 4, 1968, retired June 13.

Willard W. Grenoble, a poultry worker in the College of Agriculture since Sept. 19, 1967, will retire June 27.

Martha K. DePalma, a senior office secretary in Student Affairs, left the University March 28 after serving since Sept. 1, 1968.

Robert M. Olley, chief radiologic technologist at Hershey Medical Center, left the University June 1 after serving since Oct. 1, 1970.

Sandra C. Good, a graphic artist at Hershey Medical Center since Dec. 14, 1967, left the University on June 5.

Edward J. Dahmus, a systems planning specialist with Management Services, left the University on June 6. He had been employed since March 23, 1970.

Vera J. McCann, a janitorial foreman with Physical Plant, left the University on June 20 after serving since Sept. 15, 1966.

University Park Calendar

June 25- July 12 Special Events

Thursday, June 25

Festival Theatre, Garson Kanin, *Born Yesterday*, 8 p.m., The Pavilion Theatre.
GSA Explazagana Concert, *Coming Home* (Jane Fonda, Jon Voight), dusk, Fisher Plaza.

Friday, June 26

Pass/Fall (10 week Summer Term).
Commonplace Theatre, *Cousin, Cousine*, 7:30 p.m.; *Wifemistress*, 9:15 p.m., Room 112 Kern.
Festival Theatre, *Born Yesterday*, 8 p.m., The Pavilion Theatre.

HUB Movies, *High Noon*, 9:30 p.m., HUB Lawn.

Saturday, June 27

Opening reception for "Hemline, Neckline, Streamline: Women's Fashions 1890-1940," 3-5 p.m., Museum of Art.
France-Cinema, *Cousin, Cousine*, 7:30 p.m.; *French Postcards*, 9:15 p.m., Room 112 Kern.
Festival Theatre, *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Nittany Mountain Summer Festival, "A Party with Betty Comden and Adolph Green," 8 p.m., Eisenhower Auditorium.

Sunday, June 28

Commonplace Theatre/France-Cinema, *French Postcards*, 7:30 p.m.; *Wifemistress*, 9:15 p.m., Room 112 Kern.
Festival Theatre, *Born Yesterday*, 7:30 p.m., The Pavilion Theatre.

Monday, June 29

Penn State Scholars Program, through July 2.
Pass/Fall (10 week Summer Term).
Registration for eight, six and three week Summer Terms, 1-4:30 p.m., Activities Room, IM Bldg.

Fuel Science Seminar, Dr. Brian T. Kelly, Springfield Nuclear Power Development Labs, on "Radiation Damage in Graphite," 4 p.m., Room 301 Steidle.
Commonplace Theatre/France-Cinema, *Cousin, Cousine*, 7:30 p.m.; *Wifemistress*, 9:15 p.m., Room 112 Kern.

Tuesday, June 30

Eight week Summer Term classes begin, 8 a.m.
Drop deadline (10 week Summer Term).
Pass/Fall (10 week Summer Term).

Course repeat deadline (10 week Summer Term.)

GSA Explazagana Concert, Barbara Singer and The Doom Lang Chorus, 7 p.m., Fisher Plaza.

Festival Theatre, *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Wednesday, July 1

Commonplace Theatre, *The Hobbit*, 7:30 and 9 p.m., Room 112 Kern.
Festival Theatre, *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Thursday, July 2

Fuel Science Seminar, Dr. Brian McEnaney, Univ. of Bath, on "A New Interpretation of the Relation between the Characteristic Adsorption Energy and Gyration Radius for Microporous Carbons," 11 a.m., Room 301 Steidle.
UDIS workshop, "Test Construction," 1:30 p.m., Room 128 Mitchell. Reservations, 863-0668.

Fuel Science Seminar, Dr. Jacob Moulijn, Univ. Van Amsterdam, on "Mechanism of Nickel and Potassium Catalysis of Coal Gasification," 4 p.m., Room 301 Steidle.

Commonplace Theatre, *The Hobbit*, 7:30 and 9 p.m., Room 112 Kern.
Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Friday, July 3

Concerts by the Nittany Valley Symphony Orchestra and the Allegheny String Band and fireworks, 7 p.m., fields near Beaver Stadium. Rain date, July 4.
Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Saturday, July 4

Independence Day.
Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Sunday, July 5

Alumni Assn., Vacation College, "Shaping the '80s," through July 11. Information, 865-6516.

Opening reception for the Central Pennsylvania Festival of the Arts "Festival Gala," 7-9 p.m., Museum of Art.

Festival Theatre, *Once Upon a Mattress*, 7:30 p.m., The Playhouse; *Born Yesterday*, 7:30 p.m., The Pavilion Theatre.

Monday, July 6

Deadline for August graduates to deliver doctoral theses to Committee.

France-Cinema, Renoir, *Rules of the Game*, 7 and 9 p.m., Room 112 Kern.

Interdisciplinary Symposium on Value, 7:30 p.m., Room 101 Kern. Chris Johnson, speech, Delaware County, on "Ethics, Communication and the Pursuit of Wisdom: Creating Humane Knowledge."

Tuesday, July 7

Late registration deadline (8 week Summer Term).

Add deadline (8 week Summer Term).
Preregistration deadline for Fall Term.

Phi Delta Kappa Summer Seminar Series, 2:20 p.m., Room 101 Kern. Don Smiley, community liaison, International Year of the Disabled Person, on "Barrier-Free Living in the Community."

GSA Explazagana Concert, Bill McCloskey and Richard Sleight, 7 p.m., Fisher Plaza.

15th Annual Central Pennsylvania Festival of the Arts (CPFA), opening ceremonies and street dancing, evening, downtown.

Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Wednesday, July 8

CPFA, Children's Day, 10 a.m.-10 p.m.
Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Thursday, July 9

CPFA, sidewalk sales and exhibitions, noon-midnight, campus and downtown.
Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

GSA Explazagana Film, *The Little Prince* (Gene Wilder, Richard Riley), dusk, Fisher Plaza.

Friday, July 10

Board of Trustees meeting, Ogontz Campus.
CPFA, sidewalk sales and exhibitions, 9 a.m.-midnight, campus and downtown.

Commonplace Theatre, *Bring There, 7 p.m.*; 10:15 p.m., Room 112 Kern.

Nittany Mountain Summer Festival, John Hartford, bluegrass music, 7 and 9 p.m., Eisenhower Auditorium.

Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Saturday, July 11

Board of Trustees meeting, Ogontz Campus.
Deadline for August graduates to deliver master's theses or papers to adviser.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

CPFA, sidewalk sales and exhibitions, 9 a.m.-midnight, campus and downtown.
France-Cinema, Brusati, *Bread and Chocolate*, 7 and 9 p.m., Room 112 Kern.

Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Nittany Mountain Summer Festival, New

American Ragtime Ensemble, 8 p.m., Eisenhower Auditorium.

Sunday, July 12

CPFA, sidewalk sales and exhibitions, noon-midnight, campus and downtown.
Commonplace Theatre, *Bring There, 7 p.m.*; 10:15 p.m., Room 112 Kern.

Festival Theatre, *Once Upon a Mattress*, 7:30 p.m., The Playhouse; *Born Yesterday*, 7:30 p.m., The Pavilion Theatre.

Exhibits

Chambers Gallery: open Monday through Friday, 8 a.m.-5 p.m. Michael Starner, pottery and glass; Kaye Amr, drawings and paintings, both through July 1. CPFA Child Art exhibit, open July 6.

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m. Carol Norton-11 p.m. Benjamin A. Saggese, prints and paintings, through June 26. CPFA Jr. Photography exhibit and Glass Invitational, both open July 5.

Museum of Art: open 11 a.m.-4:30 p.m. Closed Mondays. Tours, Sundays, 1:30 p.m. Special hours July 9-11, 11 a.m.-8 p.m. Twentieth-century works from the Museum's collection, "Hemline, Neckline, Streamline: Women's Fashions 1890-1940" from the collection of Beverly Birks, opens June 28. CPFA Junior Crafts exhibit, opens July 5.

Pattie Library: Susan Nushum, paintings, through July 1. Paul Matthews, paintings, opens July 1. East Corridor Lobby, Dave Hamilton, photographs, through July 1. Beverly Laverdiere, paintings, opens July 1. Lending Services Lobby, Dave Hamilton, photographs, through July 1. Carol Treat, ceramics, opens July 1. Main Lobby, Martha Carothern, "The Design and Production of Children's Novelty Books," Rare Books Room.

Visual Arts Zoller Gallery: open 11 a.m.-4:30 p.m. Closed Mondays. Special hours July 9-11, 11 a.m.-8 p.m. Lannie Soanese, posters, opens July 1.

Fashion exhibit reflects 1890-1940 cultural history

A gorgeous gallery of women's fashions dating from 1890 to 1940 opens to the public on June 28 at Penn State's Museum of Art.

Drawn from the collection of Beverly Birks, this "Hemline, Neckline, Streamline" show offers a visual feast of satin brocades and velvets, silk gauze ruffles, silver lame and lace — as well as a serious look at the cultural history of the period.

The 42 pieces on display were culled from Ms. Birks' collection of some 2,000 items of dress. Three were lent by the surreal designer, Billy Boy. The labels evoke the legendary designers of haute couture — among them, Worth, Poiret, Fortuny, Chanel and Mainbocher.

While the exhibit can be enjoyed solely for its beauty, it functions also on another level, according to Museum Curator Olga Preisner. Visitors can follow European and American fashions from their radical transformation at the turn of the century to the eve of World War II.

"Fashion became a means by which women stated and heightened their identity," Dr. Preisner explains in the exhibition's catalog, noting:

"... women's fashion was distinguished by two aspects. One is consistent with man's traditional vision of women, while the other confirms the vested and inviolable rights of femininity."

One of the earliest pieces in the show is an opera coat by Charles Frederick Worth, who in 1850 established in Paris the first true house of haute couture. "He must be credited with dressing the most famous women in the western world for 50 years with bustles, bows, trains and ruffles," Dr. Preisner says. "The attitude of the epoch is expressed in a proverb from the Spanish homeland of Eugenie (Napoleon III's Empress), 'Only God helps the badly dressed.'"

Shortly before the turn of the century, women cosseted themselves to achieve a matronly S-shaped figure. "But the corset brought about a curious ambivalence in women's clothes," Dr. Preisner continues, "for it was designed to shape the woman's body into the desirable contours demanded by men's stereotypes and standards, while at the same time it served as armour under the protection of which the woman remained inviolable in the new ambitious femininity."

The S-curve figure developed into the monobosom suit in 1899, exemplified in an afternoon tea gown of cream lace applique on net on display at the Museum. Then in the early years of the 20th century, fashion was transformed by Paul Poiret, whose exotic tastes, influenced by both the Near and Far East and by Diaghilev's Ballet Russe, brought in the tunic, the hobble skirt and the lampshade silhouette. At the same time, Mariano Fortuny created his

famous "Delphos" silhouette, which followed the shape of the body; its admirers claimed it made women look like "breathing rainbows." The Museum's example of the "Delphos" has a pleated black china silk dress. There is also an opera coat by Poiret.

World War II did not put an end to showy clothes, Dr. Preisner points out. The roaring '20s revealed the leg, took away the waistline and increased the décolletage. Designers, influenced strongly by modern art, reflected the Cubist and Art Deco movements in bias cuts or patterns on dresses. One aspect of the work of "Coco" Chanel, who introduced the basic functional wardrobe of the modern era, is represented by an afternoon tea dress, whose dropped skirt consists of layers of geometric Art Deco style petals.

Tailored suits and classic dresses in importance during the '30s. Museum visitors can see an afternoon cocktail gown by the great Mainbocher, a Schiaparelli cape and jacket, a tailored Adriani suit and Lilly Daché hats. The show concludes with a 1947-48 riding ensemble designed by Jean Cocteau and Charles Berard for the film, *The Eagle Has Two Heads*, just at the time of Dior's "New Look."

The show will remain at the Museum through Sept. 13. It is part of Nittany Mountain Summer Festival 1981, which also includes the Festival Theatre (865-1884) and Music and Dance (863-0255).

A Jean Patou evening gown, c. 1935, is modeled by Beverly Birks, from whose fashion collection 42 pieces are on display in the Museum of Art.

News in Brief

Bargaining to begin

Representatives of The Pennsylvania State University and Teamsters Local No. 8 announced that collective bargaining meetings commenced on Tuesday, June 23, 1981, for a new labor agreement to replace the agreement that expires June 30.

Teamsters Local Union No. 8 represents approximately 2,400 University workers employed in areas such as residence and dining halls, physical plant, the academic colleges and other operating areas at all University locations.

Bargaining had been delayed because of unfair labor practice charges the parties had filed with the Pennsylvania Labor Relations Board over a request from the Union on the number of hours worked for the University by University students.

The Union and University representatives met in Harrisburg on Friday, June 19, with a representative appointed by the Labor Board and reached mutually satisfactory agreement on the issue, according to Earl W. Lutz, Local 8 President, and James M. Elliott, University Director of Personnel Relations.

19 spaces reserved for Fleet customers

University employees who wish to leave their motor vehicles on campus while renting vehicles from Fleet Operations may park in one of 19 spaces reserved especially for this purpose.

The spaces are located in the east Orange "A" lot adjacent to the Fleet Operations Office in the Maintenance Building. The spaces are designated by new blue-on-white signs which read: RESERVED 24 HOUR - FLEET CUSTOMERS - NO ORANGE "A" PERMITS.

The new signs are intended to deter Fleet Operations customers from parking their personal vehicles elsewhere in the Orange "A" lot, which is designated as an open faculty-staff parking area. Customers with Orange "A" permits may, of course, park in the lot's regular spaces, which also are adjacent to Fleet Operations.

Fleet Operations suggests that since the University has no liability for faculty-staff personal vehicles, it is wiser to leave them at home when renting a vehicle.

Leader dogs may enter University buildings

Although dogs are not allowed in University buildings, the University will allow children participating in the 4-H Leader Dog Program to take their dogs into all buildings.

The dogs, which are being trained to serve as leader dogs for the blind, wear identifying green "coats."

Classics Department moves to Burrows

The Department of Classics has recently been relocated from its former offices in Carnegie Building to offices in Burrows Building. The main office is Room 310 Burrows; the telephone numbers remain the same (865-8851 and 863-1778).

Journalism sequences are reaccredited

The advertising and news-editorial sequences in the School of Journalism were recently reaccredited by the Accrediting Council on Education in Journalism and Mass Communications.

According to Don Carter, ACEJMC president, 194 communications programs at 81 universities have been accredited by the Council. Programs are examined every six years.

Canadians visit Fayette to observe mining program

Three representatives from Canada's East Kootenay Community College visited the Fayette Campus to observe Penn State's successful Coal Mining Technology program, now in its 12th year.

Canada, like the United States, has huge coal reserves, and a coal production boom has created shortages of qualified mine personnel. East Kootenay, which has nine campuses in British Columbia, plans to establish a mining technology program to alleviate the problem.

Pattee announces Summer Term hours

Summer hours for Pattee Library and the branch libraries at University Park will be as follows: Monday through Thursday, 7:45 a.m. to 1 p.m.; Fridays, 7:45 a.m. to 9 p.m.; Saturdays, 7:45 a.m. to 5 p.m.; and Sundays, 1 p.m. to 10 p.m.

The Pollock Library is now open for Summer Term and will close Aug. 21. Summer hours will be from 1 p.m. to midnight.

UDIS to offer two summer workshops

The University Division of Instructional Services (UDIS) will sponsor two seminar/workshop activities for faculty members during the Summer Term. Presentations will be held in Room 128 Mitchell Building. For a synopsis of each seminar/workshop or to sign up for a specific seminar/workshop, call 863-0668.

The seminar/workshop topics and dates are Test Construction, Thursday, July 2, 1:30-3:30 p.m.; and Enhancing Classroom Communication, Wednesday, July 15, 1:00-4:00 p.m.

Education society donates \$400 for curriculum study

The University's Alpha Tau chapter of Phi Delta Kappa, a professional education fraternity, has donated \$400 to the Society for the Study of Curriculum History to underwrite the costs of publishing a recent volume of the Society's papers.

Two College of Education faculty members, both in the Division of Curriculum and Instruction, contributed

to the volume's production: Edmund C. Short, associate professor of education, served as editor; and Murry R. Nelson, assistant professor of education, co-authored two articles.

Dr. Nelson is president-elect of the Society, which was founded in New York City in 1977 by a small group of curriculum scholars.

Fleet Operations changes hours of operation

Fleet Operations announces a change in its hours of operation, effective June 15.

Mondays through Fridays, it will be open from 5:45 a.m. to 1 a.m. Hours for Saturday and Sunday are 5:45 a.m. to 4 p.m. These hours will remain in effect until further notice.

Rock Mechanics Lab sponsoring two conferences

International experts in two related areas — microseismic activity in geologic structures and the mechanical behavior of salt — will attend conferences being sponsored this fall by the University's Rock Mechanics Laboratory.

The Third Conference on Acoustic Emission/Microseismic Activity will be held Oct. 5-7, and the First Conference on the Mechanical Behavior of Salt, Nov. 9-11.

Co-chairman of both conferences is Dr. H.R. Hardy Jr., professor of mining engineering and director of the Rock Mechanics Laboratory.

Ag film library housed at Special Services

The College of Agriculture film library is now being housed at the Special Services Building and can be ordered through Audio-Visual Services.

The collection includes approximately 390 films, 400 slide sets, 200 filmstrips and 100 videotapes covering a broad range of subjects in the areas of agriculture, family living, community development and 4-H, and is available to members of the faculty and staff.

For general information and scheduling of material, contact Audio Visual Services at 865-6314. Questions concerning subject content should be directed to Ag Communications at 865-3407.

Comden and Green

Broadway revue to visit Eisenhower

Nittany Mountain Summer Festival — Music and Dance — will present "A Party with Betty Comden and Adolph Green" Saturday, June 27, at 8 p.m. in Eisenhower Auditorium.

The "Party," which previously ran on Broadway, is a musical revue tracing the careers of writer-performers Betty Comden and Adolph Green. The program begins with their earliest works from the Greenwich Village group called the Revuers, then moves to their Hollywood days when they served as screenwriters and lyricists at the M-G-M studios. The team completes the evening with some recent numbers they have written and performed on Broadway.

Comden and Green have created more than a dozen Broadway shows. Among their biggest hits are *On the Town*, *Peter Pan*, *Applause*, *Wonderful Town* and *Singin' in the Rain*. In 1978, they won a Tony Award for *On the 20th Century*.

Tickets for "A Party with Betty Comden and Adolph Green" are on sale at the Eisenhower Auditorium box office from 9 a.m. to 4 p.m. Phone orders are accepted on MasterCard/Visa at 863-0255.

Tickets on sale for Festival Theatre

Born Yesterday opens the Festival Theatre 1981 season tonight (June 25) in the Pavilion. The Carson Kanim classic will run through July 12 under the direction of Bob Leonard.

Mr. Leonard, a former faculty member, has directed productions in regional theatres throughout the country. Two Penn Stateers are also in the cast, Lowell Manfull, professor of theatre arts, and Roland Fleischer, professor of art history.

Tickets are on sale also for Festival Theatre's second production, *Once Upon a Mattress*, which runs in the Playhouse July 2-19. A musical version of the "princess and the pea" fairy tale, the show features three Equity performers who are newcomers to Festival Theatre.

Pamela Bierly is the heroine of the piece, Princess Winnifred the Woebegone. Her most recent musical theatre credit was the role of Sally Bowles in *Cabaret*.

Verna Pierce plays Queen Aggravain, a non-stop talker and overly-possessive mother. Among her credits are Broadway appearances in the Tony Award-winning musicals, *A Little Night Music* and *Pippin*.

No fairy tale court is complete without its jester. Equity actor Lee Lohenhofer fills the slot in *Once Upon a Mattress*. Along with his many dramatic and musical credits, Mr. Lohenhofer has studied Kabuki acting and appeared in *Kabuki Macbeth* in the role of Lady Macbeth.

Ticket information about Festival Theatre's shows may be obtained by calling the Playhouse Box Office at 865-1884.

Roger Zellner with Frost sculpture

Entomology opens new greenhouse, unveils sculpture

The Department of Entomology is now occupying a new 2,200 square foot greenhouse, among the best of its kind in the nation.

Located behind Wagner Building, the greenhouse houses 12 separate research units, each with the potential for individual climate controls.

Renovations to the Frost Entomological Museum and to the Department of Entomology offices, both in Patterson

Building, have been completed. At dedication ceremonies on June 17, a bust of the late Stuart Ward Frost was unveiled. Sculpted by Dr. Roger R. Zellner, associate professor of art education at Albion, the bust, which will be displayed at the entrance to the Museum, honors Dr. Frost's contributions to entomology. A faculty member from 1918 to 1957, he was the author of more than 150 scientific papers.

University and Britannica join in venture

The University and Encyclopaedia Britannica Education Corporation have entered into an agreement jointly to produce, develop and distribute educational television and film programs and related print materials.

President Oswald and John Benton, chairman of the board of EBEC, signed a "memorandum of understanding" that will provide for:

- sharing of information on research and development, and identification of needs, trends and the state of the art;
- consultation by media producers with faculty members of appropriate academic disciplines during the planning and development of individual projects; and
- joint production and distribution of educational materials for schools, colleges and universities, and for on-site education at government agencies, hospitals and other organizations and institutions.

According to Marlowe Froke, director of Media Learning Resources at Penn State, EBEC is the largest U.S. developer and distributor of educational filmstrips, videotapes, motion pictures and other materials. It was established in 1917 as Electrical Research Products, Inc., a pioneer in innovative classroom films.

Some materials produced in the cooperative venture will be distributed via public broadcasting services, cable television and satellite. The agreement will be in effect for five years.

The memorandum signed by Dr. Oswald and Mr. Benton notes that: "Education at all levels—pre-school, elementary, secondary, higher and adult—is progressively more dependent on educational materials for teaching and learning."

"Research and experience have already established the effectiveness of the new media. What is desirable and necessary at this time is development of new relationships that would bring together organizations and agencies committed to their application."

Calendar report

The involvement of Commonwealth Campus faculty members in discussions of the effect of the early semester calendar on curricula was among the topics raised at the June 4 meeting of the Calendar Conversion Council.

Concern was voiced that in those instances where Campus faculty are involved, input tends to be confined to lower division courses.

Council members took note of questions raised in the Senate and various other quarters about the 55-minute class period. It was the consensus of the Council that the 55-minute class period in the semester system should not be changed.

The Sabbatical Leave Subcommittee, reporting on its initial discussions, pointed out that the current economic climate is making sabbatical leaves increasingly difficult for faculty and that alternative leave policies may need to be developed.

In the next issue of INTERCOM (July 9), the Calendar Conversion Council will publish a chart identifying the major events that should occur between now and August 1983 to meet the September 1983 deadline for conversion of the early semester calendar.

The chart, intended to depict a general schedule, will show when course and curriculum changes must be completed University-wide, as well as when personnel requirements at all locations will be examined within the budget review process. It will specify also the activities of University organizations central to the conversion, including the Faculty Senate, all academic Colleges, Commonwealth Campuses and the Office of the Registrar.

Photo of balcony frescoes was taken for booklet.

New booklet devoted to Frescoes

An illustrated booklet describing the Land Grant Frescoes of Henry Varnum Poor has been published in commemoration of the 125th anniversary celebrated last year by Penn State.

The booklet contains two sections of text. The first, dealing with the central north wall of the Old Main mural, was composed in 1940 with the concurrence of Mr. Poor. It has been updated with minimal alterations.

The second part contains newly written material on the later balcony frescoes on the east and west walls. It was prepared by Dr. Harold E. Dickson, professor emeritus of art history and one of the three faculty members (along with the late J. Burne Helm and Francis E. Hyslop) who originated the idea of frescoed murals.

In a brief foreword, Dr. Dickson points

to four factors accounting for "the unique significance of the Land Grant Frescoes as a tribute to Penn State: the subject matter, a pictorial synthesis of the school's founding and growth as one of the nation's oldest land-grant educational institutions; the artistry of Henry Varnum Poor (1888-1970), a distinguished muralist and American master of the fresco medium; a focal situation in the lobby directly under the beacon-like tower of Old Main; and, of special moment, the fact that the paintings, all 1300 square feet of them, are the munificent gift of Penn State students and graduates."

The booklet, which will be sold at the Museum of Art Gift Store, was designed by Marilyn Shobaken, University art editor.

Publications, activities lists due

Members of the faculty who wish their publications and professional activities listed in the University's annual bibliographies should send this information to their department heads, research deans or intercollege research unit directors.

Detailed instructions for the submission of these listings are given in a May 1 memo from Dr. R. G. Cunningham, vice president for research and graduate studies. Copies of this memo are available from department heads or research deans.

Commonwealth Campus faculty members should send their listings to their department heads at University Park, with a copy to their Campus director and Commonwealth Campus dean.

Contributions should be in the department head's hands in sufficient time

to reach the Office of the Vice President for Research and Graduate Studies by July 31.

The bibliography is printed in two publications: *Research Publications and Professional Activities* and *University Publications, Reports to Agencies, and Reviews*. To be included are research papers and articles, books that have been reviewed and printed by established publishers, substantive and/or final reports sent to state and federal agencies, information materials (articles and reports and printed in non-standard journals), and novels, short stories, musical compositions, exhibits of fine arts, inventions patents and any other activity that meets recognized standards of excellence in its field.

Two vanpooling projects to begin

A pilot program using two vans running from two selected outlying geographical areas to and from University Park—five days a week during all normal working days—is expected to be operational by late summer.

The program is a response to requests from University employees who commute to work from remote areas and have become concerned about decreasing energy supplies and increasing fuel costs.

A Vanpooling Committee, created to study the feasibility of a program, recommended it be run by employees under guidelines established by the

Committee.

The proposed vanpools will be available only to University employees. One van will consist of volunteers from Housing and Food Services and the other of volunteers from Physical Plant. Weekly and monthly rates will be established based on the length of the trip per rider, with all expenses incorporated into the rate.

After sufficient data has been gathered from the experience of the trial program, the Committee will determine whether additional vanpooling routes should be set up.

Hosler to chair United Way

Dr. Charles L. Hosler, dean of the College of Earth and Mineral Sciences, has been named chairman of the 1981 United Way program at University Park.

In announcing the appointment, President Oswald said: "Dean Hosler's leadership and exceptional skills in organizing resulted in his college's outstanding participation in the 1981 United Way campaign."

"I am delighted that Dean Hosler has accepted his role. His commitment and dedication to United Way, the University and the community will ultimately benefit thousands of Centre Countians in need of assistance."

Dean Hosler's administrative capabilities were recently recognized by the University when he was named recipient of the 1981 John E. Wilkinson Award for Administrative Excellence.

The organizational plan which was so effective in the College of Earth and Mineral Sciences during the 1980 fund raising drive emphasized personal solicitation by department, an accurate feedback system to assure awareness by all employees and orientation for peer solicitors. It will be implemented campus-wide this fall.

"The personal solicitation campaign conducted in 1980 resulted in a record campus contribution of more than \$103,000 to United Way," Dean Hosler points out.

"It is the best way to explain all aspects of United Way to Penn State employees and give each person an opportunity to give. Confidentiality of response to the campaign will be closely guarded."

"In addition, the advanced gifts campaign will be expanded from the deans and president's staff to include other key University officials."

The 1981 campaign will begin with a kickoff luncheon in mid-September for associate chairpersons and their assistants. The campaign itself will run from Sept. 28 through Oct. 9.

Associate chairpersons appointed by Dr. Hosler for the 1981 campaign are: Student Affairs, Raymond O. Murphy; Admissions, Donald Dickason; Finance, Steve Garban; Provost, William Asbury; Commonwealth Educational System, Marlowe Froke; Pattee Library, Charles Ness; Administration, John Hargleoad; Undergraduate Studies, Harvey Wall; Research, Beatrice Swift; Applied Research Lab, Richard Bland; Agriculture, Robert Flipse; Arts & Architecture, William Allison; Business Administration, Eugene Kelley; Earth & Mineral Sciences, John Cahir; Health, Physical Education & Recreation, Martha Adams; Human Development, Evan Pattishall; Engineering, George McMurtry; Education, Henry Hermanovics; Science, Norman Fred; Advanced Gifts, Irvin Kochel; Graduate School, James Bartoo; Liberal Arts, Stanley Paulson; Technical Service, Wade Barber.

Workshops

(Continued from page 1)

will be limited to approximately five persons so that individual questions can be considered.

Clinic topics include: How to raise money for scholarships and fellowships; how to use alumni, advisory groups, and friends to raise funds; how to raise funds for specific projects such as facilities and endowed chairs; how to present a case statement to a potential donor, and how to stimulate fund-raising activity by faculty members.

As a result of the workshop, senior academic administrators will be able to begin planning for fund-raising efforts by the colleges, Dr. Chait comments.

OCE reports receipt of 25 new PSU support programs

Twenty five new programs for assisting students, recognizing outstanding achievement and supporting other activities at the University have been developed through the Office of Gifts and Endowments.

The privately funded programs include:

— The George W. Bierly Emergency Loan Fund, which will provide short-term interest-free loans to students at the Wilkes-Barre Campus. The initial principal is a gift from Mr. Bierly, Campus director from 1958 until his retirement last year.

— The Margaret Bittner Parke Scholarship, to recognize outstanding undergraduate students enrolled in the Colleges of Education and the Liberal Arts, who are planning careers in the teaching of English or the humanities. The initial principal of this fund is a gift from Margaret B. Parke of Brooklyn, N.Y., the 1972 recipient of the Distinguished Alumnus Award from the University.

— The Canadian Club Scholarship, to provide financial assistance to full-time undergraduates enrolled as majors in food service and housing administration, service administration option. Funds for the scholarship are provided by Hiram Walker, Inc.

— The William J. Carnahan Alumni Memorial Scholarship, to attract outstanding potential students for enrollment at the University. The principal of the fund will come as a gift from the estate of Mr. Carnahan, who now lives in St. Petersburg, Fla. Recipients of the scholarship will be known as "William J. Carnahan Alumni Memorial Scholars."

— The Earth and Mineral Sciences College General Scholarship, to provide financial assistance to undergraduates enrolled in the College. This scholarship will be funded by annual monies received from major corporations representing the various disciplines of the College.

— The Earth and Mineral Sciences College Dean's Freshman Scholarship, to recognize and attract superior students to the College.

— The Ben Euwema Memorial Scholarship, to provide travel and research funds for graduate students enrolled in the Department of English. The initial principal is a gift from Mrs. Catherine Euwema in memory of Dr. Euwema, dean

of the College of the Liberal Arts from 1946 until 1964. Preference for the scholarship will be given to those graduate students at the Ph.D. thesis stage who have a need to travel to complete their research.

— The First Seneca Bank Scholarship, to recognize undergraduate students at the Shenango Valley Campus. The principal for the fund will come from a gift from Dr. Robert E. Lantz, the recipient of the Shenango Valley Campus Distinguished Service Award.

— The Kevin Daniel Gilmore Memorial Grant-in-Aid Fund, to provide grants-in-aid to undergraduate students enrolled as chemistry or biochemistry majors in the College of Science. Funds to support this grant will be contributed annually by Roger W. and Elizabeth B. Gilmore of Brooklyn Park, Minn. In addition, a matching contribution from Mr. Gilmore's employer, FMC Corporation, will be received.

— The Dorothy Houghton Memorial Loan Fund, to provide emergency financial assistance to all students in the College of Human Development in the form of small, short-term loans. The funds will come as gifts from friends of Mrs. Houghton, a member of the faculty from 1952 until her retirement as acting dean of the College of Human Development in 1966.

— The Francis E. Hyslop Memorial Scholarship, to enable graduate students in art history to continue their studies or conduct their research. The initial principal of this fund is a gift from the family, friends and colleagues of the late Dr. Hyslop, professor of art history at the University from 1934 until his retirement in 1974.

— The Marvin J. Kudroff Memorial Lectureship in Engineering Management, to provide for an annual lecture or seminar for faculty and students of the University by leaders in the field of engineering management. The principal of this fund is a gift from the firm of Daniel, Mann, Johnson, and Mendenhall, Los Angeles, and from the family, friends and former associates of Mr. Kudroff, a 1943 graduate of the University.

— The Katey Lehman Creative Writing Award, to stimulate, encourage and recognize demonstrated talent in poetry, prose and journalism. The initial principal

is a gift from Mr. and Mrs. Frank P. Smeal, class of 1942, in memory of Mrs. Lehman, Class of 1942 and wife of Ross Lehman, executive director of the Penn State Alumni Association.

— The Shuman H. and Elizabeth B. Moore Engineering Scholarship, to provide financial assistance to outstanding undergraduate students enrolled in electrical engineering. The initial principal is a gift from Mr. Moore of Pasadena, Calif., class of 1933.

— The Victor H. and Rachel P. Noll Award, to recognize the achievements of outstanding students in the College of Education who have at least fourth-term standing. The initial principal is a gift from Mr. and Mrs. Noll, of Hendersonville, N.C. The award is available to all full-time undergraduate students in the College of Education who have completed at least three terms and who distinguish themselves by participation in University and community activities.

— The Pennsylvania Livestock Association Judging Teams' Fund, to provide financial assistance to members of the Penn State Judging Teams in livestock, meats and horses. The initial principal is a contribution from the Pennsylvania Livestock Association. Each grant is for an individual's team participation, and a student may receive more than one grant for additional competitions.

— The Ernest C. Pollard Lecture Fund, to stimulate research in biophysics through an annual lecture. The principal is a gift from friends and colleagues of Dr. Ernest C. Pollard, chairman of the Biophysics Department at the time of his retirement in 1971.

— The David H. Rank Memorial Physics Award, to recognize graduate students enrolled in the Physics Department who have achieved outstanding academic records and who show high promise for doctoral research. The initial principal is a gift from family, friends, colleagues and former students of the late Dr. Rank, who retired in 1972 as Evan Pugh research professor of physics and department head, after having served on the faculty since 1935.

— The Ruby Skinner Miller Atlas Fund, for the purchase of atlases for the enrichment of the collections beyond the regular allocations made from general

University funds. The initial principal is a gift from Dr. E. Willard Miller in honor of his wife, a member of the Pattee Library faculty from 1957 until her retirement as associate librarian in 1977.

— The Charles P.M. and Elizabeth T. Smith Scholarship, to recognize and attract the enrollment of freshman students who have demonstrated exceptional academic achievement and who have a need for financial assistance. The gift, from Mr. and Mrs. Smith's son, William R. Smith, will be available first to graduates of Bellefonte Area High School, second to graduates of other Centre County high schools, and third to all others.

— The Tau Beta Pi-Pennsylvania Beta Scholarship, to provide financial assistance to students enrolled in ceramic science, metallurgy, mining engineering, and petroleum and natural gas engineering. The award comes as a gift from the Pennsylvania chapter of Tau Beta Pi Honor Society.

— The Robert E. Weber Memorial Scholarship, to recognize the academic achievements in mathematics of students enrolled at Shenango Valley. The initial principal has been received as a gift from friends, colleagues and former students in honor of Dr. Weber, a member of the mathematics faculty from 1975 until his death in 1980.

The Wilkes-Barre Student Loan Fund, to provide financial assistance in the form of a loan to students enrolled at the Wilkes-Barre Campus. The initial amount of the fund has been contributed by the Midland-Ross Corporation. Short-term and long-term loans may be made, and no interest will be charged if repaid by the due date.

— The Guy W. Wilson Award for Excellence in Advising, to encourage and reward excellence in student advising by faculty at The Behrend College. The initial principal of this fund is a gift from Mrs. Guy Wilson, of Erie, and others.

— The Dwight E. Younkin Memorial Scholarship, to provide financial assistance to worthy students interested in swine production. The initial principal comes as a gift from the Pennsylvania Pork Producers Council, friends, and family of the late Mr. Younkin, of Somerset, a member of the Agricultural Extension staff from 1953 until 1980.

Staff Vacancies

The following vacancies for positions classified as staff emerger or staff nonemerger are listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., July 2, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

NUTRITIONAL CARE TECHNICIAN, COLLEGE OF MEDICINE, HERSEY Responsible to Senior Nutritional Care Technician for the operation of the Diet Office and to Clinical Dietitian. Screen and monitor patients to provide individualized nutritional care. Formulate meal patterns for patients on regular and modified diet. Explain diet and nutrition to patients. Calculate daily food intake and chart diet analysis as well as other pertinent nutritional information in patient medical records. Associate degree in foods and nutrition or equivalency and six to twelve months of effective experience required.

ASSISTANT DIRECTOR, UNIVERSITY RELATIONS, New Kensington Responsible to Campus Director for organizing and conducting a comprehensive University relations program for the entire Campus, including continuing education, public information and relations, gifts and endowments, alumni and community activities. The preparation of news releases, funding proposals and alumni activities are included in the responsibilities of the position. Bachelor's degree or equivalent, plus two to four years' effective experience, preferably involving newspaper and/or journalism writing, public relations. Relevant

experience in higher education is preferred. Experience in fund raising and proposal writing is highly desirable.

RECORDS AND INSTITUTIONAL RECORDS, RECORDS AND SCHEDULING, Capital Campus Responsible for scheduling, registration and records division of the Capital Campus; the development of a Campus-wide academic and administrative information system and the overall design and implementation of studies in support of Campus planning and decision-making by the Provost, Dean and his staff. Master's degree or equivalent organized study or training in administration, educational administration or higher education, with over three years and up to including four years of effective experience in administrative or related educational areas. Management and communication skills and a knowledge of the capabilities of automated data processing systems, research design and analysis required.

MAINTENANCE FOREMAN, Behrend College Responsible to the Supervisor of Maintenance and Operations for the supervision and performance of maintenance and repair operations on equipment, buildings, utilities and grounds. Includes planning, scheduling, training and supervising full- and part-time technical service employees. Foreman must continually apply knowledge of management techniques, work procedures and methods, machines and equipment, and college and university policies. High school education, plus a minimum of five years of total maintenance area experience. Strong background in supervision, building control systems, mechanical trades and electrical trades preferred.

There are positions in certain work units that, because of the large number of such positions, frequently are still available after employees in the work unit have been considered. They are listed below and will not be listed on an individual vacancy basis. Application for such positions may be made at any time, and you are welcome to make your interests known now to the Employment Division for future consideration when such vacancies occur. These positions are:

POSITION TITLE	LOCATION
Assistant Coordinators	Student Affairs

Assistant Food Supervisors	Housing and Food Services
Computer Operators	IRP
Shifts: 8 a.m. to 4:30 p.m., 4:30 p.m. to 1 a.m., 12 midnight to 8 a.m.	
Programmers	Management Services
Research Aides	College of Agriculture
Residence Hall Area Coordinators	Student Affairs
Cardiology Technicians	Hersey
Clinical Laboratory Assistants	Hersey
Clinical Laboratory Technologists (HEW)	Hersey
Critical Care Monitoring Technicians (Jr. & Sr. Levels)	Hersey
Cyto-Technologists	Hersey
Licensed Practicall Nurses	Hersey
Medical Technologists (CLIA, MLT, CLT, HEW)	Hersey
Nuclear Medical Technicians	Hersey
Preclinical Technicians	Hersey
Physician's Assistants	Hersey
Radiology Technicians	Hersey
Research Technicians (Jr. & Sr. Levels)	Hersey
Respiratory Therapy Technicians	Hersey
Staff Nurses	Hersey

off, he or she is granted another day off with pay as a holiday.

This year, since July 4 falls on a

Saturday, employees who normally do not work on Saturdays may arrange to take a day off at another time after consultation with their supervisors.

University contribution to TIAA changed

The University makes a contribution to the Teacher's Insurance and Annuity Association (TIAA) on behalf of each faculty and staff member who belongs to that retirement program. The retirement law which permitted the University to use TIAA as an alternate to the State Employee's Retirement System (SERS) also states that the amount the University contributes to TIAA shall be no more than the rate the actuaries of the retirement board determine to be necessary to fund the SERS adequately.

The amount is reviewed each year by the actuaries, and it may increase or decrease. From July 1, 1980, through June 30, 1981, the amount has been 7.90 percent of salary. The rate which will be in effect from July 1, 1981, through June 30, 1982, will be 6.50 percent of salary.

The contribution rate by faculty and staff members to either retirement system will remain at 5.00 percent of salary.

Arts and Architecture Dean announces retirement plans

Dean Walter H. Walters of the College of Arts and Architecture has announced his plans to retire as soon as a replacement is appointed but preferably no later than April 1, 1982.

Dean Walters said that he wishes to take early retirement to be able to spend more time on personal projects.

"The arts have become part of the mainstream of the University during Dean Walters' 31 years at Penn State," President Oswald said. "He has enriched the entire community by his leadership in establishing such programs as Nittany Mountain Summer and the University Resident and Festival Theatre Companies. I had hoped to persuade him to stay on and regret that I was unable to do so."

Dr. Oswald added that a search committee will be appointed in the near future to consider nominations for the position.

In addition to his academic responsibilities, Dean Walters serves as director of University Arts Services, overseeing the Artists Series, the Museum of Art, the theatres and Schwab and Eisenhower Auditoriums.

"The linkage we have established between our professionals and academic units has been adopted as a model by a number of universities," Dean Walters observed.

"I am also proud of the greatly increased opportunities Arts and Architecture is now able to offer students who are interested in the arts as a profession. I am even prouder of the service function which the College provides. More than 26,000 students take general arts and service courses in the College each year."

Dean Walters' most recent contribution to the arts at Penn State was the launching this summer of an "Angels Program," which has attracted private support for the first time to help underwrite the summer Festival Theatre productions.

Dr. Walters joined the faculty in 1950. He was the first head of the Department of Theatre Arts, a position he assumed in 1956. During his tenure, the Playhouse and Pavilion Theatres were designed and opened and a Master of Fine Arts degree was added to the curriculum. He was

Dean Walters

named associate dean of the College of Arts and Architecture in 1966 (three years after its founding), became acting dean in 1968 and dean in 1969. The Museum of Art was opened under his leadership and in eight years has acquired major holdings. Dean Walters served seven years on the committee for the construction of Eisenhower Auditorium and has been responsible for the Auditorium's management.

Dean Walters has played a prominent role as a spokesman for the arts both nationally and internationally. Since 1976, he has been chairman of the Fine Arts Commission of the National Association of State Universities and Land-Grant Colleges (NASULGC). In this role, he led a steering committee which produced a report on "The State of the Arts at State Universities and Land-Grant Colleges," the first and only such assessment. Dean Walters is also a member of the steering committee of NASULGC's International Affairs Committee.

In 1974, he was elected chairman of the International Council of Fine Arts Deans. He has served on the board and as an

(Continued on page 8)

Toombs named center director

Dr. Toombs

William Toombs has been named director of the University's Center for the Study of Higher Education.

Dr. Toombs, professor of higher education, was formerly a research associate at the Center and from 1971 to 1977 was its assistant director. He succeeds Kenneth P. Mortimer, professor of education and one of the original staff members at the Center, who will return to fulltime teaching and research.

In announcing the appointment, Provost Eddy said, "The University is fortunate to have someone of Dr. Toombs' caliber assume the leadership of the Center and build upon the Center's impressive record to date."

The Center, established in 1969, is a research unit focusing on policy aspects of

(Continued on page 8)

Students face reduction in federal aid, work study opportunities

College students everywhere face a reduction in the amount of federal aid and employment opportunities available during the coming academic year.

While Penn State's Office of Student Aid has been able to offer assistance to about 8,300 students, almost 6,000 persons with demonstrated financial need have had to be refused.

Students were advised to seek alternative means of support, including state grants, the Pell Grant and the Guaranteed Student Loan. Student Aid Director John F. Brugel reports.

Applicants for student aid are rank-ordered on the basis of financial need. Dr. Brugel emphasizes, using a national standard, the Uniform Methodology of Need Analysis.

Penn State receives aid funds from three federal sources — National Direct Student Loans (NDSL), Supplemental Educational

Opportunity Grants (SEOG), and the College Work Study Program (CWSP). In 1980-81, these programs awarded Penn State a total of \$11,014,752. The final 1981-82 allocation figure is expected sometime in August, but a total of \$9,468,114 was suggested in a letter received by Student Aid in April. This is a reduction of approximately \$1.6 million.

On the national level, according to Dr. Brugel, the NDSL program is being cut by \$100 million — from \$286 million — and it could be further reduced by \$14.8 million. For Penn State, this translates into a shortfall of at least \$700,000 as compared with last year.

Cuts in SEOG are much smaller. Dr. Brugel points out, estimating that they will run about \$60,000.

The funds available to the College Work Study Programs, however, are being sharply decreased. Last year, the

University received a basic allocation of \$3,693,621, plus a supplemental one of \$43,798. With no likelihood of a supplemental allocation for 1981-82, CWSP funds could drop by as much as \$885,000.

Dr. Brugel says that although fewer students will be employed in the undergraduate and graduate work study programs, the Office of Student Aid has attempted to maintain the program at levels close to last year's by cutting back on the summer program.

Penn State's students received about \$64 million in 1980-81 from Basic Educational Opportunity (Pell) Grants (BEOG) and from the Guaranteed Student Loan Program. About half of all aid received by the University's students comes from the latter source, which allows the families of undergraduates to borrow

up to \$2,500 annually and graduate students up to \$5,000.

Freshman and upper class students as well as those graduate students who had applied to the Office of Student Aid for assistance were notified of their status in early June. Those who had to be refused were given alternative referrals.

Dr. Brugel concludes:

"The problems we are experiencing result from a confluence of pressures — rising institutional costs, increasing inflationary burdens on families and students, and a regrettable reduction in the availability of federal funding. We have found, however, that when students and their families understand that our decisions are based solely on financial need, they are willing to accept the decisions and seek alternate forms of funding."

Penn Staters

Dr. Robert Bernheim, professor of chemistry, has been named a Visiting Fellow of the Joint Institute for Laboratory Astrophysics in Boulder, Col. Dr. Bernheim will use the fellowship to pursue his research on laser spectroscopy of small molecules during his year in residence at the Boulder facility.

Dr. K. Danner Clouser, professor of humanities at Hershey, delivered the commencement address at Thomas Jefferson University College of Allied Health Sciences on June 5 and was awarded a doctor of humane letters degree by that University.

Paul H. Cutler and Tien Tzou Tsong, professors of physics at the University, were invited lecturers at the sixth International Seminar on Physics of Solid Surfaces in Karpacz, Poland. The seminar was sponsored by the University of Wrocław's Institute of Experimental Physics in Wrocław.

In addition, Dr. Cutler presented a paper at the Institute of Experimental Physics. The paper, prepared with Nicholas M. Miskovsky, assistant professor of physics at the Altona Campus, was entitled "Theory and Application of Metal-Vacuum-Metal Point-Contact Normal Tunneling Junctions."

Dr. Francis J. Di Vesta, professor of psychology and education, has returned from Caracas, Venezuela, where he gave a series of lectures and seminars over a two-week period to faculty members at the Central University of Venezuela. He also conducted several seminars on plans for a new program in instructional psychology at the University of Venezuela this coming fall.

Richard Hamwi, an instructor in the School of Visual Arts, has received the Genevieve Weaver and Marie Henninger Memorial Award from the Chautauque National Exhibition for his watercolor painting "Remembrance." Nine drawings by Mr. Hamwi also were selected for inclusion in an exhibition held through July 3 at the Staempfli Gallery in New York City.

Dr. B. Lakshminarayana, director of computational fluid dynamics studies and professor of aerospace engineering, presented a paper entitled "Interaction of Compressor Blade Wake with Wall Boundary Layer/Vortex in the End-Wall Region" at the International Symposium on Applications of Fluid Mechanics and Heat Transfer to Energy and Environmental Problems, held at the University of Patras, Greece, June 29-July 3. He also organized and chaired a session on "Viscous Flows in Turbomachines with Emphasis in Three-Dimensional Effects." The Symposium and his trip were sponsored by the Greek Ministry of Industry and Energy, the University of Patras, and the Hellenic Industrial Development Bank.

Two members of the geophysics faculty recently were presented awards.

Assistant professor **Charles A. Langston** is one of 20 persons across the country selected to receive a \$5,000 ARCO Oil and Gas Company Outstanding Junior Faculty Award. These awards are made to help colleges and universities attract and retain highly qualified staff. A member since 1977, Dr. Langston holds a Ph.D. from the California Institute of Technology. His research and teaching activities center on seismology.

Associate professor **Randolph J. Martin** received the Boston College Alumni Association's Award for Excellence. A member of the faculty since 1978, Dr. Martin earned his doctorate at Massachusetts Institute of Technology. His current research focuses on the geophysical properties of rocks under crustal conditions.

Prof. Nisbet

Prof. Park

Prof. Pass

Prof. Reed

Prof. Ross

25-year chairs

Twenty-five years of Penn State service on the part of **James M. Hughes Jr.** was honored recently by the Altoona Campus. An associate professor of engineering at the Campus, Mr. Hughes graduated from Penn State in 1951 with a B.S. in electrical engineering. Before joining the faculty, he worked as a design engineer with Westinghouse in Baltimore.

The College of Engineering presented 25-year service awards to five faculty members in a recent ceremony held in the Bayard D. Kunkle Engineering Activities Center. The five are: **John S. Nisbet**, director, Ionosphere Research Laboratory and professor of electrical engineering; **William H. Park**, professor of mechanical engineering; **Vincent L. Pass**, associate professor of architectural engineering; **Joseph R. Reed**, associate professor of civil engineering; and **William J. Ross**, professor of electrical engineering.

Dr. Nisbet earned his B.S. at London University and his M.S. and Ph.D. degrees at Penn State. Before joining the faculty as a research associate in 1955, he was an engineer with Nash and Thompson, Ltd., Decca Radar, Ltd., and the Canadian Westinghouse Corp.

His research interests are in the area of planetary aeronomy, in modeling the ionospheres of the earth and the planets, and in the electric field systems in the upper atmosphere. In 1979 he received a Fulbright Fellowship to teach and conduct research at Kharkov State University in the USSR and in 1980 was awarded a

National Academy of Sciences National Research Council Senior Fellowship to conduct research at Goddard Space Flight Center on the interaction of the solar wind with the planet Venus. In 1979 he completed a project of teaching all the stem courses in the undergraduate electrical engineering curriculum.

Dr. Park came to the University in 1953 as an instructor in mechanical engineering. Previously, he worked as a research engineer for Borg-Warner in Bolbrook, Ill., as a design engineer for Sanders & Thomas, Inc., in Pottstown, Pa., and as principal research engineer for Ford Motor Co.

Dr. Park earned his B.S. and M.S. degrees in mechanical engineering from Penn State and his Ph.D. from Cornell University in 1966. His research interests are in vehicle simulation, micro-processor applications, impact loading of pavements, and road roughness measurements.

Dr. Park is currently graduate student advisor in the mechanical engineering department. He is a member of University Council and has been very active in the Faculty Senate.

An associate professor of architectural engineering, Mr. Pass retired June 30. He completed his B.S. in architectural engineering at Penn State in 1948 and his M.S. at the University of Texas. Before returning to Penn State in 1955, he was a senior structural engineer with General Motors Corp.

His main emphasis has been undergraduate teaching, and in 1969 he received a Lindback Award.

Dr. Reed became an instructor in 1953. He holds B.S. and M.S. degrees in civil engineering from Penn State and a Ph.D. from Cornell University.

Dr. Reed has been a consulting engineer for several companies and is a registered professional engineer in Texas. He is a reviewer for the American Society of Civil Engineers' *Journal of the Hydraulics Division*.

In 1966 Dr. Reed was a Science Faculty Fellow of the National Science Foundation at Cornell University. His research interests are in the hydromechanics of free surface flow, which he is currently pursuing relative to hydroplaning on pavements. At the University, he has served in the Faculty Senate and was an assistant University Marshal at spring graduation ceremonies.

Dr. Ross joined the faculty in 1956 as an assistant professor after earning his B.Sc. and M.Sc. degrees in physics and a Ph.D. in radio physics from Auckland University College in New Zealand.

In addition to his teaching duties in electrical engineering, Dr. Ross has conducted an extensive series of research projects in association with the Ionosphere Research Laboratory, studying the effects of the atmosphere on the propagation of radio waves from satellites. He is the author of a number of technical papers in this field. He has also served as a consultant to the NASA Space Sciences Committee and on a National Academy of Sciences Advisory Committee.

Dr. Ross served as head of the Electrical Engineering Department from 1971-1979.

Dr. Rustum Roy, director of the Materials Research Laboratory, visited and lectured at a number of research laboratories in Poland and the USSR in early June.

He spoke on "New Ideas on Materials Synthesis" at the Institute on the Physics and Chemistry of Silicates in Leningrad and at the Institute of Inorganic Chemistry in Novosibirsk, Central Siberia.

Dr. Roy also was an invited speaker at two international meetings. He discussed the Penn State work on low temperature waste forms at the Symposium on Nuclear Waste Disposal, June 1-4, at the German Nuclear Center in Jülich. He spoke on ceramics in radioactive waste science and technology at the XIII Biennial Meeting on the Science of Ceramics, June 14-17, in Göteborg, Sweden.

Appointments

Cathryn A. McNamara as assistant Extension agent, Fulton County, B.S., State University of New York at Oneonta; M.S., Queens College, City University of New York.

Alice I. Tetreault, as associate professor of nursing, Diploma, R.I. Hospital School of Nursing; B.S., Pembroke College; M.A., Columbia U. Teachers College; M.P.H., Yale U. School of Medicine; Ed.D., North Carolina State U. Formerly associate professor, Fort Hays State U. School of Nursing.

Promotions

Staff Exempt

Mary H. Dunkle to manager, news bureau in Public Information.

Richard W. Jones to assistant manager, news bureau in Public Information.

Clerical

Kathy L. Dorman to clerk A—CWSP in Student Administrative Services.

Catherine Fyock to accounting clerk in Health, Physical Education and Recreation.

Glenda M. Lucas to secretary C at Shenango Valley.

Muriel H. Perozz to clerk, bookstore A at Osgood.

Sharon Ridgway to secretary B in Business Administration.

Technical Service

Paul W. Byers to maintenance worker, utility at Capitol.

Terry L. Fetterolf to poultry worker, general in Agriculture.

Ronald K. Grove to waste water treatment plant helper in Physical Plant.

Clarence Hardaway to maintenance worker (general) B at Capitol.

Larry D. Herst to building maintenance worker in Student Affairs.

Elissa A. Morgan to photographic technical A in Agriculture.

Prof. Mentzer

Department of Engineering Science and Mechanics.

Prior to joining the faculty, Dr. Mentzer was an engineer with Westinghouse Corporation, headed a Theory Group at Penn State's Ordnance Research Laboratory, and was a staff member at MIT's Lincoln Laboratory and the Antenna Laboratory at Ohio State.

Dr. Mentzer has conducted research in electromagnetic radiation and transmission, microwave optics, ionosphere physics and propagation, and has taught courses in engineering analysis, electromagnetic field theory, antennas and electronics. Under his direction, the Engineering Science program has developed into one of the most respected in the country.

Dr. Mentzer is the author of a book, *Scattering and Diffraction of Radio Waves*, published by Pergamon Press and translated into several languages, including Russian. He has been a consultant to several companies.

After retirement Dr. Mentzer and his wife plan to maintain their residence in State College.

Prof. Gentry

Prof. Smith

Robert F. Gentry, professor of veterinary science, retired June 30 after 27 years of service. He will have emeritus rank.

A native of Topeka, Kan., Dr. Gentry earned the D.V.M. degree from Kansas State University, an M.S. in endocrinology from the University of Missouri and a Ph.D. in microbiology and public health from Michigan State University.

He was a research veterinarian for seven years in the Regional Poultry Research Laboratory at East Lansing, Mich., prior to his appointment in 1954 as associate professor of veterinary science at Penn State. He was promoted to professor in 1960.

Dr. Gentry's specialties include avian pathology; avian virology — embryo, chick and bird inoculation and isolation; immunology — vaccination techniques and field evaluation; serology — serological techniques and virus neutralization procedure; and microbiology. His research has contributed substantially to programs of flock health management and the development of preventative diseases against a number of specific diseases.

Dr. Gentry presently is veterinary consultant to companies in four foreign countries and the U.S. Food and Drug Administration. He has conducted scientific training workshops on the isolation and propagation of Mycoplasma gallisepticum (MG) for use in immunization of chickens in several Caribbean and Central and South American countries.

He was a member of the founding group for the *Journal of Avian Diseases* and served on the editorial board and as associate editor.

Dr. Gentry and his wife, Freida, plan to make their retirement home in Florida, although he will continue his consulting activities and as president of Tri-Bio Laboratories in State College.

Dr. Jeanne L. Smith, professor of psychology at the Osgontz Campus, retired with emeritus rank on June 30.

Dr. Smith joined the faculty in 1957 as an instructor, becoming a full professor in 1974. During her career at Osgontz, she was one of the founders of the Osgontz Faculty Senate, served several terms of office as a senator, and was chairman of the governing body in 1972. She was secretary of the first University-wide committee on faculty rights and responsibilities.

Dr. Smith's excellence in teaching was recognized in 1972 when she was honored by the Commonwealth Campus administration. She has been called "an outstanding role model," and "a teacher who cares," and in 1968 the student body voted her Chief Osgontz, an award presented annually to the faculty member who most demonstrates the traits of dedication, inspiration, educational ideals and contributions to student life. The campus community further honored Dr. Smith this spring by asking her to be the speaker at the 10th annual commencement ceremonies.

Dr. Smith received her Ph.D. from the University of Pennsylvania and her M.A. and B.S. degrees from the University of Alabama. She lives in Willow Grove with her husband, Albert, a retired member of the engineering faculty at Osgontz, and her son, Michael, a former Osgontz student who is now employed by the Campus.

David Kerner, associate professor of English at the Osgontz Campus, retired June 30 with 26 years of service to the University.

Prof. Kerner was graduated in 1940

Prof. Kerner

Mr. Robb

from the University of Pennsylvania, where he was elected to Phi Beta Kappa. During his service in World War II, he received a certificate of fluency in Russian from the Army Specialized Training Program at Cornell University. In 1948 he received his Master's degree from Columbia University.

Prof. Kerner has published numerous stories and scholarly articles. One of his reviews, of John Barth's *The End of the Road*, originally published in *Chicago Review* in 1959, was recently reprinted in *Critical Essays on John Barth*, edited by Joseph J. Waldmeir. One of his articles on the teaching of composition, "Jigsaw Puzzle in Expository Writing," was reprinted in 1976 in *Writing Exercises from "Exercise Exchange,"* edited by Littleton Long and published by the National Council of Teachers of English.

In his career at the Osgontz campus, he taught 18 different courses ranging from freshman composition and English, American and European literature, to creative writing and literary criticism. He served Osgontz as chairman of the library committee for several years, including those in which the new Woodland Library facility was planned.

During his retirement, Prof. Kerner hopes to complete, among other things, "a novel of novellas," he has been working on for many years. "Thanksgiving," the first long story in this collection, was published in *Commentary* in 1969 and was listed on the Roll of Honor in the 1970 volume of the Martha Foley annual *The Best American Short Stories* (Houghton Mifflin).

Positive thinking is the key to a successful retirement for **Preston Robb**, who has served the University in Housing and Food Services for 26 years. "I don't allow negative thoughts to enter my mind," he says. "I plan to lean back on that decision to retire and enjoy it."

In his newly acquired spare time, Mr. Robb will develop some mountain land which he owns and has "lots to do around the house."

Mr. Robb began his University career in 1955 as a dining hall utility worker and one year later became a truck driver/stock clerk. For several years, he took accounting courses through correspondence to reach his goal of becoming an accountant and in 1964, advanced to the position of accounting clerk in Vending. Since 1966, he has been an accountant for the HUB Food Services, in charge of inventory, payroll, all cash receipts, cashiers and accounts receivable. "I liked accounting," Mr. Robb said of his job. "I worked for good managers all through the years; I always knew just where things stood."

Penn State has been a family affair for the Robbs. Mrs. Robb retired two years ago from her position as a counterwoman in Simmons Dining Hall. And three of the four Robb children graduated from Penn State: Janice in art education, Roger in electrical engineering, and James in secondary education. Another daughter, Marcia, attended Polyclinic Hospital and the University of Pennsylvania in the field of nursing.

Mrs. Audrey M. Phelps, supervisor of the Department of Agricultural Communications, retired July 1 with more than 25 years of service.

Appointed office supervisor in February 1974, she has been responsible for such operations as training and supervising clerical and technical-service employees; processing of press, radio, television and publications services; editing media materials; developing new office

procedures and maintaining record systems.

A native of Penns Creek, Snyder County, Mrs. Phelps received her B.S. in business education from Susquehanna University in 1954.

Prior to being named to the ag communications staff, she was head secretary in the College's Agricultural Experiment Station Office; head secretary in Penn State's Art and Science Extension; and clerk-typist in the Department of Public Instruction, Harrisburg.

Mrs. Phelps is choir director, organist, deaconess and president of Christian Women's Fellowship of the State College Christian Church, and vice president of the Xi Delta Chapter of Beta Sigma Phi. She is married to Ben G. Phelps Jr., a U.S. Postal Service employee. She is the stepmother of three children and has three great-grandchildren.

Inez L. Lauck, transcript supervisor in the Office of the University Registrar, retired June 30 after working at Penn State for 35 years.

Mrs. Lauck observes that included in her duties as transcript supervisor were overseeing the issuing of official student transcripts and addressing any problems that would arise with the transcripts.

After beginning her University career in the Registrar's Office as a clerk in 1946, Mrs. Lauck performed a number of clerical duties such as typing and general office work.

Mrs. Lauck's husband, James A., is a machinist in the College of Engineering.

Charles D. Arthur, an assistant professor of history at Delaware County since Sept. 1, 1967, retired June 30.

Margaret E. Anderson, assistant professor of chemistry at Capitol Campus, retired on June 30 after serving since April 1, 1968. From 1948 to 1951, she taught at the Altoona Campus.

Peter P. Karapin, assistant professor of engineering at the York Campus, retired June 30 after being employed by the University since Sept. 1, 1965.

Wilbur Kline, business manager at the Mont Alto Campus, retired June 30 after working for the University since Sept. 1, 1966.

Elwood Mintz, assistant professor of agriculture, retired June 30, after being a member of the University faculty since 1962.

Marguerite M. Beltz, a clerk in Continuing Education since Jan. 5, 1969, retired June 27.

Charles H. Kope, maintenance worker at the Capitol Campus, retired on June 20. He had been a University employee since May 3, 1971.

The Rev. Quentin L. Schaut, O.S.B., rector of the Penn State Catholic Center, retired June 19 after serving the University since 1962.

"The (Penn State) administration has been superb in its support of religious programs," The Rev. Schaut says. "I am especially appreciative of this because I know from talking with my colleagues at other institutions that such support is not often found."

Prior to joining the University community, he served from 1955 to 1962 as president of St. Vincent College, his alma mater for both his undergraduate and seminary work.

The Rev. Schaut, 80, is retiring to Latrobe, home of St. Vincent, where he plans to remain active and enjoy the college's "beautiful campus and good working library."

Constance S. Fleck, a clerk in the College of Agriculture since July 1, 1965, will retire Aug. 1.

Bonita L. Silbaugh, secretary B in instructional services at the Capitol Campus, will retire Aug. 1 after being employed by the University since Oct. 10, 1966.

John V. Banks, maintenance foreman and a member of the Behrend College staff since Jan. 19, 1962, left the University July 1.

Junior computer operator **Maria R. English**, a member of the Hershey staff since Sept. 14, 1970, left the University June 13.

David J. Laird, an equipment operator with the Office of Physical Plant, left the University June 4 after serving since Dec. 2, 1970.

Obituaries

Robert L. Ruttenberg of Limekiln (Berks County), a member of the University's Board of Trustees from 1976 to 1979, died June 4. He was 61.

A 1941 Penn State graduate with a B.A. degree in arts and letters, Mr. Ruttenberg was appointed to the Board of Trustees by Gov. Milton J. Shapp. He also served as a trustee to Kutztown State College.

Mr. Ruttenberg, who encouraged the development of the Berks Campus, was the owner of Ruttenberg Travel Service in Reading and affiliated with Chesterfield Webbing Company in South Carolina. He is survived by his wife, Ruth, four children and one grandchild.

Sally D. Buterbaugh, a secretary at The Behrend College, died June 18. She was 20 years old and had been working at Behrend since July 30, 1979.

Wilbur L. Spicer, a fireman and mechanic with the Office of Physical Plant, died June 29 at the age of 73. He was employed by the University from 1937 until 1939.

Joseph R. Morrison, who retired in September 1960 on disability, died June 21 at the age of 38. A Phillipsburg native, he joined the staff as a baker in 1967 and was employed also as a machine operator, milker and animal caretaker.

Kathleen Luzier, a residence hall worker with Housing and Food Services from 1962 to 1972, died June 21 at the age of 73.

George W. Keener, an assistant professor of agricultural Extension in Clarion County from 1961 until his retirement in 1976, died June 20 at the age of 69.

Carpooler

Barbara Houtz would like to share driving from Rebersburg or Madisonburg. She works from 8 a.m. to 5 p.m. in Tyson Building. Call either 863-2189 or 422-8910.

Staff Development

Thirty-four clerical employees have completed the Clerical Enrichment Program. Participating were:

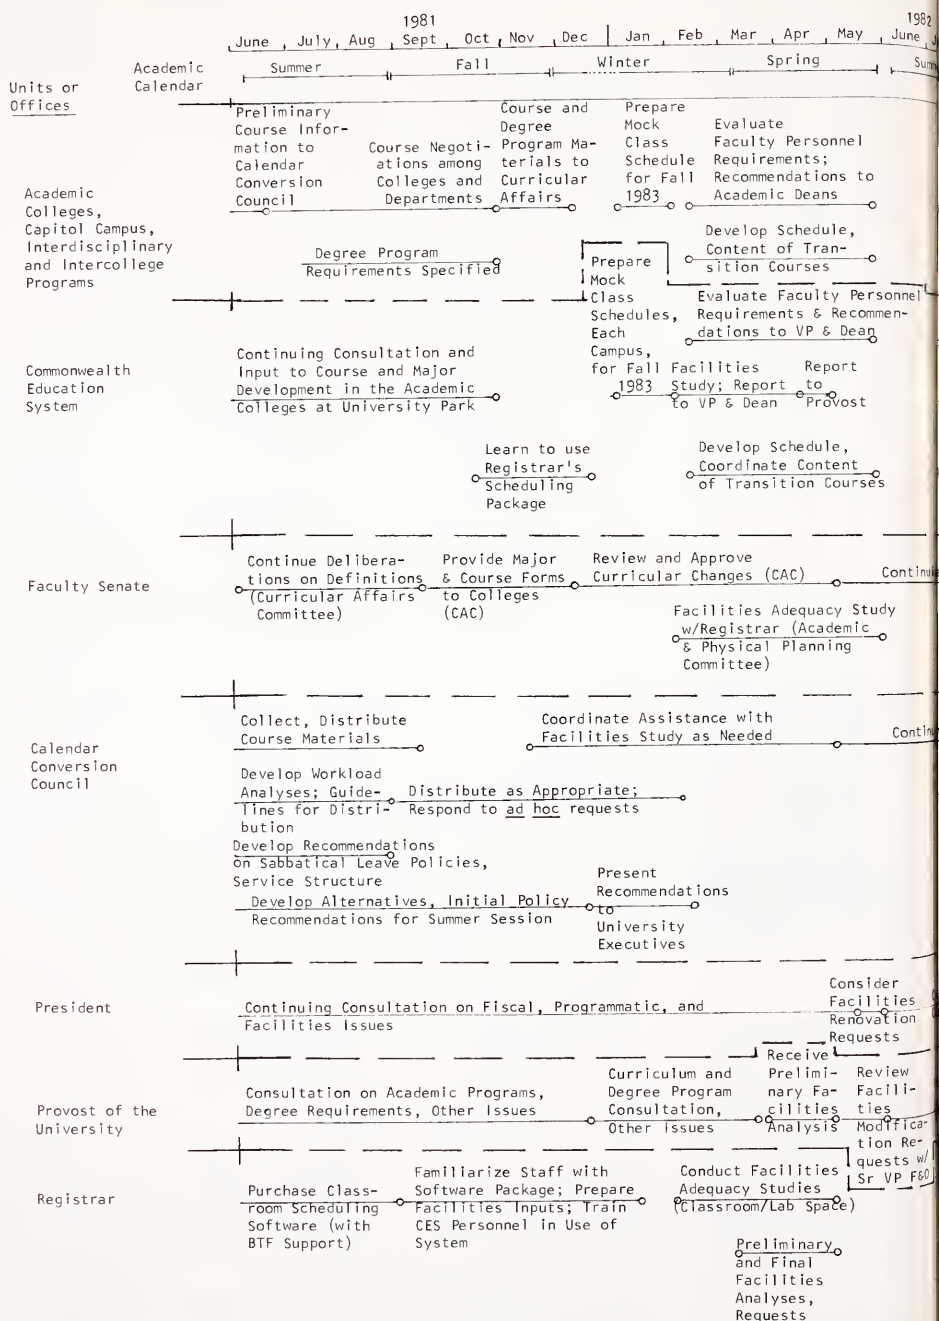

Doreen Blessing, clerk binding; **Libraries: Janet Brannan**, clerk/hostess, **Nittany Lion Inn: Sandra Brown**, secretary C, Graduate School; **Kay Christine**, secretary C, Agriculture; **Janet Coder**, clerk, accounting B, Housing & Food Services; **Sandy Detwiler**, secretary C, Engineering; **Julia Gibboney**, clerk, medical records B, Health Services; **Peggy**

Council charts 'major events' in U

University calendar conversion process

The accompanying schedule shows the major events which must occur for conversion to the early semester calendar in the fall of 1983. The schedule is expected to be updated and republished as necessary to assist in keeping the University community aware of activities which must occur prior to fall of 1983. It is not intended to show *all* of the interrelationships and communications necessary between organizations within the University to accomplish the conversion. Those organizations included on the chart are there because of the high degree of communication which is now, and will continue to be, necessary over the next several years.

The schedule is organized as follows: The months and years until the date the calendar conversion takes place are shown across the top; the current academic calendar, indicated by the beginning and ending dates of each term through the summer of 1983, are shown below the time headings; major academic organizations are shown on the first three areas going vertically down the left side of the chart. The Calendar Conversion Council, which has coordinating and expediting responsibilities for calendar conversion, is shown next. The Offices of the President and Provost are then shown, followed by the Office of the Registrar.

The major activities to be completed by the academic units of the University are as follows:

— The units which include, for purposes of this schedule, the academic colleges, Capitol Campus, interdisciplinary and intercollege programs, and the Commonwealth Educational System, have already started the process of reviewing and updating course offerings. Preliminary course materials submitted to the Calendar Conversion Council by these organizations are being distributed in order to meet a variety of information needs of all academic departments. Negotiations necessary to refine these preliminary course data are expected to continue throughout the summer and early fall months. Course and degree program materials are to be submitted to the Faculty Senate Committee on Curricular Affairs in mid-December.

— In early 1982 colleges and campuses will be requested to prepare a mock class schedule for the fall of 1983. (Some preliminary information on classroom scheduling may be requested in Fall, 1981.) The mock schedule will be used by the Office of the Director of Registration and Scheduling, in conjunction with other appropriate offices, to determine the sufficiency of classroom space within the University.

— During the late winter and spring of 1982, academic units will evaluate their personnel requirements and make recommendations to the academic deans. Critical personnel issues will be reflected in the budget review hearings which will commence in the fall of 1982.

— Also in the late winter and early spring of 1982, academic units will be requested to evaluate their course offerings in order to prepare, as necessary, transition courses to insure that students will not be penalized in their academic progress because of conversion to the semester schedule.

The Faculty Senate will participate in a wide variety of policy-related discussions during the conversion process. It will continue to develop the necessary definitional changes required by the calendar conversion, and will perform its

(Continued on page 8)

News in Brief

Wayne Bechdel promoted in Arts and Architecture

Wayne R. Bechdel, assistant dean for continuing education in the College of Arts and Architecture since 1969, has been promoted to associate dean, effective July 1.

Prior to his appointment to Arts and Architecture, Mr. Bechdel spent 14 years as an administrator in Continuing Education, including 11 years as director of the Conference Center.

During Mr. Bechdel's tenure with Arts and Architecture, Continuing Education credit course offerings have increased fourfold and non-credit offerings have doubled. In 1980 the National University Continuing Education Association honored Mr. Bechdel with the Stanley Robinson Award for excellence.

Energy grant applications submitted by University

Applications to the Governor's Energy Council for energy conservation measures grants totaling \$1,135,000 have been submitted by the University.

Technical assistance reports detailing the conservation changes needed were prepared for 21 buildings at University Park and 12 buildings on other campuses at a cost of \$65,041. These reports, paid for in part by 30 percent federal matching funds, designated the specific improvements needed in each building.

The grants originate with the U. S. Department of Energy, but are being administered by state authorities. Awards will be announced by Sept. 1.

Schuylkill Campus center gets national affiliation

The Center for Economic Education (CEE) at the Schuylkill Campus has become an affiliate of its national counterpart, the Joint Council on Economic Education (JCEE).

Committed to fostering understanding of economic theory and practice in the community, the Schuylkill Campus CEE is the first Penn State Center to become an affiliate of the national organization. It is one of only 10 such centers in Pennsylvania and one of 214 nationwide.

"The Schuylkill Campus Center's affiliation with the Joint Council reflects the national organization's confidence in the Center's ability to render quality service to the community," says Dr. Wayne D. Lammie, campus director.

"More importantly," he adds, "the affiliation will strengthen the Schuylkill Center's programs and provide valuable resources and support for its activities."

Those activities, explains Dr. David A. Martin, director of the Center, include conducting seminars, workshops and mini-conferences for elementary and secondary school teachers to help them teach economics in their classrooms.

Exercise program participants sought

Two graduate students — Cathy Talano, physiology, and Liz Klunk, nutrition — are recruiting women ages 35-65 to participate in an eight-week exercise program beginning early in August. "Diabetic and non-diabetic overweight women and non-diabetic women of normal weight are being sought. Of special need are diabetic overweight women."

Exercises will include aerobic dance, aerobic games, walking-jogging and water games. All participants will be exercise-tested this month at the Human Performance Research Laboratory and will receive exercise and dietary prescriptions.

Ms. Talano and Ms. Klunk can be reached by telephoning 863-0525 from 10 a.m. to 12 noon and from 2 to 4 p.m.

Alumni Vacation College features faculty speakers

During the second week of the University's Annual Alumni Vacation College July 19 through 25, nine faculty members will speak on topics ranging from the Underground Railroad to the computer revolution.

The overall theme for the program, which is sponsored each year by Penn State's Alumni Association, will be "Swamping the Senses." Theme for the first week of the Vacation College, which concludes Saturday, is "Shaping the 80s."

Adult participants attend a series of lectures and take part in cultural and recreational activities. Separate programs are planned daily for children.

Lecturers and their topics for the second week are:

"Communication and Thought," Richard Gregg, professor of speech communication; "Sayonara Kojak — U. S. Leadership in International Electronic Media," Richard Barton, associate professor of speech communication; "Contemporary American Literature," Theodore Gross, provost and dean of Penn State's Capitol Campus.

Also, "Communicating on the Underground Railroad," Ann Shields, producer-director for WFSU-TV; "Emblems: Keys to Hidden Meanings in Paintings," Roland Fleischer, professor of art history; "Communication Technologies and Social Change," Mary Mander, assistant professor of speech communication. In addition, "Patterns, Personality and Technology in the Popular Arts," Ellis Grove, associate professor of general education in the arts; "National Security — Our Vulnerability in the 80s," David Myers, associate professor of political science; and "Communication and the Computer Revolution," Frank Vastola, professor of fuel science.

Communications Seminar

A seminar entitled "Enhancing Classroom Communication" will be held on Wednesday, July 15, from 1 to 4 P.M. in Room 128 Mitchell Building. Faculty and graduate teaching assistants are invited to attend this session to become acquainted with the skills and techniques to improve the transmission of information in the classroom.

The seminar will be conducted by Maryellen Gleason of the Speech Communication Department and Mary Ann Chezik of the UDIS staff. It will emphasize a variety of factors that affect the success of communication. For more information and to make reservations for either the seminar or followup discussion groups, call 863-0668.

Park Ave. detour detailed

Park Avenue is closed to westbound traffic from Shortledge Road to North Atherton Street during this summer's construction of left turn lanes at Park Avenue's intersections with North Atherton and North Allen streets.

Westbound vehicles that approach the construction site from University Drive are being rerouted down Shortledge Road to East College Avenue. The detour will be lifted when construction is completed on Aug. 26.

The construction work includes widening Park Avenue on the University side, resurfacing, building new curbs on both sides and constructing left turn lanes at the two signalized intersections.

Airport personnel changes

Reorganization at University Airport has resulted in these personnel changes. Duane O. Callahan, who has served as a staff pilot since 1966, has become Supervisor — Airport Operations. Charles K. Farwell, who began University employment in 1963 as a flight instructor and later was promoted to chief flight instructor, is now Foreman — Airport Operations.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed in the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., July 16, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PSE-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

COORDINATOR OF FINANCIAL AID, GRADUATE SCHOOL, University Park

Responsible to the Dean of the Graduate School for planning, developing, organizing, directing and implementing all actions and responsibilities related to the Graduate School financial aid programs with special emphasis on the development and coordination of financial aid awards within federal, state, private and institutional provisions. A Master's degree (or equivalent) in student personnel, higher education, business or public administration plus 2 to 3 years of effective financial aid experience including experience and knowledge of data processing routine as it applies to information systems. This is a Fixed Term 1 appointment.

NURSE ANESTHETIST, COLLEGE OF MEDICINE, Hershey

Administratively responsible to the Chairman of the Department of Anesthesiology and professionally responsible to a designated anesthesiologist to administer anesthesia, and to provide pre-operative, operative, and post-operative care to patients. Participate in the pre-operative review of the patient's medical record and explanation to the patient of the anesthesia procedures anticipated. Select and administer anesthesia under the professional direction of a staff anesthesiologist. Continuously monitor the patient during surgery. Select and prepare equipment, instruments, and supplies to be utilized. Responsible for the collection of various research data as assigned. Graduate of accredited school of nursing plus graduation from an accredited school of Nurse Anesthesia and registered in the State of Pennsylvania. In addition, one to two years of effective experience is required.

DIRECTOR OF CAMPUS RELATIONS, CAPITOL CAMPUS Responsible for organizing and conducting a comprehensive University relations program for the entire campus to include public information, development programs and alumni affairs. Bachelor's degree, or equivalent, plus four to seven years of effective experience involving development, fund raising and newspaper and/or journalistic writing. Must have a minimum of five years experience in higher education is desirable.

COUNSELOR, STUDENT AFFAIRS, University Park

Responsible to provide various services to individual students to enable them to effectively adjust to the University environment socially, personally, and academically to the extent at which

other services are indicated. A Master's degree in sociology or counselor education is required. Over one year up to and including two years of effective experience in a directly related activity is necessary. This is a 10-month standing appointment beginning Aug. 17, 1981.

FINANCIAL ASSISTANT, COLLEGE OF AGRICULTURE, University Park Responsible to the Associate Dean for Administrative Services for providing assistance to the Financial Officer relative to a wide variety of College financial matters. Performs accounting duties for various budgets, grants and miscellaneous funds. Assists in the preparation of annual budget to include reallocation of budgets, processing, recording, plan changes, promotions, salary increases, etc. Assists in the audit of auxiliary enterprises. Implements College procedure relative to the Federal Office of Management and Budget regulations, especially those concerning costs applicable to grants, contracts, etc. Identifies possible problems relating to college financial matters. Provide staff support to College Fiscal Specialists. Prepare a variety of monthly and special accounting reports and summaries Bachelor's degree (or equivalent) in Accounting with one or two years of effective experience required preferably in a University setting.

PROGRAMMER/ANALYST, COLLEGE OF AGRICULTURE, University Park

Responsible to the Manager of Data Processing Services for assistance in the analytical and programming phases of research projects. Develop new computer programs and upgrade, maintain and adapt existing programs. Plan logical steps to solution of problem, use of computer systems components, input and output data formats and translate plans into computer instructions. Confer with project personnel to determine the objectives, anticipated results, and use of project data. Advise researchers in the design of survey forms, types of analyses and time requirements. Advise and assist researchers in the efficient execution and the debugging of programs. Bachelor's degree (or equivalent) with a major in mathematics, statistics, or computer science or related field, and one to two years of effective programming experience is required. Course work in linear algebra, trigonometry, statistics, calculus, statistics, computer languages, and system programming is particularly desirable.

SENIOR PROGRAMMER/ANALYST, COLLEGE OF AGRICULTURE, University Park

Responsible to the Manager of Data Processing Services for assistance in the solution of complex data processing problems requiring research projects and for supervision of office staff. Develop new computer programs and upgrade, maintain and adapt existing programs. Plan logical steps to solution of problem, use of computer system components, input and output data formats and translate plans into computer instructions. Confer with Project personnel to determine the objectives, anticipated results, and use of project data. Advise researchers in the design of survey forms, types of analyses possible and time requirements. Advise and assist researchers in the efficient execution and the debugging of programs. Act as a consultant on joint projects with other Universities. Attend pertinent conferences and workshops. Bachelor's degree or equivalent with a major in mathematics, statistics, or computer science and two to four years of effective experience is required. Course work in linear algebra, numerical analysis, calculus, statistics, computer languages and systems programming is particularly desirable.

Grove, clerk B, Continuing Education; Tammy Gummo, clerk B, Health, Physical Education & Recreation; Bonnie Henninger, clerk typist A, Science.

Kathleen Houser, clerk typist B, Agriculture; Susan Kelleher, clerk typist B, Agriculture; Brenda Keller, clerk typist B, Arts & Architecture; Cynthia Kress, secretary C, Engineering; Valerie Lanager, clerk typist B, Human Development; Elizabeth Lass, receptionist C, Engineering; Nancy Martz, clerk B, Health, Physical Education & Recreation; Karen McCrea, stenographer A, Engineering.

Wendy Miller, receptionist typist, Science; V. Diane Mullen, clerk registration A, Continuing Education;

Linda Plozner, data preparation operator B, Alumni Association; Kathleen Porteous, clerk, information processing A, Libraries; Elana Pyle, secretary C, Human Development; DeLoise Reeves, clerk typist A, Science; Laura Sewell, clerk typist A, Earth & Mineral Sciences; Ruby Shepherd, clerk typist B, Business Administration; Carol Sonnier, secretary C, Science; Wanda Wagner, campus scheduler, Continuing Education; Cathy G. Watson, technical secretary C, Earth & Mineral Sciences; Margaret Williams, data preparation operator C, Alumni Association; Mildred Witherite, clerk, recorder, Continuing Education;

Kathleen Wolfe, cashier, check cashier, Bookstore; Jacqueline Wooden, secretary C, President's Office; Kaye Yarnell, Secretary C, Science.

Faculty/Staff Alerts

Social Security numbers needed to process claims

The University is pleased to announce that the claims payment system for the hospital/surgical/major medical expense program has been improved. Claims are now being processed by a computer system. This new automated system will increase accuracy and decrease the time required to process each claim.

Under this new system, however, it is very important that each claim form include the faculty or staff member's Social Security number. Claim forms that do not have the faculty or staff member's Social Security number cannot be processed until the Social Security number is obtained, thus causing delays.

Any questions concerning the submission of claim forms may be referred to your Personnel Representative, Business Manager, or the Employee Benefits Division, Room 133 Willard Building, 814-865-1473.

Correction

Although Pattee Library staff members may be disappointed, contrary to what appeared in the June 25 INTERCOM, the library will not close at 1 p.m. Mondays through Thursdays during the summer. The library will remain open until 10 p.m.

University Park Calendar

July 9-
July 26

Special Events

Thursday, July 9

CPFA, sidewalk sales and exhibitions, noon-midnight, campus and downtown.
Penn State Dames meeting, 7:30 p.m. Room 101 Kern.

Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

GSA Explazaganza Film, *The Little Prince* (Gene Wilder, Richard Riley), dusk, Fisher Plaza.

Friday, July 10

Board of Trustees meeting, Ogontz Campus.
CPFA, sidewalk sales and exhibitions, 9 a.m.-midnight, campus and downtown.

Commonplace Theatre, *Being There*, 7 p.m.; 10, 9:15 p.m., Room 112 Kern.

Nittany Mountain Summer Festival, John Hartford, bluegrass music, 7 and 9 p.m., Eisenhower Auditorium.

Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Interlanka Folk Dancing, 7:30 p.m., HUB Ballroom.

Saturday, July 11

Board of Trustees meeting, Ogontz Campus.
Deadline for August graduates to deliver master's theses or papers to adviser.

CPFA, sidewalk sales and exhibitions, 9 a.m.-midnight, campus and downtown.

France-Cinema, Brusati, *Bread and Chocolate*, 7 and 9 p.m., Room 112 Kern.

Festival Theatre, *Once Upon a Mattress*, 8 p.m., The Playhouse; *Born Yesterday*, 8 p.m., The Pavilion Theatre.

Nittany Mountain Summer Festival, New American Ragtime Ensemble, 8 p.m., Eisenhower Auditorium.

Sunday, July 12

CPFA, sidewalk sales and exhibitions, noon-midnight, campus and downtown.

Commonplace Theatre, *Being There*, 7 p.m.; 10, 9:15 p.m., Room 112 Kern.

Festival Theatre, *Once Upon a Mattress*, 7:30 p.m., The Playhouse; *Born Yesterday*, 7:30 p.m., The Pavilion Theatre.

Shaver's Creek Environmental Center, Alan Seeger Trail Hike, 1-3 p.m. Information and registration, 865-1851.

Monday, July 13

Shaver's Creek Environmental Center, Walnut

Springs Walk, 7-9 p.m. Information, 865-1851.

Deadline for August graduates to take final oral doctoral examinations and to submit camera-ready thesis manuscripts to Thesis Office.

France-Cinema, Brusati, *Bread and Chocolate*, 7 and 9 p.m., Room 112 Kern.

Tuesday, July 14

Shaver's Creek Environmental Center, Reptile & Amphibian Program, 10:30-11:30 a.m., "Fur Forest" Tot Lot. Information, 234-7188.

Pass/Fail (eight week Summer Term).

Phi Delta Kappa Summer Seminar Series, 2:20 p.m., Room 101 Kern. George Bonham, Council on Learning and Change magazine, on "Global Power and Educational Directions — Linking Responsibilities with Capabilities."

GSA Explazaganza Concert, The Atherton String Quartet, 7 p.m., Fisher Plaza.

Wednesday, July 15

Pass/Fail (eight week Summer Term).

UDIS workshop, "Enhancing Classroom Communication," 1 p.m., Room 128 Mitchell. Reservations, 863-0668.

Commons Concert, noon, Kern Lobby.

University Libraries Reference Section Seminar, Guide to research in field of education, 2:30-4 p.m.; 7-8:30 p.m., E105 Pattee Lecture Room.

Thursday, July 16

Drop deadline (eight week Summer Term).

Pass/Fail (eight week Summer Term).

Course repeat deadline (eight week Summer Term).

HUB Craft Center, Open House, 7:30-9:30 p.m., Room 312 HUB.

Fred Waring Summer Youth Concert, 8 p.m., Schwab.

GSA Explazaganza film, *Modern Times* (Charlie Chaplin), dusk, Fisher Plaza.

Shaver's Creek Environmental Center, Reptile & Amphibian Program, 10:30-11:30 a.m., Halfmoon Park. Information, 234-7188.

Seminar (follow-up discussion), "Enhancing Classroom Communication," 10 a.m.-noon, 103 Mitchell. Information and reservations, 863-0668.

Friday, July 17

Commonplace Theatre, "Richard Pryor Live in Concert," 7:30 p.m.; *Roadie*, 9 p.m., Room 112 Kern.

Fred Waring Summer Youth Concert, 8 p.m., Schwab.

Nittany Mountain Summer Festival, Joyleff II Dancers, 8 p.m., Eisenhower Auditorium.

HUB Movie, *Three Stripes Go Around The World in a Day*, 9:30 p.m., HUB Lawn.

Interlanka Folk Dancing, 7:30 p.m., HUB Ballroom.

Seminar (follow-up discussion), "Enhancing Classroom Communication," 1-3 p.m., 103 Mitchell. Information and reservations, 863-0668.

Saturday, July 18

Deadline to register for second session classes, HUB Craft Center, Room 312 HUB.

France-Cinema, Truffaut, *Small Change*, 7 and 9 p.m., Room 112 Kern.

Nittany Mountain Summer Festival, Joyleff II Dancers (new program), 8 p.m., Eisenhower Auditorium.

Sunday, July 19

Alumni Assn., Vacation College, "Swamping the Senes," through July 25. Information: 865-6516.

HUB Craft Center, second session classes begin.

Commonplace Theatre, "Richard Pryor Live in Concert," 7:30 p.m.; *Roadie*, 9 p.m., Room 112 Kern.

Monday, July 20

Special Lecture, Dr. A. Sankaram, "Recent Endeavors in Agricultural Production in India," 3 p.m., Room 301A Ag. Administration. Information, 865-1221 or 863-0249.

Color Slide Club meeting, 7:30 p.m., Room 189 Materials Research Lab.

France-Cinema, Truffaut, *Small Change*, 7 and 9 p.m., Room 112 Kern.

Shaver's Creek Environmental Center, Walnut Springs Walk, 7-9 p.m. Information, 865-1851.

Tuesday, July 21

Deferred grade deadline.

Phi Delta Kappa Summer Seminar Series, 2:20 p.m., Room 101 Kern. J. Robbins Kidd, International Council for Adult Education, Toronto, on "The Affirmers: First Person Reports of Learning and Implications for Research and Practice."

Special Lecture, Dr. A. Sankaram, "Crop Production in India with Special Reference to Fertilizer Use," 3 p.m., Room 301 Ag. Administration. Information, 865-1221 or 863-0249.

Wednesday, July 22

GSA Explazaganza concert, Menagerie, 7 p.m., Fisher Plaza.

Commons Concert, "701" (name of group), noon, Kern Lobby.

Shaver's Creek Environmental Center, Reptile & Amphibian Program, 6-7 p.m., College Heights School. Information, 234-7188.

Thursday, July 23

Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre.

GSA Explazaganza film, *The Graduate* (Dustin Hoffman, Katherine Ross, Anne Bancroft), dusk, Fisher Plaza.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Friday, July 24

Commonplace Theatre, *Foxes*, 7:30 p.m.; *The Rose*, 9:20 p.m., Room 112 Kern.

Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre.

HUB Movie, *Dial M for Murder*, 9:30 p.m., HUB Lawn.

Interlanka Folk Dancing, 7:30 p.m., HUB Ballroom.

Saturday, July 25

France-Cinema, Weir, *Picnic at Hanging Rock*, 7 and 9 p.m., Room 112 Kern.

Nittany Mountain Summer Festival, Mel Tillis, 7:15 and 9:30 p.m., Eisenhower Auditorium.

Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre.

Sunday, July 26

Commonplace Theatre

Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre.

Exhibits

Anthropology Museum (Sparks Building): Special CPFA hours, July 9, noon-8 p.m.; July 10, 10 a.m.-8 p.m.

Chambers Gallery: open Monday through Friday, 8 a.m.-5 p.m. CPFA Child Art exhibit.

HUB: Art Alliance Juried Member Show. CPFA, Alice Aycock, Bruce Oppenheim, drawings, Elaine Mayes, photographs.

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon-11 p.m. CPFA Juried Photography exhibit and Glass Invitational.

Museum of Art: open 11 a.m.-4:30 p.m. Closed Mondays. Tours, Sundays, 1:30 p.m. Special hours July 9-11, 11 a.m.-8 p.m.

Twentieth-century works from the Museum's collection, "Hemline, Neckline, Streamline: Women's Fashions 1890-1940" from the collection of Beverly Berks. CPFA Juried Crafts exhibit.

Pattee Library: Paul Matthews, paintings, East Corridor Lobby. Beverly Laverdiere, paintings, Lending Services Lobby. Carol Trent, ceramics, Main Lobby. Martha Carothers, "The Design and Production of Children's Novelty Books," Rare Books Room.

Visual Arts Zoller Gallery: open 11 a.m.-4:30 p.m. Closed Mondays. Special hours July 9-11, 11 a.m.-8 p.m. Lianne Sommes, posters.

Hartford, Ensemble to perform

Nittany Mountain Summer Festival continues with two presentations in Eisenhower Auditorium during the Arts Festival weekend.

John Hartford, three-time Grammy award winner, will perform a rousing evening of bluegrass music at 7 and 9 p.m. on Friday, July 10.

Hartford, a musician, lyricist, entertainer, humorist, artist, and riverboat captain, was raised in St. Louis. After a number of jobs, he became a session musician in Nashville. This led to his association with RCA, where he recorded eight albums.

As a result of these albums, Hartford became a regular on the Smothers Brothers' Comedy Hour and The Glen Campbell Goodtime Hour. During this period Hartford wrote "Gentle On My Mind," which, sung by Glen Campbell, reached the top of the charts and gradually became a classic. The song won Hartford two Grammy Awards, plus one for Campbell, and over the next two years was recorded by more than 300 artists around the world.

After leaving The Goodtime Hour, Hartford toured with his band, which included Vassar Clements, Norman Blake, and Tut Taylor. Then, in the early 70's, he made the decision to strike out on his own, developing more facets of his own talent. Hartford then signed with Flying Fish Records. His first album with them, "Mark Twang," brought another

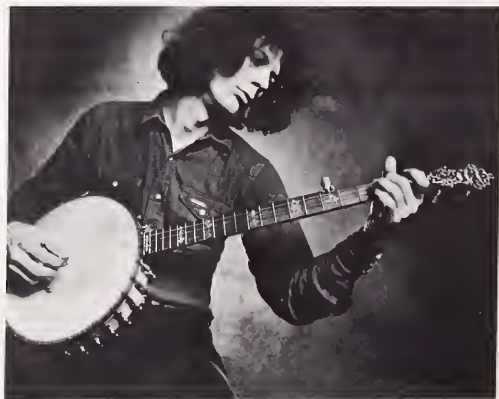

Grammy (in the traditional-ethnic-folk category in 1976).

Hartford's professional success has given him the freedom to get back to his other love — the river. A licensed riverboat captain, he uses the river life and its people as the basis for many of his works. Most of the last eight years he has worked on the paddlewheeled steamboat, "Julie Belle Swain," as deckhand and entertainer, but mostly learning the river.

The basis of Hartford's music is bluegrass, to which he adds his own special twists. His songs and performances are done lightly and in fun, yet with a serious strain underlying what he projects. His one-man show consists of performing on banjo, fiddle, guitar, and dancing upon an amplified piece of plywood, which he calls dog dancing.

As the second event, Saturday, July 11, at 8:00 p.m., the New American Ragtime Ensemble will perform the syncopated rhythms of ragtime.

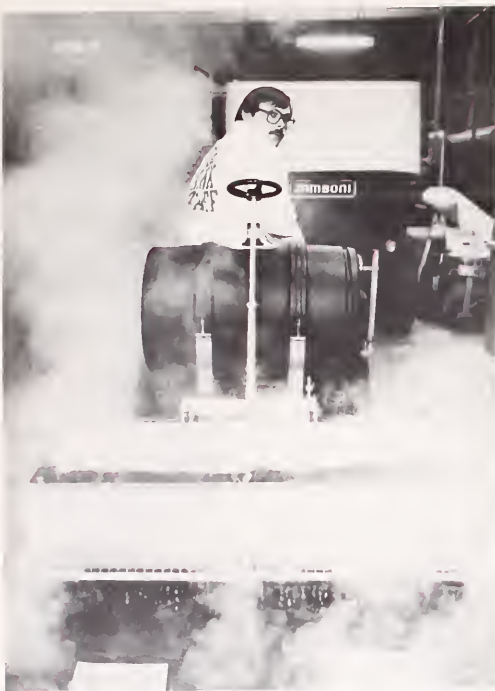

The ensemble is a 12-member orchestra that employs the traditional ragtime orchestra of flute, piccolo, clarinet, trumpet, trombone, tuba, two violins, viola, cello, piano, and percussion. The group was formed in 1976 by Tom Maguire, principal percussionist for the Oklahoma Symphony Orchestra, to celebrate the nation's bicentennial with musical performances which drew from the experiences of the American

John Hartford

The music known as ragtime marked its beginnings in the 1880s. It was the result of mixing different cultural and musical traditions — the African musical heritage brought by the slaves and the white American musical culture derived from European origins. Scott Joplin, the "King of ragtime," began the ragtime era when his "Maple Leaf Rag" became the first piece of sheet music to sell more than a million copies.

By appearing in turn-of-the-century formal dress, the New American Ragtime Ensemble recreates the time when the century was young and ragtime was the rage. Included in the ensemble's repertoire is the American music of Joplin, Blake, Stravinsky, and Gottschalk, along with the music of European composers Satie and Debussy.

Brian Hassinger, maintenance supervisor at the new ice rink, uses the rink's specially designed "little Zamboni." One of two conventional Zamboni machines rests in the background.

At new rink

Maintenance efforts focus on safety, energy conservation

Brian Hassinger takes care that Penn Staters don't skate on thin ice!

Mr. Hassinger is the maintenance supervisor at the new ice rink, and he puts top priority on safety. His job includes cleaning and resurfacing the ice, maintaining the rink's machinery, controlling ice temperature — and even working behind the cash register when things get busy.

Maintaining the ice surfaces is a round-the-clock job, according to Mr. Hassinger, who was a member of the landscaping department for seven years. First thing every morning, the supervisor checks the boards and Plexiglas around the main rink, as well as the ice surfaces there and in the smaller studio rink for chips.

"In addition to safety, we gear our operation around conserving water and electricity to reduce costs," Mr. Hassinger says. "The rink has averaged about 20 hours of use a day since it opened in January."

Two Zamboni machines maintain the surface of the main rink, and a garden tractor has been converted to a little Zamboni for the studio rink. The tractor was designed for Penn State at the ice rink of Bowling Green University.

Mr. Hassinger and the other Zamboni drivers clean the main rink seven or eight times a day. Sometimes they dry cut the ice — shave off snow without putting down water — but usually they put down a thin layer of 180-degree-Fahrenheit

water that freezes and becomes the new surface.

The Zamboni machine was invented by Frank Zamboni in the late 1940s. A blade scrapes the ice while augers move the scrapings to a holding tank. At the same time, the machine lays water on the ice, which is then smoothed over by a cloth strip.

The studio rink, with less than one-fifth the area of the main rink, offers different problems. Besides needing the special tractor, the rink does not have a refrigeration unit.

Cold air is recirculated to keep the ice temperature as stable as possible, but frost does form on the ice surface. The temperature in the room itself can rise two or three degrees if a door stays open for even a few minutes.

Mr. Hassinger says ice temperature is usually about 19 degrees for figure skating and 16 degrees for hockey. Temperature changes in the main rink take about two hours and are planned in advance to save electricity.

The rink is an auxiliary enterprise of the College of Health, Physical Education and Recreation. It operates on income from admissions and group rentals.

Rink manager Larry Fies says the rink will stay open throughout the spring and summer for all area skating enthusiasts. He stresses that the rink is a facility for the whole community, not just the University.

Dean Walters

(Continued from page 1)

officer of The American Research Institute for the Arts and has been chairman of the Caucus on the Arts in Higher Education since 1978. In addition, he was president of the U.S. Institute for Theatre Technology and is still a member of its board of directors. He was chairman of the founding committee and first president of the University and College Theatre Association.

Dean Walters developed an internship program in auditorium management to which the Republic of China, Taiwan, sent students for training. Last year, Dean Walters acted as a consultant to the Ministry of Education in Taiwan for the establishment of a new fine arts college. He will return to Taipei in August in connection with this project.

In May, he was an invited discussion

leader at an international conference in Florence on professional education and career entry of artists, sponsored by the International Council of Fine Arts Deans.

A native of Alabama, Dean Walters earned his B.S. in English literature at Troy State University and his Ph.D. in English literature at the University of Wisconsin-Madison. Western Reserve University granted him an M.F.A. in drama and a Ph.D. in literature and drama.

A Fellow of the American Theatre Association and of the U.S. Institute of Theatre Technology, Dean Walters served on Pennsylvania's Council on the Arts and was honored for his contributions to education by a Governor's Citation. This spring he was made an honorary member of the Pennsylvania-Delaware Chapter of the American Society of Landscape Architects.

He and Mrs. Walters plan to move to the Jacksonville, Fla., area.

Calendar Conversion

(Continued from page 5)

review and approval function with regard to curricular and student program changes. The Academic and Physical Planning Committee will be involved in the facilities analysis which will be conducted by the Registrar's Office in conjunction with the Office of the Vice President for Business. Input on other issues will be requested as needs arise.

The *Calendar Conversion Council* will continue in its role of coordinating and expediting the conversion process. Activities currently defined and underway within the Council are:

- To assist the academic units by acting as a primary distribution point for course materials developed by the academic units;
- To assist the Office of the Registrar in conducting the facilities adequacy studies;
- To develop instructional workload analyses of the academic units, and to later assist in evaluating personnel requirements, as requested, in the budget review hearings;
- To develop recommendations on sabbatical leave policies for faculty members, as well as recommendations on the weeks of service expected of faculty members under the semester calendar.

These recommendations will be made in consultation with appropriate offices around the University;

- To develop alternative concepts and initial policy recommendations for implementing a summer session within the University. A Standing Committee of the Calendar Conversion Council will have continuing responsibilities in this area.

The President and the Provost will be consulted and kept continuously informed with regard to the progress of calendar conversion. The results of the facilities analyses will be presented to them. Recommendations with regard to personnel requirements will be considered as part of the budget review process in the fall and winter terms of 1982-83.

The Office of the University Registrar will conduct analyses of classroom and laboratory facilities at University Park and will be assisted in that study by other University offices. Results of the analyses and recommendations for possible changes in facilities will be made in the spring of 1982. Computer software capabilities used in the facilities analysis will be made available to other locations of the University for similar analysis there.

There are many other organizations, not shown on this schedule, which will play an important part in the conversion process.

— *Management Services* will be required to make significant changes to the processing of student data under the semester calendar. Management Services also will be expected to assist the Registrar in the facilities analysis.

— The *Publications Office* has been requested to modify the publishing schedule for degree catalogs for the 1983-84 academic year. The Associate Degree Catalog and the Baccalaureate Degree Catalog are to be published by Nov. 7, 1982, and the Graduate Catalog will be published by March 1, 1983.

(62-2) Grants for Engineering Research Equipment are available from the National Science Foundation either as "permanent equipment on regular research grants" or through "proposals exclusively for research equipment at institutions of higher education." The objective of the equipment grant is to "improve the quality or broaden the scope of the research which will be conducted." There are no proposal deadlines but a special effort is made to process proposals received during September and October. (Ref. NSF 81-31)

(62-2) Opportunities to teach abroad and to attend seminars abroad are available under the Fulbright Teacher Exchange program of the U.S. Department of Education. Exchanges are currently conducted with the United Kingdom, Germany, France, Switzerland, Denmark, Canada, and New Zealand. Applications are due between Sept. 1 and Nov. 1, 1981. For brochure and application call (202-245-9700), the Teacher Exchange Branch of Education. (Ref. ED announcement)

Dr. Toombs

higher education. Current projects include an NSF-sponsored study of institutes and centers connected with universities and a study of administrators' career patterns. Researchers at the Center also are exploring regional affiliations among community colleges and four-year institutions.

Dr. Toombs was a visiting scholar at the University of London's Institute of Education during the 1980-81 year. From 1977 to 1979, he was in charge of Penn State's higher education program.

He joined the Penn State faculty in 1971, following four years on the staff of the University of Michigan's Rackham School of Graduate Studies. He had previously been affiliated with Drexel University, first as associate professor of sociology and later as dean of men.

Dr. Toombs received a bachelor's

degree in history and biology from West Chester State College in 1942. He holds a master's degree from the University of Pennsylvania in history, and did additional work there in sociology. His Ph.D., in higher education, is from the University of Michigan. He also has studied at the Harvard Graduate School of Business's Institute for College Administrators, the U.S. Navy's Postgraduate Intelligence School and the University of Pennsylvania's Wharton Evening School.

In recent years, Dr. Toombs' research has been primarily in the areas of faculty career change, counseling and brokering centers for adults and academic program development. He and researchers from the University's Commonwealth Educational system are presently engaged in a Kellogg Foundation study of continuing education for the professions.

Dr. Toombs is active in the American Educational Research Association and the Association for Institutional Research.

Penn State Intercom

Board to seek Pres. Oswald's 1983 successor

The University's Trustees have authorized establishment of a Trustee Presidential Selection Committee to recommend to the Board of Trustees a successor to President John W. Oswald. Dr. Oswald announced last weekend that he will retire when his current contract expires June 30, 1983.

The committee, whose members will be Trustees, will develop and implement criteria and procedures "to ensure breadth, equal opportunity, timeliness, confidentiality, and appropriate University community involvement in the search process."

"Its main duty will be to recommend a final candidate to the Board of Trustees," Board President Quentin Wood said.

Mr. Wood said he would appoint members to the committee prior to the next Board meeting in September, "and possibly within the next two weeks." Dr. Oswald, at his own request, has been excused from serving on the committee and from consultation responsibilities in the appointment of the committee. (Ordinarily, under Trustee bylaws, the University president serves on all special committees of the Board.)

In addition, said Mr. Wood, "I intend to recommend strongly to the Trustee Selection Committee that a University Presidential Search and Screen Committee be established, consisting of various representatives of the University community."

Those representatives, he said, would include "faculty members, academic deans, Commonwealth Campus directors, students and alumni. Up to half

President John W. Oswald

of the committee's members would be faculty members.

"I would hope that names of candidates for the Search and Screen Committee could be obtained from the various groups and committee members appointed by December, 1981," Mr. Wood said.

The Search and Screen Committee, he added, should complete its work by May, 1982. The Trustee Selection Committee will make a final recommendation to the Board in November, 1982.

Dr. Oswald told the Trustees at a regular meeting on the Ogozt Campus the period at Penn State "has been one of the most rewarding in my lifetime, and in many ways I shall miss working with my colleagues on the staff and you on the Trustees most deeply.

"Since 1957, however, I have been actively involved in major academic-administrative posts at three major state universities, and in October of

(Continued on page 2)

Board adopts 1981-82 budget; hears temporary housing plans

University Trustees have adopted an operating budget for the fiscal year 1981-82.

It is based on the appropriation level for Penn State approved by the Legislature and signed by Governor Thornburgh on July 1. The appropriation increase over last year will be \$6.726 million or 5.3 percent.

"We had hoped for a higher level of increase, but we recognize the heavy demands on the State's resources," said Dr. John W. Oswald, president of the University.

"While the overall state budget increase is 5 percent, the University received a 5.5 percent increase in all key line items except medical education and student aid."

Dr. Oswald further noted that "inflationary cost increases and the fact that State appropriations have not kept pace with inflation have necessitated the development of an austere budget which meets only the highest priority needs of the University.

"It is apparent that the University must continue to seek economies in all of its areas of operation. In this budget, we have made internal reductions and reallocations of \$2.2 million, bringing the 10-year total to almost \$26 million."

The economies are being made, he added, at a time when Penn State is experiencing record enrollments. "For the fall term of 1981," he said, "the University expects the record level of enrollments from last year to hold up and possibly be exceeded."

On the income side, he continued, the University has added \$1.4 million to its budget from increases in indirect cost recovery, sales and service, and investment income, and nearly \$3.5 million from enrollment changes.

On the expenditure side of the budget, the largest amounts by far are devoted to salary adjustments for faculty and staff members, and for related staff benefits, the largely mandated costs which continue to increase rapidly, Dr. Oswald said.

As is noted in the Trustee docket: "The University has placed a high priority on highly justified salary adjustments for faculty and staff members. The recommended salary adjustments for all employees not covered

by negotiated contracts represent an approximate 8 percent increase over the 1980-81 filled position salary base.

Portions of these funds will be used for basic salary increments, for merit increases, and for promotions.

"Some additional funds have been provided, (1) where extreme market conditions exist; (2) for certain individual equity considerations; and (3) as a continuing effort to correct differences that exist between our Commonwealth Campuses plus Behrend College and respective branches of other comparable public universities. The overall 8 percent increase in the salary budget base, however, does not constitute an automatic 8 percent increase for any individual or class of employees."

Priority also was placed on providing additional faculty positions in those academic colleges and departments where there is the greatest student demand. This is essential to maintain quality academic offerings in those areas.

Funding of this priority came in part from new funds, from reallocation of funds within these same academic units or from elsewhere in the University, and by making positions that were temporary last year into permanent positions. In balancing this all out, the actual number of faculty after the additions and subtractions throughout the University was reduced by seven.

Dr. Oswald further noted that, in the budget request submitted initially to the state last September, the University acknowledged the necessity of students sharing to some degree with the State the increased costs of education. Therefore, at that time, a 5 percent increase in tuition was proposed.

"It is apparent now," said Dr. Oswald, "that an additional tuition rate increase of approximately 7.6 percent beyond the 5 percent already included in the appropriation request is necessary."

The new income needed to balance the budget comes almost exactly one-half from the increase in tuition rates, and the other half primarily from the State, but also from anticipated additional students, reimbursement for indirect costs of research, and investment income. Over the recent years the general funds budget, which supports the basic educational

(Continued on page 2)

At Shenango Valley

Charles Bursley named acting director

Dr. Charles R. Bursley has been named acting director of the Shenango Valley Campus. He succeeds Dr. Eric R. Birdsall, who will continue his duties as a member of the Shenango Valley faculty and associate director for academic affairs.

"In his teaching and research — and particularly in his involvement in Penn State's Marine Sciences Program —

Dr. Bursley has consistently displayed a high regard for excellence," President Oswald said, in announcing the appointment.

"The search for a permanent director has been re-opened, and a search committee is being formed. It will be operational within the next several weeks. We expect to have a permanent director at the Campus as soon as possible, hopefully by Jan. 1."

Dr. Bursley has been active in the University's Marine Sciences Program since it was initiated 10 years ago. Through that program, students live and work for one 10-week term at the Marine Science Consortium field station at Wallops Station, Va. They study oceanography, coastal geology and biology in courses emphasizing field and laboratory work.

Dr. Bursley also teaches anatomy and physiology to students from the Sharon School of Nursing, through a cooperative arrangement between that institution and the Shenango Valley Campus.

A native of Muskegon, Mich., he holds a bachelor's degree in biology from Kalamazoo College. His master's degree in biology and Ph.D. in zoology are from Michigan State University.

(Continued on page 2)

Dr. Charles R. Bursley

New fund to enrich Museum of Art

A Museum of Art Enrichment Fund has been established at the University to embellish the programs and offerings of the University's museum.

The fund has an initial principal of \$400,000 from private gifts and an ultimate goal of \$2 million, to be met by gifts from interested individuals and organizations.

"Through this fund, we hope to assemble outstanding traveling exhibitions of art and offer seminars and other educational experiences for students," said Dr. Walter H. Walters, dean of the College of Arts and Architecture.

Dean Walters said the monies also will be used to sponsor guest lecturers, special consultants and curatorial assistance. In addition, the fund will help to provide for proper conservation of art pieces and will

cover special preparation expenses, such as catalogs.

"We expect to reach a much wider audience, both among students and other groups, with the help of this fund," Dean Walters added.

All fund expenditures will support the museum's educational and cultural purposes, and conform to University policy. The Museum's director will approve all expenditures with the concurrence of the director of University Art Services.

All expenditures will be made only from fund earnings. Earnings not spent at the close of each fiscal year will either be retained for use the following year or added to the principal, according to the request of the dean of the College of Arts and Architecture.

Trustees adopt budget . . .

(Continued from page 1)

programs of the University, has been supported about 50-50 between State appropriation and tuition income.

"The tuition increases are essential to maintain quality in our educational programs in view of continuing inflation and because the appropriation is less than requested," Dr. Oswald said.

Three additional tuition policy actions are recommended:

- First, because of the maturing four-year status of the Behrend College, the undergraduate tuition rate for students there will be increased over a three-year period to the level of undergraduate tuition at University Park. This will require an increase of \$261, or 18.4 percent, for the 1981-82 year;
- Second, it is proposed that the tuition rate for graduate students at the Behrend College, the Capitol Campus, and the Radnor Center be increased to the level of undergraduate tuition at University Park. This will be accomplished by an increase of \$255, or 16 percent, for 1981-82; and
- Third, as the last step of a multi-year plan to bring the tuition rate for undergraduate students at the Capitol Campus to the level of undergraduate tuition at University Park, an increase of \$255, or 16 percent, is proposed.

Effective with the fall term at the University Park Campus, undergraduate students who are Pennsylvania residents will pay \$207 more a year for tuition, an annual increase from \$1,641 to \$1,848. At the Behrend College the increase will be \$261 per year and at other Penn State campuses, the increase will be from \$1,416 to \$1,593. Tuition at the Capitol Campus will be increased by \$255 to \$1,848 a year (the same as at University Park).

The tuition increase for out-of-state undergraduate students at all locations will be \$144, to \$3,711 per year.

In-state graduate students will pay \$219 more at University Park and \$255 more at all other locations. Out-of-state graduate students will pay \$438 more per year at all locations.

The rates for in-state graduate students will be \$1,968 at University Park and at the Milton S. Hershey Medical Center, and \$1,848 at all other locations. Out-of-state graduate students will pay \$3,936 at all campuses.

Annual tuition rates are based on full-time attendance for three of the four annual terms.

. . . and hear housing plans

Because freshman enrollments have been higher than expected, the University will have to provide temporary housing for a number of students at University Park this fall, Trustees have been told.

Vice President for Business Ralph E. Zilly said, however, the University is taking steps to minimize the problem.

"In January, the anticipated fall term enrollment at University Park was 33,500, or an increase of 796 students over the previous year's fall term," Mr. Zilly said. "Fall term freshman admissions were targeted at 4,200, the 1980 level."

The 4,200 figure included 800 freshmen admitted to Penn State at the beginning of the 1981 summer term.

Mr. Zilly said, however, that admissions officers noted in March that freshman acceptances to offers of admission were running higher than usual and might end in exceeding the quota, possibly by as many as 200.

Last month, he added, admissions officers said they were receiving far fewer freshman cancellations this year than last. At that time, they concluded that fall term freshman enrollment — including summer term admissions — could be approximately 4,600, or 200 above the March estimates.

"University policy states that all freshmen must be accommodated in residence halls on campus," Mr. Zilly said. "Considering cancellations, we now

Tuition for in-state medical students at the Hershey Medical Center will be increased from \$5,550 to \$5,829, a 5 percent increase. Out-of-state medical students will pay \$9,105.

"A modest 5 percent increase is proposed," Dr. Oswald said. "Penn State's current tuition level for medical students is among the highest in the nation for public medical schools."

Graduate students at Hershey will pay University Park rates.

The College of Medicine will receive no additional state funds in 1981-82, Dr. Oswald noted. The college has been able to balance its increased costs by the modest increase in tuition, income from the Hershey endowment fund, income from the general purpose fund and payments for services provided by the hospital and by College of Medicine physicians and staff.

No State or tuition funds are used to support the Milton S. Hershey Medical Center Hospital or the University's auxiliary enterprises such as residence halls, food service, intercollegiate athletics and the book stores. All are self-supporting.

Of the total Medical Center operating budget of \$94,672,000, only 3.6 percent comes from State funds.

The University's general funds portion of the operating budget totals \$261 million, or about half of the University's total operating budget. It supports the University's basic programs of teaching, research and public service.

The total University operating budget for 1981-82, including the general funds portion, as well as all auxiliary enterprises and estimated research grants and other funds, is approximately \$494 million. This is an increase of about 9.5 percent over last year's figure of \$451 million.

A total of almost \$134 million, or 28.4 percent, will come from State appropriations in 1981-82.

The remainder of the income side of the operating budget, in addition to student tuition, consists of income primarily from auxiliary enterprises such as residence halls, the hospital, and intercollegiate athletics, and from restricted funds, including research grants from the Federal government, foundations, industry and private sources.

believe that approximately 800 students will be housed in temporary quarters for the 1981 fall term. This is from 100 to 300 more temporary quarters than we had originally anticipated."

He said the University has taken, or is considering, the following courses of action to minimize the problem:

- All freshman admissions offers to University Park have been closed, responses to outstanding offers returned after the deadline will not be accepted.

- A letter has been sent to all upperclassmen who hold housing contracts offering to release them from the contracts.

- Consideration is being given to limiting winter term 1981 admissions so as not to prolong the need for temporary housing.

- Students from the State College area are being asked to live at home.

Mr. Zilly noted that the problem is confined to University Park and will not affect students at other campuses.

Remaining news from the Trustee docket will be reported in the next issue of INTERCOM, July 23.

President Oswald

(Continued from page 1)

1982 I will reach the age of 65," he said. "Thus, the time clearly has come for new and vital leadership."

"I give this official notification at this time after discussions with Mr. Wood, so as to permit ample time to allow the Board to proceed with the necessary steps and processes to initiate and complete the search for a new president and the ultimate appointment of my successor."

He told the Board he would continue to work "with all that is a part of me" to maintain and strengthen Penn State during his remaining years in office.

He told the Trustees, "We are all proud of the work we did together as we planned for the 1980s, and view with pride and optimism the resulting document known as the 'Perspective on the '80s.' I am pleased at the progress we are making in implementing this most important document and I know that the University will continue to do so."

"I assure you that I have no lame duck cells in my body as I approach the next two years," he said.

Mr. Wood said Dr. Oswald's announcement "marks a point in time which many of us regret to see pass."

"On behalf of this Board," he added, "let me immediately express our appreciation for the indelible contribution you have made on the growth, development and quality of Penn State since 1970."

At the time of his retirement, Dr. Oswald will have awarded diplomas to one-half of all Penn State graduates.

Dr. Oswald, who is 63, is Penn State's 13th president. He came to the University in 1970 from the University of California at Berkeley, where he was executive vice-president, that university's number two position. From 1963 to 1968, he was president of the University of Kentucky.

A plant pathologist, he has conducted extensive research on plant viruses and virus diseases. He discovered a new disease of cereal crops, called the barley yellow dwarf, known now to be prevalent throughout the world.

Ogontz center to open this fall

An on-campus Conference Center will open this fall at the University's Ogontz Campus.

Dr. Robert A. Bernoff, campus director, told Trustees that renovations are currently underway on the structure formerly known as the "Science Building," one of the original buildings given to Penn State by Ogontz.

School-owner Abby Sutherland in 1950. For a time, it housed laboratories. More recently, it was the site of the campus Safety/Security Department and Army ROTC, both of which have been moved to other buildings.

The newly renovated facility will be used by both resident instruction and continuing education departments. The latter plans to make the center headquarters for local seminars for managers and for special interest courses for school teachers. The building also will provide additional classroom space for the evening school program.

Dr. Bursey

(Continued from page 1)

In 1969-70, he held a one-year National Institutes of Health post-doctoral fellowship at the University of Miami in Florida. He was affiliated with the university's School of Marine and Atmospheric Science.

He joined Penn State's Shenango Valley Campus as assistant professor of biology in 1970 and was promoted to associate professor in 1975. Dr. Bursey's research is chiefly on invertebrates, and he has published widely in that area.

Born in Minneapolis, he holds a bachelor's degree in botany with a minor in history from DePaul University in Greencastle, Ind. At DePaul, he was elected to Phi Beta Kappa and was captain of the football team.

His Ph.D. was conferred by the University of California at Davis, following research and study at both the Davis and Berkeley campuses.

During World War II, Dr. Oswald served in the U.S. Navy as a PT boat captain and a divisional commander in the Mediterranean. He received the Navy Commendation Medal.

Upon his release from active duty, he returned to the Davis Campus and began a career that included service in a number of academic and administrative posts at the Davis and Berkeley campuses. In 1953-54, he was a Fulbright research grantee at the Agricultural University of The Netherlands.

Dr. Oswald has been active in a number of national professional organizations over the years. He was formerly chairman of the American Council on Education and president of the Association of American Universities. He was also president of the Pennsylvania Association of Colleges and Universities.

In 1974, when the People's Republic of China was still closed to most Western visitors, he headed a delegation of 12 Penn State faculty members on a three-week study tour there.

Dr. Oswald and his wife, Rose, have two daughters and a son. Elizabeth, a 1968 graduate of Vassar College, is married to Michael Browne, Insurance Commissioner, Commonwealth of Pennsylvania. Nancy is a graduate of Stanford University, and John Jr., of Cornell.

Dr. Oswald said he hopes to devote time to his work in plant pathology and to do what he can to support higher education, following his retirement. He will move to Philadelphia, where he recently purchased a house, and will maintain an office at the Ogontz Campus.

In addition, the center will be made available for use by faculty members, professional organizations and community groups, Dr. Bernoff added.

An overview of the campus's 30-year history and growth and an update on educational programs at Ogontz also were part of Dr. Bernoff presentation. He cited Ogontz as a major supplier of upper division students to University Park and commended the quality of the campus's student activities program. He also said Ogontz has the largest evening school program — and the greatest number of off-campus credit centers and public seminars for business and industry in the Penn State system.

New courses of study added to undergraduate programs

New courses of study have been added to several University undergraduate programs.

Provost Eddy told Trustees that no additional funds are required because the new options have been created through revisions to existing programs.

"As the world's needs change, so do the needs and goals of our students," he said. "These new options are designed to meet some of those needs and goals with more precision."

One new area of specialization, an option in music history and literature, has been added to the major leading to a bachelor of music degree.

While graduates may find employment in music publishing and similar fields, Dr. Eddy said, the program is primarily intended to prepare students for graduate-level study and college-level teaching.

"This program will offer the musician-scholar a chance to begin acquiring skills necessary for musicological research," he said.

It will consist of 130 credits, including substantial requirements in music theory, music history and literature, keyboard performance and foreign languages.

Opportunity also is provided for research in areas of special interest in a three-credit seminar.

The major in geography leading to a bachelor of science degree has been revised to include a fourth option — planning and applied geography. Existing options are cartography and remote sensing, and physical and general geography.

Dr. Eddy said the new option is designed for students seeking positions in urban and regional planning, and especially for those interested in planning in the public sector. It will also prepare students for graduate study.

The major in geography leading to a bachelor of arts degree also has been revised. It now includes two specialty areas, a general option — the existing major, with minor changes — and an economic and development geography option.

The latter is designed for students who intend to pursue careers in business and industry in economically developed nations and for those interested in Third World development problems.

Dr. Eddy said the two options would

give students greater opportunity to specialize in their academic work.

The major in art education has been revised to include two areas of specialization: art education for schools, the program now in existence, and art education for cultural and social agencies, a new option.

The change is being made, Dr. Eddy said, to accommodate today's emphasis on visual arts education in museums, galleries, art centers and social agencies.

The major in agricultural business, leading to an associate in science degree has been revised to include three options: general, animal production and crop production.

"These options should meet the needs of students who want to farm and those who want training directly in agricultural business," Dr. Eddy added.

Students will continue to take the first three terms of the major at selected Commonwealth Campuses; the second year of course work will still be offered at University Park.

The 800-level courses required previously in the major, however, have been replaced with corresponding, existing baccalaureate courses, to eliminate course duplication and to make it easier for students who wish to continue baccalaureate study in the field.

The major in anthropology has been revised to include two areas of specialization, general anthropology, the existing major, and medical anthropology, a new option.

"The field of medical anthropology is the most rapidly growing sub-discipline in modern anthropology," Dr. Eddy observed.

He said the new option will prepare students for careers in local, state, federal and volunteer health agencies, and for graduate study.

Students will examine the relationships among culture, human biology and health. They will be able to study, and gain laboratory and field experience in, human biology, cultural anthropology, quantitative methods and health planning and administration.

Practicum internships will be offered at the Hershey Medical Center, the National Institutes of Neurological Diseases and Blindness, and the Environmental Health Division of the U.S. Environmental Protection Agency.

better and has been nominated by his or her coach as eligible for the award.

A committee made up of the dean of the College of Health, Physical Education and Recreation, the University's representatives to the NCAA and AIAW, head coaches from women's and men's teams and the director of Intercollegiate Athletics will select the recipients.

The award will consist of cash, an inscribed plaque, and inscription of the recipients' names on permanent plaques in Recreation Building and White Hall. Awards will be made from the income generated by the fund principal, and the selection committee will set the award amount.

Contributions to the fund may be made by interested persons or organizations.

The flower garden behind Boucke Bldg. provides a perfect setting for summer studying.

Graduate assistants standards among Faculty Senate highlights

Ensuring teaching standards for graduate assistants and defining the role of the academic adviser were among several highlights of 1980-81 for the University Faculty Senate.

In presenting the annual chairman's report of Senate activities to Trustees, Dr. George W. Franz, assistant professor of history at the Delaware County Campus, said that "to insure quality teaching from the University's graduate assistants, teaching assistants will henceforth be required to attend teacher training programs."

He added that their competence in the understanding and use of spoken English will be evaluated. Those deemed deficient will receive training at the University's Center for the Study of English as a Second Language.

Dr. Franz, 1980-81 Senate chairman, said five changes were made this year in academic policies and procedures with respect to academic advising.

"The role of the adviser," he noted, "is defined as 'consultative in nature,' and the responsibility for deciding on course scheduling and program planning is placed with the student."

Other key activities during the past year included:

- Legislative action establishing procedures for Senate Council's recommendations to Provost Eddy on the establishment, reorganization and discontinuation of organizational units and areas;

- Legislative action modifying two areas of PS-23.

- A discussion of conversion from the term to an early semester calendar in Fall Term, 1983. During this discussion, reports were presented by representatives of 10 Senate committees which had

considered the effects of calendar conversion in their areas of responsibility.

"It is important to note," Dr. Franz said, "that the Senate's lengthy discussion of the conversion to an early semester calendar was the result of much study and input from many of the University's faculty members. As such, it played a significant role in assisting the University administration in planning for the calendar conversion."

Dr. Franz added that such discussion and input is characteristic of the Senate in all of its various activities, which included 12 legislative and 30 informational reports this past year.

"The Faculty Senate does much more than meet once a month," he explained. "For example, some committees — which seldom become involved in the monthly Senate meetings — work continuously behind the scenes."

Dr. Franz observed that two such committees are those on Academic and Athletic Standards, and Admissions, Records and Scheduling, both of which, he said, act to address the needs of students while considering the University's rules and regulations.

Other committees which add to the Senate's vitality, he noted, are the Faculty Rights and Responsibilities Committee and the Faculty Advisory Committee to the President.

"As exemplified by the work of these — and all 13 — Senate committees, the Senate has made progress this year in effectively exercising its advisory and consultative responsibilities," Dr. Franz said.

"The Senate's primary concern is helping to assure that academic quality be maintained and strengthened throughout the University."

News in Brief

McCoy Award set up

The Ernest B. McCoy Memorial Award has been established at the University to recognize a senior man and woman who have combined athletic participation with academic excellence.

The initial principal of the fund was received as gifts from friends, colleagues and family in memory of the late Dr. McCoy, dean of the College of Health, Physical Education and Recreation from 1952 to 1970.

Any graduating senior who actively participates in intercollegiate sports, has a cumulative grade point average of 3.0 or

Penn Staters

Dr. Richard C. Bradt, professor of ceramic science and engineering and head of the Department of Materials Science and Engineering, presented the introductory lecture at Science of Ceramics XI, a biennial European ceramics meeting held recently at Stenungsund, Sweden, under the sponsorship of the Swedish Ceramic Association.

The topic of his talk was "Problems and Possibilities with Cracks in Ceramics." Presented at the same meeting was a paper, "Creep of Silicon Carbide," co-written by Dr. Bradt and Dr. Leif Hermansson, of the Swedish Institute for Silicate Research, who has done postdoctoral work at Penn State.

While in Sweden, Dr. Bradt also visited and presented seminars at Chalmers University of Technology and the Swedish Institute for Silicate Research, both in Göteborg.

Recognized internationally for his work in the fracture mechanics of ceramic materials, Dr. Bradt received a 1980 Richard M. Fulrath Award for his studies of the relationship between the structure and mechanical behavior of ceramic materials. This award is given annually to one U.S. and three Japanese ceramic scientists.

Earlier this year, Dr. Bradt presented the keynote lecture at the 15th Basic Ceramics Meeting of the Japanese Ceramic Society at Nagoya, Japan. Earlier this month (July 15-17), he served as local coordinator for the International Symposium on the Fracture Mechanics of Glass, held this year at Penn State.

Dr. Ronald A. Chez, professor and chairman of the Department of Obstetrics and Gynecology at the Hershey Medical Center, has been named by Gov. Thornburgh to the Task Force on Special Supplemental Food Programs for Women, Infants and Children.

Dr. Laurence M. Demers, director of the Clinical Chemistry and Core Endocrine Laboratory at the Hershey Medical Center, has been awarded a Senior International Fellowship from the Fogarty International Center of the National Institutes of Health to study at Oxford in reproductive endocrinology.

Dr. John A. Dutton, professor of meteorology, has been appointed a member of the Committee on Atmospheric Sciences of the National Research Council, the operating agency of the National Academies of Science and Engineering.

The committee reviews the progress and development of national programs in the atmospheric sciences.

Dr. Turgay Ertekin, assistant professor of petroleum and natural gas engineering, was invited lecturer at the Colloquium on Methods of Heavy Oil Recovery in Caracas, Venezuela. The colloquium was sponsored by the University of Simon Bolivar and Venezuela Petroleum Technology Institute. Dr. Ertekin presented a series of lectures on non-thermal enhanced oil recovery research and compositional simulation of flow problems in porous media.

Dr. Peter R. Gould, professor of geography, presented seminars to the Department of Design of the Open University at Milton Keynes, England; to the Geographical Institute at Lisbon University in Portugal; and to the Department of Geography at Cambridge University in England.

H. Richard Hess, associate director of the Career Development and Placement Center, has been elected to a three-year term on the Board of Governors of the National College Placement Council. He will serve as the council's college representative from the Middle Atlantic Placement Association.

Dr. Charles A. Langston, assistant professor of geophysics, will receive ARCO Oil and Gas Company Outstanding Junior Faculty Award.

He is one of 20 young faculty members at as many of different universities who will receive this honor for the 1981-82 academic year.

Dr. Randolph J. Martin, associate professor of geophysics, has received the Boston College Alumni Association's Award for Excellence in recognition of his outstanding work in the field of geophysics.

He received his B.S. in geology at Boston College in 1964 and his M.S. and Ph.D. from Massachusetts Institute of Technology in 1968 and 1971, respectively. He served as a research associate at the University of Colorado, leaving there in 1978 to join the Penn State faculty. His current research focuses on the geophysical properties of rocks under crustal conditions.

Dr. Lloyd A. Morley, professor of mining engineering, has been elected a senior member of the Institute of Electrical and Electronics Engineers (IEEE). Only about 12 percent of the 200,000 members of IEEE have been accorded this honor. Dr. Morley is currently vice president of the society's Process Industry Department and chairman of the IEEE Second Mining Industry Technical Conference.

Dr. L.N. Mulay, professor of solid state science, presented a plenary lecture at a symposium on "Current Trends in Magnetism" in Delhi, India. Previously, he gave an invited lecture to the chemistry section of the 66th Indian Science Congress in Hyderabad, India.

Dr. Dennis J. Murphy, Extension safety specialist, has been named recipient of the Maynard Cole Award presented by the National Institute for Farm Safety "for his excellence in the field of agricultural safety."

The award is based on Dr. Murphy's farm safety research, "Relationships of Attitudes Toward Farm Safety Concepts and Farm Accident Involvement," which examined social and psychological aspects of agricultural safety.

Dr. G. Kenneth Nelson, professor of accounting, has been selected by the National Advisory Forum of Beta Alpha Psi to receive the society's 1981 Accountant of the Year Award.

The award was established to encourage chapters of Beta Alpha Psi, the national accounting honorary society, to honor their own outstanding accounting alumni members or honorary members in the areas of education, public accounting, and industrial or governmental accounting.

Dr. Nelson was graduated from the University of Pennsylvania with a bachelor's degree in accounting. He received a master's degree and his doctorate from the University of Illinois. He gained his CPA certification in Illinois.

He joined the Penn State faculty in 1950. From 1958 to 1976, he served as head of the Department of Accounting and Management Information Systems.

Dr. Robert D. Pashek, associate dean of the College of Business Administration and acting director of the Pennsylvania Transportation Institute, has been elected president of the Council of University Transportation Centers.

The Council is an association of the major transportation research institutes in the United States. Its members, in addition to Penn State, are MIT, University of California at Berkeley, Northwestern University, Texas A&M University, University of Texas—Austin,

University of North Carolina, and the University of Tennessee.

Associate members include the University of Pennsylvania, University of Kentucky, Oregon State University, University of Illinois Consortium, and the University of Virginia.

Richard Porter, registrar at the Museum of Art, has been elected national vice-chairman of the Registrars' Committee of the American Association of Museums (AAM).

He also serves on the Steering Committee of the recently formed Association of University and College Museums and Galleries as corresponding secretary. In this position, he will edit the final drafts of the Association's constitution and bylaws which he helped to prepare.

Dr. Stephen G. Simpson, associate professor of mathematics, recently returned from a month as visiting professor at the University of Paris, where he participated in research and gave a series of lectures titled "Independence Results in Finite Combinatorics." His visit was sponsored under a program funded by the French national science foundation.

Dr. Susan F. Weis, associate professor of home economics education, has been elected vice chairman of the Pennsylvania Advisory Council on Vocational Education. The council was established by federal legislation to review vocational education programs in the State, to identify problems and needs, and to make recommendations for improvement to the State Board of Education and the Department of Education. It is composed of representatives of business, industry, organized labor, education and the general public.

Dr. Joseph L. Wysocki, Extension family housing specialist, has been elected president-elect of the American Association of Housing Educators. In this role, he will serve as program chairman for the 1982 annual meeting to be held in Knoxville, Tennessee, at the same time as the World Energy Exposition.

Carpooler

Arthur Kunst would like to share driving from DuBois. He works from 8 a.m. to 5 p.m. in Hammond Building. Call either 863-2354 or 371-2945.

Ernest R. Weidhaas receives award

Ernest R. Weidhaas, assistant dean for Commonwealth Campuses in the College of Engineering, has been awarded the 1981 James H. McGraw Award in Engineering Technology Education.

Dean Weidhaas, the 32nd recipient of the award, was presented a citation and a cash gift at the 1981 annual meeting of the American Society for Engineering Education in San Francisco, June 21-25. He is the fourth Penn State to receive the award. The other recipients were: Harry Hammond, former dean of the College of Engineering, 1950; Kenneth Holderman, presently a member of the University's Board of Trustees, 1960; and Merritt A. Williamson, former dean of the College of Engineering, 1974.

The James H. McGraw Award in Engineering Technology is awarded to individuals for their outstanding contributions to the advancement of engineering technology education. The award is sponsored by the Gregg Division of the McGraw-Hill Book Company.

Dean Weidhaas helped to establish the Beaver, Delaware County, Fayette, Capitol and Shenango Valley Campuses. He has directed 12 associate degree programs at 18 campuses and has been

Dean Ernest R. Weidhaas

instrumental in establishing six new associate and five new baccalaureate programs, including innovative curricula in air pollution control, bio-medical equipment technology, nuclear engineering technology, solar heating and cooling technology, and most recently, railway engineering technology and telecommunications technology.

A frequent contributor to professional journals, Dean Weidhaas is the author of nine popular textbooks on architectural drafting and design, and numerous articles and workbooks. He holds B.S. and M.S. degrees in mechanical engineering from New York University.

Three honored for 'educational aids'

Three agricultural engineering specialists in the Cooperative Extension Service have received blue ribbon awards from the American Society of Agricultural Engineers "for development of noteworthy educational aids."

Recipients and awards, announced during the society's recent annual meeting in Orlando, Fla., are:

— **Dr. Dennis J. Murphy**, assistant professor of agricultural engineering extension, awards for three fire safety education publications — "Basic Guide Book," "Fire Protection in Your Community" and "Preventing Fires";

— **N. Henry Wooding Jr.**, professor of agricultural engineering extension, a blue ribbon for his publication, "Wastewater Management and Disposal for Milking Centers and Milk Handling Facilities"; and

— **James W. Garthe**, instructor in agricultural engineering extension, a blue ribbon for his slide set, "Alcohol Fuel Production: There's More to it Than You Think."

The competition is designed to

encourage specialists to strive for excellence in Extension activities through the interchange of ideas on successful educational methods and teaching techniques. The American Society of Agricultural Engineers, a professional and educational organization, includes more than 9,000 members from all 50 states and some 90 foreign countries.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Retirements

James D. Decker, associate professor of mechanical engineering, retired June 30, after 33 years with the University. He came to Penn State in 1948 as an instructor of mechanical engineering.

Prof. Decker—who earned his B.S. and M.S. degrees from the University of Michigan—has taught undergraduate courses in thermodynamics, fluid mechanics, heat transfer, gas dynamics, gas turbines, and rocket propulsion. His research interests include spot cooling, and controlled atmosphere combustion.

Besides his research and teaching duties, he has been active in a number of University, College and Department committees. He served three years on the Faculty Senate, was chairman of the Academic Engineering Department curriculum committee, the Engineering Library committee, and the College Academic Committee for the BDR II requirements.

Prof. Decker has been an engineering extension lecturer on rocket propulsion at

James A. Lauck, research machinist in engineering shop services, will retire from the University Sept. 2 after 29 years of service.

Mr. Lauck began working in engineering shop services in September, 1952. The engineering shop in Hammond carries out the mechanical work necessary for various research projects sponsored by colleges and departments throughout the University.

Mr. Lauck remembers, in particular, a project he worked on with a team of mechanical engineering students who designed and built a compact car, named "Uv Duck," which placed 14th out of 60 entries in the 1972 Urban Vehicle Design competition held in Ann Arbor, Mich.

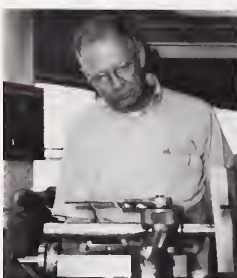

Although Mr. Lauck has been at Penn State for 29 years, one member of his family has outdone him in service to the University. His wife, Inez, a transcript supervisor at the Records Office in Shields Building, retired from the University July 1; she had been with the University

James D. Decker

Curtiss-Wright and on gas turbines at AVCO-Lycoming. He has been a consultant for Consumers' Research, Inc., Allegheny Valve Co., Ervite Corp., and HRB-Singer.

He served as president of the University Park section of the American Rocket Society and was chairman of the Central Pennsylvania Section of the American Society of Mechanical Engineers. He is a member of Tau Beta Pi and Pi Tau Sigma.

James A. Lauck

for 35 years.

Mr. and Mrs. Lauck will remain in their home in Pine Grove Mills, where Mr. Lauck plans to do a lot of lawn mowing this summer. The couple plans to take a winter vacation in Pompano Beach, Fla.

who led the UMW from 1973 to 1979, initiated many reforms aimed at returning control of the union to rank-and-file miners.

Based on UMW papers, interviews with union staff and press conferences, *The Miners' Fight for Democracy* is an account of the early idealism of Miller's administration, the steps taken against the corruption of earlier administrations and organizational changes to allow mine workers a say in the running of the union and the bargaining process. The book also describes some of the problems that accompanied the changes—several long nation-wide strikes, an epidemic of wildcat strikes and political factionalism.

Mr. Clark, who is responsible for Penn State's labor education activities in western Pennsylvania, served as a research assistant for the UMW. He holds a master's degree from the IRL school at Cornell.

who did not receive a copy of the annual report may obtain one by contacting the Employee Benefits Division, Room 133 Willard Building (865-1473).

Promotions

Administrative

Kenneth S. Babe to assistant vice president—audits and internal control in Controller's Office.

Staff Exempt

R. Donald Adam to budget administration coordinator in Planning and Budget.

Charles H. Bush Jr. to maintenance foreman at Schuylkill.

Thomas C. Coleman to assistant director—continuing education at Beaver.

Evelyn F. Homan to senior information planning specialist in Planning and Budget.

Rita Munchinski to administrative assistant in Liberal Arts.

Donna L. Poorman to area representative in Continuing Education.

Richard D. Sheedert to senior research and planning associate in Planning and Budget.

Don E. Stewart to laboratory supervisor in Science.

Staff Non-Exempt

Laurel J. Compton to research technician at Hershey.

Michael A. Davis to research aide in Agriculture.

Thomas E. Herrington to computer operator in Management Services.

Angela MacMillan to coordinator, laboratory support services at Hershey.

Cynthia K. Nafe to research technician at Hershey.

Clerical

Sandra E. Andrews to secretary B in Agriculture.

Karen A. Bratton to information processing clerk in Libraries.

Jane M. Cross to senior teller in Controller's Office.

Susan Donley to secretary B in Housing and Food Services.

Patricia J. Gearhart to teller in Controller's Office.

Wava A. Grove to accounting clerk in Controller's Office.

Thelma Heffner to film scheduler in Continuing Education.

Carol A. Helt to secretary A at Hershey.

Marlene M. Hopkins to secretary B—continuing education at Shenango Valley.

Kathy M. Kleinfelter to clerk A, central processing at Hershey.

Shirley A. Marks to secretary B at Hershey.

Judy K. McCormick to secretary A in Agriculture.

Lisa Meyers to secretary C in Human Development.

V. Diane Mullen to registration clerk in Continuing Education.

Karen G. Penland to clerk typist A in Engineering.

Shirley A. Raker to secretary B in Public Information.

Maxine L. Reif to clerk A, central processing at Hershey.

Paulette A. Schall to data preparation operator B in Management Services.

Darlene Stiles to accounting clerk at Schuylkill.

Suanne J. Warner to secretary C in Education.

Teresa A. Wilson to clerk typist A in Education.

Technical Service

Samuel C. Emigh to storeroom clerk—stock selector in Business Services.

Appointments

Roger J. Cadieux as assistant professor of psychiatry at Hershey. B.S., Northwestern (La.) State U.; M.D., Louisiana State U. Resident in Psychiatry, Hershey.

Ernest K. Manders as assistant professor of surgery at Hershey. A.B., Harvard College; M.D., Harvard Medical School; general and plastic surgery residencies, U. of Michigan Affiliated Hospital. Resident in plastic surgery, University Hospital, Ann Arbor, Mich.

John F. Mitchell as assistant professor of

psychiatry at Hershey. M.D., Creighton Medical School, Omaha, Neb. Resident in Psychiatry, Hershey. Staff physician, Sexual Dysfunctions Clinic, Hershey.

Steven H. Sherman as assistant professor of surgery (ophthalmology) at Hershey. B.A., Boston U.; M.D., U. of Vermont. Resident in neurology, Albert Einstein College of Medicine. Private practice, retina and vitreous surgery, Freehold, N.J.

Joseph S. Smith as assistant professor of food science at University Park. B.S., Brescia College, M.S., Kansas State U.; Ph.D., PSU. Graduate assistant, PSU.

Obituaries

Dr. Walter S. Beach, professor emeritus of botany, died July 19 in Florida. He was 91.

Dr. Beach, who joined the Penn State faculty in 1918, retired in 1955. He held a B.S. in agriculture from the University of Minnesota, M.S. in plant pathology from Michigan State College, and a Ph.D. in botany from the University of Illinois.

Dr. Grant W. Smith, professor emeritus of chemistry, died July 19 at his home in State College. He was 74.

Dr. Smith, who retired in 1967, received the B.A. degree from Grinnell College and the Ph.D. from the University of Minnesota. Prior to joining the University faculty in 1950, he served on the faculties of Itasca Junior College, Grinnell College, University of Kansas City, and the University of North Dakota. While employed by B. F. Goodrich, Dr. Smith was awarded five patents in the area of polyvinyl latex.

Staff Development

Twenty University clerical employees from the Capitol and Mont Alto Campuses completed a special two-week Clerical Enrichment program. This was the first time the program was offered to branch

campus personnel. Designed to familiarize clerical employees with University policy and organization, to identify work situation problem areas in the office, and to begin the initial stages of professional office training and preparation for career development, the

Book shelf

Paul F. Clark, instructor in the Department of Labor Studies, is the author of a book to be published in August by IRL Publications, a division of the New York State School of Industrial and Labor Relations at Cornell University.

In his book, *The Miners' Fight for Democracy: Arnold Miller and the Reform of the United Mine Workers*, Mr. Clark outlines the progress of a reform drive during the 1970s in the United Mine Workers (UMW) union.

The reform movement of which Mr. Clark writes was launched by a group within the UMW, the Miners for Democracy (MFD), after the murder of union leader Jack Yablonski. In 1972, MFD candidate Arnold Miller unseated UMW president Tony Boyle, then under grand jury indictment. Miller, a disabled miner

Friday, July 24

Commonplace Theatre, *Foxes*, 7:30 p.m.; *The Rose*, 9:20 p.m., Room 112 Kern.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre.
HUB Movie, *Dial M for Murder*, 9:30 p.m., HUB Lawn.
Interlana Folk Dancing, 7:30 p.m., HUB Ballroom.

Saturday, July 25

France-Cinema, *Weir, Picnic at Hanging Rock*, 7 and 9 p.m., Room 112 Kern.
Nittany Mountain Summer Festival, Mid Tolls, 7:15 and 9:30 p.m., Eisenhower Auditorium.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre.

Sunday, July 26

Commonplace Theatre, *Foxes*, 7:30 p.m.; *The Rose*, 9:20 p.m., Room 112 Kern.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 7:30 p.m., The Pavilion Theatre.

Monday, July 27

Deadline for August graduates to deliver theses to Graduate School and for departments to certify to Graduate School completion of required papers for August graduates.
France-Cinema, *Weir, Picnic at Hanging Rock*, 7 and 9 p.m., Room 112 Kern.

Tuesday, July 28

First day to sign Fall Term NDSL and University Long Term Loans, Room 108 Shields.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre.
Aging Workshop — "Physical Changes of Aging," 7-8 p.m., Nursing Consultation Center, Human Development South. Coordinator: Dr. Jesse Igou, assistant professor of nursing. Registration and information, 863-2200 or 863-2225. Open to public.

Wednesday, July 29

GSA Explazagana Concert, The Arthur Goldstein Jazz Trio, 7 p.m., Fisher Plaza.
Commons Concert, Whetstone Run, noon, Kern Lobby.
Shaver's Creek Environmental Center, reptile and amphibian program, 6-7 p.m., Spring Creek Park.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre.

Thursday, July 30

Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 8 p.m., The Playhouse.
GSA Explazagana Film, Warner Brothers Animation and W.C. Fields shorts, dusk, Fisher Plaza.
Aging Workshop — "Social Aspects of Aging," 7-8 p.m., Nursing Consultation Center, Human Development South. Coordinator: Dr. Jesse Igou, assistant professor of nursing. Registration and information, 863-2200 and 863-2225.
Nursing Consultation Center, "Learning to Relax" series, first session, 3:30-5 p.m. Registration and information, 863-2200. Series continues August 6, 13 and 27, 3:30-4:30 p.m.

Friday, July 31

Commonplace Theatre, *Take the Money and Run*, 7:30 p.m.; *Network*, 9 p.m., Room 112 Kern.
HUB Movie, *Evening with Stan Trek*, 9:30 p.m., HUB Lawn.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 8 p.m., The Playhouse.
Interlana Folk Dancing, 7:30 p.m., HUB Ballroom.

Saturday, August 1

France-Cinema, Bertolucci, *Last Tango in Paris*, 7 and 9 p.m., Room 112 Kern.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 8 p.m., The Playhouse.
Shaver's Creek Environmental Center, Traditional Folk Music Festival with Caroline and Sandy Paton of Folk Legacy Records. 2 p.m. — Children's get-together (free) at Shaver's Creek, 8 p.m. — Family Concert at University Baptist & Brethren Church.

Sunday, August 2

Festival Theatre, Ernest Thompson, *On Golden Pond*, 7:30 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 7:30 p.m., The Playhouse.
Commonplace Theatre, *Take the Money and*

Run, 7:30 p.m.; *Network*, 9 p.m., Room 112 Kern.

Monday, August 3

France-Cinema, Bertolucci, *Last Tango in Paris*, 7 and 9 p.m., Room 112 Kern.
Interdisciplinary Values Symposium, 7:30 p.m., Room 101 Kern.

Tuesday, August 4

Late drop deadline (10 week Summer Term). Red Cross Bloodmobile, 10 a.m.-4 p.m., Walnut Bldg.
Phi Delta Kappa Summer Seminar Series, 2:20 p.m., Room 101 Kern. Robert Schell, global education, Pa. Dept. of Ed., on "Wiping Out Boundary Lines: Global Education."
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 8 p.m., The Playhouse.
Aging Workshop — "Psychological Aspects of Aging," 7-8 p.m., Nursing Consultation Center, Human Development South. Coordinator: Dr. Jesse Igou, assistant professor of nursing. Registration and information, 863-2200 or 863-2225. Open to public.

Wednesday, August 5

Last day to sign Summer NDSL and University Long Term Loans, Room 108 Shields.
GSA Explazagana Concert, The Hipsters, 7 p.m., Fisher Plaza.
Commons Concert, noon, Kern Lobby.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 8 p.m., The Playhouse.

Thursday, August 6

GSA Explazagana Film, *Bad Day at Black Rock*, (Spencer Tracy, Lee Marvin), dusk, Fisher Plaza.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 8 p.m., The Playhouse.
Aging Workshop — "Aging and the Environment," 7-8 p.m., Nursing Consultation Center, Human Development South. Coordinator: Dr. Jesse Igou, assistant professor of nursing. Registration and information, 863-2200 or 863-2225.
Nursing Consultation Center, "Learning to Relax" series, second meeting, 3:30-4:30 p.m.

Friday, August 7

Commonplace Theatre, *Kentucky Fried Movie*, 7:30 p.m.; *All That Jazz*, 9:15 p.m., Room 112 Kern.
HUB Movie, *The Odessa File*, 9:30 p.m., HUB Lawn.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/

Casey, *Gracie*, 8 p.m., The Playhouse.
Interlana Folk Dancing, 7:30 p.m., HUB Ballroom.

Saturday, August 8

France-Cinema, Fellini, *Amarcord*, 7 and 9 p.m., Room 112 Kern.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 8 p.m., The Playhouse.

Sunday, August 9

Commonplace Theatre, *Kentucky Fried Movie*, 7:30 p.m.; *All That Jazz*, 9:15 p.m., Room 112 Kern.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 7:30 p.m., The Pavilion Theatre; Jacobs/Casey, *Gracie*, 7:30 p.m., The Playhouse.
Shaver's Creek Environmental Center, Wildflower Walk, 2-4 p.m., Stone Valley.

Exhibits

Chambers Gallery: open Monday through Friday, 8 a.m.-5 p.m. Mark Ruyak, drawings and weavings, open July 27.

Kern Gallery: open Monday through Friday, 8 a.m.-11 p.m.; Sunday, noon-11 p.m. CPFA glass invitational, through July 30. Frances Vernard, retrospective exhibition, opens July 28.

Museum of Art: open 11 a.m.-4:30 p.m. Closed Mondays. Tours, Sundays, 1:30 p.m. Twentieth-century works from the Museum's collection, through July 26. Drawings and prints from the Museum's collection, "Hemline, Neckline, Streamline: Women's Fashions 1890-1940" from the collection of Beverly Birks. CPFA Juned Crafts exhibit. African sculpture from the Museum's collection, opens August 1.

Pattee Library: Paul Matthews, paintings, through July 29; Diane Cissell, recent work, opens August 1. East Corridor Lobby. Beverly Laverdier, paintings, through July 29; Michael Lucas, drawings, opens July 29. Lending Services Lobby. Carol Treat, ceramics, through July 27. Bonnie Deutsch, Helen Newhard and Elaine Stone, jewelry, opens July 27. Main Lobby. Martha Carothers, "The Design and Production of Children's Novelty Books," Rare Books Room.

Visual Arts Zoller Gallery: open 11 a.m.-4:30 p.m. Closed Mondays. Lannie Somese, posters, through August 1.

From the Press

The Development of Plato's Metaphysics. By Henry Teloh. 256 pages, \$18.75.

Plato is a much more experimental philosopher, this book argues, than most commentators acknowledge. Supporting this position, Henry Teloh combines exegesis of particular passages with a synoptic view of Plato's philosophical development through his early, middle and late dialogues. The result is a study of Plato's ideas with a more ambitious scope than any since W.D. Ross in 1951.

The book chronicles Plato's changing interests through a focus on his ontological commitments — that is, on the types of entities he addresses. It also traces many of the assumptions in Plato's thought back to their sources in pre-Socratic philosophy. By depicting the changes in Plato's thought from one period of dialogue composition to another, and by seeking to explain these changes from textual evidence, this book offers an appealing introduction to Plato for all humanists.

Dr. Teloh is a member of the philosophy faculty at Vanderbilt University, whose Research Council awarded him two grants for work on this book.

Samuel Butler Revalued. By Thomas L. Jeffers. 146 pages. \$12.00

This book is a first essay in reassessment and rediscovery: there has been no rigorously comprehensive study of Butler in over a generation. It is also an essay in

comparative criticism, which places Butler between his early 20th-century heirs and his 18th-century precursors.

While Butler is remembered chiefly as a novelist, he defies generic classification. With a lucidity and elegance that singularly bet the author of *The Way Of All Flesh*, Dr. Jeffers leads the reader to comprehend Butler in all his facets: as theologian, moralist, and educationist. Butler was a writer who, with remarkable success not only in the Portraits saga and *Erewhon*, but also in *The Fair Haven*, *Life and Habit* and *The Notebooks*, addressed himself to matters of enduring relevance.

Dr. Jeffers, the author of numerous essays on 19th-century literary figures, teaches English at Cornell University.

Shaw and Religion, Volume 1, Shaw, The Annual of Bernard Shaw Studies. Charles A. Best, editor. 256 pages. \$15.95.

The Shaw Review has assumed a book format, under its general editor, Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies. The first volume is devoted to Shaw's religious views, which are seminal to his thought and central to a full understanding of his writings. Warren S. Smith, professor emeritus of general education in the arts, has authored one of the articles, "The Adventures of Shaw, the Nun, and the Black Girl."

The new format doubles the number of pages available for articles. Some annual volumes will be devoted to single themes, but special service departments will be continued.

Anne Edwards

Robert Donley

Festival's 'On Golden Pond' opens tonight

A summer vacation worth remembering comes to the Pavilion stage when *On Golden Pond* opens tonight. The Ernest Thompson comedy, voted Best Play of the 1979-1980 season, focuses on Norman and Ethel Thayer in their 48th summer on Golden Pond, Maine.

Bob Leonard directs the Festival Theatre production, which features two Equity newcomers, Robert Donley as Norman and Anne Edwards as Ethel. Among Mr. Donley's numerous credits (radio, television, and stage) are Broadway appearances in *Anna Christie* with Liv Ullmann and *The Visit* with the Lunts. Ms. Edwards has a variety of stage and television experience, including Broadway performances in *What Every Woman Knows* with Helen Hayes and *Mrs. Patterson* with Eartha Kitt.

On Golden Pond is a combination of witty

dialogue, warmth, and honesty that turns a story of ordinary people and everyday life into a play of substance and feeling. The show continues through Aug. 9 in the Pavilion.

As *On Golden Pond* opens, the last stages of rehearsal are underway for Festival's final offering, *Gracie*. David H. Bell, who has worked extensively throughout the United States, makes his first visit to State College as director and choreographer of this 1950s-style musical. Much of Mr. Bell's cast comes to *Gracie* directly from the Festival Theatre production of *Once Upon a Mattress*. Among others, Equity performers Pamela Bierly and Lee Lohendorf move into the Rydell High Class of '59 as Betty Rizzo and Danny Zuko. *Gracie* opens in the Playhouse on July 30 and runs through Aug. 16.

News in Brief

(Continued from page 1)

Peter Bennett new head in Marketing Department

Dr. Peter D. Bennett, professor of marketing, has been named head of the Department of Marketing in the College of Business Administration.

Dr. David T. Wilson, who has served as department head for the past three years, resigned the post, effective July 1, to return to full-time teaching and research activities.

Dr. Bennett's major research interests center on problems of international marketing and consumer behavior. His book, *Consumer Behavior*, written with Dr. H.H. Kassarian, has been translated into several languages.

A recipient of the bachelor's, master's and doctoral degrees from the University of Texas, Dr. Bennett has been a visiting researcher at the School of Business of the University of Chile and was distinguished visiting professor at the University of Texas for Fall Term, 1978.

Dr. Bennett, who joined the faculty in 1964, previously served as department head for seven years.

Fall Term registration dates are announced

Registration dates for Fall Term 1981 are: **Early Registration**, Aug. 17-21; **Registration**, Sept. 3-4; **Late Registration**, Sept. 17; **Drop Deadline**, Sept. 28; **Pass-Fail**, Sept. 24, 25 and 28; **Course Repeat**, Sept. 28; **Preregistration**, Sept. 28; **Preregistration** (for Winter Term 1982), Sept. 28; and **Late Drop Deadline**, Nov. 2.

The last day of Fall Term classes is Monday, Nov. 16, and Fall Term 1981 Commencement is scheduled for Saturday, Nov. 28.

W. Herbert Schmidt assumes new position

W. Herbert Schmidt has been named director of athletic operations, a newly created position in the Department of Intercollegiate Athletics.

In this new position, Mr. Schmidt will be responsible for the business and management operations for intercollegiate athletics and for the supervisory areas of joint services between athletics and the College of Health, Physical Education and Recreation. He also will be responsible for activities that include the use and management of athletic facilities and all business-related areas such as event management, trip planning, purchasing and ticket operations.

For the last seven years, Mr. Schmidt has served as an assistant professor and assistant to the Dean of the College of Health, Physical Education and Recreation. He will retain his title of assistant to the Dean to reflect his continuing duties in the College of Health, Physical Education and Recreation, as well as responsibilities in areas of joint services between the College and Intercollegiate Athletics.

'Learning to Relax' sessions to be offered

The Nursing Consultation Center at the University will offer four sessions on "Learning to Relax" in July and August.

Instruction in supervised use of relaxation techniques will be presented. All interested persons are invited to participate.

All sessions will be on Thursdays. The first is scheduled for July 30 from 3:30 p.m. to 5 p.m. Following meetings will take place August 6, 13 and 27 from 3:30 p.m. to 4:30 p.m.

A second four-week "Learning to Relax" series will be offered August 20 and 27 and Sept. 3 and 17. The August 20 session will be from 7 p.m. to 8:30 p.m., and the following three meetings will be

from 7 p.m. to 8 p.m.

The registration deadline is the day before the first session begins. Registration and other information may be obtained by calling the Nursing Consultation Center at 863-2200. Sessions may be cancelled if enrollment is low.

Walter R. Freytag named to ARL post

Dr. Walter R. Freytag has been appointed director of personnel and research associate for the Applied Research Laboratory, effective June 1, 1981. In this position, he has responsibility for all personnel matters at ARL. Since January of 1978, he had served as associate personnel director for the Laboratory.

Dr. Freytag graduated cum laude in 1971 from Brooklyn College of the City University of New York and received his M.S. degree in psychology from Kennesaw Polytechnic Institute. Recently, he completed his Ph.D. in psychology at Penn State. His doctoral research addressed the area of innovation of scientists and engineers engaged in research and development.

Five football games are already sellouts

Five of the Nittany Lions' six home football games for the 1981 season have been sold out. The only home game for which tickets remain is the season opener against the University of Cincinnati on Sept. 12.

According to Bud Meredith, athletic ticket manager, a record number of public season tickets — \$5,000 — have been sold for the 1981 season, surpassing last year's record of 30,500.

College of Education presents alumni award

John E. Bower Jr. of Brookville, director of special education at Clarion Manor Intermediate Unit Six in Shippenville, has received the "Excellence in Education Award" from the College of Education Alumni Association.

Award recipients are chosen for their ability to deal with students and fellow professionals, for their high level of community involvement and for a positive reputation among teachers, administrators, students and members of the community.

A 1946 graduate of Penn State with an M.Ed. degree, Mr. Bower earned his B.S. Ed. degree from Bloomsburg State College in 1939. He also did post graduate work at Duke University.

Stewart-Swanger Scholarship established

A Stewart-Swanger Memorial Scholarship has been established to recognize prospective University students who show outstanding academic potential.

The initial principal of the fund was donated by Pearl O. Kramer, of Pittsburgh, a 1941 Penn State graduate in education, in memory of her sisters, Anna L. Stewart and Ida M. Swanger.

Scholarship recipients will be selected by the University's special National Merit Scholars selection committee and the Freshman Scholarship Committee.

The University's Office of Student Aid will approve all awards, which will be made from income earned by the fund principal. The number of awards to be made annually and the amount of each will be set by the selection committee.

Sewer line project approved for Behrend

Trustees have authorized officers of the University to join with the Harborside Township Sewage Authority in obtaining bids and awarding contracts for a new sewer line project at Behrend College in Erie.

Robert A. Patterson, senior vice president for finance and operations, said

a new sewage interceptor system and pumping station will be built to allow the College to be served by Erie's municipal sewage treatment system.

"The University will then be able to discontinue its small, independent wastewater treatment facilities, which are old and inadequate," he explained.

Construction costs will be shared by the University and the authority. The University's share will be \$337,000.

Grant-in-aid fund set for Shenango

A William T. Evans Grant-In-Aid Fund has been established to recognize students enrolled in several programs at the Shenango Valley Campus.

The initial principal of the fund was contributed as a retirement gift by friends and co-workers of Mr. Evans of Sharon, who was president of the Shenango Valley Water Company.

Full-time students at the Shenango Valley Campus enrolled in baccalaureate programs in business, engineering or environmental science, who have achieved or show promise of outstanding academic performance, are eligible for the grants if they have financial need.

The Shenango Valley Campus scholarship committee will select recipients with the approval of the University's Office of Student Aid. Grants will be made from income earned by the fund principal.

The number and amount of annual grants awarded will be set by the selection committee. Grants are awarded for one academic year, but may be renewed if the recipient continues to meet all eligibility conditions and funds are available.

Recipients who transfer to another campus may retain their grants if they are renewed by the Shenango Valley scholarship committee. Contributions to the fund principal may be made by interested parties or organizations.

Awards will be made for one academic year, but may be renewed if the recipient continues to meet all eligibility requirements and funds are available. Contributions to the fund principal may be made by interested persons or organizations.

Series to focus on aging, older adults

Persons interested in learning more about the aging process and about older adults are invited to attend a series of four talks to be given at the Nursing Consultation Center.

The talks will be held Tuesday, July 28, Thursday, July 30, and Aug. 4 and 6 from 7 p.m. to 8 p.m. Dr. Jesse Igou, assistant professor of nursing, will coordinate the sessions.

The scheduled topics include: physical changes of aging, July 28; social aspects of aging, July 30; psychological aspects of aging, Aug. 4; and aging and the environment, Aug. 6.

Registration deadline is July 24. No fee will be charged. Registration and other information may be obtained by calling the Nursing Consultation Center at 863-2200 or 863-2225 between 9 a.m. and noon and from 1 p.m. to 4 p.m. on weekdays.

Workshop to focus on dealing with children

The Individual and Family Consultation Center is offering a six-session parenting workshop for parents interested in learning how to discipline and communicate more effectively with their children ages 3-12 years.

The workshops, free of charge, will be offered in the evening at the Catharine Beecher House on campus. More information may be obtained by calling the Consultation Center, 863-1751, from 8 a.m. to 5 p.m. weekdays.

Three departments and Capitol honored for publications, news

The University's Departments of Publications and Public Information and Relations were cited for excellence at the annual meeting of the Council for the Advancement and Support of Education (CASE) in Washington, D.C.

In addition, the Sports Information Office and Capitol Campus Currents, a campus publication, recently won major national awards.

A certificate of excellence was presented to the Publications Department for the catalog "All That Is Glorious Around Us," prepared for the Museum of Art's exhibition of Hudson River School paintings. It was designed by Richard Villastrigo, an art assistant in the department.

A citation award was presented for "Fortune 500," a brochure produced for Continuing Education. It was designed by Marilyn Shobaken, art editor in the Department of Publications, and written by Gerald Bizozitis, head of Public Information Services in Continuing Education.

"All That Is Glorious Around Us" and "Pennsylvania Prints," another catalog prepared for the Museum of Art, earned CASE awards for technical excellence. Both catalogs were produced by Salina Press of Syracuse, N.Y.

Gretl Magadini, art assistant in the Department of Publications, designed "Pennsylvania Prints."

The News Bureau in the Department of Public Information and Relations won a special merit award for excellence in news writing in competition judged by editors of Newsweek magazine. Penn State was one of 10 universities in the United States and Canada to receive that distinction.

The News Bureau also won a citation award for its news and information programs. These include feature and news stories, a Press Contacts directory,

faculty-written opinion pieces, and notes for consumers, among other things.

The Public Information Department also won a special merit award from CASE for an editorial support campaign carried out with four other Pennsylvania universities. The campaign was launched when, in the summer of 1980, a shortfall in the state budget threatened to cut the institutions' approved funding.

In addition, Arthur V. Ciervo, director of the Office of Public Information and Relations, was presented the 1981 ACE Beeman Award for Advancement Writing at the meeting. CASE's top public relations award, it honors individuals who, through their writing, have made significant contributions to institutional advancement.

Capitol Campus Currents, for faculty, staff and friends of Penn State's Capitol Campus, received an honorable mention award in the 1981 annual School and College Publications Contest sponsored by the National School Public Relations Association.

Roger Williams, director of campus relations at Capitol, is editor of Currents.

Publications produced by the Sports Information Office received awards at the recent national convention of the College Sports Information Directors of America.

The Nittany Lions' men's basketball press guide was judged best in the district and the men's basketball program took runner-up honors in district competition. Press guides for men's and women's gymnastics shared third place in national competition, and the Nittany Lion wrestling guide was judged fourth-best in the nation.

The awards were accepted by Dave Baker, sports information director, and Mary Jo Harbeck and Dick Sapara, assistant sports information directors.

Country music of Mel Tillis this Saturday

Mel Tillis, well-known country singer, will give two performances on Saturday, July 25, at Eisenhower Auditorium as the last event of the Nittany Mountain Summer Festival of Music and Dance.

The 7:15 p.m. and 9:30 p.m. shows will also feature Tillis' band, the Statesiders, who were named after his 1963 hit song, "Stateside." Tillis' popularity stems from his famous songs like "Ruby" and "Detroit City" and has gained him national recognition as a recording artist. The "stuttering troubadour" has received many awards, including the 1976 Entertainer of the Year award. He has performed at numerous bars and appeared on *Dynasty*, *Laugh In* and *The Today Show*. His film credits include *Cannonball* and *Smiley and the Bandit* II. Besides recording his own songs, Tillis has written songs that have been recorded by Kenny Rogers, Charley Pride, and Brenda Lee.

Michael Anthony of the *Munawapah* Tribune called Tillis a consummate performer who can make people laugh and cry and sing and who can translate experience into song, lending his comical air to his music.

Born Lonnie Melvin Tillis to a baker and a housewife in Tampa, Fla., he made his first public appearance at the age of sixteen in a talent contest in Pahokee, Fla. Before making a name for himself as a country singer, he worked as a strawberry picker, a fireman, a milkman, and a driver

Mel Tillis

for "Harry's Cookie" campaign. His first hit song, "I'm Tired," came out in 1956 and by the next year, Tillis was an independent songwriter and performer in Nashville.

When asked how he began stuttering, Tillis said it happened after he got malaria when he was three.

"I also had a friend who stuttered and I honestly don't know whether I started stuttering from being around LeRoy so much or from the malaria," Tillis said.

Tickets for Mel Tillis are on sale at the Eisenhower Auditorium box office, weekdays, from 9:00 a.m. to 4:00 p.m. For ticket information or to order on MasterCard/VISA, call (814) 863-0255. Out-of-towners, call collect.

Staff Development

(Continued from page 3)

program was taught by Milton R. Trask, regional personnel officer. Capital participants were:

Ruth Arehart, clerk, A; Lois Cochran, secretary C; Jean COVER, clerk, accounting A; Mary Davis, secretary C; Joanna Dove, graduate admissions clerk A; Patricia Eagle, clerk, accounting A; Mary Alice Finn, clerk, accounting A; Sara J. Garver, secretary C; Ann Kirsch, clerk, typist A; Kenneth R. Kline, clerk, accounting A; JoAnn Krupke, secretary C; Mary Lehman, clerk, accounting A; Joanne Meinster, secretary C; Ruth Melcher, clerk, records A; Rose Reedy, clerk typist A; Rayetta Snyder, bookstore clerk; Judith Shant, secretary C; and Elsie Wilk, secretary C.

Mont Alto participants were: Noreen Verdier, clerk, stenographer A, and Ruth Wallis, secretary C.

The University offers the EXCEL Program as a training and development program

for senior, career-oriented personnel.

Completing the course work during Spring Term were:

Paula Ammerman, secretary B, President's Office; Martha Bowman, auditing clerk, Controller's Office; Darla Confer, senior clerk, Planning & Budget; Barbara DeVinney, secretary B, Earth & Mineral Sciences; Helen Garbrick, secretary B, Human Development; Bonnie Griffler, secretary B, Controller's Office; Suzanne Harpster, secretary B, Education; Donna Krach, accounting clerk, Continuing Education; Beatrice Kreider, secretary B, Agriculture; Shirley Le Francois, secretary B, Intercollege Research Programs;

Helen Livinghouse, secretary B, Education; Marjorie Lowe, veteran's benefits clerk, Controller's Office; Sharon McClinton, secretary B, Education; Polly Muthersbaugh, secretary B, Education; Debbie Norwicz, secretary B, Engineering; Suzanne Seaman, secretary B, Gifts & Endowments; Susan Stokes, accounting clerk, Controller's Office; Linda White, secretary B, Undergraduate Admissions.

overall objective of the new program is to support engineering research relevant to understanding and using biologically based resources more effectively. Emphasis will be placed on investigating enzymatic, microbial, thermal, and catalytic transformations of lignocellulosic materials, devising new routes for producing industrial chemicals such as polysaccharides, sugars, and hydrogen from renewable materials, and developing effective means to circumvent operational difficulties associated with using biocatalysis in processes. For additional information, contact Dr. Oskar Zaborsky, Division of Chemical and Process Engineering (202-357-9782).

063-2) National Science Foundation—Research in Intelligent Robot Systems. A number of programs in NSF's newly reorganized Directorate for Information on the Coordinator's Committee on intelligent robotic systems (machines and computer systems capable of simulating human activities or performing manipulative functions, often with coordination of other intelligent systems) has been established to work with scientists and engineers from academia and industry interested in submitting proposals to conduct research in this area. For more information on the Coordinator's Committee on intelligent robotic systems activities in NSF, contact Dr. Norman Caplan, Division of Electrical, Computer, and Systems Engineering (202-357-9618).

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (exterior line 475-1387) or by mail. Applications for these vacancies will be accepted until 5 p.m., July 30, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT, CDDKINADTR, RADIOLOGY TECHNOLOGY, COLLEGE OF MEDICINE, HERSHEY Responsible to the coordinator, Radiology Technology, for assistance and coordination in the establishment and maintenance of a school of radiologic technology in accordance with applicable AMA and Medical Council standards. Assist in recommending and preparing curriculum for training programs in radiologic technology, radiation therapy, and nuclear medicine. Responsible for the evaluation of teaching material, equipment and facilities; assist in recruitment of students; participate in community health and career day programs; prepare, administer, and evaluate examinations. Perform radiographic procedures in clinical settings. Graduate from approved radiologic technology program with registration and an associate degree or equivalency of two years of college, plus a minimum of three to four years effective experience, one to two years of which must have been in radiologic technology.

JUNIOR RESEARCH AIDE, INTERCOLLEGE RESEARCH PROGRAMS, UNIVERSITY PARK Under the direction of staff veterinarian, employee will be involved in surgery, necropsy, and diagnostic procedures. Responsible for the routine maintenance of the surgery and necropsy service facilities and supplies. Participate in the administration of medications, euthanasia procedures, sample collections, tissue preparation for histology, operation of inhalation anesthesia machines, radiography, post-operative monitoring and other related tasks will be assigned as needed. Animal species involved range from laboratory animals through common agriculture domestic species. Associate's degree with emphasis in veterinary technology, or equivalent, plus three to six months of effective experience is required.

ACCOUNTANT—STUDENT LOANS, CONTROLLER'S OFFICE, UNIVERSITY PARK Responsible to the assistant manager of Student Loans and Scholarships for accounting for student loans and other financial aid disbursed to students at University Park and Commonwealth Campuses. Counsel and correspond with students, parents, federal agencies, and other third parties concerning financial aid and payments on loans. Maintain records and prepare reports for the Controller's Office of the Department of Education. Bachelor's degree (or equivalent) in accounting or related field plus one to two years effective experience, preferably in institutional accounting and procedures is required. Familiarity with computer accounting procedures is desirable. THIS IS A FIXED TERM 1 APPOINTMENT FUNDED UNTIL June 30, 1982, BUT MAY BE REFUND.

ACCOUNTANT, COLLEGE OF MEDICINE, HERSHEY Responsible to the chairman, Department of Surgery, for the implementation of an accounting system as well as for the performance of accounting duties related to income, expenses, budgetary projection and preparation of financial reports. Bachelor's degree in accounting or equivalency plus one to two years of effective accounting experience is required.

COMPUTER OPERATOR, SENIOR VICE PRESIDENT FOR ADMINISTRATION, MANAGEMENT SERVICES, UNIVERSITY PARK Operation and preparation of 307158 and 4341 computers for program processing and for the operation of peripheral equipment. MUST BE WILLING TO WORK ANY OF THREE SHIFTS. High school graduate or equivalent with computer operator training equivalent to two years of college, plus one to two years of effective experience with data processing accounting experience.

AUDITING ASSISTANT, CONTROLLER'S OFFICE, UNIVERSITY PARK Responsible to the audit manager for auditing the various University and bank transactions, securities, certificates of deposit and annual General Stores inventory count, and for reviewing the University's disbursement accounting or business school graduate, or equivalent, and from one to two years of effective experience.

COORDINATOR, PATIENT MONITORING SERVICES, COLLEGE OF MEDICINE, HERSHEY Responsible to the assistant hospital director/director of Nursing Services for management and coordination of patient monitoring services. Equipment and facilities to include supervision and management of technician staff. Bachelor's degree in electrical or electronic engineering or equivalency, plus one to two years of effective experience.

COORDINATOR, CHILD LIFE PROGRAM, COLLEGE OF MEDICINE, HERSHEY Responsible to the assistant hospital director/director of Nursing Services for providing therapeutic, educational and recreational activities for pediatric patients. Also

interact with patient to provide information related to age-appropriate activities and therapy within the confines of the child's physical limitations. Bachelor's degree in child development, individual and family studies or equivalency plus 1-2 years effective experience. A master's degree preferred.

SENIOR SYSTEMS PROGRAMMER, SENIOR VICE PRESIDENT FOR ADMINISTRATION, MANAGEMENT SERVICES, UNIVERSITY PARK MVS shop with CICS, IMS, TSO, RSCSC, and other mainframe systems. Will assist in the development of programs and procedures for the ACFTVAT with MSNF. Will assist in establishing future TP directions. Responsibilities include generation, maintenance, modifications and performance of TP software. Will also assist in directing work program for systems programmers. Bachelor's degree or equivalent plus two to four years of effective experience of which one to two years should be in the systems programmer level supporting telecommunications. Advanced knowledge of telecommunication software concepts and techniques, understanding how the operating system interfaces with telecommunications, and high level of capability for independently solving software problems desired.

ADMINISTRATIVE ASSISTANT, INTERCOLLEGE RESEARCH PROGRAMS, UNIVERSITY PARK Managerial Office Director, assist with all budgetary matters including planning and implementation; responsible for University general budget; assist in preparation and processing of research proposals, including budget preparation; administer expenditures in accordance with compliance with restrictions as outlined in proposals as well as specific agency guidelines; determine appropriate budgetary distribution of salaries; supervise and coordinate staff. Bachelor's degree (or equivalent) with accounting and bookkeeping background. Must have experience with University forms and accounting system, as well as experience with grants, contracts, and processing research proposals. One to two years of effective experience required.

GRAPHIC ARTIST, COLLEGE OF AGRICULTURE, UNIVERSITY PARK Responsible to art editor for assistance in design and production of graphics and preparation of texts and illustrations into functional visually effective publications. Collaborate with writers and engineers in the preparation of technical problems related to specifications and quality control for printed materials at all stages of production. Consult with faculty members and subject matter specialist. Recommend choice and correct use of various visual and art media problems in publications. Keep abreast of the state of the art. Associate degree in art or a graduate of a two-year program from an institute (or equivalent) plus one to two years of effective graphic arts experience are required.

SUPERINTENDENT OF FARM OPERATIONS AND SERVICE, COLLEGE OF AGRICULTURE, UNIVERSITY PARK Responsible to the associate dean for Administrative Services for the overall administration, maintenance and effective utilization of farm operations and service units. Oversee the planning, harvesting and crop rotation of grain and forage crops on assigned non-research University land. Determine the appropriate crop varieties, planting rates, sequence and dates of seeding and harvesting for maximum yields. Insure that the planned crop yields establish requirements to meet the needs of Dairy and Animal Science and the Veterinary Science Departments. Plan and schedule crop harvest dates and establish harvest sequence and dates of crops. Be responsible for the overall preparation and maintenance of crop activity records. Recommend the selection, purchase and/or lease of farm equipment, tractors and trucks. Plan, develop and implement preventive maintenance program for farm equipment, tractors, trucks, including repair and/or replacement of equipment. Determine and establish crop prices and other charges for departmental services. Consult and cooperate with research personnel concerning land sales, crops, equipment, and other farm-related matters. Purchase and repair of tractors and farm equipment. Supervise assigned personnel and coordinate farm operations and services to maximize operating efficiency. Make final decisions in hiring and supervising employees. Bachelor's degree or equivalent in agriculture, preferably in agronomy with agricultural engineering courses in tractors and farm machinery or related practical experience. Over two (2) years and up to and including four (4) years of experience may be required, preferably with practical grain and forage crop and supervisory experience.

COORDINATOR, CAMPUS RESIDENTIAL LIFE, ALTOONA CAMPUS Responsible to the Dean of Student Affairs for carrying out specific responsibilities for the residence hall program. The responsibilities include administration of the conduct standards system, selection and supervision of student assistants; developing cultural, social and educational programs; and counseling of students. Bachelor's degree or equivalent, plus one to two years of directly related experience in supervising, managing or equivalent in student personnel or related field, with three to six months of residence hall experience.

COORDINATOR OF CLINICAL EXPERIENCES, COLLEGE OF EDUCATION, UNIVERSITY PARK Responsible for supervising and coordinating clinical experiences for all undergraduate and graduate students; developing and maintaining liaison with off-campus practicum sites; maintaining liaison with academic programs and implement policies developed by program and supervising maintenance of student records; assisting in presentation of the program to public agencies. Master's degree; certificate of clinical competence in speech pathology or psychology, or professional or comparable certification, plus one year of effective experience in special education or communication disorders. THIS IS A FIXED TERM POSITION.

Funding Sources

For further information, call 865-1372

063-1) A new program, Minerals and Primary Materials Processing, has been established in NSF's Directorate for Engineering to emphasize research on a wide variety of chemical and physical processes involved in mineral processing and extractive metallurgy. The program's main goal is to provide the fundamental engineering knowledge needed to develop vastly improved or radically new technologies related to ore preparation, the production of metals, refractories, ceramics, and inorganic chemicals derived from minerals. Other goals of the program involve the processing of scraps, waste solids, effluents and safe disposal of difficult-to-recover wastes. For detailed information on this program or information on proposal submission, contact Dr. Tapan Mukherjee, Division of Chemical and Process Engineering (202-357-7423).

063-3) The National Science Foundation Directorate for Engineering announces the establishment of a **Renewable Materials Engineering Program** in its Division of Chemical and Process Engineering. The

Penn State Intercom

Search reopened for development vice president

The University has reopened a search for candidates to fill the newly established position of Vice President for Development.

The Search Committee to seek and review nominations and applications is being chaired by Dr. Eugene J. Kelley, dean of the College of Business Administration. Its members are:

Dr. Maureen A. Carr, director, School of Music; Steve A. Garban, vice president and controller; William Hull, director of exhibitions; Peter A. Irvin, Graduate Student Association; Irvin H. Kochel, assistant vice president for administration; Herbert Kraybill, director, gifts and endowments, Hershey; Ross B. Lehman, executive director, Alumni Association; Dean Stanley F. Paulson, College of the Liberal Arts; Dr. Harold W. Perkins, director, Berks Campus; Dr. Doris M. Seward, executive assistant to the President; Dr. James B. Stewart, director, Black Studies Program; and Dr. Nancy M. Tischler, chairman, University Faculty Senate.

Among the responsibilities of the new vice president will be advising on fund-raising policies and practices, as well as planning, coordinating and directing the University's fund-raising program.

Candidates should have at least five years of successful, executive-level fund-raising or administrative experience and should possess a full understanding of the functions and priorities of a university such as Penn State.

Applications and resumes should be sent by Sept. 15, 1981, to Dr. Eugene J. Kelley, Chairperson, Vice President for Development Search Committee, Room 309 Old Main, University Park, PA 16802.

DuBois Campus lists new phone numbers

Effective Aug. 10, DuBois Campus will have a new telephone exchange number on the network line.

Persons calling on the network line should dial 433-3080, 433-3081 or 433-3082. Persons telephoning from University Park should use 863- and one of the same last three 30-series digits.

University employees Bob Lingle (left) and Harry K. Beck load hay from University fields into loft over barn where expectant mares are housed.

Council to study faculty contracts

The Calendar Conversion Council will appoint a committee to study the faculty contract system and determine whether a new contractual system will be appropriate for the semester calendar.

At its July 16 meeting, the Council also was advised that the requested dates for publication of catalogs were infeasible in the opinion of the Department of Publications and other representatives.

The Associate Degree Council will be available in November, 1982, with the Baccalaureate and Graduate catalogs available by March 1, 1983. The "Major Sheets" will be revised and issued by the fall of 1983.

In other business, Council:

- Received an oral report from the Standing Summer Session Committee on

its first meeting which was exploratory and informational.

- Discussed an analysis of preliminary program revision material from the departments of Biology, Chemistry, English, Mathematics, Physics, and Speech.
- Received a preliminary report from the Sabbatical Leave Committee which noted that, since sabbatical leave considerations are keyed on faculty contracts, sabbatical leave recommendations will be made when the faculty contracts issue is resolved.
- Council members also received a preliminary report on stipends for graduate assistants. A Graduate Council Committee is examining the issue.

Trustees named to presidential selection group

Eight University Trustees have been named to a Trustee Presidential Selection Committee, following the recent announcement by President Oswald that he will retire in 1983.

The appointments were made by Board President Quentin E. Wood who will serve as chairman of the committee.

Committee members are Howard O. Beaver Jr. of Reading, Walter J. Conti of Doylestown, the Honorable Roger A. Madigan of Towanda, Stanley G. Schaffer of Pittsburgh, Obie Snider of Inler, William K. Ulerich of Clearfield and Dr. Helen D. Wise of Dover, Del.

The eight are current officers of the Board and chairpersons and vice chairpersons of the Trustees' three permanent standing committees — finance, educational policy and physical plant. Dr. Richard E. Grubb, senior vice president for administration at the University, will serve as executive secretary of the committee.

Dr. Oswald, Penn State's 13th president, has announced he will retire when his current contract expires on June 30, 1983.

The Trustee committee is to "develop and implement the necessary criteria and procedures to ensure breadth, equal opportunity, timeliness, confidentiality and appropriate University community involvement in the search process."

Ultimately, the committee will recommend a final candidate for the University presidency to the full Board of Trustees.

Mr. Wood said he would strongly recommend to the committee that it establish a University Presidential Search and Screen Committee to help in the search process. That committee, he said, would consist of various University representatives, including faculty members, academic deans, campus directors, students and alumni, with up to half of its members being faculty members.

Dr. Oswald, at his own request, has been excused from serving on the committee and from consultation responsibilities in the appointment of the committee. (Ordinarily, under Trustee bylaws, the University president serves on all special committees of the Board.)

Plan at MRL tests 'public's energy conscience' to cut energy use

MRL display for energy conservation project.

A plan being tested at the Materials Research Laboratory relies on the public's energy conscience to reduce energy and resource use.

Posters placed in the lobby of the lab on campus will show how much water, electricity and steam energy are being used by building occupants over a three-year period.

The University's Executive Energy Conservation Committee (EECC) hopes that the posters will remind occupants to curtail their use of these resources, according to EECC staff member J. Carroll Dean.

The posters plot resource use since September, 1979, in quarterly (three-month) segments, and will

continue until June, 1982. Each year's use is plotted separately on a graph to highlight changes in use over previous years.

Water use, for instance, has increased by an average of approximately 1,000,000 gallons per quarter between 1979-80 and 1980-81. Steam use, which in September, 1980, was almost 1,000,000 pounds per quarter over the previous year, was cut to 750,000 pounds below the previous year's levels by June 1981.

And electricity use remained relatively stable between the two periods, although 1980-81 use has dropped almost 55,000 kilowatt-hours relative to the previous year's level.

The Materials Research Lab was

selected, Mr. Dean says, because, as a research facility, it has high utility consumption. It also is used by technically-oriented research personnel who may be inclined to respond to the information.

The lab's location (on the edge of campus near the Breazeale Nuclear Reactor) also restricts incidental traffic and utility use in the building, and allows a more accurate picture of conservation efforts by the lab's occupants.

No other attempts to encourage conservation will be made in the building, Mr. Dean says; the experiment is intended to discern whether such a silent reminder is helpful. If successful, the effort may be expanded to other campus buildings.

Penn Staters

Dr. Frank M. Goode, associate professor of agricultural economics, has been elected president-elect of the Northeast Agricultural Economics Council.

Dr. Thomas L. Leaman, professor and chairman of family and community medicine at Hershey, has been named president-elect of the Society of Teachers of Family Medicine.

Dr. Leaman has pioneered in the teaching of family medicine in U.S. medical schools since he was appointed chairman of the nation's first department of family medicine at Hershey in February, 1966. He is a founder of the Society which he will head. It now has over 2,000 members and is a formally recognized constituent group in the Council of Academic Societies of the American Association of Medical Colleges.

Since Hershey became the first school to have such a department, more than 80 percent of America's medical schools have added programs in the last 15 years.

Dr. John S. Shenk, professor of plant breeding, has received the Merit Certificate Award of the American Forage and Grassland Council.

Dr. Shenk has played a major role in evaluating and applying a process known as near infrared reflectance to analyze forages and feeds for nutrient qualities. The process is commonly applied through an "infrared spectro computer."

Dr. Shenk, who also developed and perfected a bioassay procedure for evaluating an animal's ability to gain weight when forage is limited, holds B.S. and M.S. degrees from Penn State and the Ph.D. in plant breeding from Michigan State.

Two retired faculty members,
Dr. Howard B. Sprague and **Dr. John B.**

Washko, received the Grassland Council's new Distinguished Grasslander Award.

Dr. Sprague was head of the Department of Agronomy for 11 years before retiring in 1964. Dr. Washko, who retired in 1977, was a Fellow of the American Society of Agronomy and served as its Northeast Branch vice president and president.

Dr. I. S. T. Tsong, associate professor of materials research, presented papers entitled "Outershell Electronic Processes in Ne+ Collisions with a Ni(110) Surface" at the 9th International Conference of Atomic Collisions in Solids held in Lyon, France, and "Ion-Beam Depth-Profiling Studies of Leached Glasses" at the International Conference of Radiation Effects in Insulators in Arco, Italy.

Dr. Paul J. Wangness, professor of animal nutrition and head of the Department of Dairy and Animal Science, has received the top award presented to dairy and livestock scientists of the Northeast.

The Young Scientist Award is presented jointly by the American Society of Animal Science and the American Dairy Science Association.

Dr. Wangness was cited for his research which has involved nutrition and metabolism of farm and laboratory animals, with emphasis on the body's controls of appetite and weight gain.

William C. Zierke, research assistant, Applied Research Laboratory, presented a paper entitled "Measurement and Analysis of Total-Pressure Unsteadiness Data from an Axial-Flow Compressor Stage" at the International Symposium on Energy and Environment in Athens, Greece, in June.

Promotions

Staff Exempt

Linda L. Brandt to nursing supervisor at Hershey.

Mark G. Hoskinson to programmer at Hershey.

Susan M. Lewis to chief radiologic technologist at Hershey.

Arlene D. Wagner to manager, management systems at Hershey.

Staff Non-Exempt

Jeanette O. Beck to senior staff nurse at Hershey.

Cynthia L. Bowman to senior staff nurse at Hershey.

Bookshelf

Dr. Charles M. Redenius, associate professor of political science at Behrend, is the author of *The American Ideal of Equality and Constitutional Change: From Jefferson's*

Retirements

Gordon Bowker

Gordon Bowker, professor of engineering at Mont Alto, retired June 30 after 15 years of service with the University.

Prof. Bowker joined the faculty at Mont Alto on Aug. 1, 1966, after lengthy service in government and industry. He headed the Surveying Technology program and taught courses in that program and in the Forest Technology program. Student evaluations consistently ranked him among the top teachers in the College of Engineering.

He served several terms in the University Faculty Senate and was active with the Intra-University Relations Committee.

Prof. Bowker marked his retirement by speaking at Spring Term commencement at Mont Alto. At the ceremonies, the Student Government Association honored him as the first recipient of its outstanding faculty award.

Samuel D. Lewis, Northampton County Extension Agent, retired July 31 after 34 years of service to the University.

Lewis, who received B.S. and M.S. degrees at Penn State, joined the

Cooperative Extension Service staff in 1947 as assistant Northampton County agent. He was promoted to associate agent in 1954 and to county agent in 1956.

As a result of his leadership in the 4-H program, membership increased by more than 300 percent during his tenure. One of his significant accomplishments was the development of a 4-H center north of Nazareth.

Using demonstrations as a teaching technique, Lewis assisted in establishing several hundred field trials and plots to help improve crop production and soil fertility. He also placed major emphasis on safe pesticide use, lawn care, and arboriculture.

In 1967 Lewis received a Distinguished Service Award from the National Association of County Agricultural Agents for his service to Pennsylvania agriculture.

Sybil B. Coble, senior extension agent in the College of Agriculture, retired June 30. She had been an employee of the University since Nov. 1, 1963.

William R. Fulton, senior assistant librarian at the Beaver Campus, retired June 30 after serving with the University since July 1, 1965.

Clerk typist **Ann K. Nestich**, a member of the Beaver Campus staff since July 6, 1971, retired August 1.

Joseph Parrish, group leader, maintenance worker, Utility, Delaware County Campus, retired Aug. 1 after serving since July 27, 1971.

Partings

Vicki J. Montesano, administrative aide at Hershey, left the University July 25 after serving since Oct. 1, 1970.

Coral L. Sweetwood, a food service worker in Housing and Food Services, left the University June 1 after serving since September 15, 1968.

Obituaries

Dr. Robert Stefanko, professor of mining engineering and associate dean for continuing education in the College of Earth and Mineral Sciences, died July 25. He was 55.

Undertaken by 30 years' confinement to a wheelchair resulting from a mine roof collapse, he gained international recognition for pioneering research in mine roof support, electrical systems and ventilation, the use of diesel-powered equipment in underground coal mines, and the commercial recovery of methane gas from coal seams prior to mining.

Widely honored for his work, Dr. Stefanko also was long active in the Society of Mining Engineers (SME) of the American Institute of Mining, Metallurgical and Petroleum Engineers (AIME). He was the SME's national president in 1979, and a member of its board from 1975 to 1981. He was on AIME's board of directors from 1977 to 1980.

Dr. Stefanko earned three degrees in mining engineering from Penn State — B.S., 1948; M.S., 1957, and Ph.D., 1961. He joined the faculty in 1957 and was named head of the Department of Mining in 1964. He was appointed assistant dean of the College in 1969 and became associate dean in 1976. He is survived by his wife, Margaret, a daughter, and a granddaughter.

Franklin A. Miller, professor emeritus of education and former head of the College of Education's Department of Educational Services, died July 1. He was 78.

A member of the Penn State faculty from 1949 until his retirement in 1967, Dr. Miller headed his department from 1959 to 1967. He was an early advocate of school jointures during the 1950s and served as an adviser in the establishment of several

school mergers in the Central Pennsylvania area. He also served as chairman of several State Evaluation Teams, appointed by the Department of Public Instruction to evaluate the quality of graduate programs in state-related colleges and universities.

Dr. Miller, a native of Johnstown, held three degrees from the University — bachelor's and master's of science and doctor of philosophy.

Albert E. Diem, vice president for business administration at the University from 1958 to 1962, died July 27 in Bridgeport (Conn.) Hospital. He was 71.

Mr. Diem received a B.A. degree in commerce and finance from Penn State in 1935. He was the University of Bridgeport's vice president for business and finance and treasurer from 1962 until his retirement in 1974, at which time he was granted emeritus status.

Mr. Diem was awarded two honorary degrees, a doctor of letters degree from Indiana University of Pennsylvania and a doctor of laws degree from Salem (W.Va.) College. He is survived by his wife, Adelaide, and two children.

John L. Corl, an equipment operator with the Office of Physical Plant, died July 23 at the age of 73. He was employed by the University from 1950 until 1969.

Carpooler

Helen Liveringhouse would like to share driving from Lewisstown. She works from 8 a.m. to 5 p.m. in Chambers Bldg. Call either 865-2523 or 717-242-2255.

University Park Calendar

August 6 —
August 23

Special Events

Thursday, August 6

GSA Explazaganza Film, *Bad Day at Black Rock* (Spencer Tracy, Lee Marvin), dusk, Fisher Plaza
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Grease*, 8 p.m., The Playhouse.
Aging Workshop — "Aging and the Environment," 7-8 p.m., Nursing Consultation Center, Human Development South. Coordinator: Dr. Jesse Igou, assistant professor of nursing. Registration and information, 863-2200 or 863-2225.
Nursing Consultation Center, "Learning to Relax" series, second meeting, 3:30-4:30 p.m.

Friday, August 7

Commonplace Theatre, *Kentucky Fried Movie*, 7:30 p.m.; *All That Jazz*, 9:15 p.m., Room 112 Kern.
HUB Movie, *The Odessa File*, 9:30 p.m., HUB Lawn.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Grease*, 8 p.m., The Playhouse.
Interlandia Folk Dancing, 7:30 p.m., HUB Ballroom.

Saturday, August 8

France-Cinema, Fellini, *Amarcord*, 7 and 9 p.m., Room 112 Kern.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 8 p.m., The Pavilion Theatre; Jacobs/Casey, *Grease*, 8 p.m., The Playhouse.

Sunday, August 9

Commonplace Theatre, *Kentucky Fried Movie*, 7:30 p.m.; *All That Jazz*, 9:15 p.m., Room 112 Kern.
Festival Theatre, Ernest Thompson, *On Golden Pond*, 7:30 p.m., The Pavilion Theatre; Jacobs/Casey, *Grease*, 7:30 p.m., The Playhouse.
Shaver's Creek Environmental Center, Wildflower Walk, 2-4 p.m., Stone Valley.

Monday, August 10

Late drop deadline (eight week Summer Term).
France-Cinema, Fellini, *Amarcord*, 7 and 9 p.m., Room 112 Kern.
"Biological Agriculture: Implications for Farmers, Consumers and Researchers," 9:30-11 a.m., Kern Auditorium. Dr. Hartmut Vogtmann, professor and Chair for Alternative Farming Methods, University of Kassel, Germany. Open to the public.

Tuesday, August 11

Festival Theatre, Jacobs/Casey, *Grease*, 8 p.m., The Playhouse.
Seminar/Discussion, "Manure Management and Weed Control in Biological Agriculture Systems," 9-10:30 a.m., 115 Animal Industries Bldg. Dr. Hartmut Vogtmann, professor and Chair for Alternative Farming Methods, University of Kassel, Germany.

Wednesday, August 12

GSA Explazaganza Concert. The Arthur Goldstein Rock Band, 7 p.m., Fisher Plaza.
Commons Concert, Dan Johnson, noon, Kern Lobby.

This "Pomp and Circumstance Teapot" is one of 50 ceramic pieces by Susan McGilvrey included in an exhibition in Visual Arts Zoller Gallery now through Aug. 14. Also in the show are prints and handmade paper pieces by Doris Karlisch.

Festival Theatre, Jacobs/Casey, *Grease*, 8 p.m., The Playhouse.
"Young and Older Adults Working Together," 1:15 p.m., Nursing Consultation Center, Human Development East. Registration and information, 863-2200 or 863-2225. Open to the public.

Thursday, August 13

Penn State Dames meeting, 7:30 p.m., Room 101 Kern.
Fred Waring Summer Youth Concert, 8 p.m., Schwab.
GSA Explazaganza films, *The African Queen* (Humphrey Bogart, Katherine Hepburn); *We're No Angels* (Humphrey Bogart, Peter Ustinov), dusk, Fisher Plaza.
Nursing Consultation Center, "Learning to Relax" series, third meeting, 3:30-4:30 p.m.

Friday, August 14

Deadline to submit petitions to Registrar's Office to graduate in absentia in August.

Commonplace Theatre, *Everything You Always Wanted to Know About Sex*, 7:30 p.m.; *American Graffiti*, 9 p.m., Room 112 Kern.
Fred Waring Summer Youth Concert, 8 p.m., Schwab.
HUB Movie, *Cactus Flower*, 9:30 p.m., HUB Lawn.
Festival Theatre, Jacobs/Casey, *Grease*, 8 p.m., The Playhouse.
Interlandia Folk Dancing, 7:30 p.m., HUB Ballroom.

Saturday, August 15

France-Cinema, *Wertmuller, Seven Banties*, 7 and 9 p.m., Room 112 Kern.
Festival Theatre, Jacobs/Casey, *Grease*, 8 p.m., The Playhouse.

Sunday, August 16

Commonplace Theatre, *Everything You Always Wanted to Know About Sex*, 7:30 p.m.; *American Graffiti*, 9:00 p.m., Room 112 Kern.
Festival Theatre, Jacobs/Casey, *Grease*, 7:30

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

p.m., The Playhouse.

Monday, August 17

Fall Term early registration, 8:30 a.m.-4:30 p.m., Room 112 Shields.
Color Slide Club meeting, 7:30 p.m., Room 189 Materials Research Lab.
France-Cinema, *Wertmuller, Seven Banties*, 7 and 9 p.m., Room 112 Kern.
"Young and Older Adults Working Together," 10:30 a.m., Nursing Consultation Center, Human Development East. Registration and information, 863-2200 or 863-2225. Open to the public.

Tuesday, August 18

Ten week Summer Term classes end, 9:55 p.m.
Fall Term early registration, 8:30 a.m.-4:30 p.m., Room 112 Shields.

Wednesday, August 19

Loans, Room 108 Shields.
Eight week Summer Term classes end, 9:55 p.m.
Fall Term early registration, 8:30 a.m.-4:30 p.m., Room 112 Shields.

Thursday, August 20

Final examinations, through Saturday, August 22.
Fall Term early registration, 8:30 a.m.-4:30 p.m., Room 112 Shields.
Nursing Consultation Center, "Advanced Relaxation Series," first meeting, 7:30-8:30 p.m. Information and registration, 863-2200.

Friday, August 21

Fall Term early registration, 8:30 a.m.-4:30 p.m., Room 112 Shields.

Sunday, August 23

Residence Halls close for Summer Term, 3 p.m.
Shaver's Creek Environmental Center, Wildflower Walk, 2-4 p.m., Stone Valley.

Exhibits

Chambers Gallery: open Monday through Friday, 8 a.m.-5 p.m., Mark Ruyak, drawings and weavings, through August 19.

Kern Gallery: open Monday through Friday, 8 a.m.-11 p.m.; Sunday, noon-11 p.m.
Frances Vernard, retrospective exhibition, through August 18.

Museum of Art: open 11 a.m.-4:30 p.m.
Closed Mondays, Tours, Sundays, 1:30 p.m.
Drawings and prints from the Museum's collection. "Homeline, Neckline, Streamline: Women's Fashions 1890-1940" from the collection of Beverly Birds. CPFA, Jured Crafts exhibit through August 16. African sculpture from the Museum's collection.

Pattee Library: Michael Lucas, drawings, through August 20; Robert Andruille, paintings, opens August 20. East Corridor Lobby.
Jocelyn Burris, paintings, through August 19, Lending Services Lobby.
Bonnie Deutsch, Helen Newhart and Elaine Stone, metalwork, through August 20. Main Lobby and Second Floor East.
Mortu Carothers, "The Design and Production of Children's Novelty Books," Rare Books Room.

Visual Arts Zoller Gallery: open 11 a.m.-4:30 p.m. Closed Mondays. Susan McGilvrey and Doris Karlisch, ceramics and prints, through August 14.

'Grease' features three Equity actors

Grease, the final offering of Festival Theatre 1981, adds a new face to the Equity roster for the season. Kim Strauss, who plays the hot-rod-happy Kenickie, is unusually well-suited to performance in a highly stylized rock musical.

Mr. Strauss began his professional career as a singer and drummer in a band he started with his brothers. Since that time he has performed and recorded with several bands.

Mr. Strauss and his fellow Equity performers in *Grease* (Pamela Bierly as Rizzo and Lee Lobenhofer as Danny) all come to Festival from recent appearances at Chicago's Marriott's Lincolnshire Theatre where each has worked with *Grease* director-choreographer, David H. Bell.

For Festival's production of *Grease*,

Kim Strauss

Mr. Bell and his cast have worked to present not only the sights, the sounds and the style of the 1950s and the birth of rock'n'roll, but also the individual

David H. Bell

humanity behind the stereotypes. *Grease* continues in the Playhouse through Aug. 16. For tickets call the Festival Box Office at 865-1884.

Fall Calendar material due for INTERCOM

The deadline for submission of information for the Fall Term Calendar is Friday, Aug. 14. Please send material to Calendar Editor, Room 301 Old Main, 865-2501. The Calendar will appear in the Sept. 3 issue of INTERCOM.

Calendar orders accepted by Student Government

The Undergraduate Student Government is accepting orders for its 1981-82 University calendar. The calendars are priced at \$1.00 and can be paid for by cash or personal check, made payable to USG. IDTs are not accepted.

Calendars can be ordered until Friday, Aug. 21, by memo to Mary L. Francis, USG calendar manager, 203A HUB, phone 863-1874.

News in Brief

John Dutton to chair Meteorology Department

Dr. John A. Dutton, professor of meteorology, has been named head of the Department of Meteorology. He succeeds Dr. A. K. Blackadar, who will continue teaching and will expand a research program relating models of boundary layer processes to numerical weather forecasting procedures.

Dr. Dutton, who earned three degrees in meteorology at the University of Wisconsin, has been a member of the University meteorology faculty since 1965. His teaching and research primarily are concerned with theoretical and mathematical aspects of large-scale atmospheric motion.

Dr. Dutton was a trustee of the University Corporation for Atmospheric

Research (UCAR) from 1974 to 1980, and formerly was the UCAR's secretary, treasurer, and vice-chairman. In 1958, Penn State was one of several universities granting Ph.D. degrees in meteorology that cooperated to form the UCAR, which now operates the National Center for Atmospheric Research, Boulder, Colo.

Recently, Dr. Dutton was named to the Committee on Atmospheric Sciences of the National Research Council. Elected a fellow of the American Meteorological Society in 1977, he is editor of "Meteorological Monographs," published by the society.

Dr. Blackadar, a past president of the American Meteorological Society, has been head of the meteorology department since 1967. He first came to Penn State in 1954, as a visiting associate professor on leave from New York University. He joined the University faculty in 1956.

Telephone Directory errors should be corrected

Faculty and staff members who have noted errors in their Telephone Directory listings should forward corrections immediately to facilitate the preparation of next year's edition.

Information for the directory was taken from payroll files last summer. Following is a list of common errors, and the procedures for getting the correct information into the proper files.

In correcting the forms, it is important to fill in all the information. Missing elements may cause errors or rejection of the correction by the computer file.

Directory listing carrying old or incorrect title:

Must be corrected on Payroll Change Form submitted by your Department

Head, through the Office of Personnel Administration.

Listing showing old or incorrect address: Home address — changed by submitting new W-4.

Campus address — changed by submitting Office Address Telephone Information form. Both forms are available from your Personnel Representative.

Name omitted from Directory: Submit O.A.T.I. form to Payroll. Form is available from your Personnel Representative.

Unlisted number appearing in Directory: This can be corrected in two ways. Submit new O.A.T.I. form with a Code 2 in the publish box, or fill out a new W-4 form and omit your unlisted number from the form. Both forms are available from your Personnel Representative.

Ag committee named

A search committee has been named to identify candidates for the position of Associate Dean for Research and Associate Director of the Agricultural Experiment Station in the College of Agriculture.

Dr. Gene M. Love, associate dean for resident education in the College, is committee chairman. Members are:

Dr. James L. Starling, professor and head of the Department of Agronomy; Dr. C. S. Card, professor and head of the Department of Veterinary Science; Dr. John W. Malone Jr., professor and head of the Department of Agricultural Economics and Rural Sociology; Dr. Harold V. Walton, professor and head of the Department of Agricultural Engineering; Dr. Thomas Smyth Jr., professor of entomology, and G. G. Hanniard, graduate student in horticulture.

Nominations and applications for the position should be sent in care of Dr. Love to 217 Agricultural Administration Bldg., University Park, PA 16802, by Oct. 2, 1981.

Skills program offered

The Individual and Family Consultation Center at the University offers a free program in "Relationship Enhancement Skills" to couples and families.

The program consists of weekly sessions during which groups, individual couples or families meet to learn and practice communication, problem solving and mutual helping skills. The sessions continue according to the participants' needs, usually from 10 to 12 weeks.

For further information call Evelyn Roberts, program coordinator, at 865-1751 weekdays from 8 a.m. to 5 p.m.

mailed recently to all faculty and staff members who are members of that retirement system.

Any employee on leave of absence or layoff should contact his or her supervisor upon return to employment to secure a copy. Other faculty and staff members who did not receive a copy of the annual report may obtain one by contacting the Employee Benefits Division, Room 133 Willard Building (865-1473).

provides Penn State with continuous monitoring of public and private agency programs. RIS reviews information from numerous sources including the Federal Register and the Commerce Business Daily and receives direct agency mailings. RIS makes information distributions to faculty and staff to promote an awareness of public and private programs; responds to faculty/staff inquiries about programs and program contacts; through a Preliminary Proposal Outline (PPO) mechanism, helps locate project support funds with the assistance of OFF and Penn State's Office of Gifts and Endowments (OGE). For detailed information about available RIS assistance, contact M. R. Kohler, 5 Old Main, 814-865-0715.

Videodiscs Committee seeks faculty evaluations

The University's committee on videodiscs is seeking faculty evaluations of two videodisc players newly acquired by the University. Faculty input is being sought in order to explore the applications of this technology for various disciplines, according to committee chairman Robert Allen, Audio Visual Services director.

Videodisc players offer rapid, random access of material, enabling the operator to search for one or many of the over 50,000 still frames stored in the disc. Each still

frame has a number which may be searched, retrieved and held.

The Laser Disc player by Pioneer may be previewed at Audio Visual Services' Presentation Services, located in 1 Willard Bldg. The more complex DiscVision II model, which may be interfaced with the Apple microcomputer, is available for demonstration at Audio Visual Services, Special Services Bldg., Fox Hill Road.

Videodisc players and software will be available for faculty preview and evaluation for six months at the University Park locations and six months at the Commonwealth Campuses. For more information, call AVS (865-6316).

University receives grant

The University has been selected by one of its alumni to receive a \$1,500 unrestricted educational grant from the General Electric Company's Power Delivery Group. The grant was given to the University in the name of E.R. Frey Jr., of Lombard, Ill., a 1966 graduate of Penn State and an engineer in GE's Electric Utility Sales Division in Oak Brook, Ill.

Mr. Frey was recently honored through the Power Delivery Group's Pi Delta Gamma Program for his outstanding contributions in his field. In that program, an exceptional employee is invited to choose a college or university to receive a grant from GE.

GE's Power Delivery Group provides electrical power delivery systems and products.

Staff Vacancies

The following vacancies for positions described as staff except as staff nomenclature has been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1380 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Aug. 13, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (P5-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap as provided by law, sex, or status as a disabled or Vietnam era veteran.

SENIOR APPLICATIONS

PROGRAMMER/ANALYST, MANAGEMENT SERVICES, UNIVERSITY PARK Provide analytical design, and programming support for financial computer systems in both development and modification environment. Meet with users to survey problems and define needs. Analyze alternatives by weighing costs and technical implications to determine best approach. Work on detail systems analysis to develop specifications. Direct coding and documentation. Bachelor's degree or equivalent in basic computer systems plus two to three years of effective systems analysis and programming. COBOL and FORTRAN experience desired. Accounting experience helpful.

SENIOR NUCLEAR MEDICINE TECHNOLOGIST, COLLEGE OF MEDICINE, HERSEY Responsible to the chief technologist and the chief, Division of Nuclear Medicine for the day-to-day administrative functions of the Division to include supervision of the aides and technologists. Direct other technologists in the performance of various patient studies. Responsible for scheduling Nuclear Medicine and CT Scanning technologists. Patient Service positions and make recommendations to the chief technologist. Perform quality control, calibration and resolution checks on electronic equipment. Troubleshoot service problems and arrange service as necessary. Maintain disposal records of isotopes. Calibrate and use stationary imaging devices, Renecal Scanners, and a variety of supplementary electronic and mechanical equipment. Handle and administer radioactive isotopes for therapeutic or diagnostic procedures as directed under the guidance of a physician. High school graduate with formal Nuclear Medicine Training in an AAMA approved program and registered by the ARRT or equivalency, plus two to three years of Nuclear Medicine experience of which one to two years were in a supervisory capacity.

COUNSELOR, NEW KENSINGTON CAMPUS Responsible to the campus director through the dean of student affairs of the Commonwealth Campus for conducting personal, educational, career and placement counseling programs. Assist with work of other Student Affairs and campus divisions as assigned by the dean of student affairs. Conduct undergraduate enrollment, academic advising, educational counseling, and the academic information support services of the Division of Undergraduate Studies. Responsible for administering these programs and services according to procedural guidelines and policies of the Division of Undergraduate Studies.

SENATE POLICIES AND PROCEDURES for Undergraduate Studies. A master's degree in clinical or counseling psychology; counselor education, or equivalent training, plus a minimum of two years of applicable professional experience in educational/counseling or related experience; or Ph.D. or D.Ed. in clinical or counseling psychology; counselor

education or equivalent training, plus a minimum of up to one year of applicable professional experience in educational/vocational counseling or related experience.

ASSISTANT HEALTH PHYSICIST, COLLEGE OF MEDICINE, HERSEY Responsible to the health physicist for the daily operation of the Health Physics laboratory and supervision of a varying number of technicians as well as carrying out an effective Medical Center monitoring program. Master's degree in health physics or equivalency; plus one to two years of effective experience.

COORDINATOR, MULTI-PURPOSE BUILDING AND ATHLETIC FACILITIES, SCHUYLKILL CAMPUS Responsible to the business manager for providing supervision and coordination of the multi-purpose building and athletic facilities, security for equipment and facilities and for supervising work staff and wage payroll studies. Assist in coordinating the maintenance of the multi-purpose building and all athletic facilities. Associate degree or equivalent in recreation plus one year over up to and including two years of effective experience are required.

CHIEF TECHNOLOGIST — LABORATORY SUPPORT SERVICES, COLLEGE OF MEDICINE, HERSEY Reports to the manager of the Laboratory Support Services, responsible to manage Clinical Laboratory for efficient operation of laboratory computer and central processing; also responsible to director/Clinical Laboratories and manager/Clinical Laboratory for planning, and implementing improved operations of laboratory computer and central processing. Bachelor's degree in medical technology — MT (ASCP) and/or equivalent plus four to six years of effective experience in a clinical laboratory.

SUPERVISOR OF MAINTENANCE, HOUSING AND FOOD SERVICE OPERATIONS,

UNIVERSITY PARK Responsible to the manager of Maintenance Services for administering and coordinating maintenance functions in housing and other areas. High school or equivalent formal trades training and two to three years of effective experience required; knowledge of upholstery, plumbing, carpentry, electricity, electronics, ticket operated washers, dryers, ticket dispensers, and other maintenance skills as well as the ability to read and work from schematics is desirable.

ACCOUNTANT — HUB FOOD SERVICE, HOUSING AND FOOD SERVICE OPERATIONS, UNIVERSITY PARK Responsible to the manager of Business Services for the efficiency of the Hub Food Service Accounting Office, including inventory, operating and cash reports. Associate degree in accounting and one to two years of effective experience required; knowledge of word processing equipment desirable.

COORDINATOR, INSTRUCTION SUPPORT CENTER, COLLEGE OF EDUCATION, UNIVERSITY PARK Coordinate faculty efforts in use of existing computer-managed instruction center. Generate new applications that will improve testing and instruction services to faculty. Master's degree or equivalent in computer science or in education with instructional systems emphasis. Two years effective experience in computer systems design and/or systems development. THIS IS A FIXED TERM POSITION FUNDING THROUGH JUNE 30, 1982.

ASSISTANT DIRECTOR, DEVELOPMENT SERVICES, OFFICE OF GIFTS AND ENDOWMENTS, UNIVERSITY PARK Responsible to the director of Administrative and Information Services to provide administrative support relating to gift processing, accounting and reporting as well as accounting for office programs and projects. Assist in the maintenance of the Alumni/Development data base and the implementation of related services. Bachelor's degree or equivalent with one or more years of effective experience in accounting or management. Computer background desirable; oral and written communication skills important.

Part-time work urged to offset aid reductions

In light of a reduction in College Work Study funds, University faculty and staff are urged to fill part-time payroll positions during the academic year with students in need of earnings to continue their studies.

"The Office of Student Aid received many more applications from eligible students for the College Work Study Program than could be awarded with funds available," Dr. Richard E. Grubb, senior vice president for administration, said.

"In view of this situation, we are asking that faculty and staff, in filling part-time positions, give priority to these students needing to offset their expenses."

According to Dr. John F. Brugel, director of student aid, approximately 800 to 1,000 fewer federal work study positions will be available during the 1981-82 academic year because of the funding cutbacks.

"Several thousand freshmen, upper-class and graduate students were eligible for employment under the program but were not awarded because of limited funds," he said.

"To best use our resources, we've instituted some cuts in the summer program in an effort to minimize the impact for the upcoming Fall, Winter and Spring terms. Nevertheless, the number of qualified and highly needy students far exceeds the funds available."

As a means of reducing the impact, the Office of Student Aid is encouraging utilization of existing University wage employment.

"We're encouraging voluntary use of a listing service at the Commonwealth Campuses and University Park," Dr. Brugel said, "on the premise that industrious and needy students will use this service seeking help. We can then direct them to on-campus jobs."

Departments having positions that can be filled by students are asked to notify the University Park Student Employment Office, 301-A Boucke Bldg., 863-0336-0337, or the Dean of Student Affairs Office at the campuses.

Students seeking work will be provided with job information, including job description, necessary application qualifications, hourly wage, and number of hours per week. The student will then contact the employer directly.

Japanese enjoy campus, special English program

Japanese school teachers visiting University Park this summer are vividly impressed by the spacious campus.

"Most conspicuous are the many green areas, which constantly delight our eyes," says Harumi Kurisaka, a high school teacher from Okayama Prefecture (County), Japan.

Mr. Kurisaka is the leader of a group of 42 Japanese junior and senior high school teachers who are spending a month participating in the "Intensive English Communication Program for Japanese Teachers."

Now in its 12th year at Penn State, the program is conducted by the Department of Speech Communication and Continuing Education under auspices of the Council on International Education Exchange and the Japan-American Society.

Gale Duque, coordinator of Speech Communication's English as a Second Language Program and director of the program for the Japanese teachers, describes the group as "very responsive, active and eager to practice their English communication skills."

Mr. Kurisaka agrees, noting "everyone is very diligent in doing their work."

Still, he says, the Japanese "don't feel any pressure — it's our duty to learn, so we can be better teachers and encourage our students at home."

Ms. Duque explains that the Japanese teachers-turned-students spend mornings learning about American culture and how to deal — in English — with various aspects of life in America.

For example, she says the group watches videotapes and then practices exercises on topics such as "Making a Local Telephone Call," "At the Post Office," "Declining an Invitation" and "Polite Responses to Embarrassing Questions."

The teachers also take field trips, complete assignments for which they

must speak with Americans and participate in evening "tastes of American culture" such as square dancing.

"The CIEE program actually consists of three components, of which Penn State's program is the first," Ms. Duque says.

The other components consist of a cross-country bus tour and living for two weeks with American families.

"Penn State's role in the overall program is to prepare the Japanese for the other two components," observes Ms. Duque.

As part of the training, Centre County area families have volunteered to serve as host families for the Japanese while they are at University Park, providing them the opportunity to experience American meals and an overnight visit in American homes.

After the group leaves Penn State on Aug. 22, it will travel by bus to Iowa, where it will disperse into the homes of

American school teachers for a two-week visit. In addition to experiencing family life with the teachers and sharing educational ideas, the Japanese will visit junior and senior high schools.

Then, it's back on the road again to San Francisco — via the Grand Canyon — where a flight to Japan will take the group home.

"The Japanese really enjoy the program, and more important, they say they really benefit from it," Ms. Duque notes.

She further observes that Penn State is one of only four universities which offer this particular program. The others are Syracuse University, the University of Massachusetts and Brown University.

"It's always exciting for us, and judging from this year's participants, the program remains very exciting to the Japanese," Ms. Duque says. "It offers all of us — Americans and Japanese — a great chance to learn many new things and to share in each other's culture."

Photo: Scott Johnson

Japanese school teachers look for familiar faces in group photographs of participants in previous programs in English communication. Gale Duque, Penn State project leader, and Harumi Kurisaka, Japanese group leader, are at far right.

Biomedical research grants are available

Faculty with research interests in the life and health-related sciences are invited to submit proposals to the Biomedical Research Support Grant program (BRSG) via department heads and Intercollege Research Programs directors. This is the second year in which screening of proposals will take place in the fall term.

The twelve-month awards will range from \$5,000 to \$15,000 for individual investigators, and up to \$30,000 for more than one investigator on a project. Preference will be given to projects not normally or easily funded by National Institutes of Health such as pilot projects, unforeseen requirements, and new

Penn Staters

Four members of the Cooperative Extension Service staff were among 110 agricultural agents in the United States who received Distinguished Service Awards from the National Association of County Agricultural Agents.

Cited for "outstanding educational contributions to Pennsylvania's agriculture" were **Harold R. Bock**, Clearfield County Extension director; **C. R. Bryan Jr.**, Delaware County Extension agent; **Gordon D. Walker**, Mifflin County Extension agent; and **Edward J. Woods**, Washington County Extension director.

Dr. John F. Brugel, director of student aid, has been elected to the Executive Committee of the Financial Aid Division of the Middle States Regional Assembly of the College Board.

Two members of the College of Agriculture communications staff received superior awards in the 1981 critique and awards program sponsored by Agriculture Communications in Education.

Harry A. Carey, Extension exhibits specialist, was cited for a large exhibit that explained Penn State programs and activities throughout the Commonwealth.

Paul D. Ruskin, video executive producer, was honored for a nonbroadcast television production.

Promotions

Faculty

Robert Bridges to assistant professor of psychology at New Kensington.

Donald J. Caputo to assistant professor of computer science at Beaver.

A. Ilhan Erinc to adjunct associate professor of microbiology and cell biology.

Catherine Hebert to assistant professor of French at New Kensington.

Marlene Pilarski to assistant professor of German at Worthington Scranton.

Staff Exempt

Lori L. Flesher to assistant manager, Housing and Food Services at Mont Alto.

Peter Garland to assistant director in Student Affairs.

Paul D. Schedler to business manager at Mont Alto.

David L. Stoner to materials procurer/expediter in Physical Plant.

Staff Non-Exempt

Lisa R. Burkhart to research technician at

Management Services.

Lawrence M. Mylin to research technician at Hershey.

Mark M. Smolke to grants and contract accountant in Controller's Office.

Joseph E. Witowski to respiratory technician II at Hershey.

Clerical

Rita H. Berg to secretary C in Business Administration.

"Electronic Field Production Manual," which focused on using videotaping equipment as a teaching tool.

Dr. Parris Chang, professor of political science, presented a talk on "The U.S. Policy toward China under the Reagan Administration" at the Korean Institute of Foreign Affairs and National Security.

He also conducted a seminar on the "Elite Conflict in the Post-Mao China" at the Social Science Research Center of the Seoul National University.

Dr. Edward J. Danis, Division of Undergraduate Studies consultant to the College of the Liberal Arts, participated in the 34th annual international conference, "Deutschland Heute," at the University of Kiel, Federal Republic of Germany.

Dr. Carolyn R. Dexter, associate professor of social science and sociology at Capitol Campus, has been appointed director of membership of the Academy of Management. Formally organized in 1941, the Academy now has nearly 5,000 members representing 37 nations.

Dr. Dexter, a member of the Academy's board of governors and placement committee, will serve a three-year term in her new position which also functions as a clearing house for national and regional meetings.

Karen E. Butler to clerk, accounting A in Controller's Office.

Viola R. Walters to clerk, typist A in Agriculture.

Rita C. Williams to statistical drafting clerk in Planning and Budget.

Tana L. Yingling to clerk, records A in Registrar.

Technical Service

Mark E. Amsler to storeroom clerk C at Hershey.

Winifred Burns to senior milk testing machine operator in Agriculture.

Thomas R. Carr to maintenance worker utility at Delaware County.

Margaret M. Cichy to patient service aide at Hershey.

Dorothy E. Clark to maintenance worker (general) B at Beaver.

Sally Houser to senior milk testing machine operator in Agriculture.

Ronald W. Knight to group leader/maintenance worker utility at Delaware County.

Gerald Liveringhouse to lead welder mechanic, fabrication and maintenance in Physical Plant.

Lorraine L. Moore to patient service aide at Hershey.

Obituaries

William A. Hammond, barnworker-milker in the College of Agriculture, died Aug. 7 at the age of 74. He was employed by the University from 1954 until 1969.

George J. Wilson, associate housekeeping supervisor with Housing and Foods, died Aug. 10 at the age of 38. He had been employed by the University since 1972.

Carpoolers

Susan Hall would like to share driving from Rebersburg or Millheim. She works from 8 a.m. to 5 p.m. in Steidle Bldg. Call either 863-1776 or 349-8023.

Peggy Repasky seeks either drivers or riders to form a carpool from Milesburg. She works from 7:30 a.m. to 4 p.m. in Pond Lab. Call either 863-2690 or 355-1357.

Dr. William L. Ferrara, professor of accounting, recently was awarded the Lybrand Bronze Medal for his article, "A Cash Flow Model for the Future," published in the June, 1981, issue of *Management Accounting*.

The Lybrand Medals were established in 1949-50 by members of Lybrand, Ross Bros. and Montgomery (now Coopers and Lybrand) to honor William M. Lybrand, a founder of the firm. Gold, silver, and bronze medals are awarded every year to member-authors of the National Association of Accountants who place first, second, and third in the manuscript competition.

While on leave of absence as visiting economist at MIT's Center for Energy Policy Research, **Dr. Richard L. Gordon**, professor of mineral economics, presented the 1981 Shell Lecture in Energy Economics at the University of Surrey, England.

Dr. Arnulf Muan, professor of mineral sciences and associate dean for research in the College of Earth and Mineral Sciences, has been elected a foreign member of the Royal Norwegian Academy of Sciences. He is one of only 10 Americans thus honored. The academy has a total of 33 foreign members.

Dr. Muan is a fellow and past president of the Mineralogical Society of America. Also, he is a fellow of the American Ceramic Society and of the Geological Society of America.

Dr. Torrence D. Parsons, associate professor of mathematics, presented a series of lectures in Hungary and Yugoslavia in July. In Eger, Hungary, he attended the Sixth Hungarian Colloquium on Combinatorics where he presented a paper entitled, "Longest Cycles in r-Regular, r-Connected Graphs." He presented a longer paper on the same topic the following week at the Beograd-Ljubljana Seminar on Graph Theory at the University of Ljubljana where he also discussed "A Pursuit-Evasion Problem."

At Ljubljana, **Dr. Parsons** also attended the doctoral thesis defense of Tomaz Pisanski, who received his master's degree in computer science from Penn State in 1979.

Retirements

Dr. Ernst Bleuler, professor and assistant head of the Department of Physics, retired from the University with emeritus status on June 30 after 17 years on the faculty.

Born in Switzerland in 1916, he was educated at the Federal Institute of Technology in Zurich where he also served on the faculty until he came to the U.S. and Purdue University in 1947. **Dr. Bleuler** served Purdue for 17 years before joining the Penn State faculty as a full professor in 1964.

A nuclear physicist, **Dr. Bleuler** did decay scheme studies of new radioactive species in Zurich; investigations of nuclear reactions at Purdue and low energy nuclear structure studies at Penn State. During 1961-62, he held a Guggenheim Fellowship and did high energy research at CERN, the European Center for Nuclear Research in Geneva, Switzerland.

In 1975, he began studies of the upper atmosphere in association with the Penn State Ionosphere Research Laboratory. He plans to continue that research in retirement and currently has several publications pending on mathematical models of electric fields and currents in the ionosphere and on thermospheric aeronomy.

Dr. Bleuler is the co-author of more than 50 research papers published in scholarly journals and of the book, *Experimental Neutronics*, published by Rinehart in 1952. He is co-editor of the book, *Methods of Experimental Physics II: Electronic Methods*, first published in 1964 and revised in 1975.

In addition to research, **Dr. Bleuler** plans to continue sailing and skiing during retirement. A member of the Nittany

Dr. Daniel R. Tershak, associate professor of microbiology, presented an invited paper at the Molecular Biology of Picornavirus Conference at the University of Hamburg, West Germany, this month. His paper was entitled "Guanidine Resistant DI Particles of Poliovirus."

Dr. William Toombs, professor of higher education and director of the Center for the Study of Higher Education, recently presented a series of seminars at Central University of Venezuela dealing with faculty development and academic program design.

Cecil R. Trueblood, professor of education, has received this year's "Outstanding Contribution to Mathematics Education Award" from the Pennsylvania Council of Teachers of Mathematics.

Dr. Trueblood, who serves as coordinator for undergraduate studies in the College of Education's Division of Curriculum and Instruction, was cited for his "numerous contributions to mathematics education at all levels."

The citation further expressed the Council's appreciation for the "leadership and guidance" **Dr. Trueblood** provided as a consultant to PCTM's "Pennsylvania Competency-Based Teacher Education Project."

The project, funded by the Pennsylvania Department of Education, "provided a real basis for improving mathematics education throughout the Commonwealth," the Council said.

Dr. Trueblood also is director of Penn State's federally funded Teacher Corps project in the Keystone Central School District in Renovo.

Dr. Herbert Wheeler Jr., professor emeritus of architectural engineering, was one of seven delegates from the United States representing the American Institute of Architects at the XIV World Congress '81 of the Union Internationale des Architectes in Warsaw, Poland.

Prof. Wheeler, head of the newly created Professional Development Group of the AIA, presented a report on the organization and future plans of the Group. He also organized a program and introduced 15 architects from 15 nations who delivered talks on architectural practice and education.

Valley Sailing Club, he can usually be found at club races in his Flying Junior. His wife, Ruth, is his usual crew.

Two associate professors of engineering research at the Applied Research Laboratory — **Harry M. Crain** and **John E. LeFrancis** — retired July 1.

Before coming to ARL in 1946, **Mr. Crain** worked at Columbia University's Division of War Research, where he was employed as a research engineer for the design, development and installation of underwater sound equipment, fractional horsepower servo systems, and associated electronic amplifiers.

While at ARL he obtained patents on a variety of inventions and authored a number of technical reports. He was a member of the Acoustical Society, the IEEE and Sigma Xi.

Mr. Crain, who holds a B.S. degree in electrical engineering from Penn State, says golf will probably dominate many of his retirement hours.

Mr. LeFrancis, who began his tenure at ARL in 1949, also was awarded patents for his inventions. As head of the Editorial Department, he edited numerous reports, viewpoint presentations, papers, articles and briefings. In addition, he prepared scripts for films and compiled and edited a national survey for the *Journal of Acoustics*. His personal interests over the years have included singing with a barbershop quartet, whitewater canoeing, weightlifting and photography.

Mr. LeFrancis, who holds a bachelor's degree in engineering from the University of Toledo, plans to begin his retirement with a construction project — building a porch onto his home.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Gallu's new play, to debut here, will feature Ernest Borgnine

Ernest Borgnine, the actor whose roles have included the now classic *Marty*, and Sam Gallu, the playwright whose successes include the popular Truman portrait, *Give 'em Hell, Harry*, have joined forces in a new production that will have its world premiere at 8:30 p.m., Sept. 12, in Eisenhower Auditorium.

The play, entitled *An Offer You Can't Refuse*, uses a single actor to portray three generations of a powerful Mafia family. The show has been described as "whimsical, philosophical, sociological, and a prime example of black comedy."

Mr. Gallu created the new play for Mr. Borgnine whose family is, in fact, Italian, but hardly outside the law. His mother was of noble lineage, a contessa, and his father was a metallurgist from Turin. They immigrated to this country before their son was born.

The actor whom millions of television viewers know as the skipper on the popular series, *McHale's Navy*, began his own working life by enlisting in the Navy. (He is honorary skipper of the Navy's precision flying team, the Blue Angels, a position that he is very proud of).

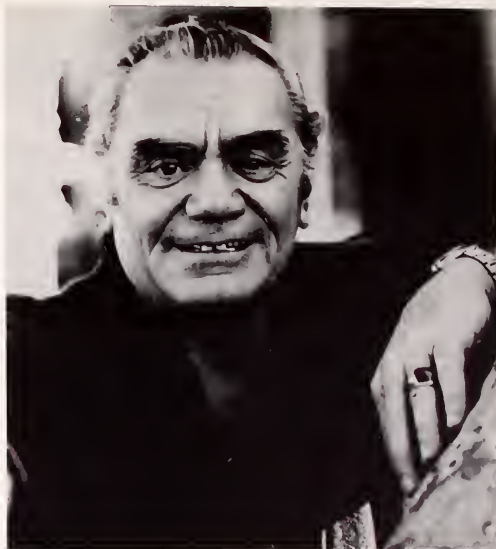

Mr. Borgnine's acting career was launched in the Broadway comedy, *Harvey*, and he soared to fame in motion

pictures with his sensitive portrayal of the lonely butcher Marty in the Paddy Chayevsky screenplay of the same name. His *Marty* won him an Oscar as best actor. His film credits are extensive, as is his television experience. In addition to *McHale's Navy*, he has starred in two other television series, *Sam Hill* and *Future Cop*.

Mr. Gallu is a 1940 graduate of Penn State and has been named both Alumni Fellow and Distinguished Alumnus. He maintains close ties with the University, particularly the College of Arts and Architecture for which he has established a scholarship fund named in honor of his parents, Simpson and Elizabeth Hall. The premiere performance of the play will benefit that fund.

Mr. Gallu and Mr. Borgnine will arrive on campus the week of Aug. 24 to rehearse the new play. The Sept. 12 performance is the only one to be given at the University. The show will go immediately on a tour that will take it to major cities across the country over the next nine months.

Tickets to the Penn State performance are being sold by mail order now. The Eisenhower box office will begin window sales Aug. 24 from 9 a.m. to 4 p.m. Monday-Friday. For information or to charge tickets, call 863-0255.

Ernest Borgnine

University Park Calendar

August 20-September 3 Special Events

Thursday, August 20

Final examinations, through Saturday, August 22.

Fall Term early registration, 8:30 a.m.-4:30 p.m., Room 112 Shields Building.

Nursing Consultation Center, "Advanced Relaxation Series," first meeting, 7-8:30 p.m. Information and registration, 863-2200.

Friday, August 21

Fall Term early registration, 8:30 a.m.-4:30 p.m., Room 112 Shields Building.

p.m., Room 112 Shields Building.

Sunday, August 23

Residence Halls closed for Summer Term, 3 p.m. Shaver's Creek Environmental Center, Wildflower Walk, 2-4 p.m., Stone Valley.

Tuesday, August 25

Ag Progress Days, 9 a.m.-5 p.m., Rock Springs Agricultural Research Center, Rt. 45W. Farm and home educational and commercial displays, programs. Admission free.

Wednesday, August 26

Ag Progress Days, 9 a.m.-7 p.m., Rock Springs Agricultural Research Center, Rt. 45W. Farm and home educational and commercial displays, programs. Admission free.

Steven J. Stack as associate professor of sociology at University Park. B.A., M.A. (Education), M.A. (Sociology), Ph.D., U. of Connecticut. Assistant professor, Indiana U.

Richard S. Tynell as librarian at Hazleton. B.A., Cornell U.; M.L.S., U. of Pittsburgh. Head librarian, reference department, Wright State U.

Bookshelf

Dr. Gerald M. Phillips' *Help for Shy People*, published recently by Prentice-Hall Inc., is based on the premise that shyness stems from a lack of skill rather than a psychological disorder. The book provides specific instructions and exercises to help shy people deal with commonly encountered situations.

Dr. Phillips, professor of speech communication, supplements his case with accounts of the shyness program that he and his associates conduct at Penn State. More than 3,000 young people and adults have learned basic speaking and conversational skills through that program.

"There is nothing wrong with people who are simply quiet because they wish to

be, so long as they can speak effectively when they want to," Dr. Phillips writes in his book. "The world might be a bit better off if most of us talked less and listened more. But shy people cannot compete well socially. They are constantly thwarted in what they seek."

He goes on to note that "shy people lack skill at talking with others. Their problem does not stem from a glandular imbalance, germs, heredity, or a fundamental flaw in their character. They simply have not learned how to talk well enough with others, and they have decided that it is probably not worth the effort to try."

Dr. Phillips says, however, that his experiences in the Penn State shyness program have convinced him that "virtually all shy people who want to can be trained to be effective in communication."

From the Press

Samuel Beckett's *Real Silence*, by Helene L. Baldwin. 171 pages. \$13.75.

Exploring the Christian symbolism throughout a major portion of Beckett's mature work, this book argues that Beckett is a writer of deep religious concern, not in the orthodox sense but in a sense fully as time honored. The path to "direct experience of Absolute or Unconditioned Being" is traced through the classic stages of the quest (detachment, darkness, silence, trance

illumination, and revelation) with examples from both the content and structure of the works. Included in Dr. Baldwin's focus are *Molloy*, *Malone Dies*, *The Unnamable*, *Watt*, *Not I*, *The Lost One*, and *Waiting for Godot*.

It is fitting that Beckett — an author frequently discussed in religious terms (his 1969 Nobel award cited him for signing the *dis tunc* [Judgment Day] of the human race — should finally be read as a religious writer.

Dr. Baldwin, a professor of English at Frostburg State College, received her Ph.D. from Penn State.

Biomedical research

investigators. Research proposed must be related to problems of human health.

Deadline for submission of proposals to 207 Old Main is Sept. 30. Following a preliminary screening by the Colleges or

IRP directors, awards will be recommended by a peer-university committee. Final awards will be announced by Oct. 30 by Dr. Richard C. Cunningham, vice president for research and graduate studies. Faculty desiring further information should call their ACOR deans or IRP directors.

University announces fall heating schedule

University heating systems will be turned on in residence halls on Monday, Sept. 7, as needed, according to Ralph E. Zilly, vice president for business and chairman of the Executive Energy Conservation Committee.

The Ritenour Health Center will have heating systems available from Tuesday, Sept. 1.

In classrooms and administrative buildings, comfort air conditioning will be shut down approximately on Monday, Sept. 14, and heat will be available starting Monday, Sept. 28.

Research areas will have seasonal air conditioning turned off on or about

Monday, Sept. 21, depending upon need. Adjustments can be made if this date creates problems in a research area.

"There could be some minor problems with systems that have been off for the summer months. We request that everyone be patient in the initial period," Mr. Zilly says. "To report any problems, please call the Physical Plant Service Desk at 865-4731."

Should short-range weather forecasts indicate the necessity, adjustments will be made to the announced dates, he noted.

The dates for turning on heat and shutting off air conditioning have been established through a statistical study of 30 years of hourly temperature history compiled by the Department of Meteorology.

approves, schedule evening credit courses at the University. A grant-in-aid is provided to eligible employees for a maximum of 16 credits taken in an academic year through residence instruction, continuing education, or a combination of both.

Detailed information is available in PS 36 and 37 of the Policy Manual and through Employee Benefits Division, 133 Willard Bldg.

University employees also may receive academic and career counseling through Continuing Education. For information on counseling and course schedules, contact the Continuing Education Office, 102 Boucke Bldg., phone 865-3443.

Assistant provosts receive promotions

Rosemary Schraer and Richard P. Chait have been named associate provosts at the University. Both had been assistant provosts.

"The promotions reflect the excellent work and expanded responsibilities of Dr. Schraer and Dr. Chait," Provost Eddy said, in announcing the appointments.

"Both have assumed an increasing number of high-level administrative assignments over the past year."

Dr. Schraer, professor of biochemistry, was associate dean for research in the College of Science before being named assistant provost in 1978.

She joined the University faculty in 1960

Irvin Kochel assumes new responsibilities

Irvin H. Kochel, assistant vice president for administration, has been assigned the duties of the Office of Educational Relations, effective Aug. 24. He succeeds Ann Keiffer Bragg, who will leave the University Aug. 21.

Mr. Kochel, who will retain his present position and duties, will be responsible in his new post for coordinating Penn State's participation in the Regional Planning Councils across the state. He will serve as the University's representative on the Inter-Institutional Coordinating Committee for Region 4, which includes the University Park and DuBois campuses.

He also will maintain liaison with the State Department of Education and assist in communications with other institutions of higher education.

In his present position, Mr. Kochel has principal staff-wide responsibilities as principal staff officer to Dr. Richard E. Grubb, senior vice president for

and had formerly been a research associate for three years at the Albert Einstein Medical Center. She is a Fellow of the American Association for the Advancement of Science and a member of a number of professional and honorary societies.

Dr. Chait came to the University in January, 1980, from Harvard University, where he was educational chairman of the Institute for Educational Management and assistant professor in the Graduate School of Education.

He has held academic and administrative posts at the University of Wisconsin and Stockton State College in New Jersey. In addition to his work in the provost's office, he is affiliate associate professor of education in the Division of Educational Policy Studies.

administration. He is responsible primarily for assisting the divisions under Dr. Grubb's jurisdiction in maintaining external University relations, in planning and conducting programs, and for liaison relationships with other University offices.

Prior to being named to his present position in 1980, Mr. Kochel was director of Behrend College for 26 years, beginning in 1954. He also has held administrative positions at Schuylkill and the former Harrisburg Campus.

Part-time help wanted

Part-time employment at the Penn State Bookstore on campus is available for approximately the first two weeks of Fall Term, starting Aug. 31, for cashier-baggers. Interested spouses of faculty and staff members or other interested persons should contact William A. McVicker at 863-0205.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Aug. 27, 1981. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

PROGRAMMER, MANAGEMENT SERVICES, UNIVERSITY PARK Analyze and design or modify program logic; prepare and interpret general and detailed flow charts and structure charts; code program instructions; prepare test data; test programs and program systems; document programs and program systems; prepare or modify JCL.
